BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS
(ISSN 0006-291X)

Published semimonthly by Academic Press, Inc., 1 East First Street, Duluth, MN 55802
1989: Volumes 158–165. Price: $712.00 U.S.A. and Canada; $879.00 all other countries
1990: Volumes 166–173. Price: $756.00 U.S.A. and Canada; $934.00 all other countries
All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publishers. All correspondence and subscription orders should be addressed to the office of the Publishers at 1 East First Street, Duluth, MN 55802. Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send changes of address to *Biochemical and Biophysical Research Communications*, 1 East First Street, Duluth, MN 55802.

Second class postage paid at Duluth, MN, and at additional mailing offices.

CUMULATIVE TABLE OF CONTENTS FOR VOLUMES 158–165

Volume 158, Number 1, January 16, 1989

AUTHOR INDEX, Volume 158, Number 1, January 16, 1989 iii

The Structure of the Mouse Lymphocyte Pore-Forming Protein Perforin *Byoung S. Kwon, Mark Wakulchik, Chau-Ching Liu, Pedro M. Persechini, Joseph A. Trapani, Asifa K. Haq, Yeong Kim, and John Ding-E Young* 1

Reversibility of the Thermal Transitions of Chloroplast Thylakoid Membranes *William G. Nolan and Leland P. Vickers* 11

Identification of the Clathrin-Binding Domain of Assembly Protein AP-2 *James H. Keen and Kenneth A. Beck* 17

Alterations in *c-abl* Gene Methylation in Cells Transformed by Phagocyte-Generated Oxidants *Sigmund A. Weitzman, Robert M. Lee, and Andre J. Ouellette* 24

Mechanism of Shear-Induced Prostacyclin Production in Endothelial Cells *Avilala Bhagyalakshmi and John A. Frangos* 31

The Insulin-like Growth Factor Binding Protein BP-25 Is Expressed by Human Breast Cancer Cells *D. Yee, R. E. Favoni, R. Lupu, K. J. Cullen, G. S. Lebovic, K. K. Huff, P. D. K. Lee, Y. L. Lee, D. R. Powell, R. B. Dickson, N. Rosen, and M. E. Lippman* 38

Amino Acid Residues Essential for Catalysis by Peptidyl Dipeptidase-4 from *Pseudomonas maltophilia* *Joseph J. Lanzillo, Yamuna Dasarathy, and Barry L. Fanburg* 45

Direct Scavenging of Free Radicals by Captopril, an Angiotensin Converting Enzyme Inhibitor *Debasis Bagchi, Renuka Prasad, and Dipak K. Das* 52

Staurosporine, a Protein Kinase C Inhibitor, Attenuates Ca^{2+}-Dependent Stretch-Induced Vascular Tone *Ismail Laher and John A. Bevan* 58

Chemically Induced Parkinson's Disease II: Intermediates in the Oxidation and Reduction Reactions of the 1-Methyl-4-phenyl-2,3-dihydropyridinium Ion and Its Deprotonated Form *Jorge N. Chacón, Miles R. Chedekel, Edward J. Land, and T. George Truscott* 63

Conformation of High Molecular Weight Kininogen: Effects of Kallikrein and Factor XIa Cleavage *German B. Villanueva, Lester Leung, Harlan Bradford, and Robert W. Colman* 72

Antibody–Antigen Binding in Organic Solvents *Alan J. Russell, Laura J. Trudel, Paul L. Skipper, John D. Groopman, Steven R. Tannenbaum, and Alexander M. Klibanov* 80

Endothelin Action on Vascular Smooth Muscle Involves Inositol Trisphosphate and Calcium Mobilization *Philip A. Marsden, N. Raju Danthuluri, Barry M. Brenner, Barbara J. Ballermann, and Tommy A. Brock* 86

Induction of Histidine Decarboxylase in Rat Basophilic Leukemia Cells by Interferon and Prevention of Its Effect in Coincubation with ADP-Ribosyltransferase Inhibitors *Toshiyuki Kitoh, Masaru Kubota, Tetsuya Takimoto, Yuichi Akiyama, Toshio Heike, and Haruki Mikawa* 94

B_2-Kinin Receptor-like Binding in Rat Glomerular Membranes
J. L. Bascands, C. Pécher, G. Cabos, J. P. Girolami 99

Staurosporine, a Protein Kinase C Inhibitor Interferes with Proliferation of Arterial Smooth Muscle Cells
Hiroaki Matsumoto and Yasuharu Sasaki 105

Distal His→Arg Mutation in Bovine Myoglobin Results in a Ligand Binding Site Similar to the Abnormal β Site of Hemoglobin Zurich (β63 His→Arg)
Hideo Shimada, Aichun Dong, Yuko Matsushima-Hibiya, Yuzuru Ishimura, and Winslow S. Caughey 110

A Reversible Unfolding Reaction of Swine Pepsin: Implications for Pepsinogen's Folding Mechanism *Peter McPhie* 115

Radioimmunoassay for Brain Natriuretic Peptide (BNP)—Detection of BNP in Canine Brain *Hiroshi Itoh, Kazuwa Nakao, Yoshihiko Saito, Takayuki Yamada, Gotaro Shirakami, Masashi Mukoyama, Hiroshi Arai, Kiminori Hosoda, Shin-ichi Suga, Naoto Minamino, Kenji Kangawa, Kisayuki Matsuo, and Hiroo Imura* 120

Induction of c-*fos* by an Antiepidermal Growth Factor Receptor Monoclonal Antibody *Raymond Taetle, Jan Castagnola, and Carol MacLeod* 129

Intrasubstrate Steric Interactions in the Active Site Control the Specificity of the cAMP-Dependent Protein Kinase
Mary Prorok and David S. Lawrence 136

Identification and Tissue Distribution of Messenger RNA for the Growth Hormone Receptor in the Rabbit *Tak S. Tiong, Katy A. Freed, and Adrian C. Herington* 141

Binding of a 1,4-Dihydropyridine Calcium Channel Activator, (−) S Bay K 8644, to Cardiac Preparations *J. Ferrante, E. Luchowski, A. Rutledge, and D. J. Triggle* 149

Suppression of TNF-Stimulated Proliferation of Diploid Fibroblasts and TNF-Induced Cytotoxicity against Transformed Fibroblasts by TGF-β
Ryutaro Kamijo, Ken Takeda, Masao Nagumo, and Kunio Konno 155

Increased Dolichol Content in Glucocorticoid-Sensitive Human T-Cell Leukemia Line Grown in the Presence of Dexamethasone
A. Dutta, B. Parikh, R. Maben, and G. Melnykovych 163

Endothelin Action: Inhibition by a Protein Kinase C Inhibitor and Involvement of Phosphoinositols *Masanori Sugiura, Tadashi Inagami, Gregory M. T. Hare, and Jim A. Johns* 170

Vascular Activity of Polycations and Basic Amino Acids: L-Arginine Does Not Specifically Elicit Endothelium-Dependent Relaxation
George Thomas, Markus Hecker, and Peter W. Ramwell 177

Changes in Mitochondrial Activity Caused by Ammonium Salts and the Protective Effect of Carnitine *M. Bellei, D. Battelli, D. M. Guarriero, U. Muscatello, F. DiLisa, N. Siliprandi, and V. Bobyleva-Guarriero* 181

Involvement of Prostaglandin-Induced Proteins in the Inhibition of Herpes Simplex Virus Replication *Naohiko Yamamoto, Mizanur M. Rahman, Masanori Fukushima, Koichiro Maeno, and Yukihiro Nishiyama* 189

Competitive Interaction between Endothelin and Sarafotoxin: Binding and Phosphoinositides Hydrolysis in Rat Atria and Brain
I. Ambar, Y. Kloog, I. Schvartz, E. Hazum, and M. Sokolovsky 195

Antibody-Mediated Targeting of Differentiation Inducers to Tumor Cells: Inhibition of Colonic Cancer Cell Growth *in Vitro* and *in Vivo:* A Preliminary Note
Michiro Otaka, Anil Singhal, and Sen-itiroh Hakomori 202

The *rho* Gene Product Expressed in *Escherichia coli* Is a Substrate of Botulinum ADP-Ribosyltransferase C3 *Klaus Aktories, Ulrich Braun, Sigrid Rösener, Ingo Just, and Alan Hall* 209

Production and Characterization of Immunoreactive Calcitonin Gene-Related Peptide (CGRP) from a CGRP Receptor-Positive Cloned Osteosarcoma Cell Line (UMR 106.01) *Mone Zaidi, Harish K. Datta, T. J. Chambers, and Iain MacIntyre* 214

Antimitochondrial Autoantibodies of Primary Biliary Cirrhosis as a Novel Probe in the Study of the Biosynthetic Regulation of the Yeast 2-Oxo Acid Dehydrogenase Complexes *Herawati Sudoyo and Sangkot Marzuki* 220

Gelatinases of Murine Metastatic Tumor Cells
Sadako Yamagata, Rie Tanaka, Yoshika Ito, and Satoru Shimizu 228

Endothelin-Sensitive Intracellular Ca^{2+} Store Overlaps with Caffeine-Sensitive One in Rat Aortic Smooth Muscle Cells in Primary Culture
Hisashi Kai, Hideo Kanaide, and Motoomi Nakamura 235

Ontogenetic Expression of Peptidyl-glycine α-Amidating Monooxygenase mRNA in the Rat Pancreas *J-Y. Maltese, P. Giraud, C. Kowalski, L'H. Ouafik, P. Salers, F. Pelen, and C. Oliver* 244

Purification and Characterization of the Autolytic Glycosidase of *Streptococcus pneumoniae* *Pedro García, José L. García, Ernesto García, and Rubens López* 251

Relationship between a 47-kDa Cytoplasmic Membrane Polypeptide and Nitrate Transport in *Anacystis nidulans* *Mirta N. Sivak, Catalina Lara, José M. Romero, Rocío Rodríguez, and Miguel G. Guerrero* 257

Post-translational Modifications of Poliovirus Proteins
Ana Urzainqui and Luis Carrasco 263

Presence of RNA in the Sperm Nucleus *Carlos A. Pessot, Monica Brito, Jaime Figueroa, Ilona I. Concha, Alejandro Yañez, and Luis O. Burzio* 272

Activation of Phospholipase A_2 by Endothelin in Cultured Vascular Smooth Muscle Cells *Thérèse J. Resink, Timothy Scott-Burden, and Fritz R. Bühler* 279

Polyamines Are Sufficient to Drive the Transport of the Precursor of Ornithine Carbamoyltransferase into Rat Liver Mitochondria: Possible Effect on Mitochondrial Membranes *M. J. Marcote, C. González-Bosch, V. J. Miralles, J. Hernández-Yago, and S. Grisolía* 287

Metabolic Responsiveness to Phorbol Ester and Activity of Protein Kinase C in Isolated Hepatocytes from Partially Hepatectomized Rats
M. Houweling, W. J. Vaartjes, and L. M. G. van Golde 294

TPA- and Agonist-Induced Force Development in Myometrium from Pregnant and Nonpregnant Rats *L. Missiaen, Y. Kanmura, J. A. Eggermont, and R. Casteels* 302

Tumor Necrosis Factor Enhances Replication of Human Immunodeficiency Virus (HIV) *in Vitro* *Masahiko Ito, Masanori Baba, Akihiko Sato, Kazuhiro Hirabayashi, Fuminori Tanabe, Shiro Shigeta, and Erik De Clercq* 307

Fate of Asialofetuin Endocytosed by Rat Liver *Robert Wattiaux, Sandra Misquith, Simone Wattiaux-De Coninck, and Franz Dubois* 313

αB Subunit of Lens-Specific Protein α-Crystallin Is Present in Other Ocular and Nonocular Tissues *Suraj P. Bhat and Chandrasekharam N. Nagineni* 319

Endothelial Thromboxane Receptors: Biochemical Characterization and Functional Implications *Cheng-Po Sung, Anthony J. Arleth, and Barry A. Berkowitz* 326

Analysis of the Structure and Expression of the c-*myc* Oncogene in Cervical Tumor and in Cervical Tumor-Derived Cell Lines *Kong-Bung Choo, Kowit-Yu Chong, Huar-Fen Chou, Lip-Nyin Liew, and Chen-Chyi Liou* 334

Transthyretin Microheterogeneity and Thyroxine Binding Are Influenced by Nonamino Acid Components and Glutathione Constituents *Tom M. Pettersson, Anders Carlström, Anders Ehrenberg, and Hans Jörnvall* 341

A Novel Citrulline-Forming Enzyme Implicated in the Formation of Nitric Oxide by Vascular Endothelial Cells *Richard M. J. Palmer and Salvador Moncada* 348

Volume 158, Number 2, January 31, 1989

AUTHOR INDEX, Volume 158, Number 2, January 31, 1989 iii

Increased Levels of Platelet-Activating Factor in Blood following Intestinal Ischemia in the Dog *János Filep, Ferenc Hermán, Pierre Braquet, and Tibor Mózes* 353

Brain Natriuretic Peptide Is a Novel Cardiac Hormone *Yoshihiko Saito, Kazuwa Nakao, Hiroshi Itoh, Takayuki Yamada, Masashi Mukoyama, Hiroshi Arai, Kiminori Hosoda, Gotaro Shirakami, Shin-ichi Suga, Naoto Minamino, Kenji Kangawa, Hisayuki Matsuo, and Hiroo Imura* 360

Tissue Distribution and Characterization of Prorenin-Converting Enzyme in Mouse *Kazuhisa Nakayama, Won-Sin Kim, Kiyotaka Hatsuzawa, Kiyomi Hashiba, and Kazuo Murakami* 369

Tissue-Specific Expression of a Novel GTP-Binding Protein (*smg* p25A) mRNA and Its Increase by Nerve Growth Factor and Cyclic AMP in Rat Pheochromocytoma PC-12 Cells *Kimihiko Sano, Akira Kikuchi, Yasushi Matsui, Yutaka Teranishi, and Yoshimi Takai* 377

A Time-Resolved Fluorescence Anisotropy Study of Bilayer Membranes Containing α-Tocopherol *Roger H. Bisby and David J. S. Birch* 386

A Yeast Strain with Mutated β-Subunits of Mitochondrial ATPase–ATP Synthase: High Azide and Bicarbonate Sensitivity of the ATPase Activity *J. M. Jault, A. Di Pietro, P. Falson, D. C. Gautheron, M. Boutry, and A. Goffeau* 392

Effect of Retinol and Retinoic Acid on Testosterone Production by Rat Leydig Cells in Primary Culture *Lala R. Chaudhary, James C. Hutson, and Douglas M. Stocco* 400

Estradiol Stimulates *in Vitro* the Secretion of Insulin-like Growth Factors by the Clonal Osteoblastic Cell Line, UMR106 *T. K. Gray, S. Mohan, T. A. Linkhart, and D. J. Baylink* 407

Estimation of the Lipophilicity of Anti-HIV Nucleoside Analogs by Determination of the Partition Coefficient and Retention Time on a Lichrospher 60 RP-8 HPLC Column *J. Balzarini, M. Cools, and E. De Clercq* 413

Flanking AT-Rich Sequences May Lower the Activation Energy of Cruciform Extrusion in Supercoiled DNA *Yue Wang and Walter Sauerbier* 423

Inhibition of Calpain in Intact Platelets by the Thiol Protease Inhibitor E-64d *Eleanor B. McGowan, Edward Becker, and Thomas C. Detwiler* 432

The Molluscicidal Activity of *Phytolacca dodecandra*. I. Location of the Activating Esterase *R. M. Parkhurst, B. M. Mthupha, Y-S. Liang, J. I. Bruce, J. D. H. Lambert, T. L. Collier, J. W. ApSimon, L. Wolde-Yohannes, G. E. Heath, W. O. Jones, J. K. Stobaeus, and L. P. Makhubu* 436

Activation of Platelet Phospholipase C by Fluoride Is Inhibited by Elevation of Cyclic AMP *Eduardo R. Lazarowski and Eduardo G. Lapetina* 440

Rabbit Liver Alcohol Dehydrogenase: Isolation and Characterization of Class I Isozymes *W. M. Keung and P. K. Yip* 445

Molecular Analysis of Homologous Recombination Catalyzed by Human Nuclear Extract: Fidelity and DNase Protection *B. Lopez and J. Coppey* 454

Proton NMR Study of the Influence on Iron Oxidation/Ligation/Spin State on the Heme Orientational Preference in Myoglobin *Gerd N. La Mar, Wanda S. Smith, Nicolette L. Davis, David L. Budd, and Mark J. Levy* 462

Diferric Transferrin Reductase in *Plasmodium falciparum*-Infected Erythrocytes *M. Fry* 469

Gas Chromatographic–Mass Spectrometric Analysis of Hexose Monophosphate Shunt Activity in Cultured Cells *Steven L. Mitchell, Brian D. Ross, Thomas Krick, and Michael Garwood* 474

Age-Related Changes in the Iron Spin State of Testosterone-Binding Rat Liver Microsomal Cytochromes P450 *Fred K. Friedman, Richard C. Robinson, and Joseph Rifkind* 480

Calmodulin Activity in Whole Body and Fat Body Tissue Extracts of *Heliothis virescens* Larvae *Timothy D. Lockey and Donald D. Ourth* 485

Amino Acid Sequence of the Bacterioferritin (Cytochrome b_1) of *Escherichia coli*-K12 *Simon C. Andrews, John M. A. Smith, John R. Guest, and Pauline M. Harrison* 489

Amino Acid Substitutions in the Human Glutathione *S*-Transferases Confer Different Specificities in the Prostaglandin Endoperoxide Conversion Pathway *John R. Burgess, Nien-Wen I. Chow, C. Channa Reddy, and Chen-Pei D. Tu* 497

S-Mercuric-N-dansylcysteine Labels the Free Sulfhydryl Groups of Human Serum Cholinesterase *George Tomlinson and Evelyn M. Kinsch* 503

Cadmium Stimulates Prostaglandin E_2 Production and Bone Resorption in Cultured Fetal Mouse Calvaria *Yoshiharu Suzuki, Ikuo Morita, Yasuhiro Yamane, and Sei-itsu Murota* 508

Determination of the Primary Structure of Paim II, an α-Amylase Inhibitor from *Streptomyces coruchorushii*, by High-Performance Tandem Mass Spectrometry *Satoko Akashi, Kazuo Hirayama, Asao Murai, Motoo Arai, and Sawao Murao* 514

Polyamine Levels during *Xenopus laevis* Oogenesis: A Role in Oocyte Competence to Meiotic Resumption *H. Beverley Osborne, Odile Mulner-Lorillon, Jean Marot, and Robert Belle* 520

Tyrosine Protein Kinase Activity of the EGF Receptor Is Required to Induce Activation of Receptor-Operated Calcium Channels *Yves Chapron, Claude Cochet. Serge Crouzy, Thierry Jullien, Michelle Keramidas, and Jean Verdetti* 527

Anomalous Increase of Ca^{2+} Current by High Concentration K^+ Stimulation in Whole Cell Clamped GH_3 Cells *Nobuyuki Suzuki, Tohru Yoshioka, Yukio Okano, Yoshinori Nozawa, and Masaakira Kano* 534

Functional Expression of Chicken Calmodulin in Yeast *Yoshikazu Ohya and Yasuhiro Anraku* 541

Autodegradation of Rat Liver Proteasomes (Large Multicatalytic Proteinase Complexes) *Keiji Tanaka and Akira Ichihara* 548

Differential Polyadenylation of the Mutant Vasopressin mRNA during Development of Brattleboro Rats *Susanne Fehr, Hartwig Schmale, and Dietmar Richter* 555

Evidence for a Membrane-Associated GTP-Binding Protein in *Stigmatella aurantiaca*, a Prokaryotic Cell *B. Dérijard, M. Ben Aïssa, B. Lubochinsky, and Y. Cenatiempo* 562

Molecular Cloning and Nucleotide Sequence of Human Pancreatic Prechymotrypsinogen cDNA *Naohiro Tomita, Yoshitaka Izumoto, Akira Horii, Sadayuki Doi, Hideoki Yokouchi, Michio Ogawa, Takesada Mori, and Kenichi Matsubara* 569

Multicopy Introduction and High-Level Expression of Interleukin-3 Genes by Retroviral Vector Superinfection *Terumasa Tsuchiya, Arinobu Tojo, and Masabumi Shibuya* 576

Tumor-Promoting Phorbol Esters Stimulate Bovine Cerebral Cortex Capillary Endothelial Cell Growth *in Vitro* *I. Daviet, J. M. Herbert, and J. P. Maffrand* 584

Enhanced Protein Phosphorylation, IL-2 Receptor Expression, and IL-2 Production Precede Cellular Proliferation in Lymphocytes Oxidized by Periodic Acid *George I. Malinin, Francis J. Hornicek, and Theodore I. Malinin* 590

Expression of an Enzymatically Active Murine Retroviral Reverse Transcriptase in Human Cells *Olivier Jean-Jean, Caroline Moyret, Dominique Bernard, Anne-Marie de Recondo, and Jean-Michel Rossignol* 595

Mechanism of Activation of Particulate Guanylate Cyclase by Atrial Natriuretic Peptide as Deduced from Radiation Inactivation Analysis
Shunji Ohuchi, Hiromi Hagiwara, Masami Ishido, Tetsuro Fujita, Tamikazu Kume, Isao Ishigaki, and Shigehisa Hirose 603

Secondary Structure and Orientation of a Chemically Synthesized Mitochondrial Signal Sequence in Phospholipid Bilayers
Erik Goormaghtigh, Isabelle Martin, Michel Vandenbranden, Robert Brasseur, and Jean-Marie Ruysschaert 610

Affinity Labeling of Cofactor-Binding Region of Human Placental Estradiol 17β-Dehydrogenase by Periodate-Oxidized NADP$^+$ (*o*-NADP$^+$)
Hiroshi Inano and Shinobu Kurihara 617

ERRATUM
Volume 157, Number 1, November 30, 1988: John B. Hibbs, Jr., Read R. Taintor, Zdenek Vavrin, and Elliot M. Rachlin, "Nitric Oxide: A Cytotoxic Activated Macrophage Effector Molecule," pp. 87–94 624

Volume 158, Number 3, February 15, 1989

AUTHOR INDEX, Volume 158, Number 3, February 15, 1989 iii

Pharmacological Modulation of the Bronchopulmonary Action of the Vasoactive Peptide, Endothelin, Administered by Aerosol in the Guinea Pig
Vincent Lagente, Pierre Etienne Chabrier, Jean-Michel Mencia-Huerta, and Pierre Braquet 625

Isolation of a Putative Collagen-like Gene from the Sea Urchin *Paracentrotus lividus* *Biagio Saitta, Giovanna Buttice, and Roberto Gambino* 633

Heterobifunctional Cross-Linking of a Monoclonal Antibody with 2-Methyl-*N*^{1}-benzenesulfonyl-*N*^{4}-bromoacetylquinonediimide
Frederick A. Liberatore, Robert D. Comeau, and Richard G. Lawton 640

The Amino Acid Sequence of the Chromosomal Protein HMG-Y, Its Relation to HMG-1, and Possible Domains for the Preferential Binding of the Proteins to Stretches of A–T Base Pairs *Jan Roger Karlson, Einar Mørk, Jostein Holtlund, Søren G. Laland, and Terje Lund* 646

Phenobarbital Decreases Hepatocyte EGF Receptor Expression Independent of Protein Kinase C Activation *Sharon A. Meyer* 652

Production of Interleukin 6 and Its Relation to the Macrophage Differentiation of Mouse Myeloid Cells (M1) Treated with Differentiation-Inducing Factor and 1α,25-Dihydroxyvitamin D_3 *Chisato Miyaura, Cheng He Jin, Yuri Yamaguchi, Mikio Tomida, Motoo Hozumi, Tadashi Matsuda, Toshio Hirano, Tadamitsu Kishimoto, and Tatsuo Suda* 660

Tissue Selectivity of the Cholesterol-Lowering Agents Lovastatin, Simvastatin, and Pravastatin in Rats *in Vivo* *John I. Germershausen, Vincent M. Hunt, Richard G. Bostedor, Philip J. Bailey, John D. Karkas, and Alfred W. Alberts* 667

Complete Characterization of the Gene Coding for the Epstein–Barr Virus Major Membrane Antigen gp 220/340 and Selective Expression of a Secreted Form of gp 220 *E. Tosoni-Pittoni, I. Joab, J. C. Nicolas, and M. Perricaudet* 676

Interactions of Factors Bound at Two Different Sites in the 5′-Upstream Region of the Adenovirus 12 E1A Gene *Yoshinobu Nakanishi, Satoshi Koikeda, Hitomi Shibata, and Yukito Masamune* 685

Structure of Mouse Fatty Acid Synthase mRNA Identification of the Two NADPH Binding Sites *Joseph D. Paulauskis and Hei Sook Sul* 690

Interactions between Structure Transitions in a Torsionally Constrained DNA *Yue Wang, Walter Sauerbier, and Martin Blumenfeld* 696

Internalization and Degradation of Insulin by a Human Insulin Receptor-v-*ros* Hybrid in Chinese Hamster Ovary Cells *Joji Hari, Koichi Yokono, Kazuyoshi Yonezawa, Richard A. Roth, and Shigeaki Baba* 705

Mastoparan, a Wasp Venom, Stimulates Insulin Release by Pancreatic Islets through Pertussis Toxin Sensitive GTP-Binding Protein *Nakako Yokokawa, Mitsuhisa Komatsu, Teiji Takeda, Toru Aizawa, and Takashi Yamada* 712

Point Mutations at Threonine-301 Modify Substrate Specificity of Rabbit Liver Microsomal Cytochromes P450 [Laurate (ω-1)-Hydroxylase and Testosterone 16α-Hydroxylase] *Yoshio Imai and Masahiko Nakamura* 717

Defect of Calmodulin-Binding Protein in Expression of Interleukin-1β Gene by LPS-Nonresponder C3H/HeJ Mouse Macrophages *Yasuhiko Terada, Hiroto Shinomiya, and Masayasu Nakano* 723

Docosahexaenoic Acid Is Neither Synthesized Nor Retroconverted by the Normal and Tumor Mouse Mammary Epithelial Cells in Primary Culture *Gautam K. Bandyopadhyay, Katherine E. Mckenzie, Walter Imagawa, and Satyabrata Nandi* 730

Supercoil-Induced Z-DNA Formation within 5′-End of Chicken myb Proto-Oncogene *Jaromir Vlach, Michal Dvorak, Petr Bartunek, Vladimir Pecenka, Miloslav Travnicek, and Jaroslav Sponar* 737

Binding to GDP-Agarose Identifies a Novel 60-kDA Substrate for the Insulin Receptor Tyrosyl Kinase in Mouse NIH-3T3 Cells Expressing High Concentrations of the Human Insulin Receptor *Richard O'Brien, Miles D. Houslay, Nicholas P. J. Brindle, Graeme Milligan, Jonathan Whittaker, and Kenneth Siddle* 743

Abnormality in DNA–Protein Binding in Ataxia Telangiectasia Nuclear Extracts *Rahmah Mohamed and Martin F. Lavin* 749

Zero-Field Mössbauer Studies of Diferric Human Transferrin *Ferenc Kilár, Agneta Gustavsson Seidel, and Lennart Häggström* 755

Insulin Induces Activation of Kinase FA in Membranes and Thereby Promotes Activation of ATP·Mg-Dependent Phosphatase in Adipocytes *Shiaw-Der Yang, Low-Tone Ho, Tung-Jing Fung, and Jau-Song Yu* 762

An Investigation on Lipoperoxidation Mechanisms in Boar Spermatozoa *V. Comaschi, L. Lindner, G. Farruggia, N. Gesmundo, L. Colombi, and L. Masotti* 769

Isolation of the mRNA Encoding Rat Liver Catechol-O-methyltransferase *Mark H. Grossman, C. R. Creveling, and Xandra O. Breakefield* 776

Molecular Cloning of the Human Transmembrane Secretory Component (Poly-Ig Receptor) and Its mRNA Expression in Human Tissues
Peter Krajči, Rigmor Solberg, Mårten Sandberg, Ole Øyen, Tore Jahnsen, and Per Brandtzaeg 783

Association of Endogenous Synenkephalin Containing Peptides with Intracellular Membranes of Bovine Adrenal Medulla
Ariel Ase, Osvaldo Vindrola, Raquel Aloyz, María Inés, Rodriguez Vida, Samuel Finkielman, and Victor Nahmod 790

Inhibitory Action of Isovaleryl-L-carnitine on Proteolysis in Perfused Rat Liver
G. Miotto, R. Venerando, and N. Siliprandi 797

Serine and Tyrosine Phosphorylation of 28- and 35-kDa Proteins of Human T Lymphocytes Stimulated by Streptococcal M Protein
Malak Kotb and Edwin H. Beachey 803

Ability of Repetitive Ca^{2+} Spikes to Stimulate Prolactin Release Is Frequency Dependent *Greg J. Law, Jonathan A. Pachter, and Priscilla S. Dannies* 811

Activation of the Bone-Derived Latent TGF β Complex by Isolated Osteoclasts
Richard O. C. Oreffo, Gregory R. Mundy, Saeid M. Seyedin, and Lynda F. Bonewald 817

Guanosine 3′:5′ Cyclic Monophosphate and Activators of Guanylate Cyclase Inhibit Secretagogue-Induced Corticotropin Release by Rat Anterior Pituitary Cells *Ference A. Antoni and Govindan Dayanithi* 824

Inhibition of Inflammatory Proteinase, Medullasin, by α_2-Macroglobulin and Ovomacroglobulin *Atsushi Ikai, Masae Nakashima, and Yousuke Aoki* 831

Inhibition of Neuroglandular Antigen (NGA) Glycosylation by Phorbol Ester in Human Melanoma Cells *Valter Feyles, Walter T. Dixon, Lydia K. J. Sikora, and L. Martin Jerry* 837

Bioactivity of Synthetic C-Terminal Fragment of Rat Pancreastatin on Endocrine Pancreas *Akihiro Funakoshi, Kyoko Miyasaka, Kenichi Kitani, Hirokazu Tamamura, Susumu Funakoshi, and Haruaki Yajima* 844

Preferential Cleavage of Amino- and Carboxyl-Terminal Oligopeptides from Vasoactive Intestinal Polypeptide by Human Recombinant Enkephalinase (Neutral Endopeptidase, EC 3.4.24.11.)
Edward J. Goetzl, Sunil P. Sreedharan, Christoph W. Turck, Robert Bridenbaugh, and Bernard Malfroy 850

The Sequence of Human Parathymosin Deduced from a Cloned Human Kidney cDNA *M. Clinton, M. Frangou-Lazaridis, C. Panneerselvam, and B. L. Horecker* 855

Secretagogue-Induced Calcium Mobilization in Single Pancreatic Acinar Cells
Edward L. Stuenkel, Yasuhiro Tsunoda, John A. Williams 863

Metabolite Transport in Rat Kidney Mitochondria: Ornithine/Phosphate Translocator *Salvatore Passarella, Anna Atlante, and Ernesto Quagliariello* 870

Endothelin-Mediated Stimulation of DNA Synthesis in Vascular Smooth Muscle Cells *Toshio Nakaki, Misa Nakayama, Satoshi Yamamoto, and Ryuichi Kato* 880

Activation of Human Neutrophil NADPH-Oxidase *in Vitro* by the Catalytic Fragment of Protein Kinase-C *Alfred I. Tauber, Jane A. Cox, John T. Curnutte, Pamela M. Carrol, Hideki Nakakuma, Barbour Warren, Hamilton Gilbert, and Peter M. Blumberg* 884

Aggregation of Calcium Ionophore (A23187) in Phospholipid Vesicles *S. V. Balasubramanian and K. R. K. Easwaran* 891

The Estrogen-Responsive 110K and 74K Rat Uterine Secretory Proteins Are Structurally Related to Complement Component C3 *Paola C. Kuivanen, Rhodessa B. Capulong, Richard N. Harkins, Eugene R. DeSombre, and Barbara E. Nowakowski* 898

Structure and Expression of the Alternatively-Spliced Forms of mRNA for the Mouse Homolog of Alzheimer's Disese Amyloid β Protein Precursor *Takeshi Yamada, Hiroyuki Sasaki, Katsumi Dohura, Ikuo Goto, and Yoshiyuki Sakaki* 906

A Role of Carbohydrate–Carbohydrate Interaction in the Process of Specific Cell Recognition during Embryogenesis and Organogenesis: A Preliminary Note *Ivan Eggens, Bruce A. Fenderson, Tatsushi Toyokuni, and Sen-itiroh Hakomori* 913

Identification of α_2-Adrenergic Receptor Sites in Human Retinoblastoma (Y-79) and Neuroblastoma (SH-SY5Y) Cells *Syed M. I. Kazmi and Ram K. Mishra* 921

Mouse Thymoma Cell Line Expresses a Gluconeogenic Enzyme, Fructose 1,6-Bisphosphatase *Hideo Mizunuma and Yohtalou Tashima* 929

Atrial Natriuretic Factor (ANF) Increases Urinary Protein Excretion in Patients with Essential Hypertension: A Possible Role of ANF for Renal Handling of Protein *K. Suenaga, K. Mizuno, S. Niimura, K. Mori, M. Sato, M. Tani, R. Yabe, Y. Yatabe, and S. Fukuchi* 936

Inhibition of HIV-1 Proviral DNA Synthesis and RNA Accumulation by Mismatched dsRNA *David C. Montefiori, Michael G. Pellegrino, W. Edward Robinson, Jr., Karen Engle, Maggie Field, William M. Mitchell, and David H. Gillespie* 943

Parathyroid Hormone Inhibition of Na^+/Phosphate Cotransport in OK Cells: Generation of Second Messengers in the Regulatory Cascade *Gary Quamme, Josef Pfeilschifter, and Heini Murer* 951

Expression of Thromboxane A_2 Receptor in Cultured Human Erythroleukemia Cells and Its Induction by 12-O-Tetradecanoylphorbol-13-acetate *Masatoshi Nakajima, Masamitsu Yamamoto, Fumitaka Ushikubi, Minoru Okuma, Motohatsu Fujiwara, and Shuh Narumiya* 958

Enhanced Activation of the Respiratory Burst Oxidase in Neutrophils from Hypertensive Patients *S. Pontremoli, F. Salamino, B. Sparatore, R. De Tullio, M. Patrone, A. Tizianello, and E. Melloni* 966

Effect of pH on Giant Cell Formation Induced by Human Immunodeficiency Virus (HIV) *Hironori Yoshiyama, Tadashi Kajii, Naoki Yamamoto, and Nobuyuki Kobayashi* 973

Endothelial Cell-Derived High Molecular Weight von Willebrand Factor Is Converted into the Plasma Multimer Pattern by Granulocyte Proteases *Han-Mou Tsai, Ronald L. Nagel, Victor B. Hatcher, and Ira I. Sussman* 980

Magnesium-Dependent Nonspecific Binding of [$_{125}$I]Prolactin to Myelinated Tracts in the Rat Central Nervous System
Luz P. Mangurian, Raymond J. Walsh, and Barry I. Posner 986

The Nucleotide Sequence of a Full Length cDNA Clone Encoding Rat Liver Urate Oxidase *Keith Alvares, Mohan R. Nemali, P. Gopal Reddy, Xuedong Wang, M. Sambasiva Rao, and Janardan K. Reddy* 991

Analysis of the Size of the Carcinoembryonic Antigen (CEA) Gene Family: Isolation and Sequencing of *N*-Terminal Domain Exons
John A. Thompson, Eva-Maria Mauch, Fun-Shan Chen, Yuji Hinoda, Heinrich Schrewe, Barbara Berling, Sabine Barnert, Sabine von Kleist, John E. Shively, and Wolfgang Zimmermann 996

Na–Ca Exchanger as a Calcium Influx Pathway in Adrenal Glomerulosa Cells
Itaru Kojima and Etsuro Ogata 1005

Modulation of Mitochondrial F_0F_1 Catalysis by Boundary and Bulk Phase Phospholipids *Federica Dabbeni-Sala, Nora Vázquez-Laslop, Antonella Fachinetti, Silvia Devars, and Georges Dreyfus* 1013

The Role of Phospholipase A_2 in Microsomal Lipid Peroxidation Induced with *t*-Butyl Hydroperoxide
Stephen M. Borowitz and Catherine Montgomery 1021

Phosphorylation of Both 47- and 49-kDa Proteins Accompanies Superoxide Release by Neutrophils *John A. Badwey, Paul G. Heyworth, and Manfred L. Karnovsky* 1029

In Vitro and *in Vivo* Antagonists against Parathyroid Hormone-Related Protein
Koichi Nagasaki, Ken Yamaguchi, Yoshio Miyake, Chiaki Hayashi, Satoshi Honda, Ken-ichi Urakami, Keizaburo Miki, Satoshi Kimura, Toru Watanabe, and Kaoru Abe 1036

Effect of Poly-basic Amino Acids on the Phosphorylation of Various Substrate Proteins by Cytosolic Protein–Tyrosine Kinase from Porcine Spleen
Keiko Sakai, Momoyo Asahi, Tomoko Kobayashi, Yukie Tanaka, Tetsuya Inazu, Shun-ichi Nakamura, and Hirohei Yamamura 1043

Characteristic Mode of Action of Gangliosides in Selective Modulation of CD4 on Human T Lymphocytes *Tatsuya Kawaguchi, Hideki Nakakuma, Tadashi Kagimoto, Kenji Shirono, Kentaro Horikawa, Michihiro Hidaka, Masao Iwamori, Yoshitaka Nagai, and Kiyoshi Takatsuki* 1050

Stimulation of Insulin Secretion by Transforming Growth Factor-β
Yasuo Totsuka, Mari Tabuchi, Itaru Kojima, Yuzuru Eto, Hiroshiro Shibai, and Etsuro Ogata 1060

Steroid Hormones Inhibit Binding of *Vinca* Alkaloid to Multidrug Resistance Related *P*-Glycoprotein
Mikihiko Naito, Keisuke Yusa, and Takashi Tsuruo 1066

ERRATUM

Volume 156, Number 1, October 14, 1988: Nigel J. Pyne and Miles D. Houslay, "An Insulin Mediator Preparation Serves to Stimulate the Cyclic GMP-Activated Cyclic AMP Phosphodiesterase Rather than Other Purified Insulin-Activated Cyclic AMP Phosphodiesterases," pp. 290–296 1072

The Glucose Polymer of PC12 Cells Is Susceptible to Trypsinization
Maija-Liisa Rasilo and Tatsuya Yamagata 1

Substoichiometric Concentrations of ATP-G-Actin Are Required to Anneal Actin Polymerized by Calcium Ions *Enrico Grazi, Giorgio Trombetta, Luciana Rizzieri, and Massimo Guidoboni* 7

Endothelin Is a Positive Inotropic Agent in Human and Rat Heart *in Vitro*
Christine Schomisch Moravec, Elwood E. Reynolds, Robert W. Stewart, and Meredith Bond 14

Cloning and Sequence Analysis of a cDNA Encoding the Rieske Iron–Sulfur Protein of Rat Mitochondrial Cytochrome *bc*$_1$ Complex
Morimitsu Nishikimi, Yoshitaka Hosokawa, Haruo Toda, Hiroshi Suzuki, and Takayuki Ozawa 19

Influence of Cyclic Nucleotides on the Processing of the Carbohydrate Part of the α-Subunit of Human Choriogonadotropin by First Trimester Human Placenta Tissue *Gerhard Hilf and Wolfgang E. Merz* 26

Electro-Insertion of Xeno-glycophorin into the Red Blood Cell Membrane
Youssef Mouneimne, Pierre-François Tosi, Yair Gazitt, and Claude Nicolau 34

In Situ Characterization of Guanine Nucleotide-Binding Properties of Erythrocyte Membranes *Gianluca Damonte, Alessandro Morelli, Maurizio Piu, Patrizia Longone, and Antonio De Flora* 41

Chronic Nicotine Use Blocks Haloperidol-Induced Increase in Striatal D$_2$-Dopamine Receptor Density *Chandan Prasad, Sally A. Spahn, and Hiromasa Ikegami* 48

Phospholipase A2 Inhibitory Activity in Thymocytes of Dexamethasone-Treated Mice—Possible Implication of Lipocortins *Mourad Errasfa, Bernard Rothhut, and Françoise Russo-Marie* 53

The Antiviral Activity of 9-β-D-Arabinofuranosyladenine Is Enhanced by the 2′,3′-Dideoxyriboside, the 2′,3′-Didehydro-2′,3′-dideoxyriboside, and the 3′-Azido- 2′,3′-dideoxyriboside of 2,6-Diaminopurine
Jan Balzarini and Erik De Clercq 61

Inhibition of Osteoclastic Acid Phosphatase Abolishes Bone Resorption
Mone Zaidi, Baljit Moonga, Donald W. Moss, and Iain MacIntyre 68

Evidence for a Latent Form of Protein Phosphatase 1 Associated with Cardiac Myofibrils *Keith K. Schlender, Wei Wang, and Susan E. Wilson* 72

Mass Determination of Receptor-Mediated Accumulation of Phosphatidate and Diglycerides in Human Neutrophils Measured by Coomassie Blue Staining and Densitometry *David E. Agwu, Linda C. McPhail, Robert L. Wykle, and Charles E. McCall* 79

Chemical Synthesis and Expression of the HIV-1 Protease Gene in *Escherichia coli* *John M. Louis, Ewald M. Wondrak, Terry D. Copeland, C. A. Dale Smith, Peter T. Mora, and Stephen Oroszlan* 87
Characterization of the Prostate-Specific Antigen Gene: A Novel Human Kallikrein-like Gene *P. H. J. Riegman, R. J. Vlietstra, J. A. G. M. van der Korput, J. C. Romijn, and J. Trapman* 95
Mutagenesis of Human Granulocyte Colony Stimulating Factor *Tetsuro Kuga, Yoshinori Komatsu, Motoo Yamasaki, Susumu Sekine, Hiromasa Miyaji, Tatsunari Nishi, Moriyuki Sato, Yoshiharu Yokoo, Makoto Asano, Masami Okabe, Makoto Morimoto, and Seiga Itoh* 103
α-Fetoprotein Gene Expression in Human Lymphoblastoid Cells and in PHA-Stimulated Normal T-Lymphocytes *Ch. Lafarge-Frayssinet, J. M. Torres, M. Frain, and J. Uriel* 112
Calcium Channel Binding in Nerves and Muscle of Canine Small Intestine *Sultan Ahmad, Jarmila Rausa, Elliott Jang, and E. E. Daniel* 119
Regulation of Epidermal Growth Factor-Receptor by Estrogen and Antiestrogen in the Human Breast Cancer Cell Line MCF-7 *Y. Berthois, X. F. Dong, and P. M. Martin* 126
Role of Cardiolipin in the Functioning of Mitochondrial L-Glycerol-3-phosphate Dehydrogenase *Zs. Beleznai and V. Jancsik* 132
The cDNA-Derived Amino Acid Sequence of Chick Heat Shock Protein M_r 90,000 (HSP 90) Reveals a "DNA-like" Structure, Potential Site of Interaction with Steroid Receptors *Nadine Binart, Beatrice Chambraud, Bruno Dumas, David A. Rowlands, Claire Bigogne, Jonathan M. Levin, Jean Garnier, Etienne-Emile Baulieu, and Maria-Grazia Catelli* 140
Atrial Natriuretic Factor Inhibits Angiotensin-Induced Aldosterone Secretion: Not through cGMP or Interference with Phospholipase C *Arunabha Ganguly, Shirley Chiou, Leigh A. West, and John S. Davis* 148
cDNA-Cloning, Sequencing, and Expression in Glucocorticoid-Stimulated Quiescent Swiss 3T3 Fibroblasts of Mouse Lipocortin I *Christine Philipps, Stefan Rose-John, Gabriele Rincke, Gerhard Fürstenberger, and Friedrich Marks* 155
Covalent Binding of Acetaldehyde to Type III Collagen *Arja Jukkola and Onni Niemelä* 163
Time Resolved Analysis of Tubulin Phosphorylation during Platelet Activation *Susan Berry, Doloretta D. Dawicki, and Manfred Steiner* 170
Preliminary Purification and Characterization Studies of a Low-Molecular-Weight, High Affinity Cytosolic Lead-Binding Protein in Rat Brain *George DuVal and Bruce A. Fowler* 177
The Calmodulin-Stimulated ATPase of Maize Coleoptiles Forms a Phosphorylated Intermediate *Sally-A. Briars and David E. Evans* 185
Local Stimulation of Prostaglandin Production by Corticotropin-Releasing Hormone in Human Fetal Membranes and Placenta *S. A. Jones and J. R. G. Challis* 192
Distinct Binding Sites for Ins(1,4,5)P_3 and Ins(1,3,4,5)P_4 in Bovine Parathyroid Glands *Peter Enyedi, Edward Brown, and Gordon Williams* 200

Effect of Guanine Nucleotides on Phospholipase C Activity in Permeabilized Pituitary Cells: Possible Involvement of an Inhibitory GTP-Binding Protein *Rona Limor, Iris Schvartz, Eli Hazum, Dan Ayalon, and Zvi Naor* 209

Rapid Postnatal Changes in F_1-ATPase Proteins and in the Uncoupling Protein in Brown Adipose Tissue Mitochondria of the Newborn Rat *Ana M. Luis and José M. Cuezva* 216

Glucose-Stimulated Efflux of Fura-2 in Pancreatic β-Cells Is Prevented by Probenecid *Per Arkhammar, Thomas Nilsson, and Per-Olof Berggren* 223

Mitochondria and Microsomal Membranes Have a Free Radical Reductase Activity That Prevents Chromanoxyl Radical Accumulation *Lester Packer, John J. Maguire, Rolf J. Mehlhorn, Elena Serbinova, and Valerian E. Kagan* 229

Purification and Characterization of a Calcium Binding Protein with "Synexin-like" Activity from Human Blood Platelets *Quingqi Zhuang and Alfred Stracher* 236

Selective Antimalarial Activity of Tetrandrine against Chloroquine Resistant *Plasmodium falciparum* *Zuguang Ye and Knox Van Dyke* 242

Cloning and Sequencing of the cDNA for Human Monocyte Chemotactic and Activating Factor (MCAF) *Yasuji Furutani, Hideki Nomura, Mitsue Notake, Yoshihiro Oyamada, Toshikazu Fukui, Masaaki Yamada, Christian G. Larsen, Joost J. Oppenheim, and Kouji Matsushima* 249

Identification and Expression of the *Actinobacillus actinomycetemcomitans* Leukotoxin Gene *Edward T. Lally, Irene R. Kieba, Donald R. Demuth, Joel Rosenbloom, Ellis E. Golub, Norton S. Taichman, and Carolyn W. Gibson* 256

Relationship between Methylation Status and Expression of an Epstein–Barr Virus (EBV) Capsid Antigen Gene *Gerald E. Fronko, Walter K. Long, Brian Wu, Timothy Papadopoulos, and Earl E. Henderson* 263

The Primary Role of the P_1' Residue (SER^{359}) of α-1-Proteinase Inhibitor *Nancy Matheson, Ian Bathurst, and James Travis* 271

Differential Calmodulin Gene Expression in Fetal, Adult, and Neoplastic Tissues of Rodents *J. P. MacManus, M. F. Gillen, B. Korczak, and H. Nojima* 278

A Human Cytochrome P450 Is Recognized by Anti-liver/Kidney Microsome Antibodies in Autoimmune Chronic Hepatitis *Liliane Kiffel, Jacqueline Loeper, Jean Claude Homberg, and Jean Paul Leroux* 283

Distribution of Basic Fibroblast Growth Factor Binding Sites in Various Tissue Membrane Preparations from Adult Guinea Pig *Dominique Ledoux, Agnès Méreau, Marie Claude Dauchel, Denis Barritault, and José Courty* 290

Characterization of the 5′-End Region and the First Two Exons of the β-Protein Precursor Gene *Giuseppe La Fauci, Debomoy K. Lahiri, Stephen R. J. Salton, and Nikolaos K. Robakis* 297

Characterization of *KEX2*-Encoded Endopeptidase from Yeast *Saccharomyces cerevisiae* *Kensaku Mizuno, Tomoko Nakamura, Takehiro Ohshima, Shoji Tanaka, and Hisayuki Matsuo* 305

Alternative Splicing of Human Insulin Receptor Messenger RNA *Susumu Seino and Graeme I. Bell* 312

Endothelin Induces Two Types of Contractions of Rat Uterus: Phasic Contractions by Way of Voltage-Dependent Calcium Channels and Developing Contractions through a Second Type of Calcium Channels *Masamichi Kozuka, Teizo Ito, Shigehisa Hirose, Katsunobu Takahashi, and Hiromi Hagiwara* 317

Molecular Cloning of the 25 kbp Region Upstream of Exon 0 of the Human Ki-*ras* Oncogene and Its Conservation in Transformed Mouse NIH 3T3 Cells *G. Courtois, J. Lebeau, and G. Goubin* 324

In the Absence of Antibody IgGSORB Precipitates Human Placenta Phosphotyrosine-Containing Proteins *H. Joseph Goren and Donna Boland* 332

[ARG292→Val] or [ARG292→Leu] Mutation Enhances the Reactivity of *Escherichia coli* Aspartate Aminotransferase with Aromatic Amino Acids *Hideyuki Hayashi, Seiki Kuramitsu, Yasushi Inoue, Yoshimasa Morino, and Hiroyuki Kagamiyama* 337

Analysis of the Human Adrenodoxin Promoter: Evidence for Its Activity *Bon-chu Chung, Char-Chang Lai, Cheng-Hui Lin, and Chi-Yao Chang* 343

Thrombin Induced Platelet Adhesion to Endothelium Is Modified by Endothelial Derived Relaxing Factor (EDRF) *Catherine M. Venturini, Peter J. Del Vecchio, and John E. Kaplan* 349

The A_1 Adenosine Receptor Antagonist 1,3-Dipropyl-8-cyclopentylxanthine (DPCPX) Displays Adenosine Agonist Properties in the FRTL5 Thyroid Cell Line *Albert G. Frauman and Alan C. Moses* 355

Opossum Kidney Contains a Functional Receptor for the *Escherichia coli* Heat-Stable Enterotoxin *Arnold A. White, William J. Krause, John T. Turner, and Leonard R. Forte* 363

Comparative Studies of Polyhemic Cytochromes *c* Isolated from *Desulfovibrio vulgaris* (Hildenborough) and *Desulfovibrio desulfuricans* (Norway) *M. Loutfi, F. Guerlesquin, P. Bianco, J. Haladjian, and M. Bruschi* 670

Study of the Heteromeric Structure of the Untransformed Glucocorticoid Receptor Using Chemical Cross-Linking and Monoclonal Antibodies against the 90K Heat-Shock Protein *Philippe Lefebvre, Bernard Sablonniere, Noureddine Tbarka, Pierre Formstecher, and Michel Dautrevaux* 677

Predict7, a Program for Protein Structure Prediction *R. S. Cármenes, J. P. Freije, M. M. Molina, and J. M. Martín* 687

Cell Density Regulates the Number of Cell Surface Receptors for Fibroblast Growth Factor *George Veomett, Charles Kuszynski, Peter Kazakoff, and Angie Rizzino* 694

Ontogeny of Pineal Protein Kinase C Activity *David Sugden* 701

Neutralization of Cholera Toxin by Rat IgA Secretory Antibodies Induced by a Free Synthetic Peptide *A. Delmas, A. Gruaz-Guyon, S. Pedoussaut, P. Pierre, P. Rivaille, and J. P. Vaerman* 707

A Tumor Growth Inhibitory Factor and a Tumor Growth Promoting Factor Isolated from Unfertilized Ova of Shad (*Alosa sapidissima*) *Bertrum Sheid, John C. Prat, and Eric Gaetjens* 713

Changes in Nuclear Inositol Phospholipids Induced in Intact Cells by Insulin-like Growth Factor I *Lucio Cocco, Alberto M. Martelli, R. Stewart Gilmour, Andrea Ognibene, Francesco A. Manzoli, and Robin F. Irvine* 720

Primary Structure of Pyrroloquinoline Quinone (PQQ) Containing Peptide Isolated from Porcine Kidney Diamine Oxidase *Robert A. van der Meer, Pieter D. van Wassenaar, Johannes H. van Brouwershaven, and Johannis A. Duine* 726

Stimulation of Na–K–Cl Cotransport in Cultured Vascular Endothelial Cells by Atrial Natriuretic Peptide *Tetsuro Fujita, Hiromi Hagiwara, Shunji Ohuchi, Masamichi Kozuka, Masami Ishido, and Shigehisa Hirose* 734

Synergistic Inhibition of Hepatic Ketogenesis in the Presence of Insulin and a cAMP Antagonist *Maria C. Olivieri and Lynne H. Parker Botelho* 741

Lipoxygenase Inhibitors Suppress Formation of Tumor Necrosis Factor *in Vitro* and *in Vivo* *Ulrich F. Schade, Martin Ernst, Margot Reinke, and Dirk T. Wolter* 748

Alterations in the Sialylation and Sulfation of Secreted Mouse Thyrotropin in Primary Hypothyroidism *G. Stephen DeCherney, Neil Gesundheit, Peter W. Gyves, Claudia R. Showalter, and Bruce D. Weintraub* 755

Lack of Effect of Pertussis Toxin on TNF-α-Induced Formation of Reactive Oxygen Intermediates by Human Neutrophils *Roger Meurer and D. Euan MacIntyre* 763

The Integrity of Tubulin Molecule Is Not Required for the Activity of Tubulin Carboxypeptidase *José C. Weizetfel, Carlos E. Argaraña, Dante M. Beltramo, and Héctor S. Barra* 770

Atrial Natriuretic Factor Messenger Ribonucleic Acid and Peptide in the Human Heart during Ontogenic Development *J.-J. Mercadier, M.-A. Zongazo, C. Wisnewsky, G. Butler-Brown, D. Gros, A. Carayon, and K. Schwartz* 777

Parameters of Activation of the Membrane-Bound $O_2^{\cdot-}$ Generating Oxidase from Bovine Neutrophils in a Cell-Free System *Marie-Claire Pilloud, Jacques Doussiere, and Pierre V. Vignais* 783

Spermine Antagonizes the Binding of Adriamycin to the Inner Membrane of Heart Mitochondria *Giancarlo Solaini* 791

Identification of the β-Endorphin-Binding Subunit of the SC5b-9 Complement Complex: S Protein Exhibits Specific β-Endorphin-Binding Sites upon Complex Formation with Complement Proteins *A. Hildebrand* 799

Decreased Atrial Natriuretic Factor Receptors and Impaired cGMP Generation in Glomeruli from the Cardiomyopathic Hamster *Ellis R. Levin, Harrison J. L. Frank, Anshumali Chaudhari, Michael A. Kirschenbaum, Anya Bandt, and Steven Mills* 807

In Vivo ^{31}P NMR Spectroscopy of Energy Rich Phosphates in the Brain of the Hyperammonemic Rat *R. Friolet, J. P. Colombo, F. Lazeyras, W. P. Aue, R. Kretschmer, A. Zimmermann, and C. Bachmann* 815

Free Radicals Inactivate Human Neutrophil Elastase and Its Inhibitors with Comparable Efficiency *Roger T. Dean, Hans Peter Nick, and Hans Peter Schnebli* 821

Rapid Purification of the 30 kDa Calcimedin Using DNase I Affinity Chromatography *Vana L. Smith and John R. Dedman* 828

Microtubule-Associated Protein-2 Stimulates DNA Synthesis Catalyzed by the Nuclear Matrix *Masaki Shioda, Hiromu Murofushi, Kimiko Murakami-Murofushi, and Hikoichi Sakai* 834

Heteronuclear Three-Dimensional NMR Spectroscopy Applied to CMP-KDO Synthetase (27.5 kDa) *Stephen W. Fesik, Robert T. Gampe, Jr., Erik R. P. Zuiderweg, William E. Kohlbrenner, and Debra Weigl* 842

Isolation and Characterization of Variant cDNAs Encoding Mouse Tyrosinase *Mineko Terao, Linda Tabe, Enrico Garattini, Daniela Sartori, Michela Studer, and Beatrice Mintz* 848

8-Azaguanosine-5′-monophosphate Synthesis via Nucleoside Kinase in Cultured Chinese Hamster Lung Fibroblasts *Maria Grazia Tozzi, Marcella Camici, Valeria Falcone, Maura Turriani, Gino Turchi, and Pier Luigi Ipata* 854

$[Ca^{2+}]_i$ Independent Mitogenesis in Cultured Human Fibroblasts Revealed by Single Cell Microfluorimetry *Frank C. Praeger, Leslie Reinlib, Mark Donowitz, and Barbara A. Gilchrest* 862

Volume 159, Number 3, March 31, 1989

AUTHOR INDEX, Volume 159, Number 3, March 31, 1989 ii

Calyculin A and Okadaic Acid: Inhibitors of Protein Phosphatase Activity *H. Ishihara, B. L. Martin, D. L. Brautigan, H. Karaki, H. Ozaki, Y. Kato, N. Fusetani, S. Watabe, K. Hashimoto, D. Uemura, and D. J. Hartshorne* 871

Extracellularly Applied ATP Alters the Calcium Flux through Dihydropyridine-Sensitive Channels in Cultured Chick Myotubes *Håkan Eriksson and Edith Heilbronn* 878

Distance Estimation from NOE Data in Macromolecular Systems: A Quadratic Approach *A. Majumdar and R. V. Hosur* 886

Enhanced Biological Activity of Dimeric Gonadotropin Releasing Hormone *Yasuo Kitajima, Kevin J. Catt, and Hao-Chia Chen* 893

Biological and Chemical Evidence for the Existence of a Porcine Hypothalamic Parotid Hormone-Releasing Factor *Jean-Marc Tieche and John Leonora* 899

Glucose-Induced Buffering of Cytoplasmic Ca^{2+} in the Pancreatic β-Cell: An Artifact or a Physiological Phenomenon? *Erik Gylfe* 907

Bioactivity of Human Pancreastatin and Its Localization in Pancreas *Akihiro Funakoshi, Atsuo Jimi, Yohichi Yasunami, Kayoko Tateishi, Susumu Funakoshi, Hirokazu Tamamura, and Haruaki Yajima* 913

Binding Activities of Thyroxine Binding Globulin versus Thyroxine Binding Prealbumin in Rat Sera: Differential Modulation by Thyroid Hormone Ligands, Oleic Acid, and Pharmacological Drugs *Lia Savu, Roger Vranckx, Michelle Maya, and Emmanuel A. Nunez* 919

Fifty Residues Coded by Exon 2 of Chicken Lysozyme Carry Residual Catalytic Activity *Wolfgang Kuchinke* 927

Continuous Perfusion with Interleukin 6 (IL-6) Enhances Production of Hematopoietic Stem Cells (CFU-S) *Chieko Suzuki, Akira Okano, Fumihiko Takatsuki, Yuko Miyasaka, Toshio Hirano, Tadamitsu Kishimoto, Daisuke Ejima, and Yukio Akiyama* 933

Apparent "Activation" of Protein Kinases by Okadaic Acid Class Tumor Promoters *Toshihiro Sassa, Werner W. Richter, Naoto Uda, Masami Suganuma, Hiroko Suguri, Shigeru Yoshizawa, Mitsuru Hirota, and Hirota Fujiki* 939

Inhibition of Polyamine Synthesis in Human B Lymphocytes during Primary Infection with Epstein–Barr Virus (EBV) Blocks Cellular DNA Synthesis but Not the Expression of EBV-Encoded Nuclear Antigens (EBNA) *Pierre Åman, Stina M. Oredsson, and Olle Heby* 945

Transient Inositol (1,4,5)Trisphosphate Accumulation under Vasopressin Stimulation in WRK_1 Cells: Correlation with Intracellular Calcium Mobilization *Bernard Mouillac, Marie-Noëlle Balestre, and Gilles Guillon* 953

The Sulfhydryl Reagent Thimerosal Elicits Human Platelet Aggregation by Mobilization of Intracellular Calcium and Secondary Prostaglandin Endoperoxide Formation *Markus Hecker, Bernhard Brüne, Katja Decker, and Volker Ullrich* 961

A Novel Cleavage Product of β-Thromboglobulin Formed in Cultures of Stimulated Mononuclear Cells Activates Human Neutrophils *Alfred Walz and Marco Baggiolini* 969

A Simple, Sensitive, and Specific Radioreceptor Assay for Inositol 1,4,5-Trisphosphate in Biological Tissues *David S. Bredt, Robert J. Mourey, and Solomon H. Snyder* 976

Enhancement by Tetraphenylboron of the Interaction of the 1-Methyl-4-phenylpyridinium Ion (MPP^+) with Mitochondria *Rona R. Ramsay, Rolf J. Mehlhorn, and Thomas P. Singer* 983

Interleukin-6 Gene Expression in Human Endothelial Cells: RNA Start Sites, Multiple IL-6 Proteins, and Inhibition of Proliferation *Lester T. May, Gabriella Torcia, Federico Cozzolino, Anuradha Ray, Stephen B. Tatter, Uma Santhanam, Pravinkumar B. Sehgal, and David Stern* 991

A Novel Nonpeptidic, Orally Active Renin Inhibitor *Hajime Morishima, Yutaka Koike, Masato Nakano, Shugo Atsuumi, Seiichi Tanaka, Hiroshi Funabashi, Junko Hashimoto, Yoshio Sawasaki, Nobuyuki Mino, Makiko Nakano, Kaoru Matsushima, Kyoko Nakamichi, and Mitsuo Yano* 999

Regulation of Colony Formation of Differentiated Chondrocytes in Soft Agar by Transforming Growth Factor-β *Masahiro Iwamoto, Katsuhiko Sato, Kazuhisa Nakashima, Hajime Fuchihata, Fujio Suzuki, and Yukio Kato* 1006

Fatty Acid Composition of Lipids Which Copurify with Band 3 *Leonard R. Maneri and Philip S. Low* 1012

The Role of Sex Steroids in the Expression of MMTV in the Normal Mouse Mammary Gland *Begoña Muñoz Bradham and Franklyn F. Bolander, Jr.* 1020

Potentiation of Diacylglycerol-Activated Protein Kinase C by Acyl-Coenzyme A Thioesters of Hypolipidaemic Drugs *Miguel Bronfman, Ariel Orellana, M. Nelly Morales, Francoise Bieri, Felix Waechter, Willy Stäubli, and Philip Bentley* 1026

Brain Natriuretic Peptide Receptors in the Rat Peripheral Sympathetic Ganglia *Tichomir Torda, Adil J. Nazarali, and Juan M. Saavedra* 1032

Cytosolic Factor(s) Determines the Impaired Desensitization of β-Adrenoceptors in the Myocardium of Spontaneously Hypertensive Rats *Catherine Limas and Constantinos J. Limas* 1039

ATP-Dependent H^+ Transport in Synaptosomal Membrane Vesicles of the Rat Brain *Reiko Fukunaga and Chiyoko Inagaki* 1045

Singlet Oxygen Production from the Peroxidase Catalyzed Formation of Styrene Glutathione Adducts *Jeffrey R. Kanofsky* 1051

Effect of Cell Surface Trypsinization on Ethanolamine Base Exchange Enzymatic Activity of Astrocyte Primary Cultures and Derived Spontaneously Transformed Cell Lines *Pierre El-Achkar, O. Keith Langley, and Marcel Mersel* 1055

Renin Expression in the Kidney and Brain Is Reciprocally Controlled by Captopril *Masazumi Tada, Akiyoshi Fukamizu, Min Seok Seo, Shigeru Takahashi, and Kazuo Murakami* 1065

Stimulation of Phospholipase C-Mediated Hydrolysis of Phosphoinositides by Endothelin in Cultured Rabbit Aortic Smooth Muscle Cells *Shun-ichi Araki, Yasuhiro Kawahara, Ken-ichi Kariya, Michitoshi Sunako, Hisashi Fukuzaki, and Yoshimi Takai* 1072

Vitamin B_2-Enhancement of Sodium Chromate (VI)-Induced DNA Single Strand Breaks: ESR Study of the Action of Vitamin B_2 *Masayasu Sugiyama, Akikazu Ando, and Ryohei Ogura* 1080

The Reactions of Chloroperoxidase in the Presence of Xanthine/Xanthine Oxidase *Diana Metodiewa, Michael Pickard, and H. Brian Dunford* 1086

Endogenous Inhibitor of Angiotensin Converting Enzyme in the Rat Heart *Fumihiko Ikemoto, Gyeong-Bu Song, Munechika Tominaga, and Kenjiro Yamamoto* 1093

Increased Level of Mitochondrial Gene Expression in Polyps of Familial Polyposis Coli Patients *Akiko Yamamoto, Satoshi Horai, and Yasuhito Yuasa* 1100

Dual Effect of Activin A on Cell Growth in BALB/C 3T3 Cells *Itaru Kojima and Etsuro Ogata* 1107

Conformationally Restrained Cyclic Peptides as Antagonists of Luteinizing Hormone-Releasing Hormone *Anand S. Dutta, James J. Gormley, Peter F. McLachlan, and James R. Woodburn* 1114

Adverse Effects of Anti-tumor Drug, Cisplatin, on Rat Kidney Mitochondria: Disturbances in Glutathione Peroxidase Activity *Satoru Sugiyama, Mika Hayakawa, Tomoko Kato, Yoshihiro Hanaki, Kazuyuki Shimizu, and Takayuki Ozawa* 1121

A New Compound, Withangulatin A, Promotes Type II DNA Topoisomerase—Mediated DNA Damage *Jin-Kai Juang, Hurng Wern Huang, Chiu-Ming Chen, and Hon Ju Liu* 1128

Evidence for the Formation of 26-Hydroxycholesterol by Cytochrome P450 in Pig Kidney Mitochondria *Hans Postlind and Kjell Wikvall* 1135

ADP-Ribosylatable Content of Elongation Factor-2 Changes during Cell Cycle of Normal and Cancerous Human Cells *Bent Riis, Suresh I. S. Rattan, Jens Cavallius, and Brian F. C. Clark* 1141

Specific Translocation of Tuftsin (Thr–Lys–Pro–Arg), a Natural Immunomodulating Peptide, into the Nuclei of Human Monocytes *Jyoti R. Wagle, Allen T. Ansevin, Steven E. Dessens, and Kenji Nishioka* 1147

Formation of 6,13-Dihydroxyoctadecatrienoic Acid Isomers from γ-Linolenic Acid *Mee Ree Kim and Dai-Eun Sok* 1154

The Formation of Glyoxylate from Glycine by Melanin *Annette Baich and Jennifer Schloz* 1161

Amphotericin β-Induced Changes in Renal Membrane Permeation: A Model of Nephrotoxicity *Richard E. Schell, Nga V. Tran, and John S. Bramhall* 1165

The Ontogeny of Immunoreactive β-Endorphin and β-Lipotropin in the Rat Ovary *Michael L. Adams and Theodore J. Cicero* 1171

Stabilization of Poliovirus against Heat Inactivation *Brent L. Dorval, Marie Chow, and Alexander M. Klibanov* 1177

Studies on the Biogenesis of the Mammalian ATP Synthase Complex: Isolation and Characterization of a Full-Length cDNA Encoding the Rat F_1-β-Subunit *D. Boulet, J. Poirier, and C. Côté* 1184

Construction and Characterization of a Packaging Cell Line for MMTV-Based Conditional Retroviral Vectors *Brian Salmons, Sylviane Moritz-Legrand, Iqbal Garcha, and Walter H. Günzburg* 1191

Lipoxygenase-Catalyzed Epoxidation of Benzo[a]pyrene-7,8-dihydrodiol *Janusz Z. Byczkowski and Arun P. Kulkarni* 1199

Prostaglandin D_2 Stimulates Calcification of Human Osteoblastic Cells *Yasuko Koshihara and Mieko Kawamura* 1206

Enhancement of Epstein–Barr Virus/C3d Receptor (EBV/C3dR or CR2) and Nuclear p120 Ribonucleoprotein Phosphorylation by Specific EBV/C3dR Ligands in Subcellular Fractions of the Human B Lymphoma Cell Line, Raji *Alain X. Delcayre, Anny Fiandino, Fouad Lyamani, Monique Barel, and Raymond Frade* 1213

A Distinct Form of Tau Is Selectively Incorporated into Alzheimer's Paired Helical Filaments *Hiroshi Mori, Yoshio Hamada, Masahiro Kawaguchi, Toshiyuki Honda, Jun Kondo, and Yasuo Ihara* 1221

Chromophore Conformational Analysis in Phycocyanin and in Related Chromopeptides by Surface Enhanced Raman Spectroscopy *M. Debreczeny, Z. Gombos, V. Csizmadia, Zs. Várkonyi, and B. Szalontai* 1227

Titration of Variant DNA Sequences Differing by a Single Point-Mutation by Selective Dot-Blot Hybridization with Synthetic Oligonucleotides *Monique Nicoloso, Liang Hu Qu, and Jean-Pierre Bachellerie* 1233

Natural Human IL-1β Exhibits Regulatory Actions on Human Bone-Derived Cells *in Vitro* *D. B. Evans, R. A. D. Bunning, J. Van Damme, and R. G. G. Russell* 1242

Transformation of NIH 3T3 Cells by Herpes Simplex Type 2 *Bgl*II n Fragment and Subfragments Is Independent from Induction of Mutation at the HPRT Locus *Louise Pilon, Allégria Kessous-Elbaz, Yves Langelier, and André Royal* 1249

Tight Binding of a Copper(II) Phthalocyanine (Cuprolinic Blue) to DNA *David C. A. John, John Rosamund, and Kenneth T. Douglas* 1256

DNA Fragments Which Specifically Bind to Isolated Nuclear Matrix *in Vitro* Interact with Matrix-Associated DNA Topoisomerase II *Y. S. Vassetzky, Jr., S. V. Razin, and G. P. Georgiev* 1263

ras p21 and Other Gn Proteins Are Detected in Mammalian Cell Lines by [γ-^{35}S]GTPγS Binding *J. G. Comerford, J. R. Gibson, A. P. Dawson, and I. Gibson* 1269

Insulin Receptor Overexpression in a Human Pre-B Acute Lymphocytic Leukemia Cell Line with a t(1;19) Chromosome Translocation near the INSR Locus *Gail C. Kaplan, Dennis J. Pillion, William J. Rutter, Helen Kim, and Peter E. Barker* 1275

Hydroxylation of Leukotriene B_4 in Leukocytes from Various Species: Identification of a Metabolite to Authentic 5*S*,12*R*, 19-Trihydroxy-6*Z*,8*E*,10*E*,14*Z*-eicosatetraenoic Acid and Relative Importance of 19- and 20-Hydroxylations *D. Mansuy, J. L. Boucher, M. Delaforge, and J. Leclaire* 1283

A Novel Calcium Signalling Response in the Breast Cancer Cell Line MDA-468 *S. Kremer, B. Margolis, and K. Skorecki* 1290

Calmodulin and Protein Kinase C Antagonists Also Inhibit the Ca^{2+}-Dependent Protein Protease, Calpain I *Lynn M. Brumley and Robert W. Wallace* 1297

Endothelin Enhances Adrenergic Vasoconstriction in Perfused Rat Mesenteric Arteries *Yoshikatsu Tabuchi, Mitsuaki Nakamaru, Hiromi Rakugi, Masahiro Nagano, and Toshio Ogihara* 1304

Half-Life of Proteasomes (Multiprotease Complexes) in Rat Liver *Keiji Tanaka and Akira Ichihara* 1309

Characterization of Insulin-like Growth Factor Binding Proteins of Cultured Rat Astroglial and Neuronal Cells *Ian Ocrant, Hung Pham, Youngman Oh, and Ron G. Rosenfeld* 1316

Inhibin α-Subunit Monomer Is Present in Bovine Follicular Fluid *Kishiko Sugino, Takanori Nakamura, Koji Takio, Koiti Titani, Kaoru Miyamoto, Yoshihisa Hasegawa, Masao Igarashi, and Hiromu Sugino* 1323

A Micellar Model for Investigating the Chemical Nature of Hydrogen Transfer in NAD(P)H-Dependent Enzymatic Reactions *U. Mallikarjuna Rao* 1330

Direct Evidence for Modulation of Porter Quaternary Structure by Transport Site Ligands *James M. Salhany and Renee L. Sloan* 1337

Endothelin and the Production of Cerebral Vasospasm in Dogs *Toshio Asano, Ichiro Ikegaki, Yoshio Suzuki, Shin-ichi Satoh, and Masato Shibuya* 1345

Parathyroid Hormone 1-34, but Not 3-34 or 7-34, Transiently Translocates Protein Kinase C in Cultured Renal (OK) Cells *Teiichi Tamura, Hisato Sakamoto, and Charles R. Filburn* 1352

Cremophor EL, a Widely Used Parenteral Vehicle, Is a Potent Inhibitor of Protein Kinase C *Fu-Kun Zhao, Linda F. Chuang, Mervyn Israel, and Ronald Y. Chuang* 1359

Colocalization of a Glucose Transporter and the Insulin Receptor in Microsomes of Insulin-Treated Rat Adipocytes *Osamu Ezaki, Naoko Bono, Hiroshige Itakura, and Michihiro Kasahara* 1368

Multiple Receptors for Modified Low Density Lipoproteins in Mouse Peritoneal Macrophages: Different Uptake Mechanisms for Acetylated and Oxidized Low Density Lipoproteins *Hidenori Arai, Toru Kita, Masayuki Yokode, Shuh Narumiya, and Chuichi Kawai* 1375

Regulation of New Osteoclast Formation by a Bone Cell-Derived Macromolecular Factor *Ian R. Dickson and Ben A. A. Scheven* 1383

Lindane Effect upon the Vasoactive Intestinal Peptide Receptor/Effector System in Rat Enterocytes *I. Carrero, M. D. Fernández-Moreno, M. A. Pérez-Albarsanz, and J. C. Prieto* 1391

DNA Polymerase α Activity Is Not Affected by Protein Kinases or Alkaline Phosphatase *Charles E. Prussak and Ben Y. Tseng* 1397

Structure Determination of the UDP-Disaccharide Fragment of Cytoplasmic Cofactor Isolated from *Methanobacterium thermoautotrophicum* *B. J. Marsden, F. D. Sauer, B. A. Blackwell, and J. K. G. Kramer* 1404

GTPase Activating Proteins for the *smg*-21 GTP-Binding Protein Having the Same Effector Domain as the *ras* Proteins in Human Platelets *Takashi Ueda, Akira Kikuchi, Nobuyuki Ohga, Juro Yamamoto, and Yoshimi Takai* 1411

Cloning and Sequence Analysis of cDNA Encoding a Precursor for Rat Brain Natriuretic Peptide *Masayasu Kojima, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo* 1420

Cloning and Sequence Analysis of cDNA Encoding a Precursor for Human Brain Natriuretic Peptide *Tetsuji Sudoh, Keiji Maekawa, Masayasu Kojima, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo* 1427

Transforming Growth Factor-β Stimulates the Expression of Endothelin mRNA by Vascular Endothelial Cells *Hiroki Kurihara, Masao Yoshizumi, Takao Sugiyama, Fumimaro Takaku, Masashi Yanagisawa, Tomoh Masaki, Masaru Hamaoki, Hirohisa Kato, and Yoshio Yazaki* 1435

DNA on Membrane Receptors: A Target for Monoclonal Anti-DNA Antibody Induced by a Nucleoprotein Shed in Systemic Lupus Erythematosus *Manuel Rieber, Cecilia Urbina, and Mary Strasberg Rieber* 1441

A Revised Sequence of Calf Thymus Glutaredoxin *I. A. Papayannopoulos, Z.-R. Gan, W. W. Wells, and K. Biemann* 1448

ERRATA

Volume 157, Number 1, November 30, 1988: Panagiotis A. Tsonis, Vasili Carperos, and Teruna Shiahaan, ''Modeling of the Homoeo Domain Suggests Similar Structure to Repressors,'' pp. 100–105 1455

Volume 157, Number 3, December 30, 1988: Edith Speir, Zhou Yi-Fu, Michael Lee, Shashi Shrivastav, and Ward Casscells, ''Fibroblast Growth Factors Are Present in Adult Cardiac Myocytes, *in Vivo*,'' pp. 1336–1340 1455

Interaction of Shigella Toxin with Globotriaosyl Ceramide Receptor-Containing Membranes: A Fluorescence Study *Witold K. Surewicz, Krystyna Surewicz, Henry H. Mantsch, and Francois Auclair* 126

Calcium Binding and Putative Activity of the Epidermal Growth Factor Domain of Blood Coagulation Factor IX *Linda H. Huang, Xiao-Hong Ke, William Sweeney, and James P. Tam* 133

Mitochondria and Xanthine Oxidase Both Generate Reactive Oxygen Species in Isolated Perfused Rat Liver after Hypoxic Injury
Hartmut Jaeschke and Jerry R. Mitchell 140

Recognition of Rat Liver and Kidney Nuclear T_3 Receptors by an Antibody against c-*erb* A Peptide *Hirotoshi Nakamura, Tetsuya Tagami, Kazuhiro Masuda, Takahiko Mitani, and Hiroo Imura* 148

Enhancement in Rats by the Liver Tumor Promoter Ethinyl Estradiol of a Serum Factor(s) Which Is Stimulatory for Hepatocyte DNA Synthesis
Yuenian E. Shi and James D. Yager 154

Nascent Very Low Density Lipoproteins from Rat Hepatocytic Golgi Fractions Are Enriched in Phosphatidylethanolamine
Robert L. Hamilton and Phoebe E. Fielding 162

pp-120: A Common Endogenous Substrate for Insulin and IGF-1 Receptor-Associated Tyrosine Kinase Activity in the Highly Malignant AS-30D Rat Hepatoma Cells *Maurizio Fanciulli, Marco G. Paggi, Andrea Mancini, Carlo Del Carlo, Aristide Floridi, Simeon I. Taylor, and Nicola Perrotti* 168

Caldesmon: Anomalous Electrophoretic Behavior in Polyacrylamide Gel
Paolo Cavanni, Palmina Cavallini, Emiliangelo Ratti, Giovanni Gaviraghi, and Luciano Dalla Libera 174

Mechanism of T Cell Proliferation *in Vivo:* Analysis of IL-2 Receptor Expression and Activation of c-*myc* and c-*myb* Oncogenes during Lymphatic Regeneration *M. Sihvola, L. Sistonen, K. Alitalo, and M. Hurme* 181

Modulation of an RGDS Binding Site on the Platelet Membrane Glycoprotein IIb–IIIa Complex *Samuel A. Santoro and William J. Lawing, Jr.* 189

Inhibition of *in Vivo* DNA Synthesis in Regenerating Rat Liver following Thermal Injury *Edward A. Carter, Sara E. Kirkham, Ronald G. Tompkins, and John F. Burke* 196

Separation and Identification of Two Phosphatidylinositol 4-Kinase Activities in Bovine Uterus *Yue-Sheng Li, Forbes D. Porter, Ruth M. Hoffman, and Thomas F. Deuel* 202

Amino Acid Sequence of a 15-kDa Actin-Binding Fragment of Turkey Gizzard Caldesmon: Similarity with Dystrophin, Tropomyosin, and the Tropomyosin-Binding Region of Troponin T *John Leszyk, Dominique Mornet, Etienne Audemard, and John H. Collins* 210

Altered Hepatic Microsomal Function and Elevated Protooncogene Expression as Residual Effects in Rats Exposed to Δ9-Tetrahydrocannabinol *Hullahalli R. Prasanna, Kenji D. Nakamura, Syed F. Ali, Ming H. Lu, William Slikker, Jr., and Ronald W. Hart* 217

Identification and Partial Purification of a Novel Tumor-Derived Protein That Induces Tissue Factor on Cultured Human Endothelial Cells *Masashi Noguchi, Toshiyuki Sakai, and Walter Kisiel* 222

Receptor Binding Activity and Cytosolic Free Calcium Response by Synthetic Endothelin Analogs in Cultured Rat Vascular Smooth Muscle Cells *Y. Hirata, H. Yoshimi, T. Emori, M. Shichiri, F. Marumo, T. X. Watanabe, S. Kumagaye, K. Nakajima, T. Kimura, and S. Sakakibara* 228

Low-Molecular-Weight GTP-Binding Proteins in Human Platelets: Cyclic AMP-Dependent Protein Kinase Phosphorylates m22KG(I) in Membrane but Not c21KG in Cytosol *Koh-ichi Nagata, Seiji Nagao, and Yoshinori Nozawa* 235

Detection of Essential Arginine in Bacterial Peptidyl Dipeptidase-4: Arginine Is Not the Anion Binding Site *Joseph J. Lanzillo, Yamuna Dasarathy, and Barry L. Fanburg* 243

Characterization of Specific Binding Sites for PAF in the Iris and Ciliary Body of Rabbit *M. T. Domingo, P. E. Chabrier, J. L. Van Delft, N. L. Verbeij, N. J. Van Haeringen, and P. Braquet* 250

Topoisomerase II: A Potential Target for Novel Antifungal Agents *David P. Figgitt, Stephen P. Denyer, Paul M. Dewick, David E. Jackson, and Paul Williams* 257

The Benzodiazepine Receptor Ligands RO 5-4864 and RO 15-1788 Do Not Block the Inhibition of PAF-Induced Platelet Aggregation Seen with the Hetrazepine WEB 2086 *Kurt Griffin, Tina Hong, and Joseph V. Levy* 263

Detection of Enhancer Binding Proteins Recognizing the Human Immunodeficiency Virus Long Terminal Repeat by *in Situ* Gel Retardation *Anna T. Brini, Annick Harel-Bellan, Marie Korner, and William L. Farrar* 268

The 5′-Region of the P450XIA1(P450scc) Gene Contains a Basal Promoter and an Adrenal-Specific Activating Domain
Bon-chu Chung, Meng-Chun Hu, Char-Chang Lai, and Cheng-Hui Lin 276

Comparison of the Conformation and GTP Hydrolyzing Ability of N-Terminal *ras* p21 Protein Segments
Chien-Hua Niu, Kyou-Hoon Han, and Peter P. Roller 282

Antibodies against an α-Bungarotoxin-Binding Peptide of the α-Subunit of the Acetylcholine Receptor
Diana L. Donnelly-Roberts and Thomas L. Lentz 289

Evidence for Exogenous Substrate Phosphorylation and Dimer Formation by the Activated 190-kDa Insulin Proreceptor *in Vitro*
Richard F. Arakaki, Richard J. Comi, and Phillip Gorden 296

Insulin Receptor Kinase Activity in Rat Adipocytes Is Decreased during Aging
José M. Carrascosa, Pilar Ruíz, Carmen Martínez, Juan A. Pulido, Jorgina Satrústegui, and Antonio Andrés 303

Captopril and Hydralazine Suppress Atrial Natriuretic Peptide (ANP) Gene Expression in the Ventricles of Spontaneously Hypertensive Rats
Kiyoshi Fukui, Hiroshi Iwao, Akio Nakamura, Akira Yamamoto, Toshiaki Tamaki, Tetsuo Shoji, Shoji Kimura, Yasuharu Aki, Kouichi Hasui, Hiroaki Ohkubo, Shigetada Nakanishi, and Youichi Abe 310

Binding of Epidermal Growth Factor by Human Colon Carcinoma Cell (Caco-2) Monolayers *Ismael J. Hidalgo, Akira Kato, and Ronald T. Borchardt* 317

Isolation and Characterization of the cDNA for Pulmonary Surfactant-Associated Protein-B (SP-B) in the Rabbit
Jiejing Xu, Carol Richardson, Carol Ford, Tina Spencer, Yao Li-juan, George Mackie, Geoffrey Hammond, and Fred Possmayer 325

Domain-Specific Bias in Arginine/Lysine Usage by Protein Toxins
Erwin London and Cindy L. Luongo 333

A Novel Method for Measuring Protein Kinase C Activity in a Native Membrane-Associated State *Balu R. Chakravarthy, Douglas J. Franks, James F. Whitfield, and Jon P. Durkin* 340

Expression of Surface Antigen and mRNA for the CD11c (αX, p150) Subunit of the Human Leukocyte Adherence Receptor Family in Hematopoietic Cells
Denise Dudley, Dianne M. Baker, Mark J. Hickey, and Dennis D. Hickstein 346

Nucleoside Transport in Activated Macrophages
Franco Busolo, Luciano Conventi, Carlo Gatti, Daniela Monti, Leonarda Troiano, and Claudio Franceschi 354

Kinetics of the Glycation of Bovine Serum Albumin by Mannose and Fucose *in Vitro* *L. J. Davis, G. Hakim, and C. A. Rossi* 362

Inhibition of the Infectivity and Cytopathic Effect of Human Immunodeficiency Virus by Water-Soluble Lignin in an Extract of the Culture Medium of *Lentinus edodes* Mycelia (LEM) *Harumi Suzuki, Akira Okubo, Sunao Yamazaki, Kenzo Suzuki, Hiroaki Mitsuya, and Shozo Toda* 367

Chemical Modification of the Glycine Receptor with Fluorescein Isothiocyanate Specifically Affects the Interaction of Glycine with Its Binding Site
Ana Ruiz Gómez, Clara Fernāndez-Shaw, Fernando Valdivieso, and Federico Mayor, Jr. 374

Insulin-like Growth Factor I Stimulates Elastin Synthesis by Bovine Pulmonary Arterial Smooth Muscle Cells
D. B. Badesch, P. D. K. Lee, W. C. Parks, and K. R. Stenmark 382

Conformation of the α Form of Human Calcitonin Gene-Related Peptide (CGRP) in Aqueous Solution as Determined by Circular Dichroism Spectroscopy
Mark C. Manning 388

Interactions of Recombinant and Platelet Transforming Growth Factor-β1 Precursor with the Insulin-like Growth Factor II/Mannose 6-Phosphate Receptor
Kristina S. Kovacina, George Steele-Perkins, Anthony F. Purchio, Mario Lioubin, Kohei Miyazono, Carl-Henrik Heldin, and Richard A. Roth 393

The β Form Is the Dominant Interleukin 1 Released by Murine Peritoneal Macrophages
S. W. Chensue, C. Shmyr-Forsch, I. G. Otterness, and S. L. Kunkel 404

Cyclosporin A Inhibits Protein Kinase C Activity: A Contributing Mechanism in the Development of Nephrotoxicity?
R. J. Walker, V. A. Lazzaro, G. G. Duggin, J. S. Horvath, and D. J. Tiller 409

John M. Brewer, John K. Wunderlich, Doo-Ha Kim, Michel Y. Carr, Gwendolyn G. Beach, and William L. Ragland 1155

Mechanisms of Reoxygenation Injury in Myocardial Infarction: Implications of a Myoglobin Redox Cycle *Dimitrios Galaris, Lynne Eddy, Arduino Arduini, Enrique Cadenas, and Paul Hochstein* 1162

An *in Vitro* Model of Nephrocalcinosis Using Rabbit Inner Medullary Collecting Tubular Cell Culture *J. C. M. Senior, J. E. Scoble, Z. Varghese, P. Sweny, and J. F. Moorhead* 1169

Non-C-G Recognition Sequences of DNA Cytosine-5-methyltransferase from Rat Liver *K. Hubrich-Kühner, H.-J. Buhk, H. Wagner, H. Kröger, and D. Simon* 1175

Evidence for a Peroxidatic Oxidation of Norepinephrine, a Catecholamine, by Lactoperoxidase *Diana Metodiewa, Krzysztof Reszka, and H. Brian Dunford* 1183

Molecular Dynamics of Antitumor Ether-Linked Phospholipids in Model Membranes: A Spin-Label Study *Chiang-San Lai, Joy Joseph, and Charles C.-Y. Shih* 1189

Polyamine-Mediated Control of Mammalian *S*-Adenosyl-L-methionine Decarboxylase Expression: Effects on the Content and Translational Efficiency of the mRNA *Lo Persson, Louise Stjernborg, Ingvar Holm, and Olle Heby* 1196

Partial Purification and Characterization of a New p36/40 Tyrosine Protein Kinase from HL-60 *Jean A. Boutin, Anne-Pascale Ernould, Annie Genton, and Claude A. Cudennec* 1203

Magnesium Monoperoxophtalate: An Efficient Single Oxygen Atom Donor in DNA Cleavage Catalyzed by Metalloporphyrin *Geneviève Pratviel, Jean Bernadou, Marco Ricci, and Bernard Meunier* 1212

Non-leaky Vesiculation of Large Unilamellar Vesicles (LUV) Induced by Plasma High Density Lipoproteins (HDL): Detection by HPLC *U. Tischler, D. Rückert, R. Schubert, H. W. Jaroni, and K. H. Schmidt* 1219

Effect of ACTH on the Stability of mRNAs Encoding Bovine Adrenocortical P450scc, P45011β, P45017α, P450C21, and Adrenodoxin *Vijayakumar Boggaram, Maliyakal E. John, Evan R. Simpson, and Michael R. Waterman* 1227

Affinity-Purified Site-Directed Antibody Recognizes the Entire Annexin Protein Family *Marcia A. Kaetzel and John R. Dedman* 1233

The Effect of Long-Term Consumption of Fish Oil on Platelet-Activating Factor Synthesis in Rat Renal Microsomes *Young K. Yeo, D-J. Philbrick, and Bruce J. Holub* 1238

Oleate-Induced Translocation of Protein Kinase C to Hepatic Microsomal Membranes *Lisardo Boscá, Maria J. M. Diaz-Guerra, and Marina Mojena* 1243

Rapid Cloning of Rearranged Immunoglobulin Genes from Human Hybridoma Cells Using Mixed Primers and the Polymerase Chain Reaction *James W. Larrick, Lena Danielsson, Carol A. Brenner, Magnus Abrahamson, Kirk E. Fry, and Carl A. K. Borrebaeck* 1250

Disruption of the *Saccharomyces cerevisiae* Gene for NADPH-Cytochrome P450 Reductase Causes Increased Sensitivity to Ketoconazole *Thomas R. Sutter and John C. Loper* 1257

An Amino-Terminally Extended and Post-translationally Modified Form of a 25 kDa Basic Fibroblast Growth Factor
Andreas Sommer, David Moscatelli and Daniel B. Rifkin 1267

Biosynthesis of Phosphatidylethanolamine via the CDP-Ethanolamine Route Is an Important Pathway in Isolated Rat Hepatocytes
Lilian B. M.Tijburg, Math J. H. Geelen, and Lambert M. G. Van Golde 1275

Methylation of the Vitamin D-Dependent CaBP Gene (Calbindin 9 kDa) Does Not Mediate Tissue or Vitamin D Regulation *Hisham M. Darwish, John Krisinger, and Hector F. DeLuca* 1281

Glucose-6-phosphate Dehydrogenase. Characterization of a Reactive Lysine Residue in the *Pichia jadinii* Enzyme Reveals a Limited Structural Variation in a Functionally Significant Segment *Jonathan Jeffery, Irene Wood, Alistair Macleod, Rachel Jeffery, and Hans Jörnvall* 1290

Identification of β Protein Precursor in Newborn Rat Brain
Koji Takio, Masato Hasegawa, Koiti Titani, and Yasuo Ihara 1296

Endothelin-Induced Ca-Independent Contraction of the Porcine Coronary Artery
Mayuko Kodama, Hideo Kanaide, Shimako Abe, Katsuya Hirano, Hisashi Kai, and Motoomi Nakamura 1302

Inhibition of Tyrosine Protein Kinases by the Antineoplastic Agent Adriamycin
Arianna Donella-Deana, Elena Monti, and Lorenzo A. Pinna 1309

Characteristics of the Myosin and Tropomyosin Binding Regions of the Smooth Muscle Caldesmon *Eisaku Katayama, Kurumi Y. Horiuchi, and Samuel Chacko* 1316

Neutral Endopeptidase 24.11 and Angiotensin Converting Enzyme-like Activity in CALLA Positive and CALLA Negative Lymphoid Cells
A. Beaumont, J. C. Brouet, and B. P. Roques 1323

Chloride Transport in Human Fibroblasts Is Activated by Hypotonic Shock
Michela Rugolo, Teresa Mastocola, Alberto Flamigni, and Giorgio Lenaz 1330

Inhibitors of Cellular Proteolysis Cause Increased Secretion from Parathyroid Cells *Ronal R. MacGregor and Devi D. Bansal* 1339

Possible Involvement of Microfilaments in Protein Kinase C Translocation
Masahiko Ito, Fuminori Tanabe, Akihiko Sato, Eiko Ishida, Yoshiyuki Takami, and Shiro Shigeta 1344

An Angiotensin II Antagonist with Strongly Prolonged Action
M. Holck, R. Bossé, W. Fischli, H. Gerold, and E. Escher 1350

Naturally Occurring Anti-band 3 Autoantibodies Recognize a High Molecular Weight Protein on the Surface of *Plasmodium falciparum* Infected Erythrocytes *E. Winograd and I. W. Sherman* 1357

Purification and Structural Determination of Urinary NH_2-Terminal Big Gastrin Fragments *Yoshifumi Higashimoto, Seiichi Himeno, Yasuhisa Shinomura, Kazuhiro Nagao, Toshiaki Tamura, and Seiichiro Tarui* 1364

Caldesmon Structure and Function: Sequence Analysis of a 35 kDa Actin- and Calmodulin-Binding Fragment from the C-Terminus of the Turkey Gizzard Protein *John Leszyk, Dominique Mornet, Etienne Audemard, and John H. Collins* 1371

The Binding Activities of Proteins That Bind Ap_4A, an Alarmone, Are Stimulated in the Presence of Ethanol or Phosphatidylethanolamine
Yasuko Kobayashi and Kazuoki Kuratomi 1379

Angiotensin 'Antipeptides': (−)Messenger RNA Complementary to Human Angiotensin II (+)Messenger RNA Encodes an Angiotensin Receptor Antagonist *Graham J. Moore, Renee C. Ganter, and Kevin J. Franklin* 1387

Atrial Natriuretic Factor Inhibits Proliferation of Vascular Smooth Muscle Cells Stimulated by Platelet-Derived Growth Factor
T. J. Abell, A. M. Richards, H. Ikram, E. A. Espiner, and T. Yandle 1392

A G4-DNA/B-DNA Junction at Codon 12 of c-Ha-*ras* Is Actively and Asymmetrically Methylated by DNA(cytosine-5)methyltransferase
Steven S. Smith, David J. Baker, and Lori A. Jardines 1397

Production of Monocyte Chemotactic and Activating Factor (MCAF) by Human Dermal Fibroblasts in Response to Interleukin 1 or Tumor Necrosis Factor
Christian G. Larsen, Claus O. C. Zachariae,
Joost J. Oppenheim, and Kouji Matsushima 1403

Evidence for Intermediate Channelling in the Glycolytic Pathway of Permeabilized L-929 Cells *James S. Clegg and Susan A. Jackson* 1409

Effect of Two Different Glucose Concentrations on Insulin Receptor mRNA Levels in Human Hepatoma HepG2 Cells *Paola Briata,*
Roberto Gherzi, Luciano Adezati, and Renzo Cordera 1415

Accumulation of Unglycosylated Liver Secretory Glycoproteins in the Rough Endoplasmic Reticulum
Tet-Kin Yeo, Kiang-Teck Yeo, and Kenneth Olden 1421

Chemical Synthesis and Expression of a Gene Encoding HIV-1 TAT Protein
B. Q. Ferguson, B. K. Friedland, E. Hendrickson,
L. Strehl, S. R. Petteway, and G. J. Jonak 1429

Specific Receptor for Endothelin in Cultured Rat Cardiocytes
Yukio Hirata, Yuka Fukuda, Hiroki Yoshimi,
Toshiaki Emori, Masayoshi Shichiri, and Fumiaki Marumo 1438

Author Index for Volume 160 1445

Volume 161, Number 1, May 30, 1989

AUTHOR INDEX, Volume 161, Number 1, May 30, 1989 iii

Affinity Purification of Endothia Protease with a Novel Renin Inhibitor, SQ 32,970 *Jon A. Norman, Deborah Little, Charles A. Free,*
Tamara Dejneka, Helen Weber, and Denis E. Ryono 1

An Enhancer in the c-*mos* Locus Binds a Nuclear Factor 1-like Protein
Frans A. van der Hoorn and Steven K. Nordeen 8

Characterization of Human Interleukin-3 Receptors on a Multi-Factor-Dependent Cell Line *Tomoaki Kuwaki, Toshio Kitamura, Arinobu Tojo,*
Shigeru Matsuki, Yukio Tamai, Kohei Miyazono, and Fumimaro Takaku 16

A Specific, Photolabile and Irreversible Antagonist (L662,025) of the PAF-Receptor *I. M. Hussaini and T. Y. Shen* 23

Effects of the Combination of Acivicin and *cis*-Diamminedichloroplatinum(II) on Thymidylate Synthesis of A549 Lung Cancer Cells
Hitoyasu Futami, Taiichi Shiotani, Yasufumi Yamaji, Noriko Yamauchi, and Shozo Irino 31

The 35-kDa Fragment of *h*-Caldesmon Conserves Two Consensus Sequences of the Tropomyosin-Binding Domain in Troponin T
Ken'ichiro Hayashi, Shigetoshi Yamada, Keiko Kanda, Fusao Kimizuka, Ikunoshin Kato, and Kenji Sobue 38

α-Agglutinin Expression in *Saccharomyces cervisiae*
Donald Wojciechowicz and Peter N. Lipke 46

Schiff Base Copper(II) Chelate as a Tool for Intermolecular Crosslinking and Immobilization of Protein
Katsuhiro Moriya, Kazutaka Tanizawa, and Yuichi Kanaoka 52

On the Effect on Specificity of Thr246→Gly Mutation in L-Lactate Dehydrogenase of *Bacillus stearothermophilus*
Daniel Bur, Tony Clarke, James D. Friesen, Marvin Gold, Keith W. Hart, J. John Holbrook, J. Bryan Jones, Marcel A. Luyten, and Helen M. Wilks 59

Computational Studies on Pterins and Speculations on the Mechanism of Action of Dihydrofolate Reductase
Tadafumi Uchimaru, Seiji Tsuzuki, Kazutoshi Tanabe, Stephen J. Benkovic, Kensuke Furukawa, and Kazunari Taira 64

Characterization of the Carboxyl Terminal Flanking Peptide of Rat Progastrin
S. Vincent Wu, Peter Chew, Fan-Jen Ho, John H. Walsh, Helen Wong, Terry D. Lee, Michael T. Davis, John E. Shively, and Joseph R. Reeve, Jr. 69

Under Anaerobic Conditions, Soluble Guanylate Cyclase Is Specifically Stimulated by Glutathione
F. Niroomand, R. Rössle, A Mülsch, and E. Böhme 75

Changes in Rat Liver mRNA for α-1-Acid-glycoprotein, Apolipoprotein E, Apolipoprotein B, and β-Actin after Mouse Recombinant Tumor Necrosis Factor Injection *F. Delers, M. Mangeney, D. Raffa, I. Vallet-Colom, M. Daveau, N. Tran-Quang, C. Davrinches, and J. Chambaz* 81

Sarafotoxin S6c Is a Relatively Weak Displacer of Specifically Bound ^{125}I-Endothelin *W. G. Nayler, X. H. Gu, and D. J. Casley* 89

Diacylglycerol Kinase Inhibitors R59022 and Dioctanoylethylene Glycol Potentiate the Respiratory Burst of Neutrophils by Raising Cytosolic Ca^{2+}
Patricia Nasmith and Sergio Grinstein 95

Induction of the Insulin Receptor and Other Differentiation Markers by Sodium Butyrate in the Burkitt Lymphoma Cell, Raji
Julie D. Newman, Glenn S. Eckardt, Andrew Boyd, and Leonard C. Harrison 101

The *de Novo* Biosynthesis of Platelet-Activating Factor in Rat Brain
Ermelinda Francescangeli and Gianfrancesco Goracci 107

Thiyl Radical Attack on Polyunsaturated Fatty Acids: A Possible Route to Lipid Peroxidation *Christian Schöneich, Klaus-Dieter Asmus, Uwe Dillinger, and Franz v. Bruchhausen* 113

Characterization of Ribonucleolytic Activity of Angiogenin toward tRNA *Frank S. Lee and Bert L. Vallee* 121

Effects of Acetylene on Hydrogenases from the Sulfate Reducing and Methanogenic Bacteria *S.-H. He, S. B. Woo, D. V. DerVartanian, J. Le Gall, and H. D. Peck, Jr.* 127

Unusual DNA Structures at the Integration Site of an HIV Provirus *Miguel A. Gama Sosa, Jessica C. Hall, Karen E. Schneider, Gregory C. Lukaszewicz, and Ruth M. Ruprecht* 134

Irreversible Inhibition of Serine Proteases by Peptidyl Derivatives of α-Aminoalkylphosphonate Diphenyl Esters *Józef Oleksyszyn and James C. Powers* 143

Analysis of Transketolase and Identification of an Enzyme Variant in Human Leukocytes *F. Paoletti, A. Mocali, M. Marchi, and F. Truschi* 150

Rabbit Brown Adipose Tissue Uncoupling Protein mRNA: Use of Only One of Two Polyadenylation Signals in Its Processing *Alexander G. Balogh, Robert G. Ridley, Hasmukh V. Patel, and Karl B. Freeman* 156

Identification of Calcium Conducting Channels in Isolated Boar Sperm Plasma Membranes *Tom Cox and R. N. Peterson* 162

Purification of Acidic Fibroblast Growth Factor from Bovine Omentum *Tetsuya Ohtaki, Kaori Wakamatsu, Masaaki Mori, Yoshihiro Ishibashi, and Tadashi Yasuhara* 169

Molecular Cloning and Sequence Analysis of Human Genomic DNA Encoding a Novel Membrane Protein Which Exhibits a Slowly Activating Potassium Channel Activity *Toshiya Murai, Akira Kakizuka, Toru Takumi, Hiroaki Ohkubo, and Shigetada Nakanishi* 176

Properties of Revertants of *lys2* and *lys5* Mutants as Well as α-Aminoadipate-semialdehyde Dehydrogenase from *Saccharomyces cerevisiae* *Douglas R. Storts and J. K. Bhattacharjee* 182

Interaction between D-Glyceraldehyde-3-phosphate Dehydrogenase and 3-Phosphoglycerate Kinase Labeled by Fluorescein-5′-isothiocyanate: Evidence That the Dye Participates in the Interaction *M. V. Sukhodolets, V. I. Muronetz, and N. K. Nagradova* 187

Inositol Lipid Metabolism in Vasopressin-Stimulated Hepatocytes from Rats Infused with Tumor Necrosis Factor *Judy A. Spitzer and Elena B. Rodriguez de Turco* 197

TMP-Reactive Autoantibodies in Human SLE Sera Demonstrate Thymine-Dependent Oligonucleotide Specificity *Theodore W. Munns and Sandra K. Freeman* 204

The Metal Requirement of Rat Thyrosine Hydroxylase *Paul F. Fitzpatrick* 211

Electron Microscope Studies of Human α_2-Macroglobulin–Chymotrypsin Complex: Demonstration That the Two Structures Assigned to Native and Proteolyzed α_2-Macroglobulin Represent Two Views of the Proteolyzed Molecule *James K. Stoops, Jean-Pierre Bretaudiere, and Dudley K. Strickland* 216

Release of β-Endorphin Immunoreactivity from Rat Pituitary and Hypothalamus *in Vitro:* Effects of Isoproterenol, Dopamine, Corticotropin-Releasing Factor, and Arginine^8-Vasopressin *C. G. J. Sweep and V. M. Wiegant* 221

A Long-Acting Heat-Stable Enterotoxin Analog of Enterotoxigenic *Escherichia coli* with a Single D-Amino Acid *Hirokazu Kubota, Yuji Hidaka, Hiroshi Ozaki, Hideaki Ito, Toshiya Hirayama, Yoshifumi Takeda, and Yasutsugu Shimonishi* 229

Molecular Cloning and Amino Acid Sequence of Rat Kidney Aminopeptidase M: A Member of a Super Family of Zinc-Metallohydrolases *Bernard Malfroy, Helen Kado-Fong, Claude Gros, Bruno Giros, Jean-Charles Schwartz, and Renate Hellmiss* 236

Molecular Analysis of Peroxisomal β-Oxidation Enzymes in Infants with Peroxisomal Disorders Indicates Heterogeneity of the Primary Defect *Samia Guerroui, Patrick Aubourg, Winston W. Chen, Takashi Hashimoto, and Jacques Scotto* 242

Molecular Basis of Mouse Himalayan Mutation *Byoung S. Kwon, Ruth Halaban, and Chaya Chintamaneni* 252

Loss of Surface Galactosyl Receptor Activity on Isolated Rat Hepatocytes Induced by Monensin or Chloroquine Requires Receptor Internalization via a Clathrin-Coated Pit Pathway *Douglas D. McAbee, Janet A. Oka, and Paul H. Weigel* 261

Sterol-Mediated Suppression of HMG-CoA Reductase mRNA Levels in Cultured Cells Requires Protein Synthesis *James M. Trzaskos, Marketa Jonas, and Harry W. Chen* 267

Synthesis of Peptide Fragments Related to Eglin C and Examination of Their Inhibitory Effect on Human Leukocyte Elastase, Cathepsin G, and α-Chymotrypsin *Y. Okada, S. Tsuboi, Y. Tsuda, K. Nakabayashi, Y. Nagamatsu, and J. Yamamoto* 272

Multiple Chromatographic Forms of the Formylpeptide Chemoattractant Receptor and Their Relationship to GTP-Binding Proteins *Paul G. Polakis, Tony Evans, and Ralph Snyderman* 276

Retinoic Acid Inhibits Phosphatidylinositol Turnover Only in RA-Sensitive while Not in RA-Resistant Human Neuroblastoma Cells *M. Lanciotti, P. Longone, P. Cornaglia-Ferraris, and M. Ponzoni* 284

Optical Spectroscopic Observation of a Metastable Form of Sperm Whale Myoglobin Generated by Reconstitution *J. A. Gebe, D. H. Peyton, and J. A. Peyton* 290

Effect of Diazepam on the Carnitine Translocation in Rat Heart Mitochondria *L. Sartorelli, G. Mantovani, and M. Ciman* 295

Protease Nexin-1 Complexes and Inhibits T Cell Serine Proteinase-1 *David Gurwitz, Markus M. Simon, Ulli Fruth, and Dennis D. Cunningham* 300

Human Cell Lines Stably Expressing HIV *env* and *tat* Gene Products *Miguel A. Gama Sosa, Rita DeGasperi, Fatemeh Fazely, and Ruth M. Ruprecht* 305

ATP-Dependent H$^+$ Transport by the Turtle Bladder: NBD-C1 Preferentially Inhibits the Vanadate-Insensitive Component in Isolated Membranes *Steven J. Youmans and Catherine R. Barry* 312

Endothelin in Human Plasma and Culture Medium of Aortic Endothelial Cells—Detection and Characterization with Radioimmunoassay Using Monoclonal Antibody *Yoshihiko Saito, Kazuwa Nakao, Hiroshi Itoh, Takayuki Yamada, Masashi Mukoyama, Hiroshi Arai, Kiminori Hosoda, Gotaro Shirakami, Shin-ichi Suga, Michihisa Jougasaki, Shoko Morichika, and Hiroo Imura* 320

Retention of Specific Protein Kinase C Isozymes following Chronic Phorbol Ester Treatment in BC3H-1 Myocytes *Denise R. Cooper, James E. Watson, Mildred Acevedo-Duncan, Robert J. Pollet, Mary L. Standaert, and Robert V. Farese* 327

Characterization of a Cysteine-Free Analog of Recombinant Human Basic Fibroblast Growth Factor *Tsutomu Arakawa, Yueh-Rong Hsu, Susan G. Schiffer, Larry B. Tsai, Craig Curless, and Gary M. Fox* 335

Primary Structure of Rat Brain Protein Carboxyl Methyltransferase Deduced from cDNA Sequence *Michihiko Sato, Tadashi Yoshida, and Syozo Tuboi* 342

Regional Distribution of Immunoreactive Endothelin in Porcine Tissue: Abundance in Inner Medulla of Kidney *Kazuo Kitamura, Tomoko Tanaka, Johji Kato, Tanenao Eto, and Kenjiro Tanaka* 348

Altered Gelatinolytic Activity by Keratoconus Corneal Cells *M. Cristina Kenney, Marilyn Chwa, Milagro Escobar, and Donald Brown* 353

Effects of Microgravity on Liposome-Reconstituted Cardiac Gap Junction Channeling Activity *Dale E. Claassen and Brian S. Spooner* 358

Hydrodynamic and Circular Dichroic Analysis of Mammary-Derived Growth Inhibitor (MDGI) *Joachim Behlke, Maren Mieth, Frank-D. Böhmer, and Richard Grosse* 363

Isolation of a Single Nuclear Gene Encoding Human Ubiquinone-Binding Protein in Complex III of Mitochondrial Respiratory Chain *Hiroshi Suzuki, Yoshitaka Hosokawa, Haruo Toda, Morimitsu Nishikimi, and Takayuki Ozawa* 371

Eicosanoids Evoke the Release of Amylase and Increase Cytoplasmic Calcium in Rat Parotid Cells *Kenneth W. Snowdowne, Leonie Rosenoer, Ellen Yu, and John R. Cashman* 379

Continued High Albumin Production by Multicellular Spheroids of Adult Rat Hepatocytes Formed in the Presence of Liver-Derived Proteoglycans *Norio Koide, Toshiyuki Shinji, Takayoshi Tanabe, Kenichirou Asano, Mitsuhiko Kawaguchi, Kohsaku Sakaguchi, Yayoi Koide, Masayasu Mori, and Takao Tsuji* 385

Stable Ornithine Decarboxylase in Promastigotes of *Leishmania mexicana mexicana* *C. P. Sánchez, N. S. González, and I. D. Algranati* 754

A Possible Role of Superoxide Anion Radical in the Process of Blastocyst Implantation in *Mus musculus*
Malini Laloraya, Pradeep kumar G, and Manmohan M. Laloraya 762

Coupling of a Proton Pump with Superoxide Radical–Superoxide Dismutase System in Maturing Mammalian Spermatozoa and Its Association with Sperm Motility *Pradeep kumar G, Malini Laloraya, and Manmohan M. Laloraya* 771

High and Low Affinity Binding Sites for Endothelin on Cultured Rat Glomerular Mesangial Cells *Kamal F. Badr, Karen A. Munger, Masanori Sugiura, Rudolf M. Snajdar, Mindy Schwartzberg, and Tadashi Inagami* 776

Characteristic Incorporation of Ganglioside GM_3, Which Induces Monocytic Differentiation in Human Myelogenous Leukemia HL-60 Cells
Mitsuru Nakamura, Hidetoshi Ogino, Hisao Nojiri, Seiichi Kitagawa, and Masaki Saito 782

Characteristics of Purified Protoporphyrinogen Oxidase from Barley *Nicholas J. Jacobs, Susan E. Borotz, and Judith M. Jacobs* 790

Kinetics of Ribosomal Protein S6 Phosphorylation by HEPG-2 Cells in Response to Insulin *Abraham K. Abraham and Mohamed S. Khatim* 797

Endothelin Inhibits Presynaptic Adrenergic Neurotransmission in Rat Mesenteric Artery *Yoshikatsu Tabuchi, Mitsuaki Nakamaru, Hiromi Rakugi, Masahiro Nagano, Hiroshi Mikami, and Toshio Ogihara* 803

Tetraphenylborate Potentiates the Respiratory Inhibition by the Dopaminergic Neurotoxin MPP$^+$ in Both Electron Transport Particles and Intact Mitochondria *Lawrence M. Sayre, Fengjiang Wang, and Charles L. Hoppel* 809

Mechanism of the Reversal Reaction of Platinated DNA with Thiourea Studied by Platinated 5′-GMP *Hidehito Urata and Masao Akagi* 819

The Molecular Basis of Retinoic Acid-Induced Night Blindness *Wing C. Law and Robert R. Rando* 825

Isolation and Characterization of ISO-rANP, a New Natriuretic Peptide from Rat Atria *T. Geoffrey Flynn, Anoop Brar, Linda Tremblay, Inder Sarda, Christina Lyons, and Donald B. Jennings* 830

Phosphatase Inhibition with Okadaic Acid Does Not Alter the Relationship between Force and Myosin Light Chain Phosphorylation in Permeabilized Smooth Muscle *M. J. Siegman, T. M. Butler, and S. U. Mooers* 838

Molecular Cloning and Characterization of the Primary Structure of the Alkane Hydroxylating Cytochrome P450 from the Yeast *Candida maltosa* *W.-H. Schunck, E. Kärgel, B. Gross, B. Wiedmann, S. Mauersberger, K. Köpke, U. Kiessling, M. Strauss, M. Gaestel, and H.-G. Müller* 843

Pituitary Follicular Cells Secrete a Novel Heparin-Binding Growth Factor Specific for Vascular Endothelial Cells *Napoleone Ferrara and William J. Henzel* 851

Hemodynamic Shear Stress Stimulates Endothelin Production by Cultured Endothelial Cells *Masao Yoshizumi, Hiroki Kurihara, Takao Sugiyama, Fumimaro Takaku, Masashi Yanagisawa, Tomoh Masaki, and Yoshio Yazaki* 859

Porcine D-Amino Acid Oxidase: Production of the Biologically Active Enzyme in *Escherichia coli* *E. Ciccarelli, M. Massaer, J.-P. Guillaume, A. Herzog, R. Loriau, A. Cravador, P. Jacobs, and A. Bollen* 865

Gene Expression of PCNA/Cyclin in Adult Tissues and the R3230AC Mammary Tumor of Rat *Yin-Chang Liu and Robert A. Bambara* 873

Oxidative Metabolism of Linoleic Acid by Human Leukocytes *O. Reinaud, M. Delaforge, J. L. Boucher, F. Rocchiccioli, and D. Mansuy* 883

Amino-Terminal Region of Human Macrophage Colony-Stimulating Factor (M-CSF) Is Sufficient for Its *in Vitro* Biological Activity: Molecular Cloning and Expression of Carboxyl-Terminal Deletion Mutants of Human M-CSF *Masayuki Takahashi, Tohru Hirato, Masaaki Takano, Tsutomu Nishida, Kenji Nagamura, Takashi Kamogashira, Satoru Nakai, and Yoshikatsu Hirai* 892

Expression of Genes of Ferritin Subunits in Human Hepatoma Cell Lines
F. Costanzo, M. A. Bevilacqua, M. Giordano, and F. Cimino 902

The Anti-Conformation of 2′,3′-Dideoxy Nucleosides May Be Essential for Anti-HIV Activity: Evidence from the Crystal Structure of 2′,2′-Dideoxy Formycin A *S. Neidle, L. Urpi, P. Serafinowski, and D. Whitby* 910

Neurosteroids: Steroidogenesis in Primary Cultures of Rat Glial Cells after Release of Aminoglutethimide Blockade
Zhong Yi Hu, Ingrid Jung-Testas, Paul Robel, and Etienne-Emile Baulieu 917

Abortive Infection of the Virulent Phage 9NA in a Fatty Acid Auxotroph of *Salmonella typhimurium:* Effect of Fatty Acid Supplementation
Ruby Goyal and Maharani Chakravorty 923

Neural Cell Recognition Molecule F11: Membrane Interaction by Covalently Attached Phosphatidylinositol
J. Michael Wolff, Thomas Brümmendorf, and Fritz G. Rathjen 931

Paf-Acether Production by *Escherichia coli*
Yves Denizot, Elie Dassa, Jacques Benventiste, and Yòlene Thomas 939

Interaction of Synthetic Sarafotoxin with Rat Vascular Endothelin Receptors
Y. Hirata, H. Yoshimi, F. Marumo, T. X. Watanabe, S. Kumagaye, K. Nakajima, T. Kimura, and S. Sakakibara 441

Contribution of External and Internal Ca^{2+} to Changes in Intracellular Free Ca^{2+} Produced by Mitogens in Swiss 3T3 Fibroblasts: The Role of Dihydropyridine Sensitive Ca^{2+} Channels
R. Olsen, M. Seewald, and G. Powis 448

A Nuclear Casein Type II Kinase from Maize Endosperm Phosphorylating HMG Proteins *K. D. Grasser, U.-G. Maier, and G. Feix* 456

On the Reactions of Lignin Peroxidase Compound III (Isozyme H8)
Danying Cai and Ming Tien 464

A New D-Stereospecific Amino Acid Amidase from *Ochrobactrum anthropi*
Yasuhisa Asano, Tsutomu Mori, Sawako Hanamoto, Yasuo Kato, and Akiko Nakazawa 470

Biosynthesis of Paf-acether. XIV. Paf-acether Output in Murine Peritoneal Macrophages Is Regulated by the Level of Acetylhydrolase *Rémi Palmantier, Anne Dulioust, Hassina Maiza, Jacques Beneviste, and Ewa Ninio* 475

Confirmation of a Ping-Pong Mechanism for *S*-Adenosyl-L-Methionine: Magnesium Protoporphyrin Methyltransferase of Etiolated Wheat by an Exchange Reaction *William C. Yee, Susan J. Eglsaer, and William R. Richards* 483

Effects of Valinomycin on Calcium Mobilization in Vascular Smooth Muscle Cells Induced by Angiotensin II *E. Koh, S. Morimoto, S. Takamoto, R. Morita, S. Kim, T. Hironaka, T. Nabata, T. Onishi, and T. Ogihara* 491

Placental Estrogen Synthetase (Aromatase): Evidence for Phosphatase-Dependent Inactivation *Francis L. Bellino and Linda Holben* 498

Thermodynamic Parameters of the Binding of an Oligo-α-Thymidylate to Its Complementary Oligo-β-Adenylate Sequences *M. Durand, N. T. Thuong, and J. C. Maurizot* 505

Evidence for Two Platelet-Activating Factor Receptors on Eosinophils: Dissociation between PAF-Induced Intracellular Calcium Mobilization Degranulation and Superoxides Anion Generation in Eosinophils *Claus Kroegel, Tatsuo Yukawa, John Westwick, and Peter J. Barnes* 511

Kinetics of Heme Binding to Semi-α-Hemoglobin *Rah Youl Park and Melisenda J. McDonald* 522

Methylation of Human Ornithine Decarboxylase Gene before Transfection Abolishes Its Transient Expression in Chinese Hamster Ovary Cells *Maria Halmekytö, Ari Hirvonen, Jarmo Wahlfors, Leena Alhonen, and Juhani Jänne* 528

C-Terminal Angiogenin Peptides Inhibit the Biological and Enzymatic Activities of Angiogenin *Susanna M. Rybak, David S. Auld, Daret K. St. Clair, Qi-Zhi Yao, and James W. Fett* 535

The Binding of G Proteins to Immobilized Delipidated Rhodopsin *Alexander M. Dizhoor, Elina R. Nekrasova, and Pavel P. Philippov* 544

Identification of Membrane Antigens of Goat Epididymal Spermatozoa *Tapati Chatterjee and Gopal C. Majumder* 550

ERRATUM

Volume 159, Number 2, March 15, 1989: Michael N. Goodman, Lorianne K. Masuoka, Jeffrey S. deRopp, and A. Daniel Jones, "Use of Deuterium-Labeled Glucose in Evaluating the Pathway of Hepatic Glycogen Synthesis," pp. 522–527 557

Activities of Pz-peptidase and Endo-oligopeptidase Are Due to the Same Enzyme
Ursula Tisljar, Antonio C. M. de Camargo, Cristine A. da Costa, and Alan J. Barrett 1460

Glycogen-Bound Type-1 Phosphatase: Isolation and Dissociation of a Complex Containing Undegraded G-Subunit *E. Villa-Moruzzi and J. W. Crabb* 1465

Calcium-Induced Cleavage and Breakdown of Spectrin in the Rat Lens
Roger J. W. Truscott, Julia M. Marcantonio, Julie Tomlinson, and George Duncan 1472

Tyrosine Phosphorylation in Human Neutrophil
Julian Gomez-Cambronero, Chi-Kuang Huang, Valerie A. Bonak, Ellen Wang, John E. Casnellie, Tadayoshi Shiraishi, and Ramadan I. Sha'afi 1478

Expression of CEA-Related Genes in the First Trimester Human Placenta
T. McLenachan and B. Mansfield 1486

The Dephosphorylation of Lens α-Crystallin A Chain
Raúl Chiesa and Abraham Spector 1494

Interaction of Rat Brain Cytidylate Cyclase with Phospholipids
Shuji Mori, Norio Muto, and Itaru Yamamoto 1502

Presence of Covalently Attached Fatty Acids in Rat Apolipoprotein B via Thiolester Linkages *Vaijinath S. Kamanna and Diana M. Lee* 1508

EGF-Induced PGE_2 Release Is Synergistically Enhanced in Retinoic Acid-Treated Fetal Rat Lung Cells *Kerby C. Oberg and Graham Carpenter* 1515

Sequence of a Human Keratin 13 Specific cDNA Encompassing Coil 1B through the 3′ End *Peter Schulz, Elmar Wachter, Karl Hochstrasser, Artur G. Wild, and Dietmar Mischke* 1522

Specificity of Endoproteinase Asp-N (*Pseudomonas fragi*): Cleavage at Glutamyl Residues in Two Proteins *Diego Ingrosso, Audree V. Fowler, Janice Bleibaum, and Steven Clarke* 1528

E-Series Prostaglandins Activate cAMP-Mediated Potassium Currents in Follicle-Enclosed *Xenopus* Oocyte *Kensaku Mori, Shogo Oka, Akiko Tani, Seiji Ito, and Yasuyoshi Watanabe* 1535

Selective Inhibition of Complex I of the Brain Electron Transport System by Tetrahydroisoquinoline *Keiji Suzuki, Yoshikuni Mizuno, and Mitsuo Yoshida* 1541

Parathyroid Hormone (PTH) and PTH-like Protein (PLP) Stimulate Interleukin-6 Production by Osteogenic Cells: A Possible Role of Interleukin-6 in Osteoclastogenesis *G. W. G. M. Löwik, G. van der Pluijm, H. Bloys, K. Hoekman, O. L. M. Bijvoet, L. A. Aarden, and S. E. Papapoulos* 1546

20-kDa Homologous Restriction Factor of Complement Resembles T Cell Activating Protein *Hidechika Okada, Yoichi Nagami, Kazuhiro Takahashi, Noriko Okada, Teru Hideshima, Hisao Takizawa, and Jun Kondo* 1553

Characterization of the Coding Sequence of the Normal M4 α1-Antitrypsin Gene *Hiroshi Okayama, Mark D. Holmes, Mark L. Brantly, and Ronald G. Crystal* 1560

17β-(Cyclopropylamino)-androst-5-en-3β-ol, a Selective Mechanism-Based Inhibitor of Cytochrome $P450_{17\alpha}$ (Steroid 17α-Hydroxylase/$C_{17\text{-}20}$ Lyase) *Michael R. Angelastro, Marie E. Laughlin, Gerald L. Schatzman, Philippe Bey, and Thomas R. Blohm* 1571

Interleukin-1 Inhibits the Secretion of Gastric Acid in Rats: Possible Involvement of Prostaglandin *Akira Uehara, Toshikatsu Okumura, Chihiro Sekiya, Kiyoshi Okamura, Yuichi Takasugi, and Masayoshi Namiki* 1578

Dicyclohexylcarbodiimide-Binding Protein Is a Subunit of the *Methanosarcina barkeri* ATPase Complex *Ken-Ichi Inatomi, Masatomo Maeda, and Masamitsu Futai* 1585

ERRATUM

Volume 160, Number 2, April 28, 1989: Sudhir R. Gogu, Sunil K. Aggarwal, S. R. S. Rangan, and Krishna C. Agrawal, "A Pro-drug of Zidovudine with Enhanced Efficacy against Human Immunodeficiency Virus," pp. 656-661 1591

Purification and Spectroscopic Characteristics in *N*-Methylformamide of the *Azotobacter vinelandii* Fe–Mo Cofactor *Patrick Frank, Stephen F. Gheller, William E. Newton, and Keith O. Hodgson* 746

Acid-Promoted Tautomeric Lactonization and Oxidation–Reduction of Pyrroloquinoline Quinone (PQQ) *Paul M. Gallop, Edward Henson, Mercedes A. Paz, Susan L. Greenspan, and Rudolf Flückiger* 755

Interleukin-1β Is More Potent than Interleukin-1α in Suppressing Follicle-Stimulating Hormone-Induced Differentiation of Ovarian Granulosa Cells *Paul E. Gottschall, Goro Katsuura, and Akira Arimura* 764

Evidence for a Regulatory Action of Vanadate on Protein Phosphorylation in Brain Microvessels *R. E. Catalán, A. M. Martínez, M. D. Aragonés, and G. Díaz* 771

A Novel Ubiquitous Protein ''Chaperonin'' Supports the Endosymbiotic Origin of Mitochondrion and Plant Chloroplast *Radhey S. Gupta, David J. Picketts, and Suhail Ahmad* 780

Bleomycin Hydrolase Is a Unique Thiol Aminopeptidase *Chiaki Nishimura, Hideo Suzuki, Nobuo Tanaka, and Hideyo Yamaguchi* 788

Pertussis Toxin Inhibits Differentiation Induced by Retinoic Acid in a Human Promyelocytic Leukemia Cell Line HL-60 *Hiromichi Hemmi, Takehiko Nakamura, Yuso Goto, and Kazuo Sugamura* 797

Irreversible Inhibition of v-*src* Tyrosine Kinase Activity by Herbimycin A and Its Abrogation by Sulfhydryl Compounds *Yoshimasa Uehara, Hidesuke Fukazawa, Yuko Murakami, and Satoshi Mizuno* 803

Are Undifferentiated PC12 Rat Pheochromocytoma Cells Electrically Excitable? *Damir Janigro, Gianmaria Maccaferri, and Jacopo Meldolesi* 810

Control of Expression of the Human Glutathione *S*-Transferase π Gene Differs from Its Rat Ortholog *K. H. Dixon, I. G. Cowell, C. L. Xia, S. E. Pemble, B. Ketterer, and J. B. Taylor* 815

Liver Cytosolic Nondialyzable Factor(s) Can Counteract GTP-Dependent Ca^{2+} Release in Rat Liver Microsomal Fractions *Rosella Fulceri, Andrea Romani, Giorgio Bellomo, and Angelo Benedetti* 823

Phosphorylation and Dephosphorylation of the Natriuretic Peptide Urodilatin (CDD-/ANP-95-126) and the Effect on Biological Activity *Thomas Dörner, Michael Gagelmann, Stephan Feller, Franz Herbst, and Wolf-Georg Forssman* 830

Protein Kinase C Involvement in Lipid Peroxidation and Cell Membrane Damage Induced by Oxygen-Based Radicals in Hepatocytes *A. A. vonRuecker, B.-G. Han-Jeon, M. Wild, and F. Bidlingmaier* 836

Formation of a Phosphoramide Mustard–Nucleotide Adduct That Is Not by Alkylation at the N7 Position of Guanine *Alexander E. Maccubbin, Lida Caballes, Girish B. Chheda, Robert F. Struck, and Hira L. Gurtoo* 843

Tetramer Formation of a Variant Type Human Transthyretin (Prealbumin) Produced by *Escherichia coli* Expression System *Hirokazu Furuya, Masamitsu Nakazato, Maria Joao Mascarenhas Saraiva, Pedro P. Costa, Hiroyuki Sasaki, Hisayuki Matsuo, Ikuo Goto, and Yoshiyuki Sakaki* 851

Perturbations in Cerebral Oxygen Radical Formation and Membrane Order following Vitamin E Deficiency *C. P. LeBel, I. N. Odunze, J. D. Adams, Jr., and S. C. Bondy* 860

Interferon Effects upon Fluorouracil Metabolism by HL-60 Cells *Laurence Elias and Jean M. Sandoval* 867

The 34-kDa Insulin-like Growth Factor Binding Proteins in Human Cerebrospinal Fluid and the A673 Rhabdomyosarcoma Cell Line Are Human Homologs of the Rat BRL-3A Binding Protein *Joyce A. Romanus, Lucy Y.-H. Tseng, Yvonne W.-H. Yang, and Matthew M. Rechler* 875

Identification of a Type 1 Insulin-like Growth Factor Binding Protein (IGF BP) in Serum from Rats with Diabetes Mellitus *Terry G. Unterman, David T. Oehler, and Ronald E. Becker* 882

Purification of Erythropoiesis-Stimulating Activity (ESA) from One Actinomycetes Strain *Makiko Sugie, Syuichi Oka, and Hideoki Tanaka* 888

Growth Hormone-Induced Alteration of Morphology and Tubulin Expression in 3T3 Preadipose Cells *Seth Guller, Robert E. Corin, Kai-Yuan Wu, and Martin Sonenberg* 895

Angiogenin Depresses Aortic Smooth Muscle Cell cAMP by a Pertussis Toxin Sensitive Mechanism *Yan Xiao, Roy Bicknell, and Bert L. Vallee* 902

Nucleotide Sequence of *AMS1*, the Structure Gene of Vacuolar α-Mannosidase of *Saccharomyces cerevisiae* *Tohru Yoshihisa and Yasuhiro Anraku* 908

In Vitro Carotenogenesis and Characterization of the Phytoene Desaturase Reaction in *Anacystis* *Gerhard Sandmann and Susanne Kowalczyk* 916

A Phospholipase D-like Mechanism in Pancreatic Islet Cells: Stimulation by Calcium Ionophore, Phorbol Ester, and Sodium Fluoride *Marjorie Dunlop and Stewart A. Metz* 922

Direct Regulation of Smooth Muscle Contractile Elements by Second Messengers *Junji Nishimura and Cornelis van Breemen* 929

Functional Endothelin/Sarafotoxin Receptors in Rat Heart Myocytes: Structure–Activity Relationships and Receptor Subtypes *Ronit Galron, Yoel Kloog, Avner Bdolah, and Mordechai Sokolovsky* 936

Crosslinking of Lipocortin I and Enhancement of Its Ca^{2+} Sensitivity by Tissue Transglutaminase *Yoshihiro Ando, Sadao Imamura, M. Koji Owada, Takeo Kakunaga, and Reiji Kannagi* 944

Binding of Insulin-like Growth Factor-I by Glomerular Endothelial and Epithelial Cells: Further Evidence for IGF-I Action in the Renal Glomerulus *Francesco G. Conti, Sharon J. Elliot, Liliane J. Striker, and Gary E. Striker* 952

Secreted α-Amidating Enzymes Are Generated by Specific Post-translational Processing of Precursors Containing Transmembrane Domains *Gary A. Beaudry and Arthur H. Bertelsen* 959

Molecular Cloning and Sequence Analysis of cDNA for Human Hepatocyte Growth Factor *Keiji Miyazawa, Hirohito Tsubouchi, Daiji Naka, Kazuhiro Takahashi, Mitsuhiko Okigaki, Naokatsu Arakaki, Hiroyuki Nakayama, Shuichi Hirono, Osamu Sakiyama, Kozo Takahashi, Eiichi Gohda, Yasushi Daikuhara, and Naomi Kitamura* 967

Pro→ Leu Change at Position 102 of Prion Protein Is the Most Common but Not the Sole Mutation Related to Gerstmann–Sträussler Syndrome *Katsumi Doh-ura, Jun Tateishi, Hiroyuki Sasaki, Tetsuyuki Kitamoto, and Yoshiyuki Sakaki* 974

Synthetic Non-peptide Inhibitors of HIV Protease *Jeffrey J. Blumenstein, Terry D. Copeland, Stephen Oroszlan, and Christopher J. Michejda* 980

Stimulation of Protein Phosphorylation by Atrial Natriuretic Factor in Plasma Membranes of Bovine Adrenal Cortical Cells *Kailash N. Pandey* 988

The Identification of a Novel Inositol Lipid, Phosphatidylinositol Trisphosphate (PIP3), in Rat Cerebrum Using *in Vivo* Techniques *Robert E. Vadnal and Ranganathan Parthasarathy* 995

Renal Necrosis and the Involvement of a Single Enzyme of the *de Novo* Pathway for the Biosynthesis of Platelet-Activating Factor in the Rat Kidney Inner Medulla *Ten-ching Lee, Boyd Malone, Donna Woodard, and Fred Snyder* 1002

Human T-Cell Leukemia Virus Minus Strand Transcription in Infected T-Cells *David Larocca, Lorrine A. Chao, Marian H. Seto, and Terence K. Brunck* 1006

Indirect Evidence That Protein Kinase C Plays a Critical Role in Signal Transduction of Both Vasopressin and Corticotropin-Releasing Factor on Pituitary Cells in Culture *B. Koch and B. Lutz-Bucher* 1014

A Pregnancy-Specific β1-Glycoprotein, a CEA Gene Family Member, Expressed in a Human Promyelocytic Leukemia Cell Line, HL-60: Structures of Protein, mRNA, and Gene *Shinzo Oikawa, Chikako Inuzuka, Motomu Kuroki, Yuji Matsuoka, Goro Kosaki, and Hiroshi Nakazato* 1021

L-Arginine Is a Precursor for Nitrate Biosynthesis in Humans *Cynthia D. Leaf, John S. Wishnok, and Steven R. Tannenbaum* 1032

Tumor Necrosis Factor-α Inhibits Follicle-Stimulating Hormone-Induced Differentiation in Cultured Rat Granulosa Cells
J. M. Darbon, F. Oury, J. Laredo, and F. Bayard 1038

Evidence for a Novel Metabolic Pathway of (ADP-Ribose)$_n$: Pyrophosphorolysis of ADP-Ribose in HeLa S3 Cell Nuclei *Sei-ichi Tanuma* 1047

Deletion of 3′ Untranslated Region of Human BSF-2 mRNA Causes Stabilization of the mRNA and High-Level Expression in Mouse NIH3T3 Cells
Naoto Tonouchi, Kiyoshi Miwa, Hajime Karasuyama, and Hiroshi Matsui 1056

Enzymatic and Nonenzymatic Mono ADP-Ribosylation of Proteins in Skeletal Muscle *Yasuharu Tanaka, Koichiro Yoshihara, and Tomoya Kamiya* 1063

Connective Tissue Activation. XXXIII. Biologically Active Cleavage Products of CTAP-III from Human Platelets
C. W. Castor, D. A. Walz, C. G. Ragsdale, P. A. Hossler, E. M. Smith, M. C. Bignall, B. P. Aaron, and K. Mountjoy 1071

Continuous Spectrophotometric Assay for Retroviral Proteases of HIV-1 and AMV *Nashaat T. Nashed, John M. Louis, Jane M. Sayer, Ewald M. Wondrak, Peter T. Mora, Stephen Oroszlan, and Donald M. Jerina* 1079

Post-translational and Direct Integration of Heme Oxygenase into Microsomes
Tadashi Yoshida and Michihiko Sato 1086

A Unique Low Frequency Raman Band Associated with Metal Binding to Metallothionein *Timothy E. Elgren and Dean E. Wilcox* 1093

The Primary Structure of Human EGF Produced by Genetic Engineering, Studied by High-Performance Tandem Mass Spectrometry
Mami Furuya, Satoko Akashi, and Kazuo Hirayama 1100

Increased Level of Apolipoprotein B mRNA in the Liver of Ventromedial Hypothalamus Lesioned Obese Rats *Yoshiaki Inui, Sumio Kawata, Yuji Matsuzawa, Katsuto Tokunaga, Shigenori Fujioka, Shinji Tamura, Takashi Kobatake, Yoshiaki Keno, and Seiichiro Tarui* 1107

Poly(ADP-Ribose) Polymerase Inhibits DNA Synthesis Initiation in the Absence of NAD$^+$ *Tsutomu Nobori, Hisashi Yamanaka, and Dennis A. Carson* 1113

Human Autoantibodies against a Nucleolar Protein *Ingela Kindås-Mügge* 1119

Purification and Characterization of Proteins with Associated Tyrosine Protein Kinase Activity from Human B Lymphocytes
Marianne Semmel, Jean Michel Biquard, Nadine Pavloff, Nicole Hanania, and Francoise Gay 1128

Characterization of Phosphopeptides Released during Dialysis of EDTA-Reacted Highly Purified DNA Prepared from Calf Thymus Nuclei
Richard S. Welsh 1135

The Two Core Sequences of the Adenovirus E1A Inducible E4 Promoter Are Required for the Formation of a Specific DNA–Protein Complex
Pascale Gilardi, Leslie Stratford, Jean-Marc Egly, and Michel Perricaudet 1143

ADP and, Indirectly, ATP Are Potent Inhibitors of cAMP Production in Intact Isoproterenol-Stimulated C6 Glioma Cells
Isabelle Pianet, Michel Merle, and Julie Labouesse 1150

Deoxycytidine Is Salvaged Not Only into DNA But Also into Phospholipid Precursors. II. ARA-C Does Not Inhibit the Later Process in Lymphoid Cells *Mária Sasvári-Székely, Tatjana Spasokukotskaja, Ágnes Soóki-Tóth, G. Pogány, L. Kopper, and Mária Staub* 1158

Peculiar Effects of Temperature and Polyvinylalcohol on the Activity of Bovine Serum Amine Oxidase *O. Befani, S. Sabatini, M. A. Mateescu, and B. Mondoví* 1168

cDNA Cloning of Gb, the Substrate for Botulinum ADP-Ribosyltransferase from Bovine Adrenal Gland and Its Identification as a *rho* Gene Product *Toshiya Ogorochi, Yasuo Nemoto, Masatoshi Nakajima, Etsuo Nakamura, Motohatsu Fujiwara, and Shuh Narumiya* 1175

Identification of a Dihydropyridine-Sensitive Calcium Channel in Chick Brain by a Monoclonal Antibody *Masami Takahashi and Yoshiko Fujimoto* 1182

ADDENDUM AND ERRATUM

Volume 161, Number 2, June 15, 1989: T. Geoffrey Flynn, Anoop Brar, Linda Tremblay, Inder Sarda, Christina Lyons, and Donald B. Jennings, ''Isolation and Characterization of Iso-rANP, a New Natriuretic Peptide from Rat Atria,'' pp. 830–837 1189

IN MEMORIAM

Alberto Sols (1917–1989) v

Leukotriene A_4 Hydrolase Activity of Human Airway Epithelial Cells *Timothy D. Bigby, David M. Lee, Nicole Meslier, and Dieter C. Gruenert* 1

Inositol Trisphosphate-Independent Increase of Intracellular Free Calcium and Amylase Secretion in Pancreatic Acini *Ashok K. Saluja, Robert E. Powers, and Michael L. Steer* 8

Dimerization of Hepatitis B Viral X Protein Synthesized in a Cell-Free System *Meei-Hua Lin and Szecheng J. Lo* 14

The Biological Activity of Interferon-α Is Influenced by Two Distinct Regions in the Protein *Jaap Bosveld, Kor van As, Arnold C. P. Hekman, Margreet van Heuvel, Jan Trapman, and Ellen C. Zwarthoff* 22

Substitution Mutations of the Highly Conserved Arginine 87 of HIV-1 Protease Result in Loss of Proteolytic Activity *John M. Louis, C. A. Dale Smith, Ewald M. Wondrak, Peter T. Mora, and Stephen Oroszlan* 30

Cell Adhesion Activity of Nonspecific Cross-Reacting Antigen (NCA) and Carcinoembryonic Antigen (CEA) Expressed on CHO Cell Surface: Homophilic and Heterophilic Adhesion *Shinzo Oikawa, Chikako Inuzuka, Motomu Kuroki, Yuji Matsuoka, Goro Kosaki, and Hiroshi Nakazato* 39

Membrane Attachment of Recombinant G-Protein α-Subunits in Excess of βγ-Subunits in a Eukaryotic Expression System *William F. Simonds, Regina M. Collins, Allen M. Spiegel, and Mark R. Brann* 46

Characterization of Renal Glomerular Endothelin Receptors in the Rat *G. Gauquelin, G. Thibault, and R. Garcia* 54

UK-69,578, a Novel Inhibitor of EC 3.4.24.11 Which Increases Endogenous ANF Levels and Is Natriuretic and Diuretic *J. C. Danilewicz, P. L. Barclay, I. T. Barnish, D. Brown, S. F. Campbell, K. James, G. M. R. Samuels, N. K. Terrett, and M. J. Wythes* 58

Multiple Neuropeptides Mobilize Calcium in Small Cell Lung Cancer: Effects of Vasopressin, Bradykinin, Cholecystokinin, Galanin, and Neurotensin *Penella J. Woll and Enrique Rozengurt* 66

Abundance of Endothelin-3 in Rat Intestine, Pituitary Gland, and Brain *Hirokazu Matsumoto, Nobuhiro Suzuki, Haruo Onda, and Masahiko Fujino* 74

The 5′ Region of the Rat Phosphoenolypurvate Carboxykinase Gene Confers pH Sensitivity to Chimeric Genes Expressed in Renal and Liver Cell Lines Capable of Expressing PEPCK *Allan S. Pollock and Judith A. Long* 81

Observation of Arginyl-Deoxyoligonucleotide Interactions in *Taq* I Endonuclease by Detection of Specific ^{1}H NMR Signals from 140-kDa[Nη1,Nη2,^{15}N Arg]*Taq* I/Oligomer Complexes *John Glushka, Francis Barany, and David Cowburn* 88

Human Intestinal Lactase-Phlorizin Hydrolase: Isolation and Preparation of a Specific Antiserum *R. O. Castillo, L. K. Kwong, A. M. Reisenauer, and K. K. Tsuboi* 94

Inhibition of Protein Kinase C by Sphingosine Correlates with the Presence of Positive Charge *Remo Bottega, Richard M. Epand, and Eric H. Ball* 102

Competitive Peptide Antagonists of ANF-Induced Cyclic Guanosine Monophosphate Production *T. J. Abell, A. M. Richards, T. G. Yandle, E. A. Espiner, C. Frampton, and H. Ikram* 108

Involvement of Transforming Growth Factor-α Secreted by Macrophages in Metallothionein Induction by Endotoxin *Yoshio Iijima, Tomihiro Fukushima, and Futami Kosaka* 114

Thrombin's Effects on Osteoblastic Cells: I. Cytosolic Calcium and Phosphoinositides *Dimitris N. Tatakis, Calogero Dolce, and Rosemary Dziak* 119

Arginine-Specific ADP-Ribosyltransferase from Rabbit Skeletal Muscle Sarcoplasmic Reticulum Is Solubilized as the Active Form with Trypsin: Partial Purification and Characterization *Masateru Taniguchi, Yoshinori Tanigawa, Mikako Tsuchiya, Koichi Mishima, Seiji Obara, Kazuo Yamada, and Makoto Shimoyama* 128

Intracellular Copper Transport in Cultured Hepatoma Cells *Jonathan H. Freedman and Jack Peisach* 134

Isolation and Characterization of a Tumor-Derived Human Pancreastatin-Related Protein *Susumu Funakoshi, Hirokazu Tamamura, Mitsuhiro Ohta, Kumi Yoshizawa, Akihiro Funakoshi, Kyoko Miyasaka, Kayoko Tateishi, Kazuhiko Tatemoto, Itsuro Nakano, Haruaki Yajima, and Nobutaka Fujii* 141

The Same Nuclear Proteins Bind the Proximal CACCC Box of the Human β-Globin Promoter and a Similar Sequence in the Enhancer *Barbara Giglioni, Paola Comi, Antonella Ronchi, Roberto Mantovani, and Sergio Ottolenghi* 149

Direct Sequencing of Deleted Mitochondrial DNA in Myopathic Patients *Masashi Tanaka, Wataru Sato, Kinji Ohno, Tomoko Yamamoto, and Takayuki Ozawa* 156

Histamine Formed in Stimulated Human Platelets Is Cytoplasmic *Satya P. Saxena, Archibald McNicol, Lorne J. Brandes, Allan B. Becker, and Jon M. Gerrard* 164

DPH Lifetime Distributions in Vesicles Containing Phospholipid Hydroperoxides *Mary Lou Wratten, Enrico Gratton, Martin van de Ven, and Alex Sevanian* 169

Isolation and Characterization of a Molecular cDNA Clone of a Human mRNA from Interferon-Treated Cells Encoding Nucleolar Protein B23, Numatrin *Xuxian T. Zhang, Daniel C. Thomis, and Charles E. Samuel* 176

10-*N*-Nonyl-Acridine Orange: A Fluorescent Probe Which Stains Mitochondria Independently of Their Energetic State *Abderrahman Maftah, Jean Michel Petit, Marie-Hélène Ratinaud, and Raymond Julien* 185

Binding Kinetics of Mutated Insulin Receptors in Transfected Cells Grown in Suspension Culture: Application to the Tyr→Phe 960 Insulin Receptor Mutant *Ronald M. Shymko, Noe S. Gonzales, Jonathan M. Backer, Morris F. White, and Pierre De Meyts* 191

Effects of Interleukin 4 on Neonatal B Lymphocyte Tolerance *Valerian B. Pinto, Richard L. Riley, and James S. Peacock* 199

Solubilization and Identification of Human Placental Endothelin Receptor *Shigeo Nakajo, Masanori Sugiura, Rudolf M. Snajdar, Frank H. Boehm, and Tadashi Inagami* 205

Free and Bound Sodium in Pancreatic β-Cells Exposed to Glucose and Tolbutamide *Liaquat Ali, Eva Grapengiesser, Erik Gylfe, Bo Hellman, and Per-Eric Lund* 212

Increased Membrane-Associated Transglutaminase Activity in Psoriasis *Jorgen Esmann, John J. Voorhees, and Gary J. Fisher* 219

Isolation and Characterization of a Partial cDNA for a Human Sialytransferase *Peter Lance, Karen M. Lau, and Joseph T. Y. Lau* 225

*Eco*RI DNA Methylase Activity Is Eliminated upon Histidine Residue Modification *Elizabeth Ann Everett and N. O. Reich* 233

High Level Expression of p55, a Thyroid Hormone Binding Protein Which Is Homologous to Protein Disulfide Isomerase in a Retroviral Vector *Hirokazu Kato, Thierry Velu, and Sheue-yann Cheng* 238

The Occurrence of Mouse-Type Oligosaccharides in Mouse–Human Chimeric Immunoglobulin G *Taei Matsui, Jiharu Hamako, Koh-zoh Kameyama, Yoshikazu Kurosawa, Koiti Titani, and Tsuguo Mizuochi* 245

In Vivo Biosynthesis of a Stage-Specific Cuticle Glycoprotein during Early Metamorphosis of the Medfly *Ceratitis capitata* *Graciela L. Boccaccio and Luis A. Quesada-Allué* 251

The Transformation-Sensitive Heat Shock Protein (HSP47) Binds Specifically to Fetuin *Akira Nakai, Kazunori Hirayoshi, Shinsuke Saga, Kenneth M. Yamada, and Kazuhiro Nagata* 259

Biosynthesis of a Renin Binding Protein *Kiyoshi Fukui, Hiroyasu Inoue, Saori Takahashi, and Yoshihiro Miyake* 265

A Novel Strategy for Producing Chimeric Bispecific Antibodies by Gene Transfection *Sirirurg Songsivilai, Patricia M. Clissold, and Peter J. Lachmann* 271

Stimulation of Growth of Human Breast Cancer Cell Lines in Culture by Linoleic Acid *David P. Rose and Jeanne M. Connolly* 277

The Effect of Interleukin-1α and Tumor Necrosis Factor α on the Secretion of Human Chorionic Gonadotropin by Jar Human Choriocarcinoma Cells *Mark L. Silen, Adolfo Firpo, Tova Francus, Renate F. Klein, and Stephen F. Lowry* 284

An Early Elevation of Diacylglycerol and Phosphatidate in Regenerating Liver *Stephen B. Bocckino, Pamela B. Wilson, and John H. Exton* 290

Hormone-Specific Phosphorylation and Transformation of Chicken Oviduct Progesterone Receptor *Makoto Nakao and V. K. Moudgil* 295

Interactions of Acetylated Histones with DNA as Revealed by uv Laser-Induced Histone–DNA Crosslinking *Y. Yu. Stefanovsky, S. I. Dimitrov, D. Angelov, and I. G. Pashev* 304

Comparative Activity of α- and β-Anomeric Oligonucleotides on Rabbit β Globin Synthesis: Inhibitory Effect of Cap Targeted α-Oligonucleotides *Jean-Rémi Bertrand, Jean-Louis Imbach, Claude Paoletti, and Claude Malvy* 311

Diabetes-like Action of Intermittent Fasting on Sarcoplasmic Reticulum Ca^{2+}-Pump ATPase and Myosin Isoenzymes Can Be Prevented by Sucrose *Heinz Rupp, Vijayan Elimban, and Naranjan S. Dhalla* 319

Determination of Immunoreactive Endothelin in Medium from Cultured Endothelial Cells and Human Plasma *Yu-Ting Xuan, A. R. Whorton, E. Shearer-Poor, J. Boyd, and W. D. Watkins* 326

Demonstration of GTP-Binding Proteins and ADP-Ribosylated Proteins in Rat Liver Golgi Fraction *Chie Toki, Kimimitsu Oda, and Yukio Ikehara* 333

Comparison of Effects of Protein Kinase C Inhibitors on Phorbol Ester-Induced CD4 Down-Regulation and Augmentation of Human Immunodeficiency Virus Replication in Human T Cell Lines *Yoshiaki Hamamoto, Yasuhiro Hayashida, Susumu Kobayashi, Tatsuya Tamaoki, Naoki Yamamoto, and Nobuyuki Kobayashi* 339

Evaluation of the Effects of Erythro-9(2-hydroxy-3-nonyl) Adenine (EHNA) on HIV-1 Production *in Vitro* *Yoshitatsu Sei, Masahiro Inoue, Izumi Tsuboi, M. Mitsuo Yokoyama, and Prince K. Arora* 345

Osmosis and Microgravity *Harold A. Papazian and Larry W. Mason* 351

Proteins Associated with mRNA in Cells Infected with Herpes Simplex Virus *Charles R. Krikorian and G. Sullivan Read* 355

Mitochondrial rRNA-Containing Petite Strains of Yeast (*Saccharomyces cerevisiae*) Show a Normal Nuclear-Mitochondrial Stringent Response *Catherine M. McEntee, Robin Cantwell, Lisa C. Thomas, and Alan P. Hudson* 362

Developmental Changes in the Activities of Phospholipase C, 3-Kinase, and 5-Phosphatase in Rat Brain *Kyung Ho Moon, Sang Yeol Lee, and Sue Goo Rhee* 370

Blood–Brain Barrier Glucose Transporter mRNA Is Increased in Experimental Diabetes Mellitus *Thomas B. Choi, Ruben J. Boado, and William M. Pardridge* 375

Site-Directed Mutagenesis of the β-Subunit of the Yeast Mitochondrial ATPase *David M. Mueller* 381

Function of the Hexameric Sequence in the Cauliflower Mosaic Virus 35 S RNA Promoter Region *Takefumi Kawata, Atsunori Nakatsuka, Tetsuya Tabata, and Masaki Iwabuchi* 387

Establishment of Radioimmunoassay for Human Islet Amyloid Polypeptide and Its Tissue Content and Plasma Concentration *Masamitsu Nakazato, Junko Asai, Kenji Kangawa, Shigeru Matsukura, and Hisayuki Matsuo* 394

Isolation and Sequence Determination of Rat Islet Amyloid Polypeptide *Junko Asai, Masamitsu Nakazato, Kenji Kangawa, Shigeru Matsukura, and Hisayuki Matsuo* 400

Tissue- and Cell Type-Specific Expression of mRNAS for Four Types of Inositol Phospholipid-Specific Phospholipase C *Yoshimi Homma, Tadaomi Takenawa, Yasufumi Emori, Hiroyuki Sorimachi, and Koichi Suzuki* 406

The *in Vitro* Effect of 1α,25-Dihydroxyvitamin D_3 on Insulin Production by Neonatal Rat Islets *Michael C. d'Emden, Marjorie Dunlop, Richard G. Larkins, and John D. Wark* 413

Kaempferol Inhibits Myosin Light Chain Kinase *John C. Rogers and David L. Williams, Jr.* 419

Hydrophobic Moieties in Cations, Anions, and Alcohols Promote the B-to-Z Transition in Poly[d(G-C)] and Poly[dG-m^5 C)] *Nazli B. McDonnell and Richard S. Preisler* 426

Negative Functional Interference between Two Active Centers Is Indicated in Animal Fatty Acid Synthetase *Hiroyuki Kyushiki and Atsushi Ikai* 434

Human α-L-Fucosidase: Complete Coding Sequence from cDNA Clones *Teresa Occhiodoro, Kerri R. Beckmann, C. Phillip Morris, and John J. Hopwood* 439

Human Red Blood Cells as Bioreactors for the Release of 2′,3′-Dideoxycytidine, an Inhibitor of HIV Infectivity *Mauro Magnani, Marzia Bianchi, Luigia Rossi, and Vilberto Stocchi* 446

Cloning and Comparative Mapping of a Human Class III(χ) Alcohol Dehydrogenase cDNA
P. Rathna Giri, Jane F. Krug, Christine Kozak, Tamyra Moretti, Stephen J. O'Brien, Hector N. Seuanez, and David Goldman 453

Suppression of Insulin-Stimulated Glucose Transport in L6 Myocytes by Calcitonin Gene-Related Peptide
D. Kreutter, S. J. Orena, and K. M. Andrews 461

Complete Deficiency of 20 kDa Homologous Restriction Factor (HRF20) and Restoration with Purified HRF20
Noriko Okada, Ryoko Harada, Ryo Taguchi, and Hidechika Okada 468

Endothelin-1 Increases Intracellular Calcium Mobilization but not Calcium Uptake in Rabbit Vascular Smooth Muscle Cells
Russell A. Bialecki, Nicholas J. Izzo, Jr., and Wilson S. Colucci 474

Isolation and Characterization of a Mouse L Cell Variant Deficient in Glucocorticoid Receptors
Paul R. Housley and Antonia M. Forsthoefel 480

Interleukin-1β Stimulates Phospholipase A_2 mRNA Synthesis in Rabbit Articular Chondrocytes *Bernadette Lyons-Giordano, Gary L. Davis, William Galbraith, Michael A. Pratta, and Elizabeth C. Arner* 488

Novel Peptide Inhibitor (SPAI) of Na^+, K^+-ATPase from Porcine Intestine
K. Araki, J. Kuroki, O. Ito, M. Kuwada, and S. Tachibana 496

Primary Structure and Functional Expression of *h*-Caldesmon Complementary DNA *Ken'ichiro Hayashi, Keiko Kanda, Fusao Kimizuka, Ikunoshin Kato, and Kenji Sobue* 503

The Presence of a 33- to 40-kDa Gastrin Binding Protein on Human and Mouse Colon Cancer *Louis Chicone, Satya Narayan, Courtney M. Townsend, Jr., and Pomila Singh* 512

Novel Characteristics of a 33-kDa Protein (pp33) Rapidly Phosphorylated in IL3-Dependent Cells by Stimulation with IL3
John M. Garland, Douglas K. Ferris, and William L. Farrar 520

Expression of Cellular Retinoic Acid Binding Protein II (Chick-CRABP II) in the Chick Embryo *Toshihiro Kitamoto, Mariko Momoi, and Takashi Momoi* 531

Amino Acid Sequence and Relative Biological Activity of Eel Atrial Natriuretic Peptide *Y. Takei, A. Takahashi, T. X. Watanabe, K. Nakajima, and S. Sakakibara* 537

Mechanism for the Generation of Active Smooth Muscle Inhibitory Factor (IF) from Bovine Retractor Penis Muscle (BRP)
Yoshiki Yui, Shigeki Ohkawa, Kohji Ohnishi, Ryuichi Hattori, Takeshi Aoyama, Mamoru Takahashi, Hiroshi Morishita, Yasutsugu Terao, and Chuichi Kawai 544

L-Pipecolate Oxidase: A Distinct Peroxisomal Enzyme in Man
R. J. A. Wanders, G. J. Romeyn, R. B. H. Schutgens, and J. M. Tager 550

Membrane-Associated Cathepsin L: A Role in Metastasis of Melanomas
Jurij Rozhin, Ronald L. Wade, Kenneth V. Honn, and Bonnie F. Sloane 556

Novel GTP-Binding Proteins in Plasma Membranes of the Fungus *Metarhizium anisopliae* *Raymond J. St. Leger, Donald W. Roberts, and Richard C. Staples* 562

Isolation of a Novel 38 Residue-Hypothalamic Polypeptide Which Stimulates Adenylate Cyclase in Pituitary Cells *Atsuro Miyata, Akira Arimura, Raymond R. Dahl, Naoto Minamino, Akira Uehara, Lun Jiang, Michael D. Culler, and David H. Coy* 567

Sequence Homology of a Canine Brain Calcium-Binding Protein with Calregulin and the Human Ro/SS-A Antigen *John H. Collins, Zhijian Xi, Barbara H. Alderson-Lang, Susan Treves, and Pompeo Volpe* 575

In Vitro Phosphorylation of the Tumor Suppressor Gene RB Protein by Mitosis-Specific Histone H1 Kinase *Yoichi Taya, Hideyo Yasuda, Masayuki Kamijo, Kazuyasu Nakaya, Yasuharu Nakamura, Yoshiki Ohba, and Susumu Nishimura* 580

Endothelin-3 Is a Novel Neuropeptide: Isolation and Sequence Determination of Endothelin-1 and Endothelin-3 in Porcine Brain *Osamu Shinmi, Sadao Kimura, Tatsuya Sawamura, Yoshiki Sugita, Toshihiro Yoshizawa, Yasuo Uchiyama, Masashi Yanagisawa, Katsutoshi Goto, Tomoh Masaki, and Ichiro Kanazawa* 587

ERRATUM
Volume 162, Number 3, August 15, 1989: D. Le-Nguyen, H. Mattras, M-A. Coletti-Previero, and B. Castro, "Design and Chemical Synthesis of a 32 Residue Chimeric Microprotein Inhibiting both Trypsin and Carboxypeptidase A," pp. 1425–1430 594

Volume 164, Number 2, October 31, 1989

AUTHOR INDEX, Volume 164, Number 2, October 31, 1989 iii

Substance P Stimulates Translocation of Protein Kinase C in Brain Microvessels *R. E. Catalán, A. M. Martínez, M. D. Aragonés, and I. Fernández* 595

Control of Alginate Synthesis in *Pseudomonas aeruginosa:* Regulation of the *algR1* Gene *Kazuhide Kimbara and A. M. Chakrabarty* 601

Amphotericin B and Nystatin Show Different Activities on Sterol-Free Vesicles *B. S. Whyte, R. P. Peterson, and S. C. Hartsel* 609

Epinephrine Activation of Heparin-Nonreleasable Lipoprotein Lipase in Three Skeletal Muscle Fiber Types of the Rat *Wayne C. Miller, Jan Gorski, Lawrence B. Oscai, and Warren K. Palmer* 615

Changes in the Expression of Superoxide Dismutase and Catalase as a Function of Age and Dietary Restriction *Imre Semsei, Govinda Rao, and Arlan Richardson* 620

Leukotriene Metabolism and Hypersensitivity in Man and Mouse *George L. Card, Thulasi Unnithan, Michael J. Rhodes, and Barbara E. Wright* 626

cDNA Sequence of Human Class III Alcohol Dehydrogenase *Chander P. Sharma, Edward A. Fox, Barton Holmquist, Hans Jörnvall, and Bert L. Vallee* 631

Inhibitory Action of Atrial Natriuretic Factor on Cholinergic and Nonadrenergic, Noncholinergic Neurotransmission in Guinea Pig Small Intestine
Ondrej Matusak and Otto Kuchel 638

Pineal Muscarinic Phosphoinositide Response: Pertussis Toxin Resistant Signaling with Very Low Receptor Number
Jarmo T. Laitinen, Tichomir Torda, and Juan M. Saavedra 645

Production and Characterization of Monoclonal Antibodies against Particulate Guanylate Cyclase in Porcine Kidney
Masahiro Takada, Hitoshi Takeuchi, Mitsumasa Shino, Sachiyuki Hamano, and Toshiharu Ohgoh 653

Nerve and Epidermal Growth Factors Induce the Release of the Alzheimer Amyloid Precursor from PC12 Cell Cultures
Lawrence M. Refolo, Steven R. J. Salton, John P. Anderson, Pankaj Mehta, and Nikolaos K. Robakis 664

HeLa Cells Contain the Atrial Natriuretic Peptide Receptor with Guanylate Cyclase Activity *Valerie M. Watt and Cecil C. Yip* 671

Biosynthesis of Endothelium-Derived Relaxing Factor: A Cytosolic Enzyme in Porcine Aortic Endothelial Cells Ca^{2+}-Dependently Converts L-Arginine into an Activator of Soluble Guanylyl Cyclase
Bernd Mayer, Kurt Schmidt, Peter Humbert, and Eycke Böhme 678

Different Induction of p55 and p70/75 Interleukin-2 Receptor Subunits in Human Cells *Toshio Tanaka, Susumu Kishimoto, and Osamu Saiki* 686

Consistent Oncogene Methylation Changes in Epithelial Cells Chemically Transformed *in Vitro* *Marc J. Mass, Nancy S. Schorschinsky, Jessica A. Lasley, Diane K. Beeman, and Stephen J. Austin* 693

Actin Assembly in Electropermeabilized Neutrophils: Role of G-Proteins
Gregory P. Downey, C. Kin Chan, and Sergio Grinstein 700

Two Distinct Receptors for ATP Can Be Distinguished in Swiss 3T6 Mouse Fibroblasts by Their Desensitization *Fernando A. Gonzalez, Eugene Bonapace, Ilana Belzer, Ilan Friedberg, and Leon A. Heppel* 706

Depletion of Arterial L-Arginine Causes Reversible Tolerance to Endothelium-Dependent Relaxation *Michele E. Gold, Peggy A. Bush, and Louis J. Ignarro* 714

Glutathione Disulfide Formation and Lipid Peroxidation during Cardiac Ischemia and Reflow in the Dog *in Vivo* *Matthew L. Lenz, Lloyd H. Michael, Charles V. Smith, Helen Hughes, Scott B. Shappell, Addison A. Taylor, Mark L. Entman, and Jerry R. Mitchell* 722

Computer-Assisted Imaging Cytometry of Nuclear Chromatin Reveals Bone Tumor Virus Infection and Neoplastic Transformation of Adherent Osteoblast-like Cells *J. Schmidt, M. Aubele, U. Jütting, K. Rodenacker, A. Luz, V. Erfle, and G. Burger* 728

Monoclonal Antibodies Directed against Basic Fibroblast Growth Factor Which Inhibit Its Biological Activity *in Vitro* and *in Vivo* *Thomas M. Reilly, David S. Taylor, William F. Herblin, Martin J. Thoolen, Andrew T. Chiu, Dennis W. Watson, and P. B. M. W. M. Timmermans* 736

Isolation and Characterization of Deaminated Neuraminic Acid-Rich Glycoprotein (KDN-gp-OF) in the Ovarian Fluid of Rainbow Trout (*Salmo gairdneri*) *Akiko Kanamori, Ken Kitajima, Sadako Inoue, and Yasuo Inoue* 744

Tissue-Specific Expression of Human Terminal Deoxynucleotidyltransferase Is Regulated at the Transcriptional Level *Theoni Trangas and Mary Sue Coleman* 750

Affinity Modification of Microsomal Flavoproteins by NAD(P) 2′,3′-Dialdehydes *Irina A. Slepneva and Lev M. Weiner* 758

Isolation and Characterization of Altered Plasmids in Mutant Strains of *Pseudomonas putida* NCIB 9816 *Cuneyt M. Serdar and David T. Gibson* 764

Studies of Nucleotide Sequence Homology between Naphthalene-Utilizing Strains of Bacteria *Cuneyt M. Serdar and David T. Gibson* 772

A Unique Membrane-Bound, Calcium-Dependent Endopeptidase with Specificity toward Paired Basic Residues in Rat Liver Golgi Fractions *Kensaku Mizuno, Tomoko Nakamura, and Hisayuki Matsuo* 780

A Novel Family of Growth Factor Receptors: A Common Binding Domain in the Growth Hormone, Prolactin, Erythropoietin, and IL-6 Receptors, and the p75 IL-2 Receptor β-Chain *J. Fernando Bazan* 788

Basic and Acidic Fibroblast Growth Factors Modulate the Epidermal Growth Factor Receptor by a Protein Kinase C-Independent Pathway *Karen Hicks, BethAnn Friedman, and Marsha Rich Rosner* 796

Interleukin 3 Stimulates Phosphatidylcholine Turnover in a Mast/Megakaryocyte Cell Line *Vincent Duronio, Leslie Nip, and Steven L. Pelech* 804

Angiotensin II and Phorbol-Esters Potently Down-Regulate Endothelin (ET-1) Binding Sites in Vascular Smooth Muscle Cells *Pierre Roubert, Véronique Gillard, Pascale Plas, Jean-Michel Guillon, Pierre-Etienne Chabrier, and Pierre Braquet* 809

Synthesis of Diacylglycerol *de Novo* Is Responsible for Permanent Activation and Down-Regulation of Protein Kinase C in Transformed Cells *Vincenzo Chiarugi, Paola Bruni, Franca Pasquali, Lucia Magnelli, Gabriele Basi, Marco Ruggiero, and Marta Fernararo* 816

The Distribution of Glycosyl-phosphatidylinositol Anchored Proteins Is Differentially Regulated by Serum and Insulin *Michael P. Lisanti, Jennifer Cordes Darnell, Betty Liwah Chan, Enrique Rodriguez-Boulan, and Alan R. Saltiel* 824

Functional Characterization of an Androgen Response Element in the First Intron of the C3(1) Gene of Prostatic Binding Protein *F. Claessens, L. Celis, B. Peeters, W. Heyns, G. Verhoeven, and W. Rombauts* 833

Abolition of the NMDA-Mediated Responses by a Specific Glycine Antagonist, 6,7-Dichloroquinoxaline-2,3-Dione (DCQX) *Yukio Yoneda and Kiyokazu Ogita* 841

A Region-Matched Hydrophobic Interaction between Melittin and Dimyristoylphosphatidylcholine in a Ternary Mixture of Phosphatidylcholines *Kazu Ohki* 850

MB-02 Cells Undergo Fetal to Adult Globin Gene Switching in Response to Erythropoietin *Susan P. Perrine, Barbara A. Miller, and Doris A. Morgan* 857

Demonstration of Promoter Function for the 5′-Flanking Region of the Human Gene for Terminal Deoxynucleotidyltransferase *Osamu Koiwai, Akimichi Morita, and Yoshinari Yamada* 863

Tiazofurin and Selenazofurin Induce Depression of cGMP and Phosphatidylinositol Pathway in L1210 Leukemia Cells *Zahra Parandoosh, Roland K. Robins, Marina Belei, and Boanerges Rubalcava* 869

Calcium-Dependent Cysteine Proteinase Is a Precursor of a Chemotactic Factor for Neutrophils *Mitoshi Kunimatsu, Shigeki Higashiyama, Kiyoe Sato, Iwao Ohkubo, and Makoto Sasaki* 875

A Mitogen for Schwann Cells Is Derived from Myelin Basic Protein *R. R. Baichwal and G. H. DeVries* 883

Vascular Relaxation Mediated by Hydroxylamines and Oximes: Their Conversion to Nitrites and Mechanism of Endothelium-Dependent Vascular Relaxation *George Thomas and Peter W. Ramwell* 889

Analysis of the Spectrin Binding Domains of Globin *Ajit S. Bhown, Fiona Hunter, and J. C. Bennett* 894

Light-Induced DNA Cleavage by Esperamicin and Neocarzinostatin *Yoshihiro Uesawa, June Kuwahara, and Yukio Sugiura* 903

Different γ-Glutamyl Transpeptidase mRNAs Are Expressed in Human Liver and Kidney *André Pawlak, Shi-Jun Wu, Frédérique Bulle, Atsuo Suzuki, Naima Chikhi, Nicolas Ferry, Ja-Hyun Baik, Sylvie Siegrist, and Georges Guellaën* 912

Purification and Properties of *Aerococcus viridans* Lactate Oxidase *John D. Duncan, John O. Wallis, and Mahmood R. Azari* 919

Atypical Multidrug Resistance in CCRF-CEM Cells Selected for High Level Methotrexate Resistance: Reactivity to Monoclonal Antibody C219 in the Absence of P-Glycoprotein Expression *Murray D. Norris, Michelle Haber, Malcolm King, and Ross A. Davey* 927

Distinct Glutathione-Dependent Enzyme Activities and a Verapamil-Sensitive Binding of Xenobiotics in a Freshwater Mussel *Anodonta cygnea* *Branko Kurelec and Branka Pivčević* 934

Nucleotide and Deduced Amino Acid Sequence of the α Subunit of Yeast Pyruvate Dehydrogenase *Robert H. Behal, Karen S. Browning, and Lester J. Reed* 941

The Effect of Gossypol and 6-Aminonicotinamide on Tumor Cell Metabolism: A ^{31}P Magnetic Resonance Spectroscopic Study *Max A. Keniry, Charlene Hollander, and Christopher C. Benz* 947

AUTHOR INDEX, Volume 164, Number 3, November 15, 1989 ii

Affinity Purification of the HIV-1 Protease
Jill C. Heimbach, Victor M. Garsky, Stuart R. Michelson, Richard A. F. Dixon, Irving S. Sigal, and Paul L. Darke 955

Fast Effects of Aldosterone on Electrolytes in Human Lymphocytes Are Mediated by the Sodium-Proton-Exchanger of the Cell Membrane
Martin Wehling, Johannes Käsmayr, and Karl Theisen 961

Abilities of Activated Macrophages to Manifest Tumoricidal Activity and to Generate Reactive Nitrogen Intermediates: A Comparative Study *in Vitro* and *ex Vivo* *R. Keller and R. Keist* 968

Differentiative Action of K252a on Protein Kinase C and a Calcium-Unresponsive, Phorbol Ester/Phospholipid-Activated Protein Kinase
Michael Gschwendt, Hanno Leibersperger, and Friedrich Marks 974

Neutrophil Activation by Surface Bound IgG Is via a Pertussis Toxin Insensitive G Protein *Warren D. Blackburn, Jr., and Louis W. Heck* 983

Human Oculocutaneous Albinism Caused by Single Base Insertion in the Tyrosinase Gene *Yasushi Tomita, Atsushi Takeda, Shoji Okinaga, Hachiro Tagami, and Shigeki Shibahara* 990

Changes in Myocardial Mitochondrial Electron Transport Activity in Rats Administered with Acetylcholinesterase Inhibitor
Takayuki Ito, Naohiko Akiyama, Takuo Ogawa, Tatsuo Satake, Tomoko Kato, Satoru Sugiyama, and Takayuki Ozawa 997

Comparison of Effects of a Potassium Channel Opener BRL34915, a Specific Potassium Ionophore Valinomycin and Calcium Channel Blockers on Endothelin-Induced Vascular Contraction *Shouei Kim, Shigeto Morimoto, Eio Koh, Yoshiyuki Miyashita, and Toshio Ogihara* 1003

Characterization of the Submitochondrial Compartments: Study of the Site of Synthesis of Dolichol and Dolichol-Linked Sugars
Dominique Ardail, Pierre Louisot, and Christiane Levrat 1009

Enhancement of c-*sis* Protooncogene Transcription in Bronchoalveolar Mononuclear Cells from Patients with Autoimmune Diseases with Lung Involvement *Yasuhiro Deguchi and Susumu Kishimoto* 1018

Isolation and Characerization of a cDNA Clone Encoding Human Aromatic L-Amino Acid Decarboxylase *Hiroshi Ichinose, Yoshikazu Kurosawa, Koiti Titani, Keisuke Fujita, and Toshiharu Nagatsu* 1024

Endothelin Depolarizes Membrane Voltage and Increases Intracellular Calcium Concentration in Human Ciliary Muscle Cells
Christoph Korbmacher, Horst Helbig, Hermann Haller, Kristine A. Erickson-Lamy, and Michael Wiederholt 1031

A Versatile Nonradioactive Technique for Restriction Analysis of Recombinant DNA *Sabine Knochenhauer and M. Alexander Schmidt* 1040

Measurement of Ca^{2+} Transients Using Simultaneous Dual-Emission Microspectrofluorimetry and Electrophysiology in Individual Pituitary Cells
Patrice Mollard, Nathalie Guerineau, Jacques Audin, and Bernard Dufy 1045

Localization of c-*erb* A Proteins in Rat Liver Using Monoclonal Antibodies
E. D. L. Schmidt, H. C. van Beeren, H. Korfage, J. H. Dussault, W. M. Wiersinga, and W. H. Lamers 1053

Evidence for a GTP-Dependent Increase in Membrane Permeability for Calcium in NG108-15 Microsomes *Thierry Jean, Leon A. Heppel, and Claude B. Klee* 1060

Phorbol Esters Inhibit Apoptosis in Il-2-Dependent T Lymphocytes *Gemma Rodríguez-Tarduchy and Abelardo López-Rivas* 1069

Agents Affecting Adenylate Cyclase Activity Modulate the Stimulatory Action of 1,25-Dihydroxyvitamin D_3 on the Production of Osteocalcin by Human Bone Cells *D. B. Evans, R. G. G. Russell, B. L. Brown, and P. R. M. Dobson* 1076

NMR Investigation on the Structure and Conformation of 3′-Azido-2′, 3′-dideoxyribosylthymine (AZT), an Inhibitor of the HIV (AIDS Virus) *G. V. T. Swapna, B. Jagannadh, M. K. Gurjar, and A. C. Kunwar* 1086

The Transport of L-Arginine in Chinese Hamster Ovary Cells *Bianca Maria Rotoli, Ovidio Bussolati, Valeria Dall'Asta, and Gian C. Gazzola* 1093

Demonstration of a Basic Fibroblast Growth Factor-like Molecule in Mouse Hepatic Endothelial Cells *Jean Rosenbaum, Philippe Mavier, Anne-Marie Preaux, and Daniel Dhumeaux* 1099

Change in Transferrin Receptor Distribution in Regenerating Rat Liver *Akiko Hirose-Kumagai and Nobu Akamatsu* 1105

Isolation and Sequencing of a cDNA Clone Encoding 96-kDa Sialoglycoprotein in Rat Liver Lysosomal Membranes *Youichiro Noguchi, Masaru Himeno, Hiroyuki Sasaki, Yoshitaka Tanaka, Akira Kono, Yasuyuki Sakaki, and Keitaro Kato* 1113

Structural Analysis of the Gene for Human Acidic Fibroblast Growth Factor *Ayalew Mergia, Edmund Tischer, David Graves, Annette Tumolo, Judy Miller, Denis Gospodarowicz, Judith A. Abraham, Gary D. Shipley, and John C. Fiddes* 1121

Human Liver 6-Pyruvoyl Tetrahydropterin Reductase Is Biochemically and Immunologically Indistinguishable from Aldose Reductase *Petra Steinerstauch, Bendicht Wermuth, Walter Leimbacher, and Hans-Christoph Curtius* 1130

Proposed Mechanism for the Bacterial Bioluminescence Reaction Involving a Dioxirane Intermediate *Frank M. Raushel and Thomas O. Baldwin* 1137

Butyrate Increases Catalase Activity and Protects Rat Pulmonary Artery Smooth Muscle Cells against Hyperoxia *Sumio Yano and Donald F. Tierney* 1143

Sequence Specificity of Pausing by DNA Polymerases *Pnina Weisman-Shomer, Dipak K. Dube, Fred W. Perrino, Karen Stokes, Lawrence A. Loeb, and Michael Fry* 1149

A Rapid and Efficient Procedure for Transformation of Intact *Saccharomyces cerevisiae* by Electroporation *John R. Simon and Kevin McEntee* 1157

N-Terminal Sequence of the Rat Liver β-Subunit in the Mitochondrial ATPase-ATPsynthase *François Cretin, Loris G. Baggetto, Luc Denoroy, and Catherine Godinot* 1165

Defective Sterol C5-6 Desaturation and Azole Resistance: A New Hypothesis for the Mode of Action of Azole Antifungals *P. F. Watson, M. E. Rose, S. W. Ellis, H. England, and S. L. Kelly* 1170

The Autoinhibitor of Cell Fusion in Dictyostelium Inhibits Calmodulin *Michael A. Lydan and Danton H. O'Day* 1176

Characterization of a M_r 25,000 Basic Fibroblast Growth Factor Form in Adult, Regenerating, and Fetal Rat Liver *M. Presta, M. Statuto, M. Rusnati, P. Dell'Era, and G. Ragnotti* 1182

2′,3′-Didehydro-2′,3′-dideoxy-5-chlorocytidine Is a Selective Anti-retrovirus Agent *Jan Balzarini, Arthur Van Aerschot, Piet Herdewijn, and Erik De Clercq* 1190

Hypoxic Pulmonary Vasoconstriction Is Enhanced by Inhibition of the Synthesis of an Edothelium Derived Relaxing Factor *Stephen L. Archer, Jonathan P. Tolins, Leopoldo Raij, and E. Kenneth Weir* 1198

Aprotinin Inhibits the Hormone Binding of the Estrogen Receptor from Calf Uterus *Vincenzo Nigro, Nicola Medici, Ciro Abbondanza, Saverio Minucci, Anna Maria Molinari, and Giovanni Alfredo Puca* 1206

Nuclear Factor I Represses the Reverse-Oriented Transcription from the Adenovirus Type 5 DNA Terminus *Ken Matsumoto, Kyosuke Nagata, Kunitoshi Yamanaka, Fumio Hanaoka, and Michio Ui* 1212

Ischaemia Causes Externalization of Endothelin-1 Binding Sites in Rat Cardiac Membranes *Jianjun Liu, David J. Casley, and Winifred G. Nayler* 1220

Two Different Mechanisms Are Involved for the Bleomycin-Induced DNA Repair Synthesis in Permeabilized HeLa Cells *Il-Seon Park, Hye Yeong Koh, Jong Kun Park, and Sang Dai Park* 1226

Stabilization of Disulfide Linkage in Drug-Polymerimmunoglobulin Conjugate by Microenvironmental Control *Masayuki Yokoyama, Teruo Okano, Yasuhisa Sakurai, Kazunori Kataoka, and Shohei Inoue* 1234

A New Mutation Causing Familial Amyloidotic Polyneuropathy *James C. Skare, Maria Joao M. Saraiva, Isabel L. Alves, Ilze B. Skare, Aubrey Milunsky, Alan S. Cohen, and Martha Skinner* 1240

Characterization of the 5′ Flanking Region of Rat Glucokinase Gene *Tamio Noguchi, Masaru Takenaka, Kazuya Yamada, Tamiko Matsuda, Mamoru Hashimoti, and Takehiko Tanaka* 1247

Separation of Yeast Proteasome Subunits: Immunoreactivity with Antibodies against ATP-Dependent Protease Ti from *Escherichia coli* *Keiji Tanaka, Tomohiro Tamura, Atsushi Kumatori, Tae Hwan Kwak, Chin Ha Chung, and Akira Ichihara* 1253

Adrenocorticotropic Hormone-Releasing Activities of Interleukins in a Homologous *in Vivo* System *Yoshiyuki Naito, Junichi Fukata, Tomoko Tominaga, Yoshihiro Masui, Yoshikatsu Hirai, Norihiko Murakami, Sunao Tamai, Kenjiro Mori, and Hiroo Imura* 1262

Stable High Level Expression of Human Thyroid Peroxidase in Cultured Chinese Hamster Ovary Cells *Jun-ichiro Hata, Shinya Yamashita, Satoru Yagihashi, Hideo Kato, Shoko Kabeno, Keisuke Hirai, Kanji Kuma, Shioko Kimura, Kazumi Umeki, Tomio Kotani, and Sachiya Ohtaki* 1268

Use of 3,3,5,5-Tetramethyl-1-pyrroline-1-oxide Spin Trap for the Continuous Flow ESR Monitoring of Hydroxyl Radical Generation in the Ischemic and Reperfused Myocardium *Marcel Culcasi, Sylvia Pietri, and Patrick J. Cozzone* 1274

Effect of Anthracycline Antibiotics on the Reconstituted Mitochondrial Tricarboxylate Carrier *Italo Stipani, Maria Incs Capalbo, and Vincenzo Zara* 1281

Binding of Bovine, Ovine, Porcine, Canine, and Rat Plasminogen to Rat Hepatocytes and Rat C6 Glioma Cells *in Vitro* *Scott W. Hall, Lela L. Braud, and Steven L. Gonias* 1288

Linear α-Human Atrial Natriuretic Peptide Analogs Display Receptor Binding Activity and Inhibit α-hANP-Induced cGMP Accumulation *Yasuo Kitajima, Yoshiharu Minamitake, Mayumi Furuya, Maki Takehisa, Toyoko Katayama, and Shoji Tanaka* 1295

Cloning of the Bovine Pancreatic Cholesterol Esterase/Lysophospholipase *Erich M. Kyger, Roger C. Wiegand, and Louis G. Lange* 1302

Molecular Cloning of a Small Prostate Protein, Known as β-Microsemenoprotein, PSP_{94} or β-Inhibin, and Demonstration of Transcripts in Nongenital Tissues *Magnus Ulvsbäck, Clas Lindström, Håkan Weiber, Per-Anders Abrahamsson, Hans Lilja, and Åke Lundwall* 1310

Isolation of a cDNA That Hybrid Selects Antiproliferative mRNA from Rat Liver *J. Keith McClung, David B. Danner, David A. Stewart, James R. Smith, Edward L. Schneider, Charles K. Lumpkin, Robert T. Dell'Orco, and Mark J. Nuell* 1316

Basic Fibroblast Growth Factor Is Present in the Conditioned Medium of Simian Sarcoma Virus Transformed NRK Cells *Karen Hicks, BethAnn Friedman, and Marsha Rich Rosner* 1323

Secretion of *Escherichia coli* β-Galactosidase in *Saccharomyces cerevisiae* Using the Signal Sequence from the Glucoamylase-Encoding *STA2* Gene *Marco Vanoni, Danilo Porro, Enzo Martegani, and Lilia Alberghina* 1331

Production in *Escherichia coli* of a Biologically Active Subfragment of von Willebrand Factor Corresponding to the Platelet Glycoprotein 1b, Collagen, and Heparin Binding Domains *Geneviève Plétu, Pierre Meullen, Ghislaine Cherel, Joseph Diaz, Dominique Baruch, Michael Courtney, and Dominique Meyer* 1339

The Effect of Asparagine and Adenine on the Glutamine Requirement for Growth of Human Peripheral Lymphocytes *Flora H. Pettit, Jocelyne O. Boghossian, and William Shive* 1348

Multiple Deletions in Mitochondrial DNA at Direct Repeats of Non-D-loop Regions in Cases of Familial Mitochondrial Myopathy *Michisuke Yuzaki, Norio Ohkoshi, Ichiro Kanazawa, Yasuo Kagawa, and Shigeo Ohta* 1352

Identification of a Cyclooxygenase-Related Gene and Its Potential Role in Prostaglandin Formation *Glenn D. Rosen, Thomas M. Birkenmeier, Ami Raz, and Michael J. Holtzman* 1358

Spectroscopic Evidence for a Copper-Nitrosyl Intermediate in Nitrite Reduction by Blue Copper-Containing Nitrite Reductase *Shinnichiro Suzuki, Tetsuhiko Yoshimura, Takamitsu Kohzuma, Sohsuke Shidara, Masayuki Masuko, Takeshi Sakurai, and Hidekazu Iwasaki* 1366

Characterization of Human Platelet GMP-140 as a Heparin-Binding Protein *Michael P. Skinner, Dominique J. Fournier, Robert K. Andrews, Jeffrey J. Gorman, Colin N. Chesterman, and Michael C. Berndt* 1373

Molecular Cloning and Characterization of a Novel Marsupial Milk Protein Gene *Chris Collet, Roslyn Joseph, and Kevin Nicholas* 1380

Inactivation of Potato Lipoxygenase by Hydroperoxy Acids as Suicide Substrates *Mee Ree Kim, Seong Hee Kim, and Dai-Eun Sok* 1384

Gene Polymorphism Identified by *Pvu*11 in Familial Lipoprotein Lipase Deficiency *Takanari Gotoda, Mototaka Senda, Toshio Murase, Nobuhiro Yamada, Fumimaro Takaku, and Yasuhiro Furuichi* 1391

Selective Low Level of Protein Kinase C Isozyme in a Tumor Promoter-Dependent Mouse Leukemia Cell Line *Toshio Tanaka, Masatoshi Hagiwara, Hiroyoshi Hidaka, Kazuo Nunoki, Hisataka Ohta, Koji Onoda, Masaaki Ito, Setsuya Ohkubo, Hiroshi Hiai, and Yasuaki Nishizuka* 1397

Purification and DNA-Binding Properties of Human Papillomavirus Type 16 E6 Protein Expressed in *Escherichia coli* *Yoshinori Imai, Youko Tsunokawa, Takashi Sugimura, and Masaaki Terada* 1402

Enzymatic Synthesis of *N*,*N*-Dimethyl-sphingosine: Demonstration of the Sphingosine: *N*-Methyltransferase in Mouse Brain *Yasuyuki Igarashi and Sen-itiroh Hakomori* 1411

On the Respective Roles of the Two Proteins Encoded by the *Bacillus sphaericus* 1593M Toxin Genes Expressed in *Escherichia coli* and *Bacillus subtilis* *Françoise de la Torre, Thérèse Bennardo, Peter Sebo, and Jekisiel Szulmajster* 1417

Lens Crystallin Changes Associated with Amphibian Metamorphosis: Involvement of a β-Crystallin Polypeptide *Y.-J. Jiang, S.-H. Chiou, and W.-C. Chang* 1423

Endothelin Stimulates Accumulations of Cellular Atrial Natriuretic Peptide and Its Messenger RNA in Rat Cardiocytes *Yuka Fukuda, Yukio Hirata, Shigeru Taketani, Takatsugu Kojima, Shinzo Oikawa, Hiroshi Nakazato, and Yohnosuke Kobayashi* 1431

Studies on Site Directed Mutant Pig Citrate Synthases *Claudia T. Evans, Daniel Owens, Joseph P. Casazza, and Paul A. Srere* 1437

Evidence that C4b-Binding Protein Is an Acute Phase Protein *Toshihiko Saeki, Sakae Hirose, Mamoru Nukatsuka, Yukihiro Kusunoki, and Shigeharu Nagasawa* 1446

Pituitary Follicular Cells Secrete both Vascular Endothelial Cell Growth Factor and Follistatin *D. Gospodarowicz and K. Lau* 292

A Glycosylated Prolactin Species Is Covalently Bound to Immunoglobulin in Human Amniotic Fluid *Linda J. Heffner, L. Shawn Gramates, and Ruth W. Yuan* 299

Depolarization Potentiates Endothelin-Induced Effects on Cytosolic Calcium in Bovine Adrenal Chromaffin Cells *Kathy Rasmussen and Morton P. Printz* 306

Protein Kinase C Potentiates Stretch-Induced Cerebral Artery Tone by Increasing Intracellular Sensitivity to Ca^{2+} *Ismail Laher, Peter Vorkapic, Amy L. Dowd, and John A. Bevan* 312

Long-Term Phorbol Ester Treatment Dissociates Phospholipase D Activation from Phosphoinositide Hydrolysis and Prostacyclin Synthesis in Endothelial Cells Stimulated with Bradykinin *Thomas W. Martin, Dorothy R. Feldman, Keith E. Goldstein, and John R. Wagner* 319

Activation of the Phosphorothionate Insecticide Parathion by Rat Brain *in Situ* *Janice E. Chambers, Jana R. Munson, and Howard W. Chambers* 327

Viscometric Characterization of Pennisetin from Pearl Millet *M. N. Sainani, A. H. Lachke, N. A. Sahasrabudhe, and P. K. Ranjekar* 334

Lack of *in Vivo* DNA Binding of Mercaptobenzothiazole to Selected Tissues of the Rat *David W. Brewster, Kathy J. Mirly, Alan G. E. Wilson, and James W. Barnett, Jr.* 342

Potent and Specific Inhibition of IL-8-, IL-1α-, and IL-1β-Induced *in Vitro* Human Lymphocyte Migration by Calcium Channel Antagonists *K. B. Bacon, J. Westwick, and R. D. R. Camp* 349

Synergistic Effects of Corticotropin and Insulin-like Growth Factor I on Corticotropin Receptors and Corticotropin Responsiveness in Cultured Bovine Adrenocortical Cells *Armelle Penhoat, Christine Jaillard, and José M. Saez* 355

Sodium Transport Defect of Ouabain-Resistant Renal Na,K-ATPase *B. M. Anner, E. Imesch, and M. Moosmayer* 360

Multiple Arginine Residues Contribute to the Increased Efficacy of Peptide Substrates for the cAMP-Dependent Protein Kinase *Mary Prorok and David S. Lawrence* 368

Response of Hepatic Alanine: Glyoxylate Aminotransferase 1 to Hormone Differs among Mammalia *Sueko Hayashi, Haruhiko Sakuraba, and Tomoo Noguchi* 372

Effects of Ammonia on Human Neutrophil *N*-Formyl Chemotactic Peptide Receptor–Ligand Interaction and Cytoskeletal Association *Maddalena Coppi and Richard Niederman* 377

Modulation of Growth Gene Expression by Selective Alteration of Polyamines in Human Colon Carcinoma Cells *Paul Celano, Craig M. Berchtold, Francis M. Giardiello, and Robert A. Casero, Jr.* 384

Intracellular [^{3}H]Dopamine Binding Sites in Normal and Malignant Cells: Relationships to Cell Proliferation *Barry M. Markaverich, Rebecca R. Gregory, and Mary Ann Alejandro* 391

Increased Therapeutic Efficacy of Zidovudine in Combination with Vitamin E *Sudhir R. Gogu, Barbara S. Beckman, S. R. S. Rangan, and Krishna C. Agrawal* 401

Possible Involvement of Actomyosin ADP Complex in Regulation of Ca^{2+} Sensitivity in α-Toxin Permeabilized Smooth Muscle *Junji Nishimura and Cornelis van Breemen* 408

Activation of Protein Kinase C Assists Insulin-Producing Cells in Recovery from Raised Cytoplasmic Ca^{2+} by Stimulating Ca^{2+} Efflux *Per-Olof Berggren, Per Arkhammar, and Thomas Nilsson* 416

Neurotensin Receptors on Circular Smooth Muscle of Canine Small Intestine: Role of Disulfide Bridges *Sultan Ahmad and E. E. Daniel* 422

Monokine Regulation of Glucose Transporter mRNA in L6 Myotubes *Peter Cornelius, M. Douglas Lee, Melissa Marlowe, and Phillip H. Pekala* 429

Heat Shock Induction of Heme Oxygenase mRNA in Human Hep 3B Hepatoma Cells *Kinuko Mitani, Hiroyoshi Fujita, Shigeru Sassa, and Attallah Kappas* 437

Regulation of Cytochrome P450-Dependent Steroid Hydroxylase Activity in *Manduca sexta:* Evidence for the Involvement of a Neuroendocrine–Endocrine Axis during Larval–Pupal Development *Daniel P. Keogh, Roberta F. Johnson, and Stan L. Smith* 442

Orientation of Chargerin II (A6L) in the ATP Synthase of Rat Liver Mitochondria Determined with Antibodies against Peptides of the Protein *Tetuya Oda, Siro Futaki, Kouki Kitagawa, Yutaka Yoshihara, Isamu Tani, and Tomihiko Higuti* 449

Direct Evidence for Local Generation and Release of Angiotensin II in Human Vascular Tissue *Kenji Mizuno, Makio Tani, Susumu Niimura, Shigeatsu Hashimoto, Akira Satoh, Kazuaki Shimamoto, Tadashi Inagami, and Soitsu Fukuchi* 457

Primary Structure of the *S. cerevisiae* Gene Encoding Uridine Monophosphokinase *Patricia Liljelund, Ambaliou Sanni, James D. Friesen, and François Lacroute* 464

Detection of Total DNA with Single-Stranded DNA Binding Protein Conjugates *Edward L. Sheldon III, Peter A. Nagainis, and Viola T. Kung* 474

Changes of *N*-Methyl-D-aspartate-Activated Channels of Cerebellar Granule Cells with Days in Culture *Marina Sciancalepore, Lia Forti, and Oscar Moran* 481

Inhibition of HIV-Replication by 3′-Fluoro-Modified Nucleosides with Low Cytotoxicity *Eckart Matthes, Christine Lehmann, Martin von Janta-Lipinski, and Dieter Scholz* 488

Interleukin-1 β Inhibition of TRH-Stimulated Prolactin Secretion and Phosphoinositides Metabolism *Gennaro Schettini, Elisa Landolfi, Maurizio Grimaldi, Olimpia Meucci, Alfredo Postiglione, Tullio Florio, and Carmelo Ventra* 496

Thyrotropin Stimulates Transcription from the Ferritin Heavy Chain Promoter
Luca G. Colucci-D'Amato, M. Valeria Ursini, Giulia Colletta, Annamaria Cirafici, and Vittorio de Franciscis 506

Minute Amounts of RNA Are Synthesized from Several Regions of the Bacteriophage Mu DNA during the Lysogenic State
Carlos Barron and Ernesto G. Bade 512

Inhibitory Effect of Cyclic AMP on Phorbol Ester-Stimulated Production of Reactive Oxygen Metabolites in Rat Glomeruli
Akihiko Miyanoshita, Takeshi Takahashi, and Hitoshi Endou 519

Sensitization of Alveolar Macrophages to Lipopolysaccharide-Induced Prostaglandin Synthesis by Exogenous Prostaglandins
Ken-ichi Tanamoto, Ulrich Schade, and Ernst Th. Rietschel 526

Cell Type-Specific Expression of the Genes for the Protein Kinase C Family: Down Regulation of mRNAs for PKCα and nPKCε upon *in Vitro* Differentiation of a Mouse Neuroblastoma Cell Line Neuro 2a
Hitoshi Wada, Shigeo Ohno, Kyoko Kubo, Choji Taya, Syuichi Tsuji, Shin Yonehara, and Koichi Suzuki 533

Effects of Okadaic Acid on Mouse Hemopoietic Cells
Syuichi Oka, Kazuya Nakagomi, Hideoki Tanaka, and Takeshi Yasumoto 539

AUTHOR INDEX, Volume 165, Number 2, December 15, 1989 iii

Benzodiazepine-like Molecules, as well as Other Ligands for the Brain Benzodiazepine Receptors, Are Relatively Common Constituents of Plants
J. H. Medina, C. Peña, M. Levi de Stein, C. Wolfman, and A. C. Paladini 547

Cholera Toxin ADP-Ribosylates the Receptor-Coupled Form of Pertussis Toxin-Sensitive G-Proteins *Franz-Josef Klinz and Tommaso Costa* 554

A Mutation in the *dam* Gene of *Vibrio cholerae:* 2-Aminopurine Sensitivity with Intact GATC Methylase Activity
Rupa Bandyopadhyay, Aditya Sengupta, and Jyotirmoy Das 561

Studies of MR 889, a New Synthetic Proteinase Inhibitor
Maurizio Luisetti, Pier Dante Piccioni, Marco Donnini, Vittoria Peona, Ernesto Pozzi, and Carlo Grassi 568

Superinduction of the Human Gene Encoding Low Density Lipoprotein Receptor
Eran Leitersdorf, Yona Banai, Gideon Friedman, and Raymond Kaempfer 574

Messenger RNA for Manganese and Copper–Zinc Superoxide Dismutases in Hepatomas: Correlation with Degree of Differentiation
Tommaso Galeotti, Hartmut Wohlrab, Silvia Borrello, and M. Emilia De Leo 581

NADPH–Cytochrome P450 Reductase Is Not a Component of the Liver Microsomal Steroid 5-α Reductase
kuo-Chi Cheng, Regina W. Wang, and Anthony Y. H. Lu 590

Purification of Bone Morphogenetic Protein Derived from Bovine Bone Matrix *Kazuhisa Besshò, Toshirou Tagawa, and Mutsuo Murata* 595

Conformational Variations in d(TGACGTCA) and Its Reverse Sequence d(ACTGCAGT): A Joint Circular Dichroism and Nuclear Magnetic Resonance Study *Olivier Mauffret, Monique Monnot, Marc Lanson, Jacques Armier, and Serge Fermandjian* 602

Structural Changes in Cellobiohydrolase I upon Binding of a Macromolecular Ligand as Evident by SAXS Investigations *Peter M. Abuja, Ingrid Pilz, Peter Tomme, and Marc Claeyssens* 615

Rat Granulosa Cells Produce a Novel Trypsin-like Protease in Response to Gonadotropin Treatment *Thomas A. Bicsak, David S. Michelson, and Aaron J. W. Hsueh* 624

p66, an *in Vivo* Target for Poly(ADP-Ribosyl)ation, Copurifies with Poly(ADP-Ribose) Polymerase *Jingyuan Zhang and Kaney Ebisuzaki* 631

Mass Spectrometric Identification of Peptides Present in Immunized and Parasitized Hemolymph from Honeybees without Purification *A. Grey Craig, Tina Trenczek, Ingemar Fries, and Hans Bennich* 637

Sequence Analysis of the 5′ Region of the Human DF3 Breast Carcinoma-Associated Antigen Gene *Miyako Abe, Javed Siddiqui, and Donald Kufe* 644

Human and Canine Gene Homologs of Porcine Brain Natriuretic Peptide *Jeffrey J. Seilhamer, Ann Arfsten, Judy A. Miller, Penny Lundquist, Robert M. Scarborough, John A. Lewicki, and J. Gordon Porter* 650

Fast-Growing Root Nodule Bacteria Produce a Novel Polyamine, Aminobutylhomospermidine *Shinsuke Fujihara and Yasuo Harada* 659

Saccharomyces cerevisiae Chromatin Associated Protein Yp20 Is a Guanine Nucleotide Binding Protein *C. Valansi and C. Shalitin* 667

NADH- and NADPH-Linked Aquacobalamin Reductases Occur in Both Mitochondrial and Microsomal Membranes of Rat Liver *Fumio Watanabe, Yoshihisa Nakano, Shinichi Maruno, Noriyuki Tachikake, Yoshiyuki Tamura, and Shozaburo Kitaoka* 675

Phospholipids Differently Modulate the Activity of Cytosolic Protein–Tyrosine Kinase from Porcine Spleen *Keiko Sakai, Takanobu Taniguchi, Reiko Shimomura, Momoyo Asahi, Tomoko Kobayashi, Tetsuya Inazu, Shun-ichi Nakamura, and Hirohei Yamamura* 680

Discontinuous DNA Replication in a *lig-7* Strain of *Escherichia coli* Is Not the Result of Mismatch Repair, Nucleotide-Excision Repair, or the Base-Excision Repair of DNA Uracil *Tzu-chien V. Wang and Kendric C. Smith* 685

Taipoxin-Binding Protein on Synaptic Membranes: Identification by Affinity Labeling *Mu-Chin Tzeng, Ming Jhy Hseu, and Chon-Ho Yen* 689

Molecular Characterization of Rat Substance K Receptor and Its mRNAs *Yoshiki Sasai and Shigetada Nakanishi* 695

Corticotropin-Releasing Factor-Binding Protein Is a Glycoprotein *Toshihiro Suda, Takashi Sumitomo, Fumiko Tozawa, Tsuyako Ushiyama, and Hiroshi Demura* 703

Cyclic GMP Analogs Inhibit γ Thrombin-Induced Arachidonic Acid Release in Human Platelets — *David C. Sane, Alicja Bielawska, Charles S. Greenberg, and Yusuf A. Hannun* 708

Effect of Interleukin-1 on the Augmentation of Human Immunodeficiency Virus Gene Expression — *Nobuyuki Kobayashi, Yoshiaki Hamamoto, Yoshio Koyanagi, Irvin S. Y. Chen, and Naoki Yamamoto* 715

Ca^{2+}-Independent Contraction of Uterine Smooth Muscle — *Katsurou Matsuo, Toshio Gokita, Hideji Karibe, and Masaatsu K. Uchida* 722

Establishment of Strongly Neutralizing Monoclonal Antibody to Human Interleukin-6 and Its Epitope Analysis — *Nobuo Ida, Shingou Sakurai, Touko Hosaka, Kazuo Hosoi, Tetsunosuke Kunitomo, Tsuneo Shimazu, Toshihiro Maruyama, Yoshiharu Matsuura, and Masayoshi Kohase* 728

Molecular Cloning of New Human TR2 Receptors: A Class of Steroid Receptor with Multiple Ligand-Binding Domains — *C. Chang, J. Kokontis, L. Acakpo-Satchivi, S. Liao, H. Takeda, and Y. Chang* 735

Sugar Modified Oligonucleotides. I. Carbo-oligodeoxynucleotides as Potential Antisense Agents — *M. Perbost, M. Lucas, C. Chavis, A. Pompon, H. Baumgartner, B. Rayner, H. Griengl, and J.-L. Imbach* 742

Alterations in the Creatine Kinase System in the Myocardium of Cardiomyopathic Hamsters — *Z. A. Khuchua, Renee Ventura-Clapier, A. V. Kuznetsov, M. N. Grishin, and V. A. Saks* 748

The Potentiating Action of Tetrandrine in Combination with Chloroquine or Qinghaosu against Chloroquine-Sensitive and -Resistant Falciparum Malaria — *Zuguang Ye, Knox Van Dyke, and Vincent Castranova* 758

Identification of Gly–Pro–Glu (GPE), the Aminoterminal Tripeptide of Insulin-like Growth Factor 1 Which Is Truncated in Brain, as a Novel Neuroactive Peptide — *Vicki R. Sara, Christine Carlsson-Skwirut, Tomas Bergman, Hans Jörnvall, Peter J. Roberts, Martin Crawford, Lena Nilsson Håkansson, Isabella Civalero, and Agneta Nordberg* 766

Static Quenching of Tryptophan Fluorescence by Oxidized Dithiothreitol — *Gautam Sanyal, Enoch Kim, Faith M. Thompson, and Elizabeth K. Brady* 772

Expression of the ED B Fibronectin Isoform in Adult Human Articular Cartilage — *Nancy Burton-Wurster, George Lust, and Roy Wert* 782

Differential Effect of Inhibitors of Oligosaccharide Processing on the Secretion of Thyrotropin from Dispersed Rodent Pituitary Cells — *Bethel S. Stannard, Neil Gesundheit, N. Rao Thotakura, Peter W. Gyves, Catherine Ronin, and Bruce D. Weintraub* 788

Effects of the Tyrosine-Kinase Inhibitor Genistein on DNA Synthesis and Phospholipid-Derived Second Messenger Generation in Mouse 10T1/2 Fibroblasts and Rat Liver T51B Cells — *Nicholas M. Dean, Martha Kanemitsu, and Alton L. Boynton* 795

Nitric Oxide from L-Arginine Stimulates the Soluble Guanylate Cyclase in Adrenal Glands — *M. Palacios, R. G. Knowles, R. M. J. Palmer, and S. Moncada* 802

Histamine Stimulates Calcium-Mediated Protein Phosphorylatin in a Colonic Epithelial Cell Line *Jonathan A. Cohn, Nancy C. Dougherty, and William F. King, Jr.* 810

Expression of Rat Hepatic Glucokinase in *Escherichia coli* *C-T. Chien, A. Tauler, A. J. Lange, K. Chan, R. L. Printz, M. R. El-Maghrabi, D. K. Granner, and S. J. Pilkis* 817

Tissue-Specific Expression of the Human Renin Gene in Transgenic Mice *Akiyoshi Fukamizu, Min Seok Seo, Toshihisa Hatae, Minesuke Yokoyama, Tatsuji Nomura, Motoya Katsuki, and Kazuo Murakami* 826

Separate Regulatory Control of Apical and Basolateral Na^+/H^+ Exchange in Renal Epithelial Cells *Valeria Casavola, Corinna Helmle-Kolb, and Heini Murer* 833

Zinc Forms Complexes with Higher Kinetical Stability than Calcium; 5-F-BAPTA Is a Good Example *Péter Csermely, Péter Sándor, Lajos Radics, and János Somogyi* 838

Immunological Studies on the Participation of 6-Pyruvoyl Tetrahydropterin (2′-Oxo) Reductase, an Aldose Reductase, in Tetrahydrobiopterin Biosynthesis *Sheldon Milstien and Seymour Kaufman* 845

Apolipoprotein E*3-Leiden Allele Results from a Partial Gene Duplication in Exon 4 *A. M. J. M. van den Maagdenberg, P. de Knijff, A. F. H. Stalenhoef, J. A. Gevers Leuven, L. M. Havekes, and R. R. Frants* 851

Proteolytic Conversion of Xanthine Dehydrogenase to Xanthine Oxidase: Evidence against a Role for Calcium-Activated Protease (Calpain) *Ken Stark, Peter Seubert, Gary Lynch, and Michel Baudry* 858

The Main Immunogenic Region of the Nicotinic Acetylcholine Receptor: Interaction of Monoclonal Antibodies with Synthetic Peptides *Manoj K. Das and Jon Lindstrom* 865

Distribution and Molecular Forms of Brain Natriuretic Peptide in Porcine Heart and Blood *Masahito Aburaya, Naoto Minamino, Kenji Kangawa, Kenjiro Tanaka, and Hisayuki Matsuo* 872

Distribution and Molecular Forms of Brain Natriuretic Peptide in the Central Nervous System, Heart, and Peripheral Tissue of Rat *Masahito Aburaya, Naoto Minamino, Jun Hino, Kenji Kangawa, and Hisayuki Matsuo* 880

Cloning of Human Gene Encoding Prostaglandin Endoperoxide Synthase and Primary Structure of the Enzyme *Chieko Yokoyama and Tadashi Tanabe* 888

The Rapidly Phosphorylated Chromosomal 42-kDa Protein Is a Subunit of Larger Protein Complexes *E. Egyhazi, J. Stigare, V. Pretz, M. Holst, and A. Pigon* 895

Complementary DNA for the Mouse Homolog of the Small Subunit of Human Cytochrome b_{558} *Hideki Sumimoto, Masahiko Nozaki, Hiroyuki Sasaki, Koichiro Takeshige, Yoshiyuki Sakaki, and Shigeki Minakami* 902

Complementary DNA Structure of the High-Molecular-Weight Rat Insulin-like Growth Factor Binding Protein (IGF-BP3) and Tissue Distribution of Its mRNA *Shunichi Shimasaki, Ann Koba, Maluz Mercado, Motoyuki Shimonaka, and Nicholas Ling* 907

Phospholipase C Activity Reduces Free Magnesium Concentration *Robert Vink* 913

Volume 163, Number 3, September 29, 1989: Toru Inadomi and Peter Maimon Ross, "Effects of Nuclear Isolation on Psoralen Affinity for Chromatin," pp. 1384–1389 919

Volume 165, Number 3, December 30, 1989

AUTHOR INDEX, Volume 165, Number 3, December 30, 1989 iii

Heterogeneity of Rat Ovarian Lactogen Receptor Species *Ellen Buczko, Ran Zhang, Carlos Delgado, and Maria L. Dufau* 921

G-Protein mRNA Levels during Adipocyte Differentiation *David C. Watkins, Peter J. Rapiejko, Manuel Ros, Hsien-yu Wang, and Craig C. Malbon* 929

Transient Expression of the Angiotensin II Receptor: A Rapid and Functional Analysis of a Calcium-Mobilizing Seven-Transmembrane Domain Receptor in COS-7 Cells *J. P. McGillis, J. Sudduth-Klinger, G. Harrowe, M. Mitsuhashi, and D.G. Payan* 935

Protective Effect of Chlorpromazine against the Lethality of Interleukin 1 in Adrenalectomized or Actinomicin D-Sensitized Mice *Riccardo Bertini, Marina Bianchi, Manuela Mengozzi, and Pietro Ghezzi* 942

Study of Estramustine Binding Protein (EMBP): Purification of Rat EMBP and Establishment of RIA *Hiroaki Shiina, Tomoyuki Ishibe, and Tsuguru Usui* 947

A Protein Target Site in an Early Replicated Human DNA Sequence: A Highly Conserved Binding Motif *Mauro Giacca, Maria Ines Gutierrez, Francesca Demarchi, Silvia Diviacco, Giuseppe Biamonti, Silvano Riva, and Arturo Falaschi* 956

Fibronectin Modulates the Activation of Human Platelets *Fabiola Sinigaglia, Mauro Torti, Giuseppe Ramaschi, and Cesare Balduini* 966

Characterization of High-Capacity Low-Affinity Calcium Binding Protein of Liver Endoplasmic Reticulum: Calsequestrin-like and Divergent Properties *Ernesto Damiani, Claus Heilmann, Sergio Salvatori, and Alfredo Margreth* 973

Tumor Promotion and Depletion of Proteinkinase C in Epidermal JB6 Cells *Thomas Kischel, Matthias Harbers, Silvia Stabel, Peter Borowski, Karin Müller, and Helmuth Hilz* 981

Presence of Cholesteryl Ester Hydroperoxide in Human Blood Plasma *Yorihiro Yamamoto and Etsuo Niki* 988

Liver Mitochondrial Respiratory Functions Decline with Age *Tzu-Chen Yen, Yu-Sheng Chen, Kwang-Laing King, Shin-Hwa Yeh, and Yau-Huei Wei* 994

Detection of Hydroxyl Radical in the Mitochondria of Ischemic-Reperfused Myocardium by Trapping with Salicylate *Dipak K. Das, Anna George, Xuekun Liu, and Parinum S. Rao* 1004

Presence of Glucagon-(1-21)-like Immunoreactive Substance in the Dog Small Intestinal Mucosa *Hidehiko Itoh, Mitsuyoshi Namba, Nobuaki Watanabe, Toshiko Ohara, Tatsuo Matsuyama, Ryoya Komatsu, Yasuhisa Shinomura, Norio Kono, and Seiichiro Tarui* 1010

Formation of Chloramine Derivatives of Histamine: Role of Histamine Chloramines in Bronchoconstriction *Clifford D. Wright and J. Edwin Low* 1018

Purification and N-Terminal Sequence of Two Tartrate-Resistant Acid Phosphatases Type-5 from the Hairy Cell Leukemia Spleen *J. J. Štěpan, K. H. W. Lau, S. Mohan, M. Kraenzlin, and D. J. Baylink* 1027

The Role of the Carboxyl-Terminal 6 Amino Acid Extension of Human TSH β Subunit *Ken-Ichi Takata, Sachihiko Watanabe, Machiko Hirono, Mikio Tamaki, Hiroshi Teraoka, and Yoshihide Hayashizaki* 1035

Crystallizable HIV-1 Protease Derived from Expression of the Viral *pol* Gene in *Escherichia coli* *Dennis E. Danley, Kieran F. Geoghegan, Kathryn G. Scheld, S. Edward Lee, James R. Merson, Steven J. Hawrylik, Graham A. Rickett, Mark J. Ammirati, and Peter M. Hobart* 1043

A Novel β-Turn Location in an LHRH Antagonist: A Combined Conformational Search and Molecular Dynamics Study *P. K. C. Paul, P. Dauber-Osguthorpe, M. M. Campbell, and D. J. Osguthorpe* 1051

Assembly Properties of Two CNBr Fragments of Avian Desmin That Correspond to the Headpiece Domain and Helix 1B *Tauseef Saeed and Wallace Ip* 1059

NIH3T3 Transforming Gene Not a General Feature of Atherosclerotic Plaque DNA (Atherosclerosis/Oncogene/NIH3T3 Transfection Assay) *P. Renee Yew, Tripathi B. Rajavashisth, James Forrester, Peter Barath, and Aldons J. Lusis* 1067

Endotoxin Increases the Liver Fructose 2,6-Bisphosphate Concentration in Fasted Rats *Bonnie C. Miller, Emi Ishikawa, Kosaku Uyeda, and G. Larry Cottam* 1072

Effects of Recombinant Interleukin-1 β on Phospholipase A_2 Activity, Phospholipase A_2 mRNA Levels, and Eicosanoid Formation in Rabbit Chondrocytes *Janet S. Kerr, Theresa M. Stevens, Gary L. Davis, Judith A. McLaughlin, and Richard R. Harris* 1079

Site-Specific Alteration of GLY-24 in Streptokinase: Its Effect on Plasminogen Activation *Byeong Ryong Lee, Seung Kook Park, Jong Hwa Kim, and Si Myung Byun* 1085

Sexual Response in *Saccharomyces cerevisiae:* Alteration of Enzyme Activity in the Glyoxalase System by Mating Factor *Yoshiharu Inoue, Choi Bong-Young, Kousaku Murata, and Akira Kimura* 1091

A Novel 17-kDa Heparin-Binding Growth Factor (HBGF-8) in Bovine Uterus: Purification and N-Terminal Amino Acid Sequence *Peter G. Milner, Yue-Sheng Li, Ruth M. Hoffman, Charles M. Kodner, Ned R. Siegel, and Thomas F. Deuel* 1096

Reversibility of the Ionomycin Promoted Synaptosomal Hydrogen Peroxide Production *Franco Zoccarato, Renzo Deana, and Adolfo Alexandre* 1104

A Novel *A*-Type Terminal Oxidase from *Sulfolobus acidocaldarius* with Cytochrome *c* Oxidase Activity *Takayoshi Wakagi, Tatsuo Yamauchi, Tairo Oshima, Michele Müller, Angello Azzi, and Nobuhito Sone* 1110

Free Calcium Rise and Mitogenesis in Glial Cells Caused by Endothelin *Surachai Supattapone, Alec W. M. Simpson, and Christopher C. Ashley* 1115

c-myc Gene Expression in Human Cells Is Controlled by Glucose *Paola Briata, Cinzia Laurino, and Roberto Gherzi* 1123

Regulation of Cytosolic Ca^{2+} in Clonal Human Muscle Cell Cultures *Vivian Sarabia and Amira Klip* 1130

Neuropeptide Y Mobilizes Intracellular Ca^{2+} and Increases Inositol Phosphate Production in Human Erythroleukemia Cells *Alejandro J. Daniels, Eduardo R. Lazarowski, Jessica E. Matthews, and Eduardo G. Lapetina* 1138

Antimyristoylation of the *gag* Proteins in the Human Immunodeficiency Virus-Infected Cells with *N*-Myristoyl Glycinal Diethylacetal Resulted in Inhibition of Virus Production *Akira Tashiro, Shozo Shoji, and Yukiho Kubota* 1145

In Vivo Treatment with Erythroid Differentiation Factor (EDF/Activin A) Increases Erythroid Precursors (CFU-E and BFU-E) in Mice *Makoto Shiozaki, Ryosei Sakai, Mari Tabuchi, Yuzuru Eto, Masaaki Kosaka, and Hiroshiro Shibai* 1155

cDNA Cloning of Mouse Myelin-Associated Glycoprotein: A Novel Alternative Splicing Pattern *Nobuya Fujita, Shuzo Sato, Tadashi Kurihara, Ryozo Kuwano, Kenji Sakimura, Takashi Inuzuka, Yasuo Takahashi, and Tadashi Miyatake* 1162

Magnetic Circular Dichroism Studies of the Active Site Structure of Hemoprotein H-450: Comparison to Cytochrome P450 and Sensitivity of pH Effects *Edmund W. Svastits, John A. Alberta, In-Cheol Kim, and John H. Dawson* 1170

Increased Insecticidal Effect by a Recombinant Baculovirus Carrying a Synthetic Diuretic Hormone Gene *Susumu Maeda* 1177

Molecular Cloning, Sequence, and Functional Expression of the cDNA for the Human Thyrotropin Receptor *Yuji Nagayama, Keith D. Kaufman, Pui Setó, and Basil Rapoport* 1184

Sphingolipid Hydrolase Activator Proteins and Their Precursors *Akira Sano, Takashi Hineno, Tatsuo Mizuno, Keiji Kondoh, Shu-ichi Ueno, Yasuo Kakimoto, and Koji Inui* 1191

Vascular Endothelial Growth Factor: A New Member of the Platelet-Derived Growth Factor Gene Family *Edmund Tischer, Denis Gospodarowicz, Richard Mitchell,Maria Silva, James Schilling, Kenneth Lau, Tracey Crisp, John C. Fiddes, and Judith A. Abraham* 1198

Hypericin and Pseudohypericin Specifically Inhibit Protein Kinase C: Possible Relation to Their Antiretroviral Activity *Isami Takahashi, Satoshi Nakanishi, Eiji Kobayashi, Hirofumi Nakano, Kohichi Suzuki, and Tatsuya Tamaoki* 1207

Structure of Mouse 2′,3′-Cyclic-Nucleotide 3′-Phosphodiesterase Gene *Katsumi Monoh, Tadashi Kurihara, Kenji Sakimura, and Yasuo Takahashi* 1213

Biphasic Increasing Effect of Angiotensin-II on Intracellular Free Calcium in Isolated Rat Early Proximal Tubule *Kyu Yong Jung and Hitoshi Endou* 1221

Marked Increase of HGF mRNA in Nonparenchymal Liver Cells of Rats Treated with Hepatotoxins *Taisei Kinoshita, Kosuke Tashiro, and Toshikazu Nakamura* 1229

Apparent Sequence Preference in Cleavage of Linear B-DNA by the Cu(II):Thiol System *David C. A. John and Kenneth T. Douglas* 1235

Involvement of Protein Kinase C in Activation of Human Granulocytes and Peritoneal Macrophages by Type 1 Fimbriated (Mannose Specific) *Escherichia coli* *Awni Gbarah, Abner M. Mhashilkar, Geoffrey Boner, and Nathan Sharon* 1243

Cloning, Sequencing, and Expression of the Human Thyrotropin (TSH) Receptor: Evidence for Binding of Autoantibodies *Frédérick Libert, Anne Lefort, Catherine Gerard, Marc Parmentier, Jason Perret, Marian Ludgate, Jacques E. Dumont, and Gilbert Vassart* 1250

Effects of Phorbol Ester and Teleocidin on Ca^{2+}-Induced Fusion of Liposomes *Ki-Youl Nam, Shunsaku Kimura, Hirota Fujiki, and Yukio Imanishi* 1256

L-Arginine Independent Macrophage Tumor Cytotoxicity *Jim Klostergaard and M. Elena Leroux* 1262

The Second Messenger System as the Morphogenetic Field *Yoram Schiffmann* 1267

Highly Efficient Immunoliposomes Prepared with a Method Which Is Compatible with Various Lipid Compositions *Eric Holmberg, Kazuo Maruyama, David C. Litzinger, Stephen Wright, Mark Davis, George W. Kabalka, Stephen J. Kennel, and Leaf Huang* 1272

Coomassie Brilliant Blue G Is a More Potent Antagonist of P_2 Purinergic Responses than Reactive Blue 2 (Cibacron Blue 3GA) in Rat Parotid Acinar Cells *S. P. Soltoff, M. K. McMillian, and B. R. Talamo* 1279

A Genomic Clone of *Zfy*-1 from a Y^{DOM} Mouse Strain Detects Postmeiotic Gene Expression of *Zfy* in Testes *Linda M. Kalikin, Hirokazu Fujimoto, Michal P. Witt, Vera Verga, and Robert P. Erickson* 1286

Plantagoside, a Novel α-Mannosidase Inhibitor Isolated from the Seeds of *Plantago asiatica*, Suppresses Immune Response *Haruki Yamada, Takayuki Nagai, Norito Takemoto, Hitoshi Endoh, Hiroaki Kiyohara, Hideki Kawamura, and Yasuo Otsuka* 1292

β-Amyloid Precursor Is a PEST Protein *Robert Siman and Greg Christoph* 1299

Human Milk-Fat Globule Membrane-Derived Mucin Is a Disulfide-Linked Heteromer *Axel K. Duwe and Roberto L. Ceriani* 1305

Visualization of Interleukin-2-like Molecules in MPP$^+$-Lesioned Rat Brain *Shu-Mei Liang, Chi-Ming Liang, and Chuang C. Chiueh* 1312

Absence of Mutations in Codon 61 of the Ha-*ras* Oncogene in Epithelial Cells Transformed *in Vitro* by 7,12-Dimethylbenz[*a*]anthracene *Marc J. Mass and Stephen J. Austin* 1319

Selective Inhibition of Tyrosine Protein Kinase by a Synthetic Multisubstrate Analog *Isabelle Baginski, Alain Commerçon, Bruno Tocqué, Geneviève Colson, and Aurelio Zerial* 1324

Mass Spectrometric Identification and Quantification of 5-Methoxytryptophol in Quail Retina *C. W. Tsang, S. F. Chan, P. P. N. Lee, and S. F. Pang* 1331

Cloning and cDNA Sequence of the Rat X-Chromosome Linked Phosphoglycerate Kinase *Salvatrice Ciccarese, Stella Tommasi, and Gino Vonghia* 1337

Sequence of Rat Skeletal Muscle Phosphoglycerate Mutase cDNA *J. Castellà-Escolà, L. Montoliu, G. Pons, P. Puigdomènech, M. Cohen-Solal, J. Carreras, J. Rigau, and F. Climent* 1345

Evidence for a Second Isoform of the Catalytic Subunit of Calmodulin-Dependent Protein Phosphatase (Calcineurin A) *Takayoshi Kuno, Takehiko Takeda, Midori Hirai, Akira Ito, Hideyuki Mukai, and Chikako Tanaka* 1352

Induction of *c-fos* mRNA in Rat Lymphoma Nb-2 Cells *Anil Bajpai, Glen K. Andrews, and Kurt E. Ebner* 1359

Inhibition of *Clostridium difficile* Toxin A and B by 1,2-Cyclohexanedione Modification of an Arginine Residue *Joachim Balfanz and Peter Rautenberg* 1364

A New Family of 2-Hydroxyacid Dehydrogenases *Gregory A. Grant* 1371

Highly Specific Inhibition of Human Immunodeficiency Virus Type 1 by a Novel 6-Substituted Acyclouridine Derivative *M. Baba, H. Tanaka, E. De Clercq, R. Pauwels, J. Balzarini, D. Schols, H. Nakashima, C.-F. Perno, R. T. Walker, and T. Miyasaka* 1375

Inhibition of Protein Kinase C by Retroinverso Pseudosubstrate Analogs *Annie Ricouart, André Tartar, and Christian Sergheraert* 1382

Neurogenic Vasodilation and Release of Calcitonin Gene-Related Peptide (CGRP) from Perivascular Nerves in the Rat Mesenteric Artery *Akira Fujimori, Akira Saito, Sadao Kimura, Tsuyoshi Watanabe, Yasuo Uchiyama, Hiromu Kawasaki, and Katsutoshi Goto* 1391

Increased Immunoreactive Neuropeptide Y in Platelets of Spontaneously Hypertensive Rats (SHR) *Tsuneo Ogawa, Kazuo Kitamura, Mari Kawamoto, Tanenao Eto, and Kenjiro Tanaka* 1399

Tissue-Specific Expression of Three Types of β-Protein Precursor mRNA: Enhancement of Protease Inhibitor-Harboring Types in Alzheimer's Disease Brain *Seigo Tanaka, Satoshi Shiojiri, Yasuyuki Takahashi, Nobuya Kitaguchi, Hirataka Ito, Masakuni Kameyama, Jun Kimura, Shigenobu Nakamura, and Kunihiro Ueda* 1406

The Direct Activation of Human Multidrug Resistance Gene (MDR1) by Anticancer Agents *Kimitoshi Kohno, Shin-ichi Sato, Hiroshi Takano, Ken-ichi Matsuo, and Michihiko Kuwano* 1415

Expression of Normal and Abnormal Porcine Kidney D-Amino Acid Oxidases in *Escherichia coli:* Purification and Characterization of the Enzymes
Fusao Watanabe, Kiyoshi Fukui, Kyoko Momoi, and Yoshihiro Miyake 1422

Evidence for Two Separate β-Ketoacyl CoA Reductase Components of the Hepatic Microsomal Fatty Acid Chain Elongation System in the Rat
Mahmoud N. Nagi, Lynda Cook, Sanoj K. Suneja, Paul S. Peluso, Juan C. Laguna, Peter Osei, and Dominick L. Cinti 1428

Atypical Multidrug Resistance in CCRF-CEM Cells Selected for High Level Methotrexate Resistance: Reactivity to Monoclonal Antibody C219 in the Absence of P-Glycoprotein Expression *Murray D. Norris, Michelle Haber, Malcolm King, and Ross A. Davey* 1435

CUMULATIVE SUBJECT INDEX* FOR VOLUMES 158–165

A

etaldehyde
  covalent binding to type III collagen, analysis (bovine skin), **159**, 163
etanilide
  hydroxylation by cytochrome P450d, regiospecificity, effects of mutations at distal and proximal enzyme sites (yeast), **160**, 669
etoacetyl-CoA thiolase, *see* Acetyl-CoA acetyltransferase
Acetylaminofluorene, *see* *N*-2-Fluorenylacetamide
etylation
  uterine nuclear high mobility group proteins, enhancement by estradiol (neonatal guinea pig), **161**, 1260
etylcholine
  induced systemic vasodilation *in vivo*, regulatory effects of L-N^G-methylarginine and L-arginine (guinea pig), **163**, 710
  role in cardiomyopathy genesis: pyridostigmine effects on myocardial mitochondrial electron transport activity (rat), **164**, 997
cetylcholine receptors
  α-bungarotoxin-binding peptide of α-subunit, antibodies to, in characterization of receptor binding site (electric ray), **160**, 289
  muscarinic, role in short-term desensitization of phosphatidylinositol turnover (guinea pig), **162**, 733
  nicotinic
    monoclonal antibodies to main immunogenic region, interaction with synthetic peptides (human), **165**, 865
    M2δ transmembrane domain, synthetic peptide with same sequence, role in ion channel formation in erythrocyte membranes (human), **162**, 352
cetylcholinesterase
  free sulfhydryl groups, labeling by *S*-mercuric-*N*-dansylcysteine (human serum), **158**, 503
cetyl-CoA acetyltransferase
  cytoplasmic, inhibition by triyne carbonate (rat liver), **163**, 548
cetyl-CoA acyltransferase
  deficiency in infants with peroxisomal disorders, molecular anlysis, **161**, 242
cetylene
  effects on hydrogenases from sulfate-reducing and methanogenic bacteria, **161**, 127
-*N*-Acetylgalactosaminidase, *see* α-Galactosidase
N-Acetyl-β-glucosaminidase
  identification and characterization (*Aspergillus flavus*, *A. parasiticus*), **159**, 464
N-Acetyl glucosaminyltransferase, *see* α-1,3-Mannosyl-glycoprotein-β-1,2-*N*-acetylglucosaminyltransferase
Acetylhydrolase, *see* Fusarinine-C ornithinesterase
N-Acetyllactosaminide α-1,3-galactosyltransferase
  immunodetectable, association with spermatozoa of high buoyant density (human), **162**, 184
N-Acetylneuraminic acid
  localization in colonic tumor and mucosal glycopeptides from carrageenan- and 1,2-dimethylhydrazine-treated rats, **159**, 452
Achatin-I
  D-amino acid-containing, purification and neuroexcitatory effects (snail), **160**, 1015
α1-Acid glycoprotein
  hepatic mRNA levels, effect of murine recombinant tumor necrosis factor (rat), **161**, 81
Acid phosphatase
  cDNA cloning and sequencing (rat liver), **162**, 1044
  inhibition by vanadate monomers and dimers, effects of pH (human seminal fluid, potato, wheat germ), **165**, 246
  prostatic, cDNA cloning, gene mapping, and protein sequence homology with lysosomal acid phosphatase (human), **160**, 79
  role in bone resorption (rat), **159**, 68
  types 5a and 5b, tartrate-resistant, purification and N-terminal sequence (human hairy cell leukemia spleen), **165**, 1027
Acinar cells
  intracellular calcium stores, mobilization by inositol 1,2-cyclic 4,5-trisphosphate and inositol 1,4,5-trisphosphate, comparison (murine pancreas), **159**, 561
  single, secretagogue-induced Ca^{2+} mobilization (rat pancreas), **158**, 863
Acivicin
  with *cis*-diamminedichloroplatinum(II), effects on thymidylate synthase and thymidine kinase in A549 lung cancer cells (human), **161**, 31
Acquired immune deficiency syndrome, *see also* Human immunodeficiency virus
  zidovudine treatment, increased efficacy in combination with vitamin E (human MT4, murine bone marrow cells), **165**, 401
Acrosin
  zymogen form, activation by spermatozoal 32-kDa protein (pig), **160**, 1026

---

*Boldface numbers indicate appropriate volume; lightface numbers indicate pagination.

ACTH, see Adrenocorticotropin
Actin
  assembly in electropermeabilized neutrophils, role of G-proteins (human), **164**, 700
  15-kDa binding fragment in caldesmon, amino acid sequence: comparison with dystrophin, tropomyosin and tropomyosin-binding region of troponin T (turkey gizzard), **160**, 210
  globular, –ATP, in annealing of actin polymerized by Ca^{2+}, requirement of substoichiometric concentrations (rabbit muscle), **159**, 7
  receptor-mediated assembly in electropermeabilized neutrophils, role of intracellular pH (human), **160**, 18
  35-kDa binding fragment in caldesmon C-terminus, sequence analysis (turkey gizzard), **160**, 1371
  type β, hepatic mRNA levels, effect of murine recombinant tumor necrosis factor (rat), **161**, 81
Actinomycin D, *see* Dactinomycin
Activin A
  dual effect on cell growth (BALB/c 3T3 cells), **159**, 1107
  interaction with somatostatin, effect on FSH secretion (rat pituitary), **162**, 958
Activin receptors
  expressed on Friend erythroleukemia and embryonal carcinoma cells, identification of two types, **161**, 1267
Actomyosin
  –ADP complex, role in regulation of Ca^{2+} sensitivity in α-toxin-permeabilized smooth muscle (rabbit), **165**, 408
Acyclouridine
  6-substituted derivative, highly specific inhibition of HIV-1 in T4 cell cultures (human), **165**, 1375
Acylation
  post-translational, poliovirus proteins, analysis (HeLa cells), **158**, 263
Acyl-CoA-desaturase
  microsomal, desaturation of linoleate and α-linolenate, aging effects (rat liver), **163**, 348
Acyl-protein synthetase
  from *Vibrio harveyi* and *V. fischeri*, amino acid sequence comparison, **163**, 93
Adenine
  and asparagine, effects on glutamine requirement for growth of peripheral lymphocytes (human), **164**, 1348
Adenine nucleotides
  effects on choriogonadotropin α and β subunit synthesis (human), **160**, 6
Adenosine
  lifetime evidence for weak lowest electronic transition, **162**, 781
Adenosine cyclic 3′,5′-phosphorothioate
  Rp-diastereomer, and insulin, synergistic inhibition of hepatic ketogenesis (rat), **159**, 741
Adenosine diphosphoribose
  enzymatic oxidation, analysis (*Penicillium charlesii*), **75**, 739; *erratum*, **163**, 665
Adenosine receptors
  A_1, antagonist 1,3-dipropyl-8-cyclopentylxanthine: agonist properties in FRTL5 thyroid cells, **159**, 355
  characterization (human adipocytes), **163**, 137
Adenosylmethionine decarboxylase
  mRNA, cell content and translational efficiency, po
    amine-mediated control (bovine), **160**, 1196
S-Adenosyl-L-methionine:magnesium protoporphyrin meth
    transferase, *see* Magnesium-protoporphyrin meth
    transferase
Adenovirus type 2
  E1A-inducible E4 promoter, core sequences, role in form
    tion of specific DNA–protein complex (HeLa cell
    163, 1143
Adenovirus type 5
  DNA terminus, reverse-oriented transcription from, repre
    sion by nuclear factor I, **164**, 1212
Adenovirus type 12
  E1A gene, factors bound at two sites in 5′-upstream
    gion, interactions (Ehrlich ascites tumor cells), 15
    685
Adenylate cyclase
  affecting agents, modulation of 1,25-dihydroxyvitamin
    stimulatory action on osteocalcin production in bo
    cells (human), **164**, 1076
  platelet-associated, regulation by GTP and analog, effec
    of hypertension (rat), **162**, 1265
  from rat pituitary, stimulatory 38-residue ovine hyp
    thalamic polypeptide, isolation, **164**, 567
Adenylate cyclase inhibitors
  interactions with β-adrenoceptors in isolated adipocyt
    (human), **161**, 654
Adipocytes
  activation of ATP,Mg-dependent phosphatase, role of ins
    lin activation of membrane kinase activating fact
    FA (rat), **158**, 762
  brown
    adrenergic regulation of uncoupling protein expressio
      in vitro (fetal rat), **163**, 541
    hormonal regulation of malic enzyme expression *in vitr*
      (fetal rat), **163**, 341
    regulation of intracellular Ca^{2+} levels by α_1- and β-a
      renergic receptors (hamster), **163**, 292
  insulin receptor-associated tyrosine kinase activity, d
    crease during aging (rat), **160**, 303
  insulin-treated, derived microsomes, colocalization of gl
    cose transporter and insulin receptor (rat), **159**, 1368
  interactions between adenylate cyclase inhibitors and β-a
    renoceptors *in vitro* (human), **161**, 654
  protein synthesis, effect of phenylarsine oxide, **161**, 63
  treatment with insulin and lipolytic hormones, stimulatio
    of same phosphodiesterase isoform (rat), **162**, 814
Adipokinetic hormone
  locust, related immunoreactivity in human cerebrospin
    fluid, identification and characterization, **163**, 534
Adipose tissue
  uncoupling protein mRNA processing: use of one of tw
    polyadenylation signals (rabbit), **161**, 156
ADP (adenosine 5′-diphosphate)
  –actomyosin complex, role in regulation of Ca^{2+} sensiti
    ity in α-toxin-permeabilized smooth muscle (rabbit
    165, 408
  and ATP, inhibition of cAMP production in intact isopr
    terenol-stimulated C6 glioma cells (rat), **163**, 1150

  ffect on calcium channel activation (human platelets), **162**, 24
DP/ATP translocase
  mitochondrial, inhibition by bongkrekic acid and op$_1$ mutation in rho$^-$ mutants, role in cell growth defects (yeast), **159**, 612
DP-ribose)$_n$
  metabolic pathway: pyrophosphorolysis of ADP-ribose in nuclei (HeLa S3 cells), **163**, 1047
DP-ribosylation
  cholera toxin-catalyzed, receptor-coupled form of pertussis toxin-sensitive G proteins, analysis (NG108-15 cells), **165**, 554
  and de-ADP-ribosylation, DNA-regulated arginine-specific, endogenous acceptor proteins (human neutrophils), **163**, 452
  G$_i$ proteins, and phosphorylation, effects of insulin (rat hepatocytes), **165**, 251
  GTP-binding proteins by pertussis toxin, detection of endogenous inhibitor in bovine brain, **160**, 67
  mediated inactivation of elongation factor-2, cell cycle-associated changes (human fibroblasts, HeLa cells), **159**, 1141
  mono-, proteins in skeletal muscle, enzymatic and nonenzymatic types (rat), **163**, 1063
  Nb$_2$ lymphoma cell membrane proteins by bacterial toxins, effects of prolactin, **156**, 776; *erratum*, **161**, 392
DP-ribosyltransferase
  arginine-specific, trypsin-solubilized from sarcoplasmic reticulum as active form, partial purification and characterization (rabbit), **164**, 128
  botulinum
    C3, identification of *rho* gene product as substrate (*Escherichia coli*), **158**, 209
    substrate Gb, cDNA cloning and identification as *rho* gene product (bovine adrenal gland), **163**, 1175
ADP-ribosyltransferase inhibitors
  prevention of interferon-induced histidine decarboxylase activity in basophilic leukemic cells after coincubation (rat), **158**, 94
Adrenalectomy
  associated sensitivity to interleukin-1 lethality, protective effect of chlorpromazine (mouse), **165**, 942
Adrenal gland
  binding of insulin and insulin-like growth factor I, comparison (hamster, human, rat), **165**, 204
  capsular portion, aldosterone synthesis in dispersed cells, stimulation by endothelin (rabbit), **160**, 628
  DNA binding to 2-mercaptobenzothiazole *in vivo*, analysis (rat), **165**, 342
  soluble guanylate cyclase, stimulation by nitric oxide from L-arginine (bovine, rat), **165**, 802
α-Adrenergic receptors
  in perfused mesenteric arteries, interaction with endothelin, analysis (rat), **159**, 1304
  role in regulation of uncoupling protein expression in cultured brown adipocytes (fetal rat), **163**, 541
  type 1, role in regulation of intracellular Ca^{2+} levels in brown adipocytes (hamster), **163**, 292
  type 2, identification in Y-79 retinoblastoma and SH-SY5 neuroblastoma cells (human), **158**, 921
β-Adrenergic receptors
  cardiac, effects of dietary eicosapentaenoic acid (marmoset), **162**, 686
  impaired desensitization in myocardium of spontaneously hypertensive rats, role of cytosolic factors, **159**, 1039
  interactions with adenylate cyclase inhibitors in isolated adipocytes (human), **161**, 654
  mammalian, high-efficiency expression in baculovirus-infected *Spodoptera frugiperda* cells, **163**, 1265
  role in regulation of
    intracellular Ca^{2+} levels in brown adipocytes (hamster), **163**, 292
    uncoupling protein expression in brown adipocytes (fetal rat), **163**, 541
  type 1, proteolytic degradation routes, analysis with antipeptide antibodies against receptor N-terminal sequence (turkey), **165**, 264
  type 2, extracellular cysteine in, substitution, enhancement of agonist-promoted phosphorylation and receptor desensitization (CHW cells), **165**, 257
Adrenergic system
  associated neurotransmission in isolated mesenteric artery, inhibition by endothelin (rat), **161**, 803
Adrenocortical cells
  adult and fetal, identification of glucocorticoid receptors (sheep), **162**, 604
  corticotropin receptors and corticotropin responsiveness *in vitro*, synergistic effects of corticotropin and insulin-like growth factor I (bovine), **165**, 355
  insulin-like growth factor receptors, regulation by angiotensin II and corticotropin (bovine), **163**, 32
Adrenocorticotropic hormone, *see* Adrenocorticotropin
Adrenocorticotropin
  effects on stability of mRNAs encoding adrenocortical cytochromes P450$_{scc}$, P450$_{11β}$, P450$_{17α}$, P450$_{C21}$, and adrenodoxin (bovine), **160**, 1227
  and glucagon, insulin, and isoproterenol, stimulation of same phosphodiesterase isoform in adipose tissue (rat), **162**, 814
  and insulin-like growth factor I, synergistic effects on corticotropin receptors and corticotropin responsiveness in cultured adrenocortical cells (bovine), **165**, 355
  regulation of insulin-like growth factor receptors *in vitro* (bovine adrenocortical cells), **163**, 32
  release by anterior pituitary cells, secretagogue-induced, inhibition by cGMP and guanylate cyclase activators (rat), **158**, 824
  releasing activities of human and rat interleukins in homologous and heterologous *in vivo* system, comparison (rat), **164**, 1262
Adrenocorticotropin receptors
  and ACTH responsiveness, synergistic effects of ACTH and insulin-like growth factor I (bovine adrenocortical cells), **165**, 355
Adrenodoxin
  adrenocortical, encoding mRNA stability, effects of ACTH (bovine), **160**, 1227
  –adrenodoxin reductase system in mitochondria, associated electron transfer, rate enhancement by dicar-

boxylic acids (bovine adrenal gland), **162**, 168
promoter element activity, analysis (human), **159**, 343
Adrenodoxin reductase, *see* Ferredoxin–NADP$^+$ reductase
Adriamycin, *see* Doxorubicin
Aequorin
intracellular loading in papillary muscles by different methods, evaluation (ferret), **162**, 402
Aerosols
endothelin, bronchopulmonary action after administration, pharmacological modulation (guinea pig), **158**, 625
Affinity chromatography
Cibacron Blue F3Ga, in purification and comparison of NAD(P)H:quinone reductase from cytosol and microsomes (rat liver), **161**, 434
Affinity labeling
opsin by *trans*-retinoyl chloromethane (bovine retina), **160**, 942
Aflatoxin B$_1$
3-methylcholanthrene-inducible cytochrome P450 isozyme with high activity toward, complete cDNA sequence analysis (hamster), **162**, 265
microsome-mediated binding to DNA, alteration by Δ-9-tetrahydrocannabinol exposure (rat liver), **160**, 217
Agarose
–GDP, in identification of 60-kDa substrate for insulin receptor tyrosyl kinase (murine NIH-3T3 cells), **158**, 743
–polylysine-immobilized GABA$_A$ receptors, ligand binding characteristics (rat cerebrocortical membranes), **163**, 611
Age
associated decline in hepatic mitochondrial respiratory functions (human), **165**, 994
cellular, effect on active calcium transport in inside-out membrane vesicles (human erythrocytes), **159**, 432
effects on
catalase and superoxide dismutase expression (rat liver), **164**, 620
heat shock induction of HSP 89 (human fibroblasts), **162**, 1302
insulin receptor-associated tyrosine kinase activity (rat), **160**, 303
iron spin state of testosterone-binding microsomal cytochromes P450 (rat liver), **158**, 480
microsomal linoleate and α-linolenate desaturation (rat liver), **163**, 348
muscle carnitine levels (human, mouse), **161**, 1135
α-Agglutinin
expression in yeast, **161**, 46
Aggregin
cleavage during thrombin-induced platelet aggregation, mediation by high-affinity thrombin receptors (human), **162**, 1017
AIDS, *see* Acquired immune deficiency syndrome
Airway obstruction
simulated, induction of atrial natriuretic factor release (human), **160**, 808
Alanine–glyoxylate aminotransferase
hepatic, response to glucagon, differences among mammalia, **165**, 372
subcellular distribution in kidney: presence as apoenzym in peroxisomes (chicken), **161**, 696
Alanine:glyoxylate aminotransferase 1, *see* Alanine–glyox late aminotransferase
Albinism
oculocutaneous, identification of single base insertion i tyrosinase gene as cause (human), **164**, 990
Albumin
cDNA, transfected COS-1 cells, processing of proalbumi to serum albumin, **163**, 194
production by multicellular spheroids of hepatocyte formed in presence of liver-derived proteoglycans analysis (rat), **161**, 385
serum, *see* Serum albumin
structural regions encoded by self-complementary mRNA of albumin mRNA, analysis (human), **163**, 466
Alcohol dehydrogenase
class I, isolation and characterization of isozymes (rabbi liver), **158**, 445
class III
cDNA cloning and comparative mapping (human liver) **164**, 453
cDNA sequence analysis (human), **164**, 631
interspecific analysis by immunoenzymatic assay wit monoclonal antibodies (fruit fly), **160**, 638
Alcohols
hydrophobic moieties, promotion of DNA B-to-Z transi tion in poly[d(G-C)] and poly[d(G-m^{5}C)], **164**, 426
Alcohol sulfotransferase
cDNA cloning and sequence analysis (rat liver), **165**, 168
Aldehyde reductase
cerebral, and hepatic 6-pyruvoyl tetrahydropterin reduc tase, biochemical and immunological identit (human), **164**, 1130
Aldose reductase, *see* Aldehyde reductase
Aldosterone
angiotensin-induced secretion, inhibition in adrena glomerulosa cells by atrial natriuretic peptide, role o cGMP and phopholipase C (bovine), **159**, 148
effects on electrolytes in lymphocytes, mediation by cell membrane Na$^+$/H$^+$-exchanger (human), **164**, 961
synthesis by dispersed adrenocapsular cells, stimulation by endothelin (rabbit), **160**, 628
Alginate
synthesis in *Pseudomonas aeruginosa*, regulatory role o *algR1* gene, **164**, 601
Alkaline phosphatase
effect on murine DNA polymerase α (bovine intestine) **159**, 1397
identification and characterization (*Aspergillus flavus*, *A parasiticus*), **159**, 464
1-*O*-Alkyl-2-acylglycerol
receptor-mediated accumulation in neutrophils, mass deter mination by Coomassie blue staining and den sitometry (human), **159**, 79
Alloxan
free radicals, generation in chemical and biological sys tems: implication in alloxan diabetogenic action (rat) **165**, 278

zheimer's disease
  amyloid peptide, encoding by two exons and sequence similarity to soybean trypsin inhibitor (human), **163**, 1248
  amyloid β-protein precursor
    detected in senile plaques, brain extract, and cerebrospinal fluid, characterization (human), **163**, 430
    mRNA expression in brain, enhancement of protease inhibitor-harboring types, **165**, 1406
    murine homolog, mRNA structure and expression of alternatively spliced forms, **158**, 906
    release from PC12 cells, induction by nerve and epidermal growth factors, **164**, 664
    soluble derivatives, labeling by antisera to β-amyloid protein (human cerebrospinal fluid), **165**, 182
  associated paired helical filaments, selective incorporation of distinct form of tau phosphoprotein (human), **159**, 1221
-Amidating enzyme
  secreted, generation by specific post-translational processing of precursors with transmembrane domains (rat medullary thyroid carcinoma cells), **163**, 959
miloride
  and analogs, competitive inhibition of tritium-labled platelet-activating factor binding to platelet membranes (rabbit), **163**, 165
  inhibition of myosin light chain kinase (turkey gizzard), **162**, 1253
minacrine
  induced morphological alterations in erythrocyte membranes, analysis (human), **163**, 1351
mine oxidase (copper-containing)
  effects of temperature and polyvinyl alcohol (bovine serum), **163**, 1168
  peptide isolate containing pyrroloquinoline quinone, structural analysis (porcine kidney), **159**, 726
Amine oxidase (flavin-containing)
  type B, selective inactivation by benzyldimethylsilylmethanamines *in vitro* (rat brain), **160**, 540
Amino acid acceptors
  role of tRNA^{Asp} discriminator base (*Escherichia coli*), **163**, 1534
Amino acid amidase
  D-stereospecific, partial purification and characterization (*Ochrobactrum anthropi*), **162**, 470
Amino acid composition
  amino-terminal gastrin fragments (human urine), **160**, 1364
  deaminated neuraminic acid-rich glycoprotein from ovarian fluid (trout), **164**, 744
  low-molecular-weight high-affinity cytosolic lead-binding protein (rat brain), **159**, 177
  Mg^{2+}-ATPase (human erythrocytes), **162**, 1
  phosphopeptides released during dialysis of EDTA-reacted highly purified nuclear DNA (bovine thymus), **163**, 1135
  progastrin carboxyl terminal flanking peptide (rat), **161**, 69
  proline-rich protein (human liver), **165**, 138
  recombinant placental ribonuclease inhibitor expressed in *Escherichia coli* (human), **160**, 115
D-Amino-acid oxidase
  biologically active, production in *Escherichia coli* (pig), **161**, 865
  normal and abnormal, expressed in *Escherichia coli*, purification and characterization (pig), **165**, 1422
α-Amino acids
  in formation of Schiff base copper(II) chelate, evaluation as tool for intermolecular crosslinking and immobilization of protein, **161**, 52
D-Amino acids
  substitution for single residue in long-acting heat-stable *Escherichia coli* enterotoxin, analysis, **161**, 229
Amino acid sequence
  acyl-protein synthetase of *Vibrio harveyi* and *V. fischeri*, comparison, **163**, 93
  alkane-hydroxylating cytochrome P450 (*Candida maltosa*), **161**, 843
  allatostatin (cockroach brain complex), **163**, 1243
  aminopeptidase M (rat kidney), **161**, 236
  amino-terminal
    ATPase–ATP synthase complex β-subunit (rat liver), **164**, 1165
    calcium-binding protein (canine brain), **164**, 575
    gastrin fragments (human urine), **160**, 1364
    heparin-binding growth factor (bovine uterus), **165**, 1096
    hepatopoietin A (rabbit blood), **163**, 1370
    insulin-like growth factor-binding protein (rat serum), **165**, 189
    lipoprotein lipase-inhibiting protein from cachexia-inducing melanoma cell line (human), **160**, 1085
    normal and abnormal D-amino acid oxidase expressed in *Escherichia coli* (porcine kidney), **165**, 1422
    β-protein precursor from newborn brain (rat), **160**, 1296
    retinoic acid-binding protein 16.2-kDa cellular form (chicken embryo), **157**, 1302; *erratum*, **159**, 371
    tartrate-resistant acid phosphatase types 5a and 5b (human hairy cell leukemia spleen), **165**, 1027
  α-amylase inhibitor Paim II (*Streptomyces coruchorushii*), **158**, 514
  amyloid peptide, similarity to soybean trypsin inhibitor (human), **163**, 1248
  β-amyloid protein precursors, identification of PEST structural motif, **165**, 1299
  atrial natriuretic peptide (eel), **164**, 537
  avian thymic hormone, identification as parvalbumin (chicken), **160**, 1155
  bacterioferritin (*Escherichia coli* K-12), **158**, 489
  bovine pancreatic cholesterol esterase, homology with rat lysophospholipase, **164**, 1302
  brain natriuretic peptide precursor
    human, **159**, 1427
    rat, **159**, 1420
  brain natriuretic peptides BNP-45 and γ-BNP (rat atrium), **163**, 226
  calcineurin A, homology with protein phosphatases 1 and 2A (rat brain), **163**, 1492
  caldesmon actin-binding 15-kDa fragment, comparison with dystrophin, tropomyosin, and troposmyosin-binding region of troponin T (turkey gizzard), **160**, 210

  caldesmon C-terminal actin- and calmodulin-binding 35-kDa fragment (turkey gizzard), **160**, 1371
  h-caldesmon 35-kDa fragment, relation to consensus sequences of troponin T tropomyosin-binding domain (chicken gizzard), **161**, 38
  calmodulin-dependent protein phosphatase catalytic subunit (rat), **165**, 1352
  canine and human homologs of porcine brain natriuretic peptide, **165**, 650
  cardiac natriuretic peptide (rat), **163**, 233
  chaperonin P1-related proteins, phylogenetic comparison: endosymbiotic origin of mitochondrion and chloroplast, **163**, 780
  chemotactic factor for neutrophils from precursor calcium-dependent cysteine proteinase (human), **164**, 875
  chromosomal high mobility group protein HMG-Y (human placenta), **158**, 646
  connective tissue activating peptide III isoforms (human platelets), **163**, 1071
  determination by computer program PREDICT7, **159**, 687
  endothelin 1 (porcine spinal cord), **162**, 340
  endothelins 1 and 3 (porcine brain), **164**, 587
  α-galactosidase B (human placenta), **163**, 1498
  G25K GTP-binding protein-derived peptides (human placenta, platelets), **160**, 25
  glucose-6-phosphate dehydrogenase: identification of limited variation within yeasts (*Pichia jadinii*), **160**, 1290
  glutaredoxin, revision (bovine thymus), **159**, 1448
  heat shock protein hsp 90 (chicken), **159**, 140
  hepatocyte growth factor (human), **163**, 967
  human epidermal growth factor produced by *Escherichia coli*, **163**, 1100
  2-hydroxyacid dehydrogenases, homology, **165**, 1371
  hydroxysteroid sulfotransferase (rat liver), **165**, 168
  hypothalamic 38-residue polypeptide (sheep), **164**, 567
  islet amyloid polypeptide (rat pancreas), **164**, 400
  lipocortin I (mouse), **159**, 155
  lymphocyte perforin (mouse), **158**, 1
  membrane-associated phospholipase A_2 (human spleen), **163**, 42
  3-methylcholanthrene-inducible cytochrome P450 isozyme with high activity toward aflatoxin B_1 (hamster), **162**, 265
  monocyte chemotactic and activating factor (human), **159**, 249
  myelin-associated glycoprotein (human), **163**, 1473
  NADPH-monooxygenases (rabbit liver), **163**, 49
  Na^+,K^+-ATPase inhibitors SPAI-1, -2, and -3, **164**, 496
  neurofilament subunit NF-M at extreme C-terminus, identification of previously unrecognized motifs in published avian and mammalian sequences, **162**, 294
  nuclear factor I, homology with protein kinases (human, pig, rat), **162**, 427
  pancreastatin-related tumor-derived protein (human), **164**, 141
  pancreatic secretory trypsin inhibitor types I and II (rat), **162**, 151
  parathymosin (human kidney), **158**, 855
  pheromone biosynthesis-activating neuropeptide PBAN (silkworm), **163**, 520
  phosphoglycerate mutase (rat muscle), **165**, 1345
  potassium channel-inducing membrane protein, (human **161**, 176
  prostaglandin endoperoxide synthase (human), **165**, 888
  prostatic acid phosphatase, homology with lysosomal aci phosphatase (human), **160**, 79
  protein carboxyl methyltransferase (rat brain), **161**, 342
  pulmonary surfactant-associated protein-B (rabbit), **16** 325
  pyrroloquinoline quinone-containing peptide from diamin oxidase (porcine kidney), **159**, 726
  pyruvate dehydrogenase α subunit (yeast), **164**, 941
  rat insulin-like growth factor-binding protein IGF-BP3 comparison with human and porcine forms, **165**, 907
  ribosomal protein L21 (rat), **162**, 364
  Rieske iron-sulfur protein of cytochrome bc_1 comple (rat), **159**, 19
  sarafotoxins, relationship to vasoconstrictor effects in aort (rabbit), **162**, 371
  secretin (rat intestine), **160**, 862
  sialoglycoprotein in hepatic lysosomal membranes (rat) **164**, 1113
  substance K receptor (rat), **165**, 695
  thyroid-stimulating hormone β subunit (human), **165**, 103
  thyrotropin receptor (human), **165**, 1250
  TR2-9 and TR2-11 steroid receptors with multiple ligand binding domains (human prostate, testis), **165**, 735
  transacylase subunit of branched-chain α-keto acid dehydrogenase (human), **161**, 1035
  vascular endothelial growth factor (bovine), **165**, 1198
  X-chromosome-linked phosphoglycerate kinase (rat), **16** 1337
9-Aminoacridine, *see* Aminacrine
Aminoacyl-tRNA synthetase complex
  functional significance in aminoacylation of tRNA^{leu} isoa ceptors (rat liver), **163**, 513
L-Aminoadipate-semialdehyde dehydrogenase
  partially purified, properties (yeast), **161**, 182
α-Aminoalkylphosphonate diphenyl esters
  peptidyl derivatives, irreversible inhibition of serine pr teases (bovine, human, pig), **161**, 143
3-Aminobenzamide
  potentiation of *N*-methyl-*N′*-nitro-*N*-nitrosoguanidine-i duced O^6-methylguanine-DNA-methyltransferase a tivity (rat hepatoma cells), **163**, 599
  prevention of interferon-induced histidine decarboxylas activity in basophilic leukemic cells after coincub tion (rat), **158**, 94
4-Aminobiphenyl, *see* *p*-Biphenylamine
Aminobutylhomospermidine
  production by fast-growing root nodule bacteria, **165**, 659
γ-Aminobutyric acid receptors
  $GABA_A$, immobilization by ConA–Sepharose and pol lysine–agarose beads and ligand binding characteri tics (rat brain), **163**, 611
Aminoglutethimide
  mediated blockade of cholesterol side-chain cleavage

    cultured glial cells, release, effect on steroidogenesis (rat), **161**, 917
-Aminolevulinate synthase
  mRNA, stability, regulation by hemin (chicken embryo liver), **162**, 102
-Aminonicotinamide
  and gossypol, effects on tumor cell metabolism, ^{31}P-MRS study (T47-D cells), **164**, 947
  potentiation of *N*-methyl-*N*′-nitro-*N*-nitrosoguanidine-induced O^6-methylguanine-DNA-methyltransferase activity (rat hepatoma cells), **163**, 599
Aminopeptidase
  identification and characterization (*Aspergillus flavus*, *A. parasiticus*), **159**, 464
Aminopeptidase M, *see* Microsomal aminopeptidase
2-Aminopurine
  –cytosine mismatch, associated high-pH wobble structure, characterization by ^{15}N NMR spectroscopy, **165**, 89
  sensitivity, association with intact GATC activity in *dam* gene mutation (*Vibrio cholerae*), **165**, 561
Aminopyrine *N*-demethylase
  microsomal, induction by phenobarbital, effect of cimetidine (rat liver), **162**, 1363
9-Amino-1,2,3,4-tetrahydroacridine, *see* Tacrine
Ammonia
  effects on neutrophil *N*-formyl chemotactic peptide receptor–ligand interaction and cytoskeletal association (human), **165**, 377
Ammoniagenesis
  renal, regulatory role of α-adrenergic stimuli (rat), **162**, 116
Ammonium acetate
  induced changes in mitochondrial respiration, protective effects of carnitine (rat liver), **158**, 181
Ammonium chloride
  induced changes in mitochondrial respiration, protective effects of carnitine (rat liver), **158**, 181
Amniotic fluid
  demostration of glycosylated prolactin species covalently bound to immunoglobulin (human), **165**, 299
Amphotericin B
  induced changes in renal membrane ion permeation: model of nephrotoxicity (rabbit), **159**, 1165
  and nystatin, differential effects on sterol-free vesicles, **164**, 609
Amylase
  release in parotid cells, effects of eicosanoids (rat), **161**, 379
  secretion in pancreatic acini, inositol trisphosphate-independent increase (rat), **164**, 8
α-Amylase inhibitors
  Paim II, amino acid sequence, determination by high-performance tandem mass spectrometry (*Streptomyces coruchorushii*), **158**, 514
Amylin
  and amidated form, effects on calcium metabolism (rabbit, rat), **162**, 876
Amyloid
  fibril deposits, secondary structure determination by circular dichroism (human), **162**, 1162
  β-protein precursor
    detected in senile plaques, brain extract, and cerebrospinal fluid of Alzheimer's disease patients, characterization, **163**, 430
    encoding gene, characterization of 5′-end region and first two exons (human), **159**, 297
    identification in newborn brain (rat), **160**, 1296
    identification as PEST sequence-containing protein, **165**, 1299
    mRNA
      for murine homolog, structure and expression of alternatively spliced forms, **158**, 906
      regulation by phorbol ester in testicular peritubular cells (rat), **161**, 568
      tissue-specific expression: enhancement of protease inhibitor-harboring types in Alzheimer's disease brain (human), **165**, 1406
    with protease inhibitor domain, mitogenicity (Swiss 3T3 cells), **162**, 83
    release from PC 12 cells, induction by nerve and epidermal growth factors (rat), **164**, 664
    soluble derivatives, labeling by antisera to β-amyloid protein (human cerebrospinal fluid), **165**, 182
Anacystis
  A. nidulans
    cytoplasmic membrane 47-kDa polypeptide, relationship to nitrate transport, **158**, 257
    plasma membrane, light-independent activity of protochlorophyllide reductase, demonstration, **162**, 71
  carotenogenesis *in vitro*, in characterization of phytoene desaturase reaction, **163**, 916
Androgens
  independent prostatic cancer cells, thymine-less death, molecular mechanism (rat), **165**, 73
  response element in first intron of C3(1) gene of prostatic binding protein, functional characterization (T-47D cells), **164**, 833
Angiogenesis
  cultured endothelial cells, effects of leukotrienes and prostaglandin E_2 (bovine carotid artery), **159**, 572
Angiogenin
  biological and enzymatic activities, inhibition by carboxy-terminal angiogenin peptides (BHK cells), **162**, 535
  depression of smooth muscle cell cAMP levels by pertussis toxin-sensitive mechanism (rat aorta), **163**, 902
  ribonucleolytic activity toward yeast tRNA, characterization (human), **161**, 121
Angiotensin II
  and atrial natriuretic peptide, action on myocardium, analysis in isolated ventricular cardiomyocytes (rat), **163**, 1435
  biphasic increasing effect on intracellular free Ca^{2+} in isolated early proximal tubule (rat), **165**, 1221
  down-regulation of endothelin-1 binding sites in vascular smooth muscle cells (rat), **164**, 809
  induced aldosterone secretion in adrenal glomerulosa cells, inhibition by atrial natriuretic peptide, role of cGMP and phopholipase C (bovine), **159**, 148
  induced calcium mobilization in vascular smooth muscle cells, effect of valinomycin (rat), **162**, 491

  local generation and release in vascular tissue, direct evidence (human), **165**, 457
  (+)mRNA, complementary (−)mRNA-encoded peptide, identification as angiotensin receptor antagonist (human), **160**, 1387
  regulation of insulin-like growth factor receptors *in vitro* (bovine adrenocortical cells), **163**, 32
  stimulation of endogenous response in ovarian follicles (*Xenopus laevis*), **159**, 658
  strong and persistent antagonism by hydrophobic analog (rabbit, rat), **160**, 1350
Angiotensin-converting enzyme, *see* Dipeptidyl carboxypeptidase I
Angiotensin II receptors
  identification of subtypes (rat adrenal gland), **165**, 196
  subtypes A and B, biochemical characterization (human, rat), **163**, 284
  transient expression in COS-7 cells: functional analysis of Ca^{2+}-mobilizing seven-transmembrane-domain receptor, **165**, 935
Anions
  hydrophobic moieties, promotion of DNA B-to-Z transition in poly[d(G-C)] and poly[d(G-m^{5}C)], **164**, 426
Annexins
  antibodies, preparation and characterization (human), **161**, 959
Antibiotics
  anthracycline, effects on reconstituted mitochondrial tricarboxylate carrier (rat liver), **164**, 1281
Antibodies
  to advanced glycation products on proteins, production and characterization, **162**, 740
  to amino-terminal myristoyl glycine, detection of NH_2-terminal myristoylated proteins in retrovirus-infected cells, **162**, 724
  anti-liver/kidney microsome
    identification of cytochrome P450 antigen in autoimmune chronic hepatitis (human), **159**, 283
    type 1, recognition of cytochrome P450 db1 (human), **159**, 542
  antipeptide, against β_1-adrenoreceptor N-terminal sequence, in analysis of receptor proteolytic degradation routes (turkey), **165**, 264
  anti-RegA, in identification of RegA protein (*Pseudomonas aeruginosa*), **163**, 1312
  auto-, *see* Autoantibodies
  to bacterial ATP-dependent protease Ti, immunoreactivity with separated yeast proteasome subunits, **164**, 1253
  to α-bungarotoxin-binding peptide of acetylcholine receptor α-subunit, in characterization of receptor binding site (electric ray), **160**, 289
  cationic peroxidase, in analysis of structural relationship to anionic isozyme (peanut), **163**, 689
  c-*erb* A peptide, recognition of nuclear T_3 receptors (rat kidney, liver), **160**, 148
  chargerin II peptide, in determination of chargerin II orientation in mitochondrial ATP synthase (rat liver), **165**, 449
  chimeric bispecific, production by gene transfection (murine myeloma cells), **164**, 271
  human annexin, preparation and characterization, **161**, 95
  macropain, pretreated BHK cells, ATP-dependent pr teolysis in soluble extracts, restoration by macropa latent form, **160**, 911; *erratum*, **161**, 944
  monoclonal, *see* Monoclonal antibodies
  monospecific polyclonal, against synthetic peptide pr dicted from α-3 nicotinic receptor cDNA, inhibitic of [^{3}H]nicotine binding to nicotinic cholinergic rece tor (rat brain), **165**, 151
  to murine 13- to 18-kDa pituitary peptides, crossreactic with growth hormone and prolactin (human, pig, ra sheep), **163**, 386
  to pancreatic islet amyloid polypeptide associated wi type 2 diabetes mellitus, characterization (huma monkey), **159**, 402
  phosphotyrosine, cross-reacting protein in insoluble cyt plasmic matrices, identification (yeast), **160**, 887
  polyclonal
    antipeptide, in analysis of extracellular domain of ins lin receptor β-subunit (human, rat), **162**, 1236
    to human 2-5A synthetase 69- and 100-kDa forms, pre aration and characterization (mouse), **160**, 580
  site-directed, affinity-purified, recognition of entire ann xin protein family (rabbit), **160**, 1233
Antiestrogens
  triphenylacrylonitrile, modes of inhibition of prote kinase C (rat brain), **163**, 1377
Antigens
  capsid, Epstein–Barr virus, gene methylation status ar expression, relationship, **159**, 263
  carcinoembryonic, *see* Carcinoembryonic antigen
  C3bi/C3d, enhancement of EBV/C3dR and p120 ribon cleoprotein phosphorylation in subcellular fractior (Raji cells), **159**, 1213
  CD4
    phorbol ester-induced down-regulation, effects of pr tein kinase C inhibitors (human T cells), **164**, 339
    selective modulation by gangliosides, mechanisr (human T lymphocytes), **158**, 1050
    soluble, binding with HIV envelope glycoprotein, ir munoassay, **163**, 172
  CD5, phosphorylation, *in vivo* and *in vitro* analys (mouse), **159**, 536
  CD11b/CD18, surface expression, and neutrophil adh ence, effects of sulfhydryl reducing agents (bovir human), **165**, 51
  CD38, induction by sodium butyrate in Burkitt lymphor cell Raji, **161**, 101
  common acute lymphoblastic leukemia, positive and neg tive lymphoid cells, detection of neutral endope tidase 24.11 and angiotensin-converting enzyme-li activity (human, mouse), **160**, 1323
  DF3, human breast carcinoma-associated, encoding gen sequence analysis of 5′ region, **165**, 644
  Epstein–Barr virus/C3d receptor, phosphorylation, e hancement by specific ligands in subcellular fractio (Raji cells), **159**, 1213
  gp220/340, Epstein–Barr virus-infected cell plasma mer brane, encoding gene, characterization and selectiv

  expression of secreted form of gp220 (marmoset), **158**, 676
  Hanganutziu–Deicher, identification in gastric cancer cell line (human), **160**, 1149
  HLA class I and II, induction by sodium butyrate in Burkitt lymphoma cell Raji, **161**, 101
  liposomal lipid or protein, primary immune response to, suppression by prostaglandin and thromboxane (rabbit), **160**, 565
  membrane, identification in epididymal spermatozoa (goat), **162**, 550
  neuroglandular, glycosylation in melanoma cells, inhibition by phorbol ester (human), **158**, 837
  nonspecific cross-reacting
    cDNA, identification of encoded 110K glycoprotein anchored into membrane via glycosyl-phosphatidylinositol (NIH/3T3 cells), **161**, 1126
    expressed on CHO cells, mediation of cell adhesion, **164**, 39
  nuclear, Epstein–Barr virus-encoded, expression and subsequent transformation events in infected B cells, effects of polyamine synthesis inhibition (human), **159**, 945
  proliferating cell nuclear, gene expression in adult tissues and mammary tumor (rat), **161**, 873
  prostate-specific, *see* Prostate-specific antigen
  Ro/SS-A, sequence homology with calcium-binding protein from canine brain (human), **164**, 575
  surface, for CD11c subunit of leukocyte adherence receptor family in hematopoietic cells, expression analysis (human), **160**, 346
Antipain
  effect on killing of cultured hepatocytes by cystamine (rat), **163**, 412
Antiproliferative activity
  associated mRNA, preferentially hybridizing cDNA, isolation (rat liver), **164**, 1316
Antisera
  β-amyloid protein, labeling of β-soluble derivatives of amyloid protein precursor (human cerebrospinal fluid), **165**, 182
  to human intestinal lactase-phlorizin hydrolase, preparation, **164**, 94
  21-residue endothelin, production and use in radioimmunoassay in endothelial cell culture medium (bovine), **160**, 662
Antithrombin III
  stimulation of prostacyclin production by cultured aortic endothelial cells (bovine), **163**, 1404
α1-Antitrypsin
  M4 allele, nucleotide sequence (human), **162**, 1560
Aorta
  contractile activity of chymotrypsin-activated big endothelin *in vitro* (rat), **161**, 406
  intima intracellular lipid accumulation, role of aggregation of modified low-density lipoproteins, **163**, 489
  precontracted, endothelium-dependent relaxation, elicitation by polycations and basic amino acids (rat), **158**, 177
  receptor binding activity and biological activity of linear α-human atrial natriuretic peptide analogs, analysis (rat), **164**, 1295
  relaxation, mediation by hydroxylamines and oximes: conversion to nitrites and mechanism of endothelium-dependent relaxation (rat), **164**, 889
  vasoconstriction-inducing activity of
    endothelial cell culture medium, correlation with endothelin immunoreactivity (pig), **160**, 602
    sarafotoxins, structure–function relationships (rabbit), **162**, 371
Apolipoprotein A
  discrete lipoprotein particles with, secreted by hepatoma cells, identification and characterization (human), **163**, 574
Apolipoprotein A-I
  gene association with nuclear matrix, effect of triiodothyronine (rat liver), **161**, 576
Apolipoprotein A-IV
  gene association with nuclear matrix, effect of triiodothyronine (rat liver), **161**, 576
Apolipoprotein B
  detection of thiolester-linked fatty acids (rat), **162**, 1508
  mRNA, hepatic levels
    effect of murine recombinant tumor necrosis factor (rat), **161**, 81
    increase in ventromedial hypothalamus-lesioned obese rat, **163**, 1107
Apolipoprotein B-48
  binding by monoclonal antibody 5A (human), **162**, 908
Apolipoprotein C-III
  gene association with nuclear matrix, effects of triiodothyronine (rat liver), **161**, 576
Apolipoprotein E
  mRNA levels, effect of murine recombinant tumor necrosis factor (rat liver), **161**, 81
Apolipoprotein E3
  associated E*-Leiden allele, formation by partial gene duplication in exon 4 (human), **165**, 851
Apoptosis
  induction in T-cell leukemia line, associated molecular changes: identification of putative nucleases as histones (human), **162**, 30
  in interleukin-2-dependent T lymphocytes, inhibition by phorbol esters (mouse), **164**, 1069
  thymine-less, in androgen-independent prostatic cancer cells, molecular mechanism (rat), **163**, 73
Aprotinin
  inhibition of hormone binding of uterine estrogen receptor *in vitro* (bovine), **164**, 1206
Aquacobalamin reductase
  NADH- and NADPH-linked, occurrence in mitochondrial and microsomal membranes (rat liver), **165**, 675
9-β-D-Arabinofuranosyladenine
  antiviral activity, enhancement by dideoxyriboside derivatives of 2,6-diaminopurine, **159**, 61
1-β-D-Arabinofuranosyl-5-(*E*)-(4-azidostyryl)-uracil 5′-triphosphate
  synthesis and utilization as photoaffinity label for DNA polymerase α (salmon testis), **161**, 514

1-β-D-Arabinofuranosylcytosine
  effects on deoxycytidine salvaging into DNA and phospholipid precursors (human lymphoid cells), **163**, 1158
Arachidonate 5-lipoxygenase
  regulating cofactors, optimization (RBL-1 cells), **161**, 1327
Arachidonate 15-lipoxygenase
  erythroid cell-specific, occurrence in human reticulocytes, **160**, 954
Arachidonic acid
  effect on activation of superoxide radical-generating membrane-bound oxidase in cell-free system (bovine neutrophils), **159**, 783
  endogenous, transcellular conversion to lipoxins in mixed platelet–granulocyte suspensions (human), **157**, 801; *erratum*, **159**, 370
  induced protein kinase C activation, potentiation by fatty acyl esters (rat pancreas), **160**, 1110
  lipoxygenase metabolites, specific high-affinity binding by liver fatty acid-binding protein (rat), **161**, 448
  platelet activating factor-stimulated mobilization in keratinocytes and fibroblasts (human), **163**, 1344
  release
    and metabolism in macrophages, promotion by acetylated low-density lipoproteins (mouse), **161**, 461
    in platelets, γ-thrombin-induced, inhibition by cGMP analogs (human), **165**, 708
    in vascular smooth muscle cells, and phosphoinositide hydrolysis, endothelin-stimulated, dissociation by phorbol ester (rabbit), **160**, 868
Arginine
  –deoxyoligonucleotide interactions in *Taq* I endonuclease, NMR study, **164**, 88
  detection as functional residue in peptidyl dipeptidase-4, assessment as anion binding site (*Pseudomonas maltophilia*), **160**, 243
  highly conserved residue in position 87 of HIV-1 protease, substitution mutation, resulting loss of proteolytic activity, **164**, 30
  and lysine, usage by protein toxins, domain-specific bias, **160**, 333
  multiple residues, role in increased efficacy of peptide substrates for cAMP-dependent protein kinase, **165**, 368
  in toxins A and B from *Clostridium difficile*, modification by 1,2-cyclohexanedione, role in toxin inhibition, **165**, 1364
L-Arginine
  and L-argininosuccinic acid, opposite effects on endothelium-dependent vascular smooth muscle relaxation (bovine artery), **161**, 536
  arterial levels, depletion, induction of reversible tolerance to endothelium-dependent relaxation (bovine), **164**, 714
  availability, role in duration of acetylcholine-induced systemic vasodilation *in vivo* (guinea pig), **163**, 710
  conversion
    Ca^{2+}-dependent, to activator of soluble guanylyl cyclase by cytosolic enzyme in aortic endothelial cells (pig), **164**, 678
    to nitrogen oxides by macrophage cytosol, role of inducible and constitutive components (mouse), **161**, 420
    oxidative, to nitric oxide, role of hydroxylamine as intermediate (rat), **163**, 527
  cytosolic, enzymatic formation of nitrogen oxides (bovin brain), **165**, 284
  demonstration as precursor for nitrate biosynthesis (human urine), **163**, 1032
  nonspecific elicitation of endothelium-dependent vascular relaxation at high dose (rat aorta), **158**, 177
  role in macrophage tumor cytotoxicity in coculture (mouse), **165**, 1262
  transport in CHO cells, characterization, **164**, 1093
L-Arginine:NO synthase
  soluble guanylate cyclase-stimulating, identification and partial characterization (bovine, rat adrenal gland), **165**, 802
Arginine vasopressin
  effect on β-endorphin release from pituitary and hypothalamus *in vitro* (rat), **161**, 221
  release from perifused hypothalamus, effect of endothelin 1 (rat), **163**, 1332
  stimulated Ca^{2+} influx in smooth muscle cells, mediation by phosphoinositide hydrolysis (rat), **161**, 677
  stimulated WRK_1 cells, transient accumulation of inositol 1,4,5-trisphosphate: correlation with intracellular calcium mobilization (rat), **159**, 953
L-Argininosuccinic acid
  and L-arginine, opposite effects on endothelium-dependent vascular smooth muscle relaxation (bovine artery) **161**, 536
Aromatase
  placental, inhibition by 19-hydroxy-4-androsten-17-one analysis (human), **160**, 1009
Aromatic acids
  enzyme-catalyzed nonoxidative decarboxylation by 2,3-dihydroxybenzoic acid decarboxylase, identification of enzyme active site residues (*Aspergillus niger*), **165**, 20
Aromatic-L-amino-acid decarboxylase
  encoding cDNA clone, isolation and characterization (human), **164**, 1024
Arteries
  cerebral
    spasm, role of endothelin (dog), **159**, 1345
    stretch-induced tone, potentiation by protein kinase C-induced increase in intracellular Ca^{2+} sensitivity (rabbit), **165**, 312
  coronary
    calcium-independent endothelin-induced contraction, analysis (pig), **160**, 1302
    endothelin-1-induced vasoconstriction, role of phosphoinositide turnover (pig), **161**, 1049
  mesenteric
    neurogenic vasodilation and release of calcitonin gene-related peptide from perivascular nerves (rat), **165**, 1391
    perfused, vasoconstriction, enhancement by endothelin (rat), **159**, 1304
    presynaptic adrenergic neurotransmission, inhibition by

- endothelin (rat), **161**, 803
- prostacyclin release, effect of endothelin (pig, rat), **160**, 924

Arthritis
- rheumatoid, associated extracellular appearance of calpain and calpastatin in knee joint synovial fluid, comparison with healthy subjects (human), **162**, 559

Aryl sulfatase
- identification and characterization (*Aspergillus flavus*, *A. parasiticus*), **159**, 464

Ascorbic acid
- and polyunsaturated fatty acids and vitamin A, competing reactions with glutathione-derived thiyl free radicals, **161**, 1199

Asialofetuin
- fate after endocytosis by liver (rat), **158**, 313

Asparagine
- and adenine, effects on glutamine requirement for growth of peripheral lymphocytes, analysis (human), **164**, 1348

Aspartate aminotransferase
- reactivity with aromatic amino acids, enhancement by [Arg292→Val] or [Arg292→Leu] mutations (*Escherichia coli*), **159**, 337

Astrocytes
- primary cultures and derived spontaneously transformed cell lines, ethanolamine base exchange enzymatic activity, effect of cell-surface trypsinization (rat), **159**, 1055

2-5A synthetase
- 69- and 100-kDa forms, murine polyclonal antibodies, preparation and characterization (human), **160**, 580

Ataxia-telangiectasia
- nuclear extracts from lymphoblastoid cells, abnormality in DNA–protein binding (human), **158**, 749

Atherosclerosis
- lipid accumulation in, correlation with sialic acid levels of low-density lipoproteins, **162**, 206
- plaque DNA, role in transformation of NIH3T3 cells, **165**, 1067

ATP (adenosine 5′-monophosphate)
- activation of arachidonate 5-lipoxygenase, optimization (RBL-1 cells), **161**, 1327
- and ADP, inhibition of cAMP production in intact isoproterenol-stimulated C6 glioma cells (rat), **163**, 1150
- and Ca^{2+}-dependent chromaffin granule-binding protein chromobindin A, presence in bovine tissues and yeast, **165**, 37
- dependent Cl$^-$ uptake by plasma membrane vesicles from brain, effects of proton pump inhibitors (rat), **160**, 469
- dependent H$^+$ transport in synaptosomal membrane vesicles of brain, analysis (rat), **159**, 1045
- dependent proteolysis in BHK cell extracts, role of macropain latent form, **160**, 911; *erratum*, **161**, 944
- dependent vanadate-insensitive H$^+$ transport in bladder epithelial membrane vesicles, inhibition by NBD-Cl (turtle), **161**, 312
- depleted erythroleukemia cells, ornithine decarboxylase stabilization (mouse), **163**, 1217
- destabilization of RNA polymerase II transcription complexes, **162**, 1133
- extracellular
  - alteration of calcium flux through dihydropyridine-sensitive channels in cultured myotubes (chicken), **159**, 878
  - effects on
    - parotid acinar cells, antagonism by Coomassie Brilliant Blue G and Reactive Blue 2, comparison (rat), **165**, 1279
    - superoxide production in neutrophils (human), **162**, 377
  - phosphorylation of p56^{lck} in intact lymphoid cells (human, mouse), **162**, 51
- –G-actin, in annealing of actin polymerized by Ca^{2+}, requirement of substoichiometric concentrations (rabbit muscle), **159**, 7
- levels in brain, effects of hyperammonemia, ^{31}P NMR spectroscopy (rat), **159**, 815
- –zinc-dependent chemical phosphorylation of proteins, analysis, **163**, 64

ATPase
- –ATP synthase complex in mitochondria
  - with mutated β-subunits, high azide and bicarbonate sensitivity of ATPase activity, (yeast), **158**, 392
  - β-subunit N-terminal sequence (rat liver), **164**, 1165
- Ca^{2+}-
  - interaction with cAMP-dependent protein kinase substrate, analysis (human platelets), **159**, 644
  - sarcoplasmic reticulum-associated, diabetes-like effects of intermittent fasting, prevention by sucrose (rat), **164**, 319
- calmodulin-stimulated, formation of phosphorylated intermediate (maize coleoptile), **159**, 185
- Ca^{2+},Mg^{2+}-, sarcoplasmic reticulum-associated, N- and C-terminal segments, evidence for cytoplasmic location (rabbit), **161**, 683
- dicyclohexylcarbodiimide-binding protein identification as subunit (*Methanosarcina barkeri*), **162**, 1585
- F$_0$F$_1$-, mitochondrial, modulation by boundary and bulk-phase phospholipids, **158**, 1013
- F$_1$-, content in brown adipose tissue mitochondria, rapid postnatal changes (rat), **159**, 216
- H$^+$-, plasma membrane-associated
  - activation by inositol phospholipids (carrot, sunflower), **162**, 1295
  - cloning of encoding genes (*Nicotiana plumbaginifolia*), **162**, 567
- Mg^{2+}-, glutathione disulfide-stimulated, purification and characterization (human erythrocytes), **162**, 1
- mitochondrial, β subunit
  - inhibition by bongkrekic acid and op$_1$ mutation in rho$^-$ mutants, role in cell growth defects (yeast), **159**, 612
  - site-directed mutagenesis (yeast), **164**, 381
- Na$^+$,K$^+$-
  - native, β-subunit, identification of disulfide bond between cysteines 214 and 277 (electric ray), **162**, 64
  - ouabain-resistant, sodium transport defect (rat kidney), **165**, 360

    - peptide inhibitors SPAI-1, -2, and -3, primary structure and sequence comparison (porcine intestine), **164**, 496
    - reconstituted, catalyzed uncoupled Na^+ efflux, analysis: electrogenic nature (shark), **160**, 801
    - α3-subunit mRNA, expression after injection into *Xenopus* oocytes (rat brain), **163**, 102

ATPase inhibitors
  - SPAI-1, -2, and -3, for intestinal Na^+,K^+-ATPase, primary structure and sequence comparison (pig), **164**, 496

ATP receptors
  - distribution of two types in Swiss 3T6 fibroblasts (mouse), **164**, 706

ATP synthase
  - –ATPase complex in mitochondria
    - with mutated β-subunits, high azide and bicarbonate sensitivity of ATPase activity, (yeast), **158**, 392
    - β-subunit N-terminal sequence (rat liver), **164**, 1165
  - mitochondrial, chargerin II orientation in, determination with antibodies against chargerin II peptides (rat liver), **165**, 449
  - mitochondrial complex, biogenesis: isolation and characterization of full-length cDNA encoding F_1-β-subunit (rat), **159**, 1184

Atrial natriuretic factor
  - activation of particulate guanylate cyclase, mechanism, radiation inactivation analysis (bovine adrenal gland, lung), **158**, 603
  - amino acid sequence and relative biological activity (eel), **164**, 537
  - and angiotesin II, action on myocardium, analysis in isolated ventricular cardiomyocytes (rat), **163**, 1435
  - and associated mRNA, cellular, endothelin-stimulated accumulation in cultured cardiocytes (rat), **164**, 1431
  - augmentation of urinary protein excretion in patients with essential hypertension: ANF role in renal handling of protein, **158**, 936
  - endogenous levels, augmentation by membrane metalloendopeptidase inhibitor UK-69,578 (mouse), **164**, 58
  - gene expression in ventricles, effects of captopril and hydralazine (spontaneously hypertensive rat), **160**, 310
  - induced cGMP production in vascular smooth muscle cells, competitive peptide antagonists (rat), **164**, 108
  - inhibition of
    - angiotensin-induced aldosterone secretion in adrenal glomerulosa cells, role of cGMP and phospholipase C (bovine), **159**, 148
    - cholinergic and nonadrenergic noncholinergic neurotransmission in small intestine (guinea pig), **164**, 638
    - platelet-derived growth factor-stimulated vascular smooth muscle cell proliferation (rat), **160**, 1392
  - iso-rANP, isolation and characterization (rat heart), **161**, 830; *addendum* and *erratum*, **163**, 1189
  - monoclonal antibodies to C-terminus, production by *in vitro* immunization (rat spleen), **162**, 634
  - mRNA and peptide levels in heart during ontogenetic development, analysis (human), **159**, 777
  - release, induction by acute airway obstruction (human), **160**, 808
  - secretion by atrial myocytes, stimulation by cocultured bovine endothelial cells, role of endothelin (rat), **163** 701
  - stimulation of
    - Na–K–Cl cotransport in vascular endothelial cells (bovine artery), **159**, 734
    - plasma membrane protein phosphorylation (bovine adrenal cortical cells), **163**, 988
    - type α, linear analogs, receptor binding activity and biological activity (rat aorta), **164**, 1295
  - type β, binding properties and activation of particulate guanylate cyclase (bovine adrenal cortex, human platelets), **163**, 37

Atrial natriuretic factor receptors
  - aortic, binding activity of linear α-human atrial natriuretic peptide analogs, analysis (rat), **164**, 1295
  - glomerular levels, cardiomyopathy-induced decrease, analysis (hamster kidney), **159**, 807
  - with guanylate cyclase activity, detection in HeLa cells, **164**, 671
  - role in guanylate cyclase activation in cardiac sarcolemma (rat), **162**, 1339

Atriopeptin
  - inhibition of secretagogue-induced corticotropin release by anterior pituitary cells (rat), **158**, 824

Autoantibodies
  - anti-mitochondrial, from primary biliary cirrhosis patients, in analysis of 2-oxo acid dehydrogenase complex biosynthetic regulation (yeast), **158**, 220
  - binding to thyrotropin receptor, evidence from cDNA cloning, sequencing, and expression (human), **165**, 1250
  - naturally occurring anti-band 3, detection of 240-kDa protein on surface of *Plasmodium falciparum*-infected erythrocytes (human), **160**, 1357
  - nucleolar protein, detection (human serum), **163**, 1119
  - TMP-reactive, in systemic lupus erythematosus sera, thymine-dependent oligonucleotide specificity (human), **161**, 204

Autoimmune diseases
  - bronchoalveolar mononuclear cells from patients with lung involvement, enhanced transcription of c-*sis* protooncogene, **164**, 1018

Autophosphorylation
  - insulin-independent, insulin receptor, stimulation by carboxyl terminal segment of human c-Ki-*ras* 2 gene product, **161**, 399

Autoxidation
  - hemoglobin, effect of crosslinking by bis(3,5-dibromosalicyl) fumarate (human), **163**, 733

Auxins
  - stimulation of phospholipase A_2 (soybean, zucchini), **163**, 111

Avian myeloblastosis virus
  - retroviral protease, continuous spectrophotometric assay, **163**, 1079

8-Azaguanosine-5′-monophosphate
  - synthesis via nucleoside kinase and purine-nucleoside phosphorylase, analysis (hamster pulmonary fibroblasts), **159**, 854

′-Azido-2′,3′-dideoxyribosylthymine, *see* Zidovudine
′-Azido-2′,3′-dideoxythymidine triphosphate
  and Carbovir and dideoxynucleoside triphosphates, effects on HIV-1 reverse transcriptase and selected human polymerases, comparison, **161**, 393
Azidopine
  ^{3}H-labeled, in photoaffinity labeling of high-molecular-weight proteins from chloroquine-resistant *Plasmodium falciparum*, **162**, 809
AZT, *see* Zidovudine

B

Bacteria
  bioluminescence reaction, proposed mechanism involving dioxirane intermediate, **164**, 1137
  Campylobacter-like, from gastric mucosa, proteolytic activities (ferret), **163**, 1
  naphthalene-utilizing strains, nucleotide sequence homology, **164**, 772
  root nodule, fast-growing, production of aminobutylhomospermidine, **165**, 659
Bacterioferritin, *see* Cytochrome b_1
Bacteriophages
  mu, DNA regions, derived synthesis of minute amounts of RNA during lysogenic state (*Escherichia coli*), **165**, 512
  9NA, abortive infection in fatty acid auxotroph: effect of fatty acid supplementation (*Salmonella typhimurium*), **161**, 923
Bacteriorhodopsin
  selective mercurilation (*Halobacterium halobium*), **161**, 640
Baculoviruses
  incorporated Yb$_1$ glutathione *S*-transferase cDNA, expression in fall armyworm cells, **162**, 1147
  infected cells, high-efficiency expression of mammalian β-adrenergic receptors (fall armyworm), **163**, 1265
  recombinant, with synthetic diuretic hormone gene, increased insecticidal effects on silkworm larvae, **165**, 1177
Baicalein
  inhibition of human immunodeficiency virus and murine leukemia virus reverse transcriptase, **160**, 982
Bay K 8644
  S enantiomer
    in analysis of 1,4-dihydropyridine regulation of voltage-dependent Ca^{2+} channels (PC12 cells), **160**, 929
    binding to cardiac cells and microsomal membranes (guinea pig), **158**, 149
B-cell stimulatory factor
  type 2, deletion of 3′ untranslated region, induction of mRNA stabilization and high-level expression in NIH 3T3 cells, **163**, 1056
Benzaldehyde oxime
  mediation of vascular relaxation: conversion to nitrites and mechanism of endothelium dependent vascular relaxation (rat aorta), **164**, 889
Benzamil
  competitive inhibition of tritium-labeled platelet-activating factor binding to platelet membranes (rabbit), **163**, 165
Benzoate
  formation by anaerobic transformation of phenol via *para*-carboxylation, analysis with fluorinated analogs, **162**, 945
Benzodiazepine
  related molecules, and other ligands for benzodiazepine receptors, detection in plants, **165**, 547
Benzodiazepine receptors
  role in hetrazepine WEB2086 inhibition of platelet-activating factor-induced platelet aggregation (rabbit), **160**, 263
Benzo[*a*]pyrene
  and other carcinogens, *in vitro* transformation of epithelial cells: evidence for consistent oncogene methylation changes (rat), **164**, 693
Benzo[*a*]pyrene-7,8-dihydrodiol
  lipoxygenase-catalyzed epoxidation (soybean), **159**, 1199
Benzoyl L-arginine ethyl ester
  oxime derivative, mediation of vascular relaxation: conversion to nitrites and mechanism of endothelium dependent vascular relaxation (rat aorta), **164**, 889
Benzyldimethylsilylmethanamine
  and *p*-chloro and *p*-fluoro derivatives, selective inactivation of monoamine oxidase B *in vitro* (rat brain), **160**, 540
O-Benzyl hydroxylamine
  mediation of vascular relaxation: conversion to nitrites and mechanism of endothelium dependent vascular relaxation (rat aorta), **164**, 889
Beta cells
  alloxan-induced diabetes, role of alloxan free radical generation (rat), **165**, 278
  free and bound sodium, effects of glucose and tolbutamide (mouse), **164**, 212
  glucose buffering of cytoplasmic Ca^{2+}, analysis (mouse), **159**, 907
  glucose-stimulated efflux of fura-2, prevention by probenecid (mouse), **159**, 223
Bezafibrate
  acyl-coenzyme A thioester, potentiation of diacylglycerol-activated protein kinase C (rat brain, liver), **159**, 1026
  and inositol hexaphosphate, stabilization of hemoglobin T state (human), **165**, 226
Binding kinetics
  mutated insulin receptors in transfected CHO cells grown in suspension culture, analysis, **164**, 191
Bioluminescence reaction
  bacterial, proposed mechanism involving dioxirane intermediate, **164**, 1137
p-Biphenylamine
  binding to monoclonal antibody 2E11 in organic solvents, description (mouse), **158**, 80
2,7-Biscarboxyethyl-5(6)-carboxyfluorescein
  and fura-2, dual loading in isolated myocytes (rat heart), **163**, 500

- Bis(3,5-dibromosalicyl) fumarate
  - crosslinking of hemoglobin, effect on autoxidation properties (human), **163**, 733
- Blast cells
  - hemopoietic, detection of parathyroid hormone binding sites (mouse), **163**, 1481
- Blastocyst
  - implantation, role of superoxide radical (mouse), **161**, 762
- Bleomycin
  - induced DNA repair synthesis in permeabilized HeLa cells, different mechanisms, **164**, 1226
- Bleomycin hydrolase
  - thiol aminopeptidase activity: unique responses to magnesium ion, sodium chloride, and metal-chelating agents (rabbit liver), **163**, 788
- Blood, *see also* Plasma, Serum
  - brain natriuretic peptide distribution and molecular forms (pig), **165**, 872
  - detection of arginine-specific carboxypeptidase unrelated to carboxypeptidase N and generated during coagulation or inflammation (human), **162**, 933
  - platelet-activating factor levels, increase after intestinal ischemia (dog), **158**, 353
- Blood–brain barrier
  - glucose transporter mRNA levels, increase in diabetes mellitus (rat), **164**, 375
- Blood pressure
  - effect of N^G-methylarginine, in assessment of role of nitric oxide release (guinea pig), **160**, 881
- Bluetongue virus
  - serotype 17, fusion protein NS1, expression in *Escherichia coli* by pUC vectors, **162**, 892
- BN 52021
  - platelet-activating factor agonist, and cyclosporin, effects on PAF- and antigen-induced bronchoconstriction (guinea pig), **163**, 118
- Bombesin
  - effect on intracellular free Ca^{2+} levels in fibroblasts: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
  - mitogenic activity, abrogation by cell-surface sialoglycopeptide growth inhibitor (Swiss 3T3 cells), **161**, 468
  - synthetic antagonist (d-Phe^{12},Leu^{14})-bombesin, structural characterization by 500 MHz NMR and circular dichroism, **161**, 987
- Bombesin receptors
  - regulated Ca^{2+} mobilizing mechanisms in peptic cells, discriminatory inhibition by somatostatin and lanthanum (frog), **159**, 599
- Bone marrow
  - AZT-induced cytotoxicity, protection by vitamin E (mouse), **165**, 401
  - DNA binding to 2-mercaptobenzothiazole *in vivo*, analysis (rat), **165**, 342
  - mineralization of tissue culture matrix, association with sulfation of secreted phosphoprotein I (rat), **165**, 234
- Bone resorption
  - in cultured fetal calvaria, effect of cadmium (mouse), **158**, 508
  - parathyroid hormone-stimulated, inhibition by 17β-estradiol in cultured neonatal calvaria (mouse), **163**, 1319
  - role of
    - circulating parathyroid hormone-like bioactivity, analysis in model of humoral hypercalcemia of malignancy (mouse), **161**, 1166
  - osteoclastic acid phosphatase (rat), **159**, 68
- Bones
  - calvarial
    - cultured fetal, prostaglandin E$_2$ production, effects of cadmium (mouse), **158**, 508
    - cultured neonatal, parathyroid hormone-stimulated prostaglandin production, inhibition by 17β-estradiol (mouse), **163**, 1319
    - derived macromolecular factor, regulation of osteoclast formation (chicken, mouse, rat), **159**, 1383
  - derived osteoblast-like cells, regulatory actions of natural human interleukin 1β *in vitro* (human), **159**, 1242
  - normal and transformed cells, synthesis of multiple forms of secreted phosphoprotein I, effects of transforming growth factor β1 (rat), **162**, 1453
  - osteocalcin production in cells, stimulatory action of 1,25-dihydroxyvitamin D$_3$, modulation by agents affecting adenylate cyclase activity (human), **164**, 1076
- Bone tumor virus
  - infection of adherent osteoblast-like cells, detection by computer-assisted imaging cytometry of nuclear chromatin (mouse), **164**, 728
- Bongkrekic acid
  - inhibition of mitochondrial adenine nucleotide exchange in rho$^-$ mutants, role in cell growth defects (yeast), **159**, 612
- Botulinum toxin
  - associated ADP-ribosyltransferase, substrate Gb from bovine adrenal gland, cDNA cloning and identification as *rho* gene product, **163**, 1175
  - type A, gene characterization: delineation of N-terminal encoding region, **162**, 1388
- Bradykinin
  - effects on
    - inositol phosphate production (NG108-15 cells), **165**, 175
    - intracellular free Ca^{2+} levels in fibroblasts: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
  - induced protein kinase C translocation in neuroblastoma NCB-20 cells, dependence on 1,2-diacylglycerol content and free calcium, **162**, 1279
  - inhibition of neuroblastoma cell cAMP production, role of pertussis toxin, **161**, 1144
  - and other neuropeptides, mobilization of Ca^{2+} in small cell lung cancer cells, **164**, 66
  - stimulated endothelial cells, phosphoinositide hydrolysis and prostacyclin sythesis, dissociation from phospholipase D activation by long-term phorbol ester treatment (bovine), **165**, 319
  - stimulated prostaglandin E$_2$ production, role of intracellular calcium changes (MDCK cells), **161**, 1333

adykinin receptors
  B_2, related binding in glomerular membranes, characterization (rat), **158**, 99
ain
  activation of parathion *in situ*, analysis, **165**, 327
  Alzheimer's disease-affected
    amyloid β-protein precursor mRNA expression: enhancement of protease inhibitor-harboring types, **165**, 1406
    associated paired helical filaments, selective incorporation of distinct form of tau phosphoprotein, **159**, 1221
  cortex, somatostatin receptors, developmental change and molecular properties (rat), **160**, 72
  cytosol, enzymatic formation of nitrogen oxides from L-arginine (bovine), **165**, 284
  endogenous inhibitor of GTP-binding protein ADP-ribosylation, detection (bovine), **160**, 67
  endothelin 3 levels, measurement by sandwich enzyme immunoassay (rat), **164**, 74
  identification of
    dihydropyridine-sensitive calcium channel by monoclonal antibody (chicken), **163**, 1182
    inositol lipid phosphatidylinositol trisphosphate with *in vivo* techniques (rat), **163**, 995
    β-protein precursor (newborn rat), **160**, 1296
  inositol 1,4,5-trisphosphate radioreceptor assay (rat), **159**, 976
  1-methyl-4-phenyl-pyridinium-lesioned, interleukin-2-like molecules, visualization (rat), **165**, 1312
  microvessels, protein phosphorylation, regulatory action of vanadate (rat), **163**, 771
  oxygen radical formation and membrane order, effects of vitamin E deficiency (mouse), **163**, 860
  plasma membrane vesicles, ATP-dependent Cl^- uptake, effects of proton pump inhibitors (rat), **160**, 469
  platelet activating factor *de novo* biosynthesis by phosphocholine transferase (rat), **161**, 107
  renin expression, reciprocal control by captopril (rat), **159**, 1065
  sarafotoxin and endothelin binding and phosphoinositide hydrolysis, competitive interaction, analysis (rat), **158**, 195
  vasospasm production, role of endothelin (dog), **159**, 1345
Brain natriuretic peptide
  BNP-45 and γ-BNP, isolation, identification, and sequencing (rat atrium), **163**, 226
  degradation by renal cortical membrane endoprotease-24.11 (pig), **161**, 1177
  detection in
    canine brain, **158**, 120
    porcine heart, **158**, 360
  distribution and molecular forms
    in central nervous system, heart, and peripheral tissue (rat), **165**, 880
    in heart and blood (pig), **165**, 872
  porcine, isolated canine and human gene homologs, sequence analysis, **165**, 650
  precursor, encoding cDNA, cloning and sequence analysis
    in human, **159**, 1427
    in rat, **159**, 1420
Brain natriuretic peptide receptors
  in peripheral sympathetic ganglia, detection and characterization (rat), **159**, 1032
Branched-chain α-keto acid dehydrogenase, *see* 2-Oxoisovalerate dehydrogenase (lipoamide)
Brefeldin A
  inhibition of cathepsins D and H targeting to lysosomes (rat hepatocytes), **163**, 220
Bromoconduritol
  delay of intracellular secretory glycoprotein transport (human hepatoma cells), **161**, 1013
  effects on integrin and adhesion of myoblasts to extracellular matrix proteins (chicken, rat), **163**, 1338
5-Bromo-2′-deoxyuridine
  induction of stem cell differentiation by inhibition of DNA synthesis, specific counterbalancing by normal nucleosides (F9 teratocarcinoma cells), **163**, 1290
8-Bromoguanosine 3′:5′-monophosphate
  inhibition of secretagogue-induced corticotropin release by anterior pituitary cells (rat), **158**, 824
Bromoperoxidase
  activation by vanadate (red seaweed), **160**, 87
Bronchoconstriction
  platelet-activating factor- and antigen-induced, effects of PAF agonist BN 52021 and cyclosporin A (guinea pig), **163**, 118
  role of histamine chloramines (guinea pig lung), **165**, 1018
Bronchopulmonary response
  to endothelin after aerosol administration, pharmacological modulation (guinea pig), **158**, 625
α-Bungarotoxin
  binding peptide of acetylcholine receptor α-subunit, antibodies to, in characterization of receptor binding site (electric ray), **160**, 289
1-Butanol, *see* *n*-Butyl alcohol
n-Butyl alcohol
  4-aminobiphenyl binding to monoclonal antibody 2E11 in, description (mouse), **158**, 80
t-Butyl hydroperoxide
  induced lipid peroxidation in microsomes, role of phospholipase A_2 (rat liver), **158**, 1021
t-Butyl hydroxylamine
  mediation of vascular relaxation: conversion to nitrites and mechanism of endothelium dependent vascular relaxation (rat aorta), **164**, 889
Butyrate
  augmentation of catalase activity and protection of smooth muscle cells against hyperoxia (rat pulmonary artery), **164**, 1143
BW-175
  renin inhibitory activity after oral administration (marmoset), **159**, 999

C

Cacodylic acid
  induction of DNA strand breaks in lung via production of active oxygen (mouse), **165**, 43

- Cadmium
  - effect on prostaglandin E_2 production and bone resorption in cultured fetal calvaria (mouse), **158**, 508
- Caffeine
  - sensitive calcium stores
    - intracellular, overlap with endothelin-sensitive stores in cultured smooth muscle cells (rat aorta), **158**, 235
    - in presynaptic nerve endings, role as cytosolic buffering system for calcium loads (rat brain), **161**, 965
- Calbindin
  - 9-kDa, vitamin D-dependent gene, methylation, role in mediation of tissue and vitamin D expression regulation (rat), **160**, 1281
- Calbindin-D_{28K}
  - gene, identification of 1,25-dihydroxyvitamin D_3 receptor-regulated promoter region (chicken), **162**, 869
- Calcification
  - osteoblastic cells, stimulation by prostaglandin D_2 *in vitro* (human), **159**, 1206
- Calcimedin
  - 30-kDa, rapid purification by DNAse 1 affinity chromatography, **159**, 828
- Calcineurin A
  - complete primary structure, homology with protein phosphatases 1 and 2A (rat brain), **163**, 1492
- Calcitonin
  - mRNA, elevated levels, association with medullary thyroid carcinoma development (rat), **159**, 528
- Calcitonin gene-related peptide
  - α form, conformation in aqueous solution, determination by circular dichroism spectroscopy (human), **160**, 388
  - production and characterization (UMR 106.1 cells), **158**, 214
  - release from perivascular nerves, role in neurogenic vasodilation in mesenteric artery (rat), **165**, 1391
  - suppression of insulin-stimulated glucose transport (L6 myocytes), **164**, 461
- Calcium
  - activation of
    - arachidonate 5-lipoxygenase, optimization (RBL-1 cells), **161**, 1327
    - myofilaments, role in dichlorobenzamil blockade of endothelin-induced contractions (rat aortic rings), **163**, 247
  - and ATP-dependent chromaffin granule-binding protein chromobindin A, presence in bovine tissues and yeast, **165**, 37
  - binding activity of epidermal growth factor-like domain of blood coagulation factor IX, analysis (human), **160**, 133
  - binding to fluo-3, kinetics, determination by stopped-flow fluorescence, **163**, 309
  - binding protein
    - from canine brain, sequence homology with calregulin and human Ro/SS-A antigen, **164**, 575
    - endoplasmic reticulum-associated, high-capacity low-affinity, characterization: calsequestrin-like and divergent properties (human liver), **165**, 973
    - with synexin-like activity, purification and characterization (human platelets), **159**, 236
  - caffeine-sensitive stores in presynaptic nerve endings, role as cytosolic buffering system for calcium loads (rat brain), **161**, 965
  - cellular mobilization, effects of endothelin: role of sodium transport mechanisms (rat aortic smooth muscle cells), **163**, 458
  - cytoplasmic
    - in beta cells, glucose-induced buffering, analysis (mouse), **159**, 907
    - in insulin-producing cells, elevated levels, recovery assistance by protein kinase C activation, role of Ca^{2+} efflux stimulation, **165**, 416
    - parotid cell levels, effects of eicosanoids (rat), **161**, 379
    - total, movements and release from intracellular stores in activated platelets, effects of fibronectin (human), **165**, 966
  - cytosolic
    - in adrenal chromaffin cells, endothelin-induced effects, potentiation by depolarization (bovine), **165**, 306
    - cardiocyte levels, effects of endothelin (neonatal rat), **160**, 1438
    - cardiomuscular cell levels, and cell circumference, simultaneous measurement during contraction by digital imaging microscopy with indo-1 (rat), **162**, 926
    - in clonal muscle cell cultures, regulation (human), **165**, 1130
    - measurement with simultaneous dual-emission microspectrofluorometry and electrophysiology in individual pituitary cells (rat), **164**, 1045; *erratum*, **165**, 1446
    - osteoblastic cell levels, effects of thrombin (human), **164**, 119
    - and plasma membrane hyperpolarization, fibroblast growth factor-induced increases: resemblence to early signals generated by platelet-derived growth factor (murine NIH-3T3 fibroblasts), **163**, 1325
    - response in cultured vascular smooth muscle cells, effects of synthetic endothelin analogs (rat), **160**, 228
    - role in potentiation of neutrophil respiratory burst by R59022 and dioctanoylethylene glycol (human), **161**, 95
    - in small cell lung cancer cells, elevation by cholecystokinin (human), **163**, 605
    - vascular smooth muscle cell levels, effects of synthetic sarafotoxin analogs (rat), **162**, 441
  - dependent activation of neutrophils by synthetic ionophore (human), **163**, 209
  - dependent cysteine proteinase, identification as precursor of chemotactic factor for neutrophils (human), **164**, 875
  - dependent membrane-bound endopeptidase with specificity to paired basic residues in hepatic Golgi fractions, partial purification and characterization (rat), **164**, 780
  - and 1,2-diacylglycerol, role in bradykinin-induced protein kinase C translocation in neuroblastoma NCB-20 cells, **162**, 1279
  - effect on
    - endothelin-induced contraction of coronary artery (pig), **160**, 1302

  - inner medullary collecting tubular cells *in vitro*, role in nephrocalcinosis (rabbit), **160**, 1169
- EF-hands binding to thioredoxin reductase, effect on cellular redox status (human keratinocytes), **162**, 1311
- extracellular
  - distinct bombesin receptor-regulated mobilizing mechanisms in peptic cells, discriminatory inhibition by somatostatin and lanthanum (frog esophagus), **159**, 599
  - effect on tumor necrosis factor-α-induced H_2O_2 formation by neutrophils (human), **159**, 763
- flux through dihydropyridine-sensitive channels in cultured myotubes, alteration by extracellular ATP (chicken), **159**, 878
- and G protein, role in phospholipase D activity in homogenates from HL-60 granulocytes, **163**, 657
- high-affinity binding sites in myeloperoxidase and lactoperoxidase (bovine), **160**, 897
- induction of
  - fusion of liposomes, effects of phorbol ester and teleocidin (bovine brain), **165**, 1256
  - insulin secretion from perifused and electrically permeabilized islets of Langerhans, effects of cAMP and phorbol ester (rat), **162**, 998
  - spectrin cleavage and breakdown (rat lens), **162**, 1472
- influx
  - and intracellular levels, effects of endothelin (rat brain), **162**, 1332
  - mediation by nicotine receptors and voltage-sensitive calcium channels in SK-N-SH neuroblastoma cells (human), **162**, 1230
  - stimulated by vasopressin in smooth muscle cells, mechanism: mediation by phosphoinositide hydrolysis (rat), **161**, 677
- inhibition of protein kinase C phosphorylation of histone H-1 (rat), **162**, 45
- intracellular
  - brown adipocyte levels, regulation by α_1- and β-adrenergic receptors (hamster), **163**, 292
  - calcium-activated elevation, role in osteoclast regulation (rat bone), **163**, 1461
  - changes in MDCK cells, role in bradykinin-stimulated prostaglandin E_2 production, **161**, 1333
  - ciliary muscle cell levels, elevation by endothelin (human), **164**, 1031
  - in embryonic glial cells, effects of endothelin (rat), **165**, 1115
  - endothelin- and caffeine-sensitive stores, overlap in cultured smooth muscle cells (rat aorta), **158**, 235
  - fibroblast levels
    - effects of mitogens: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
    - role in mitogenesis, single-cell fluorometric analysis (human foreskin), **159**, 862
  - in isolated early proximal tubule, biphasic increasing effect of angiotensin II (rat), **165**, 1221
  - mobilization
    - correlation with transient 1,4,5-trisphosphate accumulation during vasopressin stimulation (rat WRK_1 cells), **159**, 953
    - by endothelin (Swiss 3T3 cells), **161**, 489
    - by inositol 1,2-cyclic 4,5-trisphosphate and inositol 1,4,5-trisphosphate, comparison (murine pancreatic acini), **159**, 561
    - by neuropeptide Y, correlation with increased inositol phosphate production (human erythroleukemia cells), **165**, 1138
    - by platelet-activating factor, dissociation from superoxide anion generation: evidence for different eosinophil PAF receptors (guinea pig), **162**, 511
    - role in endothelin action on vascular smooth muscle cells (rabbit aorta), **158**, 86
    - role in thimerosal induction of platelet aggregation (human), **159**, 961
  - in pancreatic acini, inositol trisphosphate-independent increase (rat), **164**, 8
  - role in Ca-free contraction of uterine smooth muscle, analysis (rat), **165**, 722
  - secretagogue-induced changes in single pancreatic acinar cells (rat), **158**, 863
  - sensitivity, protein kinase C-induced increase, potentiation of stretch-induced cerebral artery tone (rabbit), **165**, 312
  - signaling response in breast cancer cell line MDA-468, analysis (human), **159**, 1290
  - in vascular smooth muscle cells
    - endothelin-induced mobilization, role of platelet-activating factor and thromboxane A_2 (rabbit, rat), **160**, 751
    - role in low-density lipoprotein-induced vasoconstriction (rat), **163**, 315
- lipocortin I sensitivity to, enhancement by tissue transglutaminase (human), **163**, 944
- mediated protein phosphorylation in intact enterocytes, stimulation by histamine, **165**, 810
- metabolism
  - effects of amylin and amylin-amide *in vivo* and *in vitro* (rabbit, rat), **162**, 876
  - regulatory activites of synthetic vitamin D_3 derivative 2β-(3-hydroxypropoxy)-1α,25-dihydroxyvitamin D_3 (rat), **163**, 1444
- micromolar ions, and free radicals, synergistic deleterious effect on respiratory function of cardiac mitochondria, localization at cytochrome *c* and salvage trial (guinea pig), **163**, 1397
- microsomal membrane permeability for, GTP-dependent increase (NG108-15 cells), **164**, 1060
- mobilization
  - angiotensin II-induced, in vascular smooth muscle cells, effect of valinomycin (rat), **162**, 491
  - endothelin-mediated, in A10 smooth muscle cells, inhibition by nicardipine, **160**, 758
  - inositol trisphosphate-dependent, α-adrenergic- and cholinergic-stimulated, dissociation at post-receptor level (rat parotid cells), **162**, 347
  - in platelets, role of cytosolic alkalinization (human), **161**, 1007
  - in small cell lung cancer cells: effects of neuropeptides, **164**, 66

- and uptake in vascular smooth muscle cells, effects of endothelin 1 (rabbit), **164**, 474
- monitoring by fura-2 and pH measurement by 2,7-biscarboxyethyl-5(6)-carboxyfluorescein, effects of dual loading (rat cardiac myocytes), **163**, 500
- myofilament sensitivity to, in α-toxin-permeabilized arterial smooth muscle, augmentation by norepinephrine and GTP-γ-S (rabbit), **157**, 677; *erratum*, **165**, 1442
- in parotid acinar cells, effects of extracellular ATP, antagonism by Coomassie Brilliant Blue G and Reactive Blue 2, comparison (rat), **165**, 1279
- –phospholipid-regulated 32-kDa proteins, identification and partial separation (bovine spleen), **162**, 15
- polymerized actin, annealing by ATP-G-actin: requirement of substoichiometric levels (rabbit muscle), **159**, 7
- regulation of
    - α-crystallin A chain dephosphorylation (bovine lens), **162**, 1494
    - folding and disulfide bond formation in α-lactalbumin (bovine milk), **163**, 1390
- release
    - inositol 1,4,5-trisphosphate- and guanosine 5′-*O*-(3-thio triphosphate)-induced, in smooth muscle cells, effects of heparin (rabbit trachea), **163**, 262
    - in microsomal fractions, GTP-dependent, effects of hepatic cytosolic nondialyzable factors (rat liver), **163**, 823
    - from sarcoplasmic reticulum, enhancement by phosphatidylinositol 4,5-bisphosphate (guinea pig skeletal muscle), **163**, 1487
    - from vacuoles, induction by inositol 1,4,5-trisphosphate (*Neurospora crassa*), **162**, 852
- repetitive spikes, ability to stimulate prolactin release, dependence on frequency (rat anterior pituitary cells), **158**, 811
- requiring pathway, role in release of mitochondrial matrix proteins (rat liver), **161**, 619
- role in
    - phenylephrine effects in renal ammoniagenesis (rat), **162**, 116
    - phenylephrine-induced activation of glycogen phosphorylase in isolated liver cells (rat), **160**, 480
    - shear-induced prostacyclin production in endothelial cells (human umbilical vein), **158**, 31
- sensitivity of α-toxin-permeabilized smooth muscle, regulation, role of actomyosin–ADP complex (rabbit), **165**, 408
- –sodium exchanger, role in calcium influx in adrenal glomerulosa cells (bovine), **158**, 1005
- transients and oscillations in A10 vascular smooth muscle cells, effects of endothelin, **163**, 1223
- and Zn^{2+}, complexes with 5-F-BAPTA, comparative stability, **165**, 838

Calcium channels
- activator (−) S Bay K 8644, binding to cardiac cells and microsomal membranes (guinea pig), **158**, 149
- antagonists, potent and specific inhibition of interleukin-8-, IL-1α-, IL-1β-induced lymphocyte migration *in vitro* (human), **165**, 349
- binding sites in nerves and muscle of small intestine localization (dog), **159**, 119
- current, anomalous increase by high concentration K^+ stimulation in whole-cell clamped GH_3 cells, **158** 534; *erratum*, **160**, 416
- dihydropyridine-sensitive
    - in cultured myotubes, calcium flux, alteration by extracellular ATP (chicken), **159**, 878
    - identification by monoclonal antibody (chicken brain) **163**, 1182
    - role in mitogen-induced changes in intracellular free Ca^{2+} levels in fibroblasts (murine fibroblasts), **162** 448
- high voltage-activated, identification in isolated spinal neurons (rat), **159**, 379
- identification in isolated sperm plasma membranes (pig). **161**, 162
- N- and L-type, ligand binding, effect of endothelin (rat brain), **162**, 1332
- receptor-operated, activation
    - by EGF receptors, role of receptor-associated tyrosine protein kinase (A431 cells), **158**, 527
    - monitoring in platelets (human), **162**, 24
- stretch-activated, identification in cultured mesangial cells (rat kidney), **159**, 516
- voltage-dependent
    - homologous regulation by 1,4-dihydropyridines. analysis (PC12 cells), **160**, 929
    - and second type, role in endothelin-induced phasic contractions and developing contractions in uterus (rat). **159**, 317
- voltage-sensitive, and nicotine receptors, mediation of calcium influx in SK-N-SH neuroblastoma cells (human), **162**, 1230

Calcium transport
- active, in inside-out erythrocyte membrane vesicles, effects of cellular aging *in vivo* and *in vitro* (human), **159**, 432

Caldesmon
- actin-binding 15-kDa fragment, amino acid sequence: comparison with dystrophin, tropomyosin, and tropomyosin-binding region of troponin T (turkey gizzard), **160**, 210
- anomalous electrophoretic behavior in polyacrylamide gel (chicken gizzard), **160**, 174
- calmodulin-binding domains, identification (chicken gizzard), **162**, 746
- localization in erythrocytes (human, swine), **159**, 395
- smooth muscle, myosin and tropomyosin binding regions characterization (chicken), **160**, 1316
- 35-kDa actin- and calmodulin-binding fragment from C-terminus, sequence analysis (turkey gizzard), **160** 1371

h-Caldesmon
- cDNA, primary structure and functional expression (chicken embryo gizzard), **164**, 503
- 35-kDa fragment, conservation of consensus sequences of tropomyosin-binding domain in troponin T (chicken gizzard), **161**, 38

llus
  riazole cytochrome-P450-obtusifoliol-14-demethylase inhibitor-resistant, regenerated sterol mutant plant, biochemical characterization (tobacco), **165**, 125
lmidazolium
  effect on Ca^{2+}-dependent protein protease calpain I (human erythrocytes), **159**, 1297
lmodulin
  activity in whole body and fat body tissue extracts of tobacco budworm larvae, **158**, 485
  binding domains
    in calcineurin A, detection (rat brain), **163**, 1492
    in caldesmon, identification (chicken gizzard), **162**, 746
  binding protein
    defect, role in lack of interleukin-1β gene expression by lipopolysaccharide-nonresponder macrophages (C3H/HeJ mouse), **158**, 723
    81-kDa heat-stable, purification and characterization (bovine brain), **163**, 581
  binding to proteins of rod outer segments, analysis (toad retina), **163**, 363
  dependent protein phosphatase, catalytic subunit, evidence for second isoform (rat), **165**, 1352
  differential gene expression in fetal, adult, and neoplastic tissues (rat), **159**, 278
  functional expression in yeast (chicken), **158**, 541
  insulin-stimulated phosphorylation *in vitro*, mediation by carboxyl terminal segment of human c-Ki-*ras* 2 gene product, **161**, 399
  N- and C-terminal domains, cooperative interaction, ^{113}Cd NMR analysis (scallop testis), **161**, 1233
  role in cell fusion inhibition by autoinhibitor (*Dictyostelium discoideum*), **164**, 1176
  35-kDa binding fragment from caldesmon C-terminus, sequence analysis (turkey gizzard), **160**, 1371
Calpain
  extracellular appearance in knee joint synovial fluid of rheumatoid arthritic and healthy subjects, comparison (human), **162**, 559
  identification as precursor of chemotactic factor for neutrophils (human), **164**, 875
  induced proteolysis of tau, analysis (bovine brain, microtubules), **163**, 1505
  in intact platelets, inhibition by thiol protease inhibitor E-64d (human), **158**, 432
  in neutrophils, activation after phorbol ester- or fMet-Leu-Phe-induced translocation to plasma membrane (human), **160**, 737
  role in proteolytic conversion of xanthine dehydrogenase to xanthine oxidase, analysis (rat), **165**, 858
Calpain I
  inhibition by calmodulin and protein kinase C antagonists, analysis (human erythrocytes), **159**, 1297
Calpain inhibitor
  synthetic, inhibition of membrane protein proteolysis (rat erythrocytes), **157**, 1117; *erratum*, **159**, 371
Calpastatin
  extracellular appearance in knee joint synovial fluid of rheumatoid arthritic and healthy subjects, comparison (human), **162**, 559
Calphostin C
  inhibition of protein kinase C (*Cladosporium cladosporioides*), **159**, 548
Calregulin
  sequence homology with calcium-binding protein from canine brain, **164**, 575
Calsequestrin
  related high-capacity low-affinity calcium-binding protein of endoplasmic reticulum, characterization (human liver), **165**, 973
Calyculin A
  inhibition of protein phosphatase activity, analysis (sea sponge), **159**, 871
Campylobacter pylori
  human, and ferret gastric Campylobacter-like organism, proteolytic activities on hemoglobin and mucus, **163**, 1
Candida tropicalis
  cAMP levels, effects of ethanol and *myo*-inositol, **162**, 646
Captopril
  direct scavenging of free radicals, analysis, **158**, 52
  reciprocal control of renin expression in brain and kidney (rat), **159**, 1065
  suppression of atrial natriuretic peptide gene expression in ventricles (spontaneously hypertensive rat), **160**, 310
Carbachol
  induction of
    Ca^{2+} mobilization in single pancreatic acinar cells (rat), **158**, 863
    force development in myometrium, effect of pregnancy (rat), **158**, 302
  stimulated inositol trisphosphate-dependent Ca mobilization, post-receptor signal tranduction mechanism: dissociation from α-adrenergic mechanism (rat parotid cells), **162**, 347
Carbohydrates
  –carbohydrate interaction, role in cell recognition during embryogenesis and organogenesis (murine F9 teratocarcinoma cells), **158**, 913
  effects on malic enzyme in cultured fetal hepatocytes (rat), **161**, 1028
  α-subunit, human chorionic gonadotropin, processing by first trimester placenta tissue, effects of cyclic nucleotides (human), **159**, 26
Carbon monoxide
  binding to hemoglobin, effects of inositol hexaphosphate and bezafibrate (human), **165**, 226
  binding site on myoglobin resulting from distal His→Arg mutation, similarity to hemoglobin Zurich abnormal beta site (bovine), **158**, 110
Carbon tetrachloride
  hepatotoxicity, potentiation by pyrazole treatment (rat), **161**, 615
  induction of increased hepatocyte growth factor mRNA levels in nonparenchymal liver cells (rat), **165**, 1229
Carbo-oligodeoxynucleotides
  synthesis: potential as antisense agents, **165**, 742
Carbovir triphosphate
  and AZT triphosphate and dideoxynucleoside triphos-

- phates, effects on HIV-1 reverse transcriptase and selected human polymerases, comparison, **161**, 393

para-Carboxylation
- in anaerobic transformation of phenol to benzoate, analysis with fluorinated analogs, **162**, 945

Carboxypeptidase
- arginine-specific, unrelated to carboxypeptidase N, generation in blood during coagulation or inflammation (human), **162**, 933

Carboxypeptidase A
- and trypsin, inhibitory chimeric 32-residue peptide, design and chemical synthesis, **162**, 1425; *erratum*, **164**, 594

Carcinoembryonic antigen
- expressed on CHO cells, mediation of cell adhesion, **164**, 39
- gene family
  - isolation and sequencing of N-terminal domain exons (human), **158**, 996
  - pregnancy-specific glycoprotein subgroup, expression in fetal liver, demonstration by cDNA cloning (human), **163**, 1197
- related genes, expression in first-trimester placenta (human), **162**, 1486
- related pregnancy-specific β1 glycoprotein
  - –fetal liver nonspecific cross-reactive antigen glycoprotein, cDNA cloning (human), **161**, 525
  - structures of protein, mRNA, and gene (HL-60 cells), **163**, 1021

Cardiac natriuretic peptide
- 5-kDa, isolation and amino acid sequence (rat atrium), **163**, 233

Cardiocytes
- cellular atrial natriuretic peptide and associated mRNA, endothelin-stimulated accumulation *in vitro* (rat), **164**, 1431
- endothelin-specific receptors, identification and characterization (neonatal rat), **160**, 1438

Cardiolipin
- role in functioning of mitochondrial L-glycerol-3-phosphate dehydrogenase (rat liver), **159**, 132
- sonicated sodium salt in aqueous medium, analysis with ^{23}Na and ^{31}P NMR (bovine heart), **161**, 979

Cardiomuscular cells
- cytosolic calcium levels and circumference, simultaneous measurement during contraction by digital imaging microscopy with indo-1 (rat), **162**, 926

Cardiomyopathy
- associated alterations in myocardial creatine kinase system, analysis (hamster), **165**, 748
- induced inhibition of cGMP generation and decrease in atrial natriuretic factor receptors in glomerulus, analysis (hamster kidney), **159**, 807

Cardiotoxicity
- doxorubicin-induced, hypoxia as risk factor, NMR evaluation (rat heart), **163**, 682

Carnitine
- muscular content, age-dependent decrease (human, mouse), **161**, 1135
- translocation in cardiac mitochondria, effect of diazepam (rat), **161**, 295

L-Carnitine
- protective effects on ammonium salt-induced alteration in mitochondrial respiration (rat liver), **158**, 181

Carotenogenesis
- *in vitro*, in characterization of phytoene desaturase reaction (*Anacystis* sp.), **163**, 916

Carrageenan
- and 1,2-dimethylhydrazine, treatment with, subsequent localization of *N*-acetylneuraminic acid and *N*-glycolylneuraminic acid in colonic tumor and mucosa glycopeptides (rat), **159**, 452

Cartilage
- articular, adult, expression of ED B fibronectin isoform (human), **165**, 782
- interleukin 1-stimulated degradation *in vitro*, partial inhibition by human transforming growth factor β (pig), **162**, 144

Casein kinase I
- ionic strength-dependent interaction with plasma membrane (rat liver), **160**, 633

Casein kinase II
- colonic carcinoma, characterization after heterotransplantation into nude mice (human), **163**, 635
- nuclear, isolation and enrichment: specific phosphorylation of endosperm HMG proteins (maize), **162**, 456

Catalase
- compound II, ubiquitous formation in perfused liver: identification of spectral species (rat), **162**, 1272
- hepatic expression, changes as function of age and dietary restriction (rat), **164**, 620
- in pulmonary artery smooth muscle cells, butyrate-induced activity increase, role in protection against hyperoxia (rat), **164**, 1143

Catechol-*O*-methyltransferase
- encoding mRNA, isolation (rat liver), **158**, 776

Cathepsin B
- identification and characterization (*Aspergillus flavus*, *A. parasiticus*), **159**, 464

Cathepsin D
- identification and characterization (*Aspergillus flavus*, *A. parasiticus*), **159**, 464
- targeting to lysosomes, inhibition by brefeldin A (rat hepatocytes), **163**, 220

Cathepsin G
- inhibition by eglin C-related peptide fragments (human) **161**, 272

Cathepsin H
- targeting to lysosomes, inhibition by brefeldin A (rat hepatocytes), **163**, 220

Cathepsin L
- membrane-associated, role in metastasis of melanomas (human, mouse), **164**, 556; *erratum*, **165**, 1444

Cations
- hydrophobic moieties, promotion of DNA B-to-Z transition in poly[d(G-C)] and poly[d(G-m^{5}C)], **164**, 426

Cauliflower mosaic virus
- 35 S RNA promotor region, hexameric sequence, function (sunflower cells), **164**, 387

DP-ethanolamine pathway
  role in phosphatidylethanolamine biosynthesis in isolated hepatocytes (rat), **160**, 1275
ell cultures
  atrial myocytes, atrial natriuretic factor secretion, stimulation by co-cultured bovine endothelial cells (rat), **163**, 701
  embryonal carcinoma cells, mutants with temperature-sensitive growth: control of stem cell differentiation by incubation temperature (mouse), **165**, 65
  Escherichia coli, heat shock protein synthesis, effects of down-shift in growth temperature, **163**, 438
Cell cycle
  associated changes in ADP-ribosylatable content of elongation factor-2 (human fibroblasts, HeLa cells), **159**, 1141
Cell fusion autoinhibitor
  mechanism of action, role of calmodulin (*Dictyostelium discoideum*), **164**, 1176
Cell lines, *see also* Tumor cells
  BHK (baby hamster kidney)
    ATP-dependent proteolysis in soluble extracts, role of macropain latent form, **160**, 911; *erratum*, **161**, 944
    mitotoxin activity of basic fibroblast growth factor–saporin, **160**, 917
  Bm-N (*Bombyx mori*), production of functional murine transcription factor S-II, **160**, 1093
  CHO (Chinese hamster ovary), *see* CHO cells
  COS (African green monkey kidney)
    expression of carboxyl-terminal deletion mutants of human macrophage colony-stimulating factor, **161**, 892
    role of terminal deoxynucleotidyl transferase as intracellular mutagen, **165**, 271
    transfected with rat albumin cDNA, proalbumin processing to serum albumin, **163**, 194
    transient expression of angiotensin II receptors: functional analysis of Ca^{2+}-mobilizing seven-transmembrane-domain receptor, **165**, 935
  CV-1 (African green monkey kidney), direct activation of human multidrug resistance gene, **165**, 1415
  DC-3F, electropermeabilization, voltage-dependent effect on introduction of d[α]octothymidylate, analysis, **159**, 633
  MB-02, detection of fetal-to-adult globin gene switching in response to erythropoietin, **164**, 857
  MT-4 (human lymphocytes)
    anti-HIV activity of zidovudine, augmentation by vitamin E, **165**, 401
    HIV replication, inhibition by 3′-fluoro-modified nucleosides with low cytotoxicity (human), **165**, 488
    infected with HIV-1, HIV-2, and simian immunodeficiency virus, antiviral activity of D4CC, analysis, **164**, 1190
  NRK (normal rat kidney), simian sarcoma virus-transformed, conditioned medium from, detection of basic fibroblast-like growth factor, **164**, 1323
  OK (opossum kidney), protein kinase C translocation, effects of parathyroid hormone 1–34, 3–34, and 7–34, **159**, 1352
  RINm5F, insulin-producing, recovery from elevated cytoplasmic Ca^{2+} augmentation by protein kinase C activation, role of Ca^{2+} efflux stimulation, **165**, 416
  RMC2h, as packaging cell line for mouse mammary tumor virus-based conditional retroviral vectors, construction and characterization, **159**, 1191
  R6-XE.4 (murine mast/megakaryocytes), phosphatidylinositol turnover, stimulation by interleukin 3, **164**, 804
  T51B (rat liver), DNA synthesis and phospholipid-derived second messenger generation, effects of tyrosine kinase inhibitor genistein, **165**, 795
  TF-1, multifactor-dependent, associated interleukin 3 receptors, characterization, **161**, 16
Cellobiohydrolase I, *see* Cellulose 1,4-β-cellobiosidase
Cellulase complex
  Clostridium thermocellum, degradation of crystalline cellulose, enhancement by cloned β-glucosidase, **161**, 706
Cellulose
  crystalline, degradation by *Clostridium thermocellum* cellulase complex, enhancement by cloned β-glucosidase, **161**, 706
Cellulose 1,4-β-cellobiosidase
  type I, structural effects of binding macromolecular ligand, small-angle X-ray scattering analysis (*Trichoderma reesei*), **165**, 615
Cell wall
  incorporated proteins, formation of covalent bonds (*Candida albicans*), **162**, 1118
Cerebrospinal fluid
  insulin-like growth factor 34-kDa binding protein, identification as homolog to rat BRL-3A binding protein, **163**, 875
  locust adipokinetic hormone-like immunoreactivity, identification and characterization (human), **163**, 534
Cerulenin
  and analogs, inhibition of HIV protease, related structural features, **163**, 980
Ceruloplasmin
  oxidation of heme proteins, analysis, **159**, 482
  transendothelial transport, role of endosomes (rat liver), **162**, 1346
  unglycosylated, solubility and accumulation in rough endoplasmic reticulum (Hep G2 cells), **160**, 1421
Chargerin II
  orientation in ATP synthase of hepatic mitochondria, determination with antibodies against chargerin II peptides (rat), **165**, 449
Charybdotoxin
  scorpion venom, interaction with mamba venom dendrotoxin I at neuronal membrane binding sites (rat brain), **163**, 394
Chediak–Higashi syndrome
  beige mouse model, abnormal down-regulation of protein kinase C and impaired natural killer activity, improvement by thiol proteinase inhibitors, **160**, 433
Chemiluminescence
  lucigenin
    in alveolar macrophages, role of mitochondrial respiration (rat), **159**, 584

    - in detection of interferon inducer effects on microsomal superoxide anion generation (rat liver), **161**, 1042

Chemotactic factors
- neutrophil-specific
    - cytokine-induced, purification and characterization (rat renal cells), **161**, 1093
    - identification of calcium-dependent cysteine proteinase as precursor (human), **164**, 875

Chemotaxis
- polymorphonuclear leukocytes, role of N-terminus of LUCT/IL-8 protein (human), **163**, 1298
- *Vibrio furnissii* in response to chitin oligosaccharides, **161**, 1172

Chitin
- oligosaccharides, chemotactic response of *Vibrio furnissii*, **161**, 1172

Chloramine-T
- derivatives of histamine, formation, role in bronchoconstriction (guinea pig lung), **165**, 1018

Chloride
- role in isomerization of angiotensin I-converting enzyme–[H^3]RU 44403 inhibitor complex to more stable form (human kidney), **163**, 718
- transport in fibroblasts, activation by hypotonic shock (human), **160**, 1330

Chloride channels
- epithelial, blocker 5-nitro-2-(3-phenylpropylamino)-benzoic acid, inhibition of prostaglandin E_2 synthesis (rat mesangial cells), **163**, 398

Chloride peroxidase
- reactions in presence of xanthine/xanthine oxidase, analysis, **159**, 1086

Chlorine
- ATP-dependent uptake by plasma membrane vesicles from brain, effects of proton pump inhibitors (rat), **160**, 469
- –K–Na cotransport in vascular endothelial cells, stimulation by atrial natriuretic factor (bovine artery), **159**, 734
- stretch-activated channels, identification in cultured mesangial cells (rat kidney), **159**, 516

2-Chlorobenzoate
- microbial degradation: identification of metabolite 2,3-dihydroxybenzoate, **161**, 700

Chloroform
- hepatotoxicity, effect of pyrazole treatment (rat), **161**, 615

7-Chloro-4-nitrobenzo-2-oxa-1,3-diazole
- inhibition of vanadate-insensitive ATP-dependent H^+ transport in urinary bladder epithelial membrane vesicles (turtle), **161**, 312

Chloroplasts
- P1-related protein, amino acid sequence, comparison with mitochondrial and bacterial proteins, evidence for endosymbiotic origin (wheat), **163**, 780
- thylakoid membranes, reversibility of thermal transitions (cucumber, pea), **158**, 11

Chloroquine
- effect on chloroquine-sensitive and -resistant falciparum malaria, potentiating action of tetrandrine, **165**, 758
- induction of
    - increase in parathyroid cell secretion (bovine), **160**, 1339
    - loss of hepatic surface galactosyl receptors, role of receptor internalization via clathrin-coated pit pathway (rat), **161**, 261
- resistant *Plasmodium falciparum*, antimalarial activity of tetrandrine, **159**, 242

Chlorpromazine
- protection against interleukin-1 lethality in adrenalectomized or actinomycin D-sensitized mice, analysis, **165**, 942

CHO cells
- *N*-acetyl glucosaminyltransferase I-deficient, restoration of enzyme activity after DNA-mediated transformation, **159**, 554
- L-arginine transport, characterization, **164**, 1093
- inducibly expressing *Eco* RI restriction endonuclease, increase in chromosomal radiosensitivity, **160**, 1079
- internalization and degradation of human insulin receptor–v-*ros* hybrid, **158**, 705
- stable high-level expression of human thyroid peroxidase, **164**, 1268
- surface-expressed nonspecific cross-reacting antigen and carcinoembryonic antigen, mediation of cell adhesion, **164**, 39
- transfected, grown in suspension culture, binding kinetics of mutated insulin receptors, **164**, 191
- transient expression of human ornithine decarboxylase gene, effect of methylation before transfection, **162**, 528

Cholecystokinin
- analogs, effects on inositol trisphosphate, intracellular free calcium, and amylase in pancreatic acini (rat), **164**, 8
- elevation of cytosolic calcium in small cell lung cancer cells, analysis (human), **163**, 605
- induction of Ca^{2+} mobilization in single pancreatic acinar cells (rat), **158**, 863
- and other neuropeptides, mobilization of Ca^{2+} in small cell lung cancer cells, **164**, 66

Cholera toxin
- ADP-ribosylation of
    - Nb_2 lymphoma cell membrane proteins, effect of prolactin, **156**, 776; *erratum*, **161**, 392
    - receptor-coupled form of pertussis toxin-sensitive G proteins (NG108-15 cells), **165**, 554
- liposome-bound, primary immune response to, suppression by prostaglandin and thromboxane in liposomes (rabbit), **160**, 565
- neutralization by peptide P50-75-induced secretory IgA antibodies (mouse), **159**, 707

5β-Cholestane-3α,7α,12α-triol
- 26-hydroxylation, catalyzing cytochrome P450, characterization (rabbit hepatic mitochondria), **157**, 30; *erratum*, **159**, 370

Cholesterol
- biosynthesis inhibition, stimulation of anchorage-independent proliferation of adrenocortical carcinoma cells (human), **165**, 219
- lowering agents lovastatin, simvastatin, and pravastatin, tissue selectivity *in vivo* (rat), **158**, 667

  side-chain cleavage in cultured glial cells, aminoglutethimide blockade, release, effect on steroidogenesis (rat), **161**, 917
Cholesterol esterase
  pancreatic, cloning: similarity to rat lysophospholipase (bovine, human), **164**, 1302
Cholesteryl ester hydroperoxide
  detection in plasma (human), **165**, 988
Cholesteryl esters
  intracellular accumulation, suppression of lipopolysaccharide-induced interleukin 1 production (rat peritoneal macrophages), **160**, 874
Choline base exchange enzyme
  in astrocyte primary cultures and derived spontaneously transformed cell lines, effect of cell-surface trypsinization (rat), **159**, 1055
Cholinephosphotransferase
  role in decreased rate of platelet-activating factor biosynthesis in *de novo* biosynthesis pathway in renal inner medulla during renal necrosis (rat), **163**, 1002
Cholinergic receptors
  nicotinic, $[^3H]$nicotine binding to, inhibition by monospecific antibodies against synthetic peptide predicted from α-3 nicotinic receptor cDNA (rat brain), **165**, 151
Chondrocytes
  articular, phospholipase A_2 mRNA synthesis, stimulation by interleukin 1β (rabbit), **164**, 488
  costal, demonstration of parathyroid hormone receptors (rabbit), **162**, 1222
  differentiated, colony formation in soft agar, regulation by transforming growth factor β (chicken, rabbit), **159**, 1006
  phospholipase A_2 activity and mRNA levels and eicosanoid formation, effects of recombinant interleukin 1β (rabbit), **165**, 1079
Chromaffin cells
  adrenal, cytosolic calcium, endothelin-induced effects, potentiation by depolarization (bovine), **165**, 306
Chromaffin granules
  Ca^{2+}- and ATP-dependent binding protein chromobindin A, presence in bovine tissues and yeast, **165**, 37
Chromanoxyl radicals
  accumulation in mitochondria and microsomal membranes, prevention by free radical reductase activity (rat liver), **159**, 229
Chromatin
  associated protein Yp20, binding to GTP (yeast), **165**, 667
  nuclear, computer-assisted imaging cytometry, in detection of bone tumor virus infection and neoplastic transformation of adherent osteoblast-like cells (mouse), **164**, 728
  4',5',8-trimethylpsoralen affinity for, effects of nuclear isolation (human), **163**, 1384; *erratum*, **165**, 919
Chromium
  Cr(VI), glutathione reductase-catalyzed reduction, role of chromium(V) and hydroxyl radicals, **163**, 627
  role in biological activity of low-molecular-weight chromium-binding substance (rabbit liver), **163**, 189
Chromium-binding substance
  low-molecular-weight, biological activity, role of chromium (rabbit liver), **163**, 189
Chromobindin A
  Ca^{2+}- and ATP-dependent chromaffin granule-binding, presence in bovine tissues and yeast, **165**, 37
Chromopeptides
  phycocyanin-related, associated chromophores, conformational analysis by surface enhanced Raman spectroscopy (*Synechococcus* 6301), **159**, 1227
Chromophores
  phycocyanin and related peptides, conformational analysis by surface enhanced Raman spectroscopy (*Synechococcus* 6301), **159**, 1227
Chromosomes
  associated rapidly phosphorylated 42-kDa protein, characterization: subunit of larger protein complexes (midge), **165**, 895
  radiosensitivity, increase in cells inducibly expressing *Eco* RI restriction endonuclease (CHO 10 cells), **160**, 1079
  translocation t(1;19), near insulin receptor locus in pre-B acute lymphocytic leukemia cell line, correlation with insulin receptor overexpression (human), **159**, 1275
  X-, linked phosphoglycerate kinase, cDNA cloning and sequencing (rat), **165**, 1337
Chymostatin
  effect on killing of cultured hepatocytes by cystamine (rat), **163**, 412
Chymotrypsin
  activated big endothelin, contractile activity in isolated aorta and pressor activity after injection *in vivo* (rat), **161**, 406
  immobilization by Schiff base copper(II) chelate (bovine), **162**, 408
  inhibition
    by *Ecballium elaterium* trypsin inhibitor II-related microproteins, **162**, 79
    irreversible, by peptidyl derivatives of α-aminoalkylphosphonate diphenyl esters (bovine), **161**, 143
    by synthetic inhibitor MR 889, analysis (bovine, human), **165**, 568
  –α_2-macroglobulin complex, structure, electron microscopic study (human), **161**, 216
  type α, inhibition by eglin C-related peptide fragments (human leukocyte), **161**, 272
Chymotrypsinogen
  precursor, cDNA, cloning and nucleotide sequence (human pancreas), **158**, 569
Cibacron Blue F3Ga
  in affinity chromatographic purification of NAD(P)H:quinone reductase from cytosol and microsomes: structural comparison (rat liver), **161**, 434
Cimetidine
  effect on phenobarbital induction of hepatic microsomal aminopyrine *N*-demethylase (rat), **162**, 1363
Ciprofibrate
  acyl-coenzyme A thioester, potentiation of diacylglycerol-activated protein kinase C (rat brain, liver), **159**, 1026

- Circular dichroism
  - determination of amyloid fibril secondary structure (human), **162**, 1162
  - and NMR joint study of conformational variations in d(TGACGTCA) and reverse sequence d(ACTGCAGT), **165**, 602
  - secondary structure of lingual and pancreatic lipases, relation to hydrophobic moments (rat), **162**, 95
- Cirrhosis
  - primary biliary, associated anti-mitochondrial autoantibodies, in analysis of biosynthetic regulation of yeast 2-oxo acid dehydrogenase complexes, **158**, 220
- Cisplatin
  - with acivicin, effects on thymidylate synthase and thymidine kinase activities in A549 lung cancer cells (human), **161**, 31
  - adverse effects on renal mitochondria: disturbances in glutathione peroxidase activity (rat), **159**, 1121
  - derived platinated DNA adducts, reversal reaction with thiourea, analysis with platinated GMP, **161**, 819
  - inhibition of ribonucleotide reductase (*Escherichia coli*), **162**, 715
- Citrate (*si*)-synthase
  - porcine, site-directed mutant, analysis, **164**, 1437
- Citrulline
  - forming enzyme, discovery in vascular endothelial cells and implications in nitric oxide formation (swine), **158**, 348
- Clathrin
  - binding domain of AP-2 assembly protein, identification (bovine brain), **158**, 17
  - coated pit pathway, hepatocyte surface galactosyl receptor internalization via, role in monensin- or chloroquine-induced loss (rat), **161**, 261
- Clofibric acid
  - acyl-coenzyme A thioester, potentiation of diacylglycerol-activated protein kinase C (rat brain, liver), **159**, 1026
- Cloning
  - acid phosphatase cDNA (rat liver), **162**, 1044
  - alcohol dehydrogenase class III(χ) cDNA (human liver), **164**, 453
  - alkane-hydroxylating cytochrome P450 cDNA (*Candida maltosa*), **161**, 843
  - aminopeptidase M cDNA (rat kidney), **161**, 236
  - bovine pancreatic cholesterol esterase/lysophospholipase cDNA, **164**, 1302
  - brain natriuretic peptide precursor cDNA
    - human, **159**, 1427
    - rat, **159**, 1420
  - calmodulin genes in yeast expression system (chicken), **158**, 541
  - carcinoembryonic antigen gene-related pregnancy-specific β1 glycoprotein/fetal liver nonspecific cross-reactive antigen glycoprotein cDNA (human), **161**, 525
  - cytochrome bc_1 complex Rieske iron-sulfur protein cDNA (rat), **159**, 19
  - growth hormone cDNA (grass carp), **161**, 1239
  - hepatocyte growth factor cDNA (human), **163**, 967
  - human macrophage colony-stimulating factor cDNA (CEM-ON cells), **161**, 892
  - hydroxysteroid sulfotransferase cDNA (rat liver), **165**, 16
  - interleukin-3 genes in retroviral vector (ψ2, NIH/3T cells), **158**, 576
  - leukotoxin gene, **159**, 256
  - lipocortin I cDNA (mouse), **159**, 155
  - β-microseminoprotein cDNA (human), **164**, 1310
  - milk late-lactation protein cDNA (wallaby), **164**, 1380
  - monocyte chemotactic and activating factor cDN (human), **159**, 249
  - myelin-associated glycoprotein cDNA
    - in human, **163**, 1473
    - in mouse, **165**, 1162
  - pancreatic secretory trypsin inhibitor cDNAs (rat), **162** 151
  - phospholipase A_2 cDNA (rat), **162**, 1030; *erratum*, **164** 1452
  - phospholipase C gene (*Clostridium perfringens*), **160**, 33
  - plasma membrane H^+-ATPase genes (*Nicotiana plum baginifolia*), **162**, 567
  - potassium channel-inducing membrane protein DN (human), **161**, 176
  - prechymotrypsinogen cDNA (human pancreas), **158**, 56
  - proline-rich protein cDNA: identification of PRP as C4b binding protein (human liver), **165**, 138
  - prostaglandin endoperoxide synthase gene: enzyme primary structure (human), **165**, 888
  - prostatic acid phosphatase cDNA (human), **160**, 79
  - rapid, rearranged immunoglobin genes with mixed primer and polymerase chain reaction (human hybridom cells), **160**, 1250
  - thyrotropin receptor cDNA (human), **165**, 1184, 1250
  - transmembrane secretory component cDNA (human), **158** 783
  - TR2 receptor cDNA: class of steroid receptors with multiple ligand-binding domains (human prostate, testis), **165**, 735
  - 25-kbp region upstream of exon 0 of human KI-*RAS* oncogene in transformed murine NIH 3T3 cells, **159** 324
  - tyrosinase cDNA of Himalayan mutant (mouse), **161**, 252
  - tyrosinase precursor cDNA (human), **162**, 984
  - X chromosome-linked phosphoglycerate kinase cDN (rat), **165**, 1337
  - *Zfy-1* gene from Y^{DOM} murine strain: detection of post-meiotic *Zfy* gene expression in testis, **165**, 1286
- CMP-KDO synthetase, *see* 3-Deoxy-*manno*-octulosonate cytidylyltransferase
- Coenzyme A
  - ^{125}I-labeled derivative, photoaffinity labeling of brown adipose tissue mitochondria: differential interaction with uncoupling protein and ADP/ATP carrier (hamster), **161**, 502
- Colchicine
  - direct activation of human multidrug resistance gene (CV-1 cells), **165**, 1415
  - photoactive analogs, photoaffinity labeling of P-glycoprotein in multidrug resistant cells (hamster lung), **162** 1402
- Collagen
  - associated binding domain of von Willebrand factor, corre

sponding subfragment, production in *Escherichia coli*, **164**, 1339
effect on calcium channel activation (human platelets), **162**, 24
production in smooth muscle cells, effects of endothelial cell growth factor and heparin (human), **163**, 84
related gene, isolation from *Paracentrotus lividus*, **158**, 633; *erratum*, **162**, 900
type I, gene expression loss, relationship to DNA methylation (rat bone cells), **162**, 1446
type III, covalent binding to acetaldehyde (bovine skin), **159**, 163
type VIII, immunolocalization in vascular tissue (sheep), **159**, 414
ollagenase
  heparin-stimulated synthesis in osteogenic MC3T3-E1 cell line, effect of β-glycerophosphate-induced mineralization (mouse), **162**, 773
  inhibition by cinnamoyl-(1-^{13}C-Phe)-^{c}Gly-Pro-Pro (*Clostridium histolyticum*), **159**, 426
olony-stimulating factor
  granulocyte–macrophage, recombinant, effects on osteoblast-like cells *in vitro* (human), **160**, 588
  human macrophage, molecular cloning and expression of carboxyl-terminal deletion mutants (CEM-ON, COS-1 cells), **161**, 892
  mutagenesis *in vitro*, in analysis of structure–function relationship (human granulocytes), **159**, 103
omplement
  alternative pathway, associated factor B, polymerization via disulfide bonds in presence of Cu^{2+}, stimulation by C3b (human), **165**, 101
  C3, structural similarities to estrogen-responsive 110K and 74K uterine secretory proteins (rat), **158**, 898
  and perforin, mediated lysis, differential susceptibility of type III erythrocytes from paroxysmal nocturnal hemoglobinuria patients, **162**, 316
  regulatory factor C4b-binding protein, identity as acute-phase protein, demonstration (Hep G2 cells), **164**, 1446
  Sc5b-9 complex, β-endorphin-binding sites, localization on S-protein subunit, **159**, 799
  20-kDa homologous restriction factor, similarity to T-cell-activating protein, **162**, 1553
Complex I, *see* NADH dehydrogenase (ubiquinone)
Complex III
  mitochondrial respiratory chain, ubiquinone-binding protein, isolation of encoding nuclear gene (human), **161**, 371
Computer applications
  Monte Carlo calculations of lipid chains and gramicidin A in model membrane, **165**, 1
  PREDICT7 program, in prediction of protein structure, **159**, 687
Concanavalin A
  affinity for extracellular matrix-associated bone differentiation-inducing protein osteogenin (bovine), **160**, 419
  –Sepharose-immobilized $GABA_A$ receptors, ligand binding characteristics (rat cerebrocortical membranes), **163**, 611
Conduritol aziridine
  mechanism-based glucosidase-inactivating, synthesis and testing (*Alcaligenes faecalis*, yeast), **163**, 495
Coomassie Brilliant Blue G
  and Reactive Blue 2, antagonism of P_2 purinergic responses in parotid acinar cells, comparison (rat), **165**, 1279
Copper
  associated polymerization of factor B of alternative complement pathway via disulfide bonds, stimulation by C3b fragment (human), **165**, 101
  intracellular transport in cultured hepatoma cells, role of metallothionein, glutathione, and superoxide dismutase, **164**, 134
  –nitrosyl intermediate in nitrite reduction by blue copper-containing nitrite reductase, spectroscopic evidence (*Achromobacter cycloclastes*, *Alcaligenes* sp.), **164**, 1366
  Schiff base chelate
    in immobilization of chymotrypsin (bovine), **162**, 408
    as tool for intermolecular crosslinking and immobilization of protein, evaluation, **161**, 52
  and thiols, single-strand cleavage of plasmid DNA, **162**, 1111
  –thiol system, apparent sequence preference in cleavage of linear B-DNA (bovine), **165**, 1235
Copper(II) phthalocyanine
  interaction with DNA, analysis (bovine thymus), **159**, 1256
Corneal cells
  keratoconus, gelatinolytic activity *in vitro*, comparison with normal cells (human), **161**, 353
Corticotropin, *see* Adrenocorticotropin
Corticotropin-releasing factor
  binding protein, structure and glycoprotein nature, analysis (human), **165**, 703
  effect on β-endorphin release from pituitary and hypothalamus *in vitro* (rat), **161**, 221
  41-residue, induced corticotropin release by anterior pituitary cells, inhibition by cyclic GMP and guanylate cyclase activators (rat), **158**, 824
  local stimulation of prostaglandin production in fetal membranes and placenta (human), **159**, 192
  signal transduction in cultured pituitary cells, critical role of protein kinase C (rat), **163**, 1014
Creatine kinase
  myocardial, alterations in cardiomyopathic hamsters, analysis, **165**, 748
Cremophor EL
  potent inhibition of protein kinase C *in vitro* (human), **159**, 1359
α-Crystallin
  A chain, dephosphorylation, regulation by calcium (bovine lens), **162**, 1494
  lens, β-subunit, localization in ocular and nonocular tissues (rat), **158**, 319
Crystallins
  lens, changes associated with amphibian metamorphosis: role of β-crystallin polypeptide, **164**, 1423

Crystallography
- Cu,Zn-superoxide dismutase (yeast), **160**, 677
- X-ray, 2′,3′-dideoxyformacin A: evidence for role of *anti* conformation in anti-HIV activity, **161**, 910

Cyanogen bromide
- cleaved desmin, fragments corresponding to intermediate filament headpiece domain and helix 1B, assembly properties (chicken gizzard), **165**, 1059

Cyclic AMP
- associated second messenger system, realization as morphogenetic field: derivation of gene transcription as hysteretic function of second messenger, **165**, 1267
- direct regulatory effect on Ca^{2+} sensitivity of contractile elements of mesenteric artery (rat), **163**, 929
- effects on
  - Ca^{2+}-induced insulin secretion from perifused and electrically permeabilized islets of Langerhans (rat), **162**, 998
  - GTP-binding protein mRNA expression in rat pheochromocytoma PC-12 cells, **158**, 377
  - phosphorylation of immunologically *ras*-related protein in erythroleukemia cells (human), **161**, 972
  - processing of carbohydrate moiety of human chorionic gonadotropin α-subunit by first trimester placenta tissue (human), **159**, 26
- induction of c-*fos* expression in melanocytic cells (mouse), **159**, 408
- inhibition of
  - phorbol ester-stimulated production of reactive oxygen metabolites (rat glomeruli), **165**, 519
  - platelet phospholipase C activation by fluoride (human), **158**, 440
- isoproterenol-stimulated rise in isolated submandibular acini, inhibition by cyclic AMP phosphodiesterase introduction with no effect on mucin secretion (rat), **161**, 661
- levels in *Candida tropicalis*, effects of ethanol and *myo*-inositol, **162**, 646
- mediated potassium currents, activation by prostaglandins E_1 and E_2 in follicle-enclosed oocytes (frog), **162**, 1535
- production by
  - isoproterenol-stimulated C6 glioma cells, inhibition by ADP and ATP (rat), **163**, 1150
  - neuroblastoma cells, inhibition by bradykinin, neurotensin, and somatostatin, pertussis toxin-sensitive and -insensitive mechanisms, **161**, 1144
  - OK cells, correlation with parathyroid hormone inhibition of Na^+/phosphate cotransport, **158**, 951
- role in
  - activation of Na^+/H^+ antiporter, analysis (murine macrophages), **165**, 131
  - calcitonin gene-related peptide suppression of insulin-stimulated glucose transport (L6 myocytes), **164**, 461
- smooth muscle cell levels
  - depression by angiogenin, role of pertussis toxin-sensitive mechanism (rat aorta), **163**, 902
  - effect of endothelin (rat aorta), **158**, 170
- vasoactive intestinal peptide-induced accumulation in isolated enterocytes, effect of lindane (rat), **159**, 1391

Cyclic AMP phosphodiesterase
- cGMP-activated, stimulation by insulin mediator prepa tion: nonstimulation of other purified insulin-ac vated cAMP phosphodiesterases, **156**, 290; *erratu* **158**, 1072
- introduction into submandibular acini, effects on isopr terenol stimulation of cAMP levels and mucin secr tion (rat), **161**, 661

Cyclic GMP
- analogs, inhibition of γ-thrombin-induced platel arachidonic acid release (human), **165**, 708
- direct regulatory effect on Ca^{2+} sensitivity of contracti elements of mesenteric artery (rat), **163**, 929
- generation in
  - glomerulus, cardiomyopathy-induced inhibition, analys (hamster kidney), **159**, 807
  - vascular smooth muscle cells induced by atrial natr uretic factor, competitive peptide antagonists (rat **164**, 108
- α-human atrial natriuretic peptide-induced accumulatio inhibition by linear α-hANP analogs (rat aorta), **16** 1295
- inhibition of secretagogue-induced corticotropin release anterior pituitary cells (rat), **158**, 824
- and phosphatidylinositol pathway, depression induced tiazofurin and selenazofurin (L1210 leukemia cells **164**, 869
- role in inhibition of angiotensin-induced aldosterone secr tion in adrenal glomerulosa cells by atrial natriuret peptide (bovine), **159**, 148
- smooth muscle cell levels, effect of endothelin (rat aorta **158**, 170

2′,3′-Cyclic-nucleotide 3′-phosphodiesterase
- gene structure, analysis (mouse), **165**, 1213

3′,5′-Cyclic-nucleotide phosphodiesterase
- high-pressure liquid chromatography (human T-lymph cytes), **163**, 554

Cyclin
- gene expression in adult tissues and mammary tumor (rat **161**, 873

Cyclodextrin glucanotransferase, *see* Cyclomaltodextri glucanotransferase

1,2-Cyclohexanedione
- modification of arginine residue in toxins A and B fro *Clostridium difficile*, role in toxin inhibition, **16** 1364

Cyclohexanone oxime
- mediation of vascular relaxation: conversion to nitrites an mechanism of endothelium dependent vascular relax tion (rat aorta), **164**, 889

Cycloheximide
- addition to 3Y1 cell culture, subsequent transient increa in c-*fos* mRNA levels (rat), **159**, 501

Cyclomaltodextrin glucanotransferase
- carboxy-terminal region, role in catalytic activity and p stability (*Bacillus* sp.), **161**, 1273

Cyclooxygenase, *see* Prostaglandin synthase

Cyclopentenone prostaglandin
- induced proteins, inhibition of herpes simplex virus rep

cation, mechanism (human embryonic fibroblasts), **158**, 189
-(Cyclopropylamino)-androst-5-en-3β-ol
mechanism-based inhibition of cytochrome $P450_{17\alpha}$ (human testis), **162**, 1571
closporin A
effect on endothelin-1 binding site density in cardiac cell membranes (mouse), **163**, 1270
inhibition of
protein kinase C, role in nephrotoxicity (MDCK cells), **160**, 409
tumor necrosis factor-α production without decrease of TNF mRNA levels (murine macrophages), **161**, 551
and platelet-activating factor antagonist BN 52021, effects on PAF- and antigen- induced bronchoconstriction (guinea pig), **163**, 118
sensitive and insensitive mechanisms, role in permeability transition in mitochondria (rat liver), **163**, 561
sensitive pathway, role in release of mitochondrial matrix proteins (rat liver), **161**, 619
ystamine
killing of cultured hepatocytes, effects of protease inhibitors (rat), **163**, 412
Cystatin C
gene sequencing and localization on chromosome 20 (human), **162**, 1324
ysteate
biosynthesis in absence of cysteine synthesis (*Cytophaga johnsonae*), **160**, 535
ysteine
effect on inhibition of v-*src* tyrosine kinase activity by herbimycin A (murine NIH 3T3 cells), **163**, 803
extracellular, in β_2-adrenergic receptor, substitution, enhancement of agonist-promoted phosphorylation and receptor desensitization (CHW cells), **165**, 257
free analog of recombinant basic fibroblast growth factor, characterization (human), **161**, 335
presence at active site of 2,3-dihydroxybenzoic acid decarboxylase (*Aspergillus niger*), **165**, 20
residues 214 and 277, formation of disulfide bond in β-subunit of native Na^+,K^+-ATPase (electric ray), **162**, 64
synthesis, role in cysteate biosynthesis (*Cytophaga johnsonae*), **160**, 535
thioether linkage to proteins, demonstration in prenylated proteins (CHO cells), **163**, 143
Cysteine proteinase
calcium-dependent, *see* Calpain
Cystic fibrosis
associated *Pseudomonas aeruginosa*, alginate synthesis, regulatory role of *algR1* gene, **164**, 601
Cytidylate cyclase
interaction with phospholipids (rat brain), **162**, 1502
Cytochrome b_1
amino acid sequence (*Escherichia coli* K-12), **158**, 489
Cytochrome b_5
partially processed mRNA types and pseudogenes, characterization (human liver), **163**, 18
Cytochrome b_{558}
human, small subunit, cDNA for murine homolog, isolation and nucleotide sequence, **165**, 902
Cytochrome bc_1
Rieske iron-sulfur protein component, encoding cDNA, cloning and sequence analysis (rat mitochondria), **159**, 19
Cytochrome *c*
and liposomal cytochrome c_1, electron transfer: catalytic implications of electrostatic potentials, **163**, 276
mitochondrial, identification as site of synergistic deleterious effect of micromolar Ca ions and free radicals on respiratory function (guinea pig heart), **163**, 1397
polyhemic, comparative analysis (*Desulfovibrio desulfuricans*, *D. vulgaris*), **159**, 670
reduced, oxidation by ceruloplasmin, analysis (horse), **159**, 482
Cytochrome c_1
liposomal, and cytochrome *c*, electron transfer: catalytic implications of electrostatic potentials, **163**, 276
Cytochrome-*c* oxidase
isolation and properties: optimal oxidation of ferrocytochrome *c*-552 at pH 3.5 (*Thiobacillus ferrooxidans*), **160**, 839
purification and partial characterization (*Sulfolobus acidocaldarius*), **165**, 1110
stoichiometric binding of valinomycin, induced structural and functional alterations (equine heart), **160**, 1132
subunit IV leader peptide p25, secondary structure and orientation in phosphlipid bilayers, **158**, 610
subunits I–III, mitochondrial genes, detection of homologous DNA sequences in nuclei from normal tissue and hepatoma cells (rat), **162**, 258
Cytochrome oxidase, *see* Cytochrome-*c* oxidase
Cytochrome P450
alkane-hydroxylating, molecular cloning and primary structure characterization (*Candida maltosa*), **161**, 843
catalysis of 26-hydroxycholesterol formation in renal mitochondria (pig), **159**, 1135
C21, 11β, scc, and 17α forms, encoding mRNA stability, effects of ACTH (bovine adrenocortical cells), **160**, 1227
db1, recognition by anti-liver-kidney microsome antibody type 1 (human), **159**, 542
dependent ecdysone 20-monooxygenase, regulation during larval–pupal development, role of neuroendocrine–endocrine axis (tobacco hornworm midgut), **165**, 442
determination of multiple forms in microsomes (chiton digestive gland), **163**, 476
and hemoprotein-450, comparison of active site structures, magnetic circular dichroism studies (rat liver), **165**, 1170
identification as antigen recognized by anti-liver/kidney microsome antibodies in autoimmune chronic hepatitis (human), **159**, 283
isozyme d, mutations at distal and proximal sites, effects on regiospecificity of acetanilide hydroxylations (yeast), **160**, 669
isozyme e, nanosecond fluorometry of single tryptophan residue, **162**, 921

- isozymes IIB1 and IIB2, phosphorylation, role in regio- and stereoselective regulation of monooxygenase activities (rat liver), **160**, 46
- isozymes catalyzing 26-hydroxylation of 5β-cholestane-3α,7α,12α-triol, characterization (rabbit hepatic mitochondria), **157**, 30; *erratum*, **159**, 370
- lysine 384 and heme, distance between, fluoresence energy transfer measurements (rabbit hepatic microsomes), **163**, 1282
- 3-methylcholanthrene-inducible isozyme with high activity toward aflatoxin B_1, complete cDNA sequence analysis (hamster), **162**, 265
- obtusifoliol-14-demethylase, triazole inhibitor-resistant tobacco callus, regenerated sterol mutant plant, biochemical characterization, **165**, 125
- phenobarbital-inducible P450b and P450e and other neonatal forms, hepatic levels, suppression by thyroid hormone in hypophysectomized rat, **160**, 609
- product release as rate-limiting step in catalysis, from analysis of deuterium isotope effects on toluene metabolism (rat liver), **160**, 844
- role in microsomal hepatic denitration of glyceryl trinitrate, formation of nitirc oxide (rat), **163**, 1210
- substrate specificity, modification by point mutations at threonine-301 (rabbit hepatic microsomes), **158**, 717
- testosterone-binding, iron spin state, age-related changes (rat hepatic microsomes), **158**, 480

Cytochrome $P450_{scc}$
- encoding gene, 5′ region, identification of basal promoter and adrenal-specific activating domain, **160**, 276

Cytochrome $P450_{17\alpha}$
- mechanism-based inhibition by 17β-(cyclopropylamino)-androst-5-en-3β-ol (human testis), **162**, 1571

Cytokines
- treated fibroblasts and endothelial cells, expression of monocyte chemotactic protein gene (human), **162**, 694

Cytophaga johnsonae
- cysteate biosynthesis in absence of cysteine synthesis, **160**, 535

Cytoplasmic cofactor
- isolated from *Methanobacterium thermoautotrophicum*, UDP-disaccharide fragment, structure determination, **159**, 1404

Cytosine
- –2-aminopurine mismatch, associated high-pH wobble structure, characterization by ^{15}N NMR spectroscopy, **165**, 89

Cytosine-D-arabino-furanoside
- induction of stem cell differentiation by inhibition of DNA synthesis, specific counterbalancing by normal nucleosides (F9 teratocarcinoma cells), **163**, 1290

Cytoskeleton
- association with neutrophil *N*-formyl chemotactic peptide receptor–ligand complex, effects of ammonia (human), **165**, 377
- beaded-chain filament proteins, mRNA encoded, *in vitro* translation (chicken), **163**, 589

Cytosolic factors
- hepatic nondialyzable, effects on GTP-dependent calci
  release in microsomes (rat), **163**, 823
- NADPH oxidase-activating, differential expression in H
  60 leukemic cells (human), **161**, 1109
- role in impaired β-adrenoceptor desensitization in myoc
  dium of spontaneously hypertensive rats, **159**, 10

Cytotoxicity
- alloxan to beta cells, role of alloxan free radicals gene
  tion (rat), **165**, 278
- basic fibroblast growth factor–saporin mitotoxin, chara
  terization (BHK cells), **160**, 917

D

Dactinomycin
- sensitized mice, interleukin 1 lethality, protective effect
  chlorpromazine, analysis, **165**, 942

Dansyl phosphatidylserine
- in fluorometric analysis of protein kinase C interactio
  with phospholipids, **159**, 495

Daunomycin, *see* Daunorubicin

Daunorubicin
- and derivatives, effects on reconstituted mitochondri
  tricarboxylate carrier (rat liver), **164**, 1281
- direct activation of human multidrug resistance gene (CV
  cells), **165**, 1415

Decarboxylation
- enzyme-catalyzed non-oxidative, aromatic acids by 2,3-
  hydroxybenzoic acid decarboxylase, identification
  enzyme active site residues (*Aspergillus niger*), **16**
  20

Dendrotoxin I
- mamba venom, interaction with scorpion charybdotox
  at neuronal membrane binding sites (rat brain), **16**
  394

Deoxycytidine
- salvaging into DNA and phospholipid precursors, effec
  of 1-β-D-arabinofuranosylcytosine (human lympho
  cells), **163**, 1158
- specific counterbalancing of stem cell differentiatio
  inducing nucleoside analogs of DNA synthesis i
  hibitors (F9 teratocarcinoma cells), **163**, 1290

2′-Deoxyguanosine 3′-monophosphate
- phosphoester linkage to phosphoramide mustard, form
  tion of phosphoester adduct, **163**, 843

1-Deoxymannojirimycin
- effects on integrin and adhesion of myoblasts to extrac
  lular matrix proteins (chicken, rat), **163**, 1338
- and other oligosaccharide-processing inhibitors, differe
  tial effects on thyrotropin secretion from dispers
  pituitary cells (rat), **165**, 788

Deoxymyoglobin
- glass transition, analysis by optical absorption spectro
  copy (horse), **160**, 948

1-Deoxynojirimycin
- induction of increase in parathyroid cell secretion (bovine
  160, 1339

  nd other oligosaccharide-processing inhibitors, differential effects on thyrotropin secretion from dispersed pituitary cells (rat), **165**, 788
oxynucleotides
  '-isopropyl esters, terminal base, oxidative elimination, **162**, 1155
eoxy-*manno*-octulosonate cytidylyltransferase
  eteronuclear 3-D NMR analysis (*Escherichia coli*), **159**, 842
oxyoligonucleotides
  -arginine interactions in *Taq* I endonuclease, NMR study, **164**, 88
Deoxyriboadenylate
  binding to complementary oligo-α-thymidylate, thermodynamic parameters, **162**, 505
oxyribonuclease I
  footprinting of RNA polymerase sigma subunit (*Escherichia coli*), **160**, 121
  protective effects on homologous recombination catalyzed by human nuclear extract, **158**, 454
oxyribonucleoside triphosphate
  levels in mutagen-sensitive *Neurospora crassa* mutants, measurement, **162**, 583
phosphorylation
  α-crystallin A chain, regulation by calcium (bovine lens), **162**, 1494
  urodilatin, and phosphorylation, effects on bioactivity (rabbit aorta), **163**, 830
epolarization
  K^+, potentiation of endothelin-induced effects on cytosolic calcium (bovine adrenal chromaffin cells), **165**, 306
ermenkephalin
  and dermorphin, C-teminal regions, differential role in opioid-site selection and binding potency (rat brain), **163**, 726
ermorphin
  and dermenkephalin, C-terminal regions, differential role in opioid-site selection and binding potency (rat brain), **163**, 726
-6-Desaturase, *see* Acyl-CoA desaturase
esaturation
  C5-6, sterols, role of defects in azole resistance (yeast), **164**, 1170
esensitization
  β_2-adrenergic receptors, agonist-promoted, enhancement by substitution of extracellular cysteine (CHW cells), **165**, 257
esferal
  oxidation product DFFR, dye photosensitized production, amplification by superoxide dismutase, **160**, 1055
esmin
  cyanogen bromide fragments corresponding to intermediate filament headpiece domain and helix 1B, assembly properties (chicken gizzard), **165**, 1059
esulfovibrio
  D. desulfuricans and *D. vulgaris*, polyhemic cytochrome *c*, comparative analysis, **159**, 670
  sulfate-reducing, hydrogenase activities, effects of acetylene, **161**, 127
Detergents
  mild, activation of HIV-enhancer binding activity in T cells (human), **162**, 238
Deuterium
  effects on toluene metabolism: product release as rate-limiting step in cytochrome P450 catalysis (rat liver), **160**, 844
  labeled glucose, in evaluation of hepatic glycogen synthetic pathway (rat), **159**, 522; *erratum*, **162**, 557
Dexamethasone
  blockage of adaptive increase in renal brush border membrane Na^+–P_i cotransport elicited by thyroid hormone (rat), **161**, 1160
  glucocorticoid-sensitive T-cell leukemia cells grown in, associated increase in dolichol levels (human), **158**, 163
  induced cell death in T-cell leukemia line, associated molecular changes: identification of putative nucleases as histones (human), **162**, 30
  treatment of mice with, associated phospholipase A2 inhibitory activity in thymocytes, implication for role of lipocortins, **159**, 53
Dextran sulfate
  permeabilization of L-929 cells, evidence for subsequent channelling of glycolytic intermediates (mouse), **160**, 1409
Diabetes
  alloxan-induced, role of alloxan free radical generation (rat), **165**, 278
  associated increase in blood–brain barrier glucose transporter mRNA levels (rat), **164**, 375
  identification of insulin-like growth factor I binding protein in serum of affected rats, **163**, 882
  related action of intermittent fasting on sarcoplasmic reticulum Ca^{2+}-pump ATPase and myosin isoenzymes, prevention by sucrose (rat), **164**, 319
  type 2, associated pancreatic islet amyloid polypeptide, antibodies to, characterization (human, monkey), **159**, 402
Diacylglycerol
  activation of protein kinase C, potentiation by acyl-coenzyme A thioesters of hypolipidemic drugs (rat brain, liver), **159**, 1026
  early elevation in regenerating liver (rat), **164**, 290
  endothelin-induced biphasic formation in cultured smooth muscle cells: mass analysis with radioenzymatic assay (rabbit aorta), **160**, 744
  and free calcium, role in bradykinin-induced protein kinase C translocation in neuroblastoma NCB-20 cells, **162**, 1279
  generation in OK cells, correlation with parathyroid hormone inhibition of Na^+/phosphate cotransport, **158**, 951
  increase in aortic smooth muscle cells, stimulation by endothelin (bovine), **162**, 381
  receptor-mediated accumulation in neutrophils, mass determination by Coomassie blue staining and densitometry (human), **159**, 79
  synthesis *de novo*, role in permanent activation and down-regulation of protein kinase C in oncogene-transformed cells (NIH/3T3 fibroblasts), **164**, 816

Diacylglycerol kinase inhibitors
  R59022 and dioctanoylethylene glycol, potentiation of neutrophil respiratory burst, mediation by elevation of cytosolic Ca^{2+} (human), **161**, 95
Diadenosine 5′, 5′′′-P^1,P^4-tetraphosphate
  binding proteins, stimulation by ethanol and phosphatidylethanolamine (*Escherichia coli*), **160**, 1379
Diamine oxidase, *see* Amine oxidase (copper-containing)
2,6-Diaminopurine
  dideoxyriboside derivatives, enhancement of 9-β-D-arabinofuranosyladenine antiviral activity, **159**, 61
cis-Diamminedichloroplatinum(II), *see* Cisplatin
Diazepam
  effect on carnitine translocation in cardiac mitochondria (rat), **161**, 295
N^2,2′-*O*-Dibutyrylguanosine 3′:5′-monophosphate
  inhibition of secretagogue-induced corticotropin release by anterior pituitary cells (rat), **158**, 824
Dicarboxylic acids
  effects on rate of electron transfer of adrenodoxin–adrenodoxin reductase system (bovine adrenocortical mitochondria), **162**, 168
Dichlorobenzamil
  blockade of endothelin-induced contractions, mechanism (rat aortic rings), **163**, 247
  competitive inhibition of tritium-labeled platelet-activating factor binding to platelet membranes (rabbit), **163**, 165
6,7-Dichloroquinoxaline-2,3-dione
  abolition of *N*-methyl-D-aspartate-mediated responses (rat synaptic membrane), **164**, 841
5,6-Dichloro-1-β-D-ribofuranosylbenzimidazole
  inhibition of protein kinase-induced phosphorylation of RNA polymerase II-derived peptide (HeLa cells), **159**, 508
Dictyostelium discoideum
  cell fusion autoinhibitor, mechanism of action, role of calmodulin, **164**, 1176
Dicyclohexylcarbodiimide
  binding protein, identification as subunit of *Methanosarcina barkeri* ATPase complex, **162**, 1585
  effect on ATP-dependent Cl$^-$ uptake by plasma membrane vesicles from brain (rat), **160**, 469
2′,3′-Didehydro-2′,3′-dideoxy-5-chlorocytidine
  anti-retroviral activity, selectivity (MT-4, Raji cells), **164**, 1190
2′,3′-Dideoxycytidine
  erythrocytes as delivery system, analysis (human), **164**, 446
2′,3′-Dideoxy-3′-fluorothymidine
  4-thio analog, inhibition of HIV replication with low cytotoxicity in cultured cells (human, mouse), **165**, 488
2′,3′-Dideoxy-3′-fluorouridine
  C-5-chloro-substituted derivative, inhibition of HIV replication with low cytotoxicity in cultured cells (human, mouse), **165**, 488
2′,3′-Dideoxyformacin A
  crystal structure: evidence for role of *anti* conformation in anti-HIV activity, **161**, 910
2′,3′-Dideoxyguanosine 5′-triphosphate
  and dideoxythymidine, AZT, and Carbovir triphosphat
    effects on HIV-1 reverse transcriptase and select
    human polymerases, comparison, **161**, 393
Diet, *see also* Nutrition
  fish oil-enriched, effect on renal microsomal platel
    activating factor synthesis after long-term consum
    tion (rat), **160**, 1238
  restriction, effects on catalase and superoxide dismuta
    expression (rat liver), **164**, 620
Diethyl pyrocarbonate, *see* Pyrocarbonic acid diethyl este
Differentiation-inducing factor
  treated myeloid leukemia cells, interleukin-6 productio
    and relationship to macrophage differentiatio
    (mouse), **158**, 660
2-Difluoromethylornithine
  inhibition of polyamine synthesis in B cells during primar
    infection with Epstein–Barr virus, effects on cellul
    DNA synthesis and EBV-encoded nuclear antigen
    (human), **159**, 945
Digital imaging microscopy
  with indo-1, measurement of cardiomuscular cell cytosol
    calcium levels and circumference during contractio
    (rat), **162**, 926
Digitalis
  polar, related factor, purification and characterizatio
    (bovine, rat hypothalamus), **161**, 953
Dihydrofolate reductase
  reduction of dihydrofolate, mechanism, computation
    studies, **161**, 64
5′-[(1,4-Dihydro-1-methyl-3-pyridinylcarbonyl)oxy]-3′-azid
    2′,3′-dideoxythymidine
  enhanced efficacy against retrovirus HIV (human, mouse
    160, 656; *erratum*, **162**, 1591
Dihydropyridine
  regulation of voltage-dependent calcium channels, analys
    (PC12 cells), **160**, 929
  sensitive calcium channels
    calcium flux alteration by extracellular ATP (chicke
      myotubes), **159**, 878
    role in mitogen-induced changes in intracellular fr
      Ca^{2+} levels (murine fibroblasts), **162**, 448
2,3-Dihydroxybenzoate
  identification as metabolite of 2-chlorobenzoate microbi
    degradation, **161**, 700
2,3-Dihydroxybenzoic acid decarboxylase
  catalyzed non-oxidative decarboxylation of aromatic acid
    identification of active site residues (*Aspergill*
    niger), **165**, 20
6,13-Dihydroxyoctadecatrienoic acid
  isomers, formation from γ-linolenic acid, **159**, 1154
1,25-Dihydroxyvitamin D$_3$
  stimulation of osteocalcin production in bone cells, mo
    ulation by agents affecting adenylate cyclase activi
    (human), **164**, 1076
1α,25-Dihydroxyvitamin D$_3$
  effect on pancreatic insulin production *in vitro* (neonat
    rat), **164**, 413

nduced onset of terminal keratinocyte differentiation, signal transduction in, role of protein kinase C translocation (mouse), **163**, 1517
treated myeloid leukemia cells, interleukin 6 production and relationship to macrophage differentiation (mouse), **158**, 660
25-Dihydroxyvitamin D_3 receptors
regulated promoters, computer analysis: identification of candidate D_3-response element (chicken, rat), **162**, 869
ltiazem
potent and specific inhibition of IL-8-, IL-1α-, and IL-1β-induced lymphocytic migration *in vitro* (human), **165**, 349
merization
hepatitis B viral X protein synthesized in cell-free system, **164**, 14
imethylarsine
induction of DNA strand breaks in lung via production of active oxygen (mouse), **165**, 43
imethylarsinic acid, *see* Cacodylic acid
12-Dimethylbenz[*a*]anthracene, *see* 9,10-Dimethyl-1,2-benzanthracene
10-Dimethyl-1,2-benzanthracene
and other carcinogens, *in vitro* transformation of epithelial cells: evidence for consistent oncogene methylation changes (rat), **164**, 693
transformed respiratory tract epithelial cells *in vitro*, absence of mutations in codon 61 of Ha-*ras* oncogene (rat), **165**, 1319
2-Dimethylhydrazine
and carrageenan, treatment with, subsequent localization of *N*-acetylneuraminic acid and *N*-glycolylneuraminic acid in colonic tumor and mucosa glycopeptides (rat), **159**, 452
Dimethylnitrosamine, *see* *N*-Nitrosodimethylamine
,*N*-Dimethyl-sphingosine
enzymatic synthesis, associated sphingosine:*N*-methyltransferase in brain, demonstration (mouse), **164**, 1411
Dimyristoylphosphatidylcholine
region-matched hydrophobic interaction with melittin in ternary mixture of phosphatidylcholines, **164**, 850
,4′-Dinitrostilbene-2,2′-disulfonate
modulation of band 3 porter quaternary structure (human erythrocytes), **159**, 1337
Dinophysistoxin-1
apparent activation by okadaic acid-class tumor promoters (murine brain), **159**, 939
Dioctanoylethylene glycol
potentiation of neutrophil respiratory burst, mediation by elevation of cytosolic Ca^{2+} (human), **161**, 95
1,2-Dioctanoyl-glycerol
effect on mitogenic desensitization and down-regulation of protein kinase C, analysis (Swiss 3T3 cells), **163**, 201
Dioleoylphosphatidylcholine
sterol-free vesicles, differential effects of nystatin and amphotericin B, **164**, 609
Dioleoylphosphatidylethanolamine
and oleic acid, plasma-stabilized liposomes composed of, characterization (human), **162**, 326; *erratum*, **163**, 1539
Dioxane
4-aminobiphenyl binding to monoclonal antibody 2E11 in, description (mouse), **158**, 80
Dioxin
effect on glucocorticoid-sensitive thymocytes after *in vivo* exposure (rat), **160**, 1003
Dioxin receptors
and glucocorticoid and oxysterol receptors, cytosolic, structural differences (rat liver), **163**, 444
Dioxirane
intermediate, role in proposed mechanism for bacterial bioluminescence reaction, **164**, 1137
Dipalmitoyl phosphatidylcholine
vesicles, aggregation of calcium ionophore A23187 into stacked dimeric pore, **158**, 891
Dipeptidyl carboxypeptidase I
detection of endogenous inhibitor in heart (rat), **159**, 1093
evidence for single active site from inhibitor binding studies with [^{3}H]RU 44403, role of sodium chloride (human kidney), **163**, 718
inhibitor captopril, direct scavenging of free radicals, analysis, **158**, 52
related activity, detection in common acute lymphoblastic leukemia antigen-positive and -negative lymphoid cells (human, mouse), **160**, 1323
Dipeptidyl carboxypeptidase I inhibitors
induction by acid-limited proteolysis of glyceraldehyde-3-phosphate dehydrogenase (porcine, tuna muscle), **161**, 456
1,6-Diphenyl-1,3,5-hexatriene
lifetime distributions in vesicles containing phospholipid hydroperoxides, **164**, 169
Diphenylhydantoin, *see* Phenytoin
Diphtheria toxin
truncated, and luteinizing hormone, in preparation of superactive hormonotoxin (murine tumor cells), **163**, 161
1,3-Dipropyl-8-cyclopentylxanthine
agonist properties in FRTL5 thyroid cells (rat), **159**, 355
Disaccharides
–UDP fragment of cytoplasmic cofactor isolated from *Methanobacterium thermoautotrophicum*, structure determination, **159**, 1404
Discriminator base
tRNA^{Asp}, role in amino acid acceptor activity (*Escherichia coli*), **163**, 1534
Disulfide bonds
in drug–polymer–immunoglobulin conjugate, stabilization by microenvironmental control, **164**, 1234
formation, and folding of α-lactalbumin, regulation by calcium (bovine milk), **163**, 1390
identification between cysteines 214 and 277 in β-subunit of native Na^+,K^+-ATPase (electric ray), **162**, 64
intermolecular α–α, spontaneous formation in transducin α subunit, **159**, 651

  modification of protein stability, geometric criteria for mutation sites, **160**, 109
  role in
    C3b-stimulated polymerization of factor B of alternative complement pathway in presence of Cu^{2+} (human), **165**, 101
    neurotensin receptor binding activity on circular smooth muscle of small intestine (dog), **165**, 422
Dithioerythreitol
  promotion of neutrophil adherence to bovine and human endothelial cells without increase of CD11b/CD18 surface expression (human), **165**, 51
Dithiothreitol
  effect on inhibition of v-*src* tyrosine kinase activity by herbimycin A (NIH 3T3 cells), **163**, 803
  oxidized, static quenching of tryptophan fluorescence, **165**, 772
  promotion of neutrophil adherence to bovine and human endothelial cells without increase of CD11b/CD18 surface expression (human), **165**, 51
Diuretic hormone
  encoding gene in recombinant baculovirus, increased insecticidal effects on silkworm larvae, **165**, 1177
Diuretic response
  production by membrane metallo-endopeptidase inhibitor UK-69,578 (mouse), **164**, 58
DNA
  adenovirus type 5, reverse-oriented transcription from left terminus, repression by nuclear factor 1, **164**, 1212
  adrenodoxin promoter element activity, analysis (human), **159**, 343
  2-aminopurine•cytosine base-pairing mismatch, associated high-pH wobble structure, characterization by ^{15}N NMR spectroscopy, **165**, 89
  from atherosclerotic plaques, role in NIH3T3 cell transformation, **165**, 1067
  bacteriophage mu, several regions, associated synthesis of minute amounts of RNA during lysogenic state (*Escherichia coli*), **165**, 512
  binding to 2-mercaptobenzothiazole in selected tissues *in vivo*, analysis (rat), **165**, 342
  binding properties of human papillomavirus type 16 E6 protein expressed in *Escherichia coli*, analysis, **164**, 1402
  B-to-Z transition in poly[d(G-C)] and poly[d(G-m^5C)], promotion by hydrophobic moieties in cations, anions, and alcohols, **164**, 426
  chain elongation, associated pausing by DNA polymerase, sequence specificity, **164**, 1149
  complementary
    acid phosphatase, cloning and sequencing (rat liver), **162**, 1044
    ADP-ribosyltransferase substrate Gb, cloning and identification as *rho* gene product (bovine adrenal gland), **163**, 1175
    alcohol dehydrogenase class III(χ), cloning and comparative mapping (human liver), **164**, 453
    alkane-hydroxylating cytochrome P450, cloning and primary structure characterization (*Candida maltosa*), **161**, 843
    aromatic-L-amino-acid decarboxylase, isolation ar characterization (human), **164**, 1024
    ATP synthase complex F_1-β-subunit, isolation ar characterization (rat), **159**, 1184
    brain natriuretic peptide precursor, cloning and sequenc analysis
      in human, **159**, 1427
      in rat, **159**, 1420
    h-caldesmon
      deduced amino acid sequence for 35-kDa fragmen conservation of consensus sequences of troponin tropomyosin-binding domain (chicken gizzard **161**, 38
      primary structure and functional expression (chicke embryo gizzard), **164**, 503
    calmodulin-dependent protein phosphatase catalytic sub unit, characterization: evidence for second isofor (rat), **165**, 1352
    carcinoembryonic antigen gene-related pregnancy-spe cific β1 glycoprotein/fetal liver nonspecific cros reactive antigen glycoprotein, cloning (human), **16** 525
    colony-stimulating factor, *in vitro* mutagenesis, i analysis of structure–function relationship (huma granulocytes), **159**, 103
    cytochrome P450, 3-methylcholanthrene-inducibl isozyme with high activity toward aflatoxin B_1, com plete sequence analysis (hamster), **162**, 265
    cytoplasmic inclusion protein of tobacco vein mottlin virus, expression in transgenic tobacco, **160**, 425
    α-L-fucosidase, complete coding sequence (human **164**, 439
    α-galactosidase B, cloning (human placenta), **163**, 149
    growth hormone, cloning and sequence analysis (gras carp), **161**, 1239
    heat shock protein hsp 90, detection of DNA-like struc ture in derived amino acid sequence: potential site c interaction with steroid receptors (chicken), **159**, 140
    hepatocyte growth factor, cloning and sequence analysi (human), **163**, 967
    high-molecular-weight insulin-like growth factor-bin ing protein IGF-BP3, isolation and characterizatio (rat), **165**, 907
    histatin clones, sequence analysis: evidence for encod ing by loci *HIS*1 and *HIS*2 (human parotid gland **160**, 495
    human macrophage colony-stimulating factor, clonin and expression of carboxyl-terminal deletion mutan (CEM-ON, COS-1 cells), **161**, 892
    hybridizing to antiproliferative mRNA from liver, isol tion (rat), **164**, 1316
    hydroxysteroid sulfotransferase, cloning and sequenc analysis (rat liver), **165**, 168
    keratin 13, encompassing coil 1B through 3′ end, nucl otide sequence (human), **162**, 1522
    lignin peroxidase isozymes, characterization (*Phaner chaete chrysosporium*), **162**, 673
    lipocortin I, cloning, sequencing, and expression i glucocorticoid-stimulated quiescent Swiss 3T3 fibr blasts (mouse), **159**, 155

  β-microseminoprotein, cloning (human), **164**, 1310
  milk late-lactation protein, cloning and characterization (wallaby), **164**, 1380
  monocyte chemotactic and activating factor, cloning and sequencing (human), **159**, 249
  murine homolog of human cytochrome b_{558} small subunit, isolation and nucleotide sequence, **165**, 902
  myelin-associated glycoprotein
    cloning (human), **163**, 1473
    identification of alternative splicing pattern (mouse), **165**, 1162
  α-3 nicotinic receptor, predicted synthetic peptide, monospecific antibodies to, inhibition of [^{3}H]nicotine binding to nicotinic cholinergic receptor (rat brain), **165**, 151
  nonspecific cross-reacting antigen, identification of encoded 110K glycoprotein anchored into membrane via glycosyl-phosphatidylinositol (NIH/3T3 cells), **161**, 1126
  nucleolar phosphoprotein B23, nucleotide sequence (human), **163**, 72
  numatrin, isolation and characterization (human), **164**, 176
  pancreatic prechymotrypsinogen, cloning and nucleotide sequence (human), **158**, 569
  pancreatic secretory trypsin inhibitor, cloning and analysis of nucleotide and amino acid sequences (rat), **162**, 151
  parathymosin, amino acid sequence deduction (human kidney), **158**, 855
  P-glycoprotein-encoding *MDR*1 gene, sequence analysis: role of Gly→Val substitution at codon 185 in multidrug resistance (human adrenal), **162**, 224
  phosphoglycerate mutase, sequence analysis (rat skeletal muscle), **165**, 1345
  phospholipase A$_2$, cloning and sequencing (rat), **162**, 1030; *erratum*, **164**, 1452
  pregnancy-specific glycoprotein subgroup of carcinoembryonic antigen gene family, expression, demonstration by cloning (human fetal liver), **163**, 1197
  proline-rich protein, cloning: identification of PRP as C4b-binding protein (human liver), **165**, 138
  prostate-specific antigen, presence of high homology to tissue kallikrein genes (human), **160**, 903
  prostatic acid phosphatase, cloning (human), **160**, 79
  protein carboxyl methyltransferase, nucleotide sequence and amino acid sequence deduction (rat brain), **161**, 342
  pulmonary surfactant-associated protein-B, isolation and characterization (rabbit), **160**, 325
  rat albumin, transfected COS-1 cells, processing of proalbumin to serum albumin, **163**, 194
  rat protein phosphatase 2C, expression in *Escherichia coli*, **163**, 131
  renal γ-glutamyltransferase, expression in *Escherichia coli* (rat), **160**, 1040
  ribosomal protein L21, sequence analysis (rat), **162**, 364
  Rieske iron-sulfur protein of cytochrome bc_1 complex, cloning and sequence analysis (rat), **159**, 19
  sialoglycoprotein in hepatic lysosomal membranes, isolation and sequencing (rat), **164**, 1113
  sialyltransferase, partial sequence isolation and characterization (human), **164**, 225
  substance K receptor, cloning and sequence analysis (rat), **165**, 695
  thyrotropin receptor, cloning, sequencing, and expression (human), **165**, 1184, 1250
  transmembrane secretory component, cloning and sequence analysis (human), **158**, 783
  TR2-9 and TR2-11 steroid receptors, sequence analysis: multiple ligand-binding domains (human prostate, testis), **165**, 735
  tyrosinase of Himalayan mutant, cloning and localization of mutation site by comparison with normal nucleotide sequences (mouse), **161**, 252
  tyrosinase precursor, functional analysis (human), **162**, 984
  tyrosinase, variants, isolation and characterization (mouse), **159**, 848
  urate oxidase, nucleotide sequence of full-length clone (rat liver), **158**, 991
  vascular endothelial growth factor, amino acid sequence deduction (bovine), **165**, 1198
  X-chromosome-linked phosphoglycerate kinase, isolation and sequencing (rat), **165**, 1337
damage mediated by type II DNA topoisomerase, promotion by withangulatin A, **159**, 1128
deoxycytidine salvaging into, effects of 1-β-D-arabinofuranosylcytosine (human lymphoid cells), **163**, 1158
discontinuous replication in *lig-7* strain of *Escherichia coli*, role of mismatch repair, nucleotide-excision repair, or base-excision repair of DNA uracil, **165**, 685
early-replicated sequence, protein target site in, analysis: highly conserved binding motif (human), **165**, 956
encoding porcine D-amino-acid oxidase, expression in *Escherichia coli*: production of biologically active enzyme, **161**, 865
fragments specifically binding to isolated nuclear matrix *in vitro*, interaction with matrix-associated DNA topoisomerase II (chicken), **159**, 1263
genomic, encoding potassium channel-inducing membrane protein, molecular cloning and sequence analysis (human), **161**, 176
hepatic, non-C–G recognition sequences for DNA (cytosine-5-)-methyltransferase, identification (rat), **160**, 1175
homologous recombinant, human nuclear extract-catalyzed, fidelity and DNAase protection, **158**, 454
human immunodeficiency virus
  long-terminal repeat recognizing enhancer binding proteins, detection by *in situ* gel retardation, **160**, 268
  proviral, detection of unusual structures at integration site, **161**, 134
interaction with
  acetylated histones, analysis by ultraviolet laser-induced histone–DNA crosslinking (bovine thymus), **164**, 304
  copper(II) phthalocyanine, analysis (bovine thymus), **159**, 1256

  - mithramycin–metal ion complexes, **160**, 517
- L1 family repetitive sequences, identification of homologous region in retinoblastoma gene clones (human), **160**, 1061
- light-induced cleavage by esperamicin and neocarzinostatin (bovine thymus, *Escherichia coli*), **164**, 903
- linear B-, cleavage by Cu(II):thiol system, apparent sequence preference (bovine), **165**, 1235
- mediated transformation of *N*-acetyl glucosaminyltransferase I-deficient cells: restoration of enzyme activity (CHO cells), **159**, 554
- membrane receptor-bound, targeting by monoclonal anti-DNA antibody induced by nucleoprotein shed in systemic lupus erythematosus (human), **159**, 1441
- metalloporphyrin-catalyzed cleavage, single oxygen atom donation by magnesium monoperoxophtalate, **160**, 1212
- methylation, relationship to loss of α_1(I) collagen gene expression (rat bone cells), **162**, 1446
- microsome-mediated binding of aflatoxin B_1, alteration by Δ-9-tetrahydrocannabinol exposure (rat liver), **160**, 217
- mitochondrial
  - from brothers with familial mitochondrial myopathy, multiple deletions at direct repeats of non-D-loop regions, **164**, 1352
  - in clonal cultures from Kearns-Sayre syndrome patients, heteroplasmy, **160**, 765
  - deletion in myopathic patients, direct sequencing, **164**, 156
  - deletions associated with ocular myopathy, detection by gene amplification (human), **162**, 664
- murine genomic, transfected xeroderma pigmentosum group A cell line with high DNA amplification and intermediate uv resistance, spontaneous reversion (human), **160**, 647
- nuclear
  - EDTA-reacted highly purified, dialysis-released phosphopeptides, characterization (bovine thymus), **163**, 1135
  - sequences homologous to mitochondrial genes, detection in normal tissue and hepatoma cells (rat), **162**, 258
- octamers d(TGACGTCA) and reverse sequence d(ACTGCAGT), conformational variations, joint CD and NMR study, **165**, 602
- plasmid, single-strand cleavage by Cu^{2+} and thiols, **162**, 1111
- platinated, reversal reaction with thiourea, analysis with platinated GMP, **161**, 819
- –protein binding in nuclear extracts, abnormality in ataxia-telangiectasia (human), **158**, 749
- –protein complexes
  - formation, role of core sequences of adenovirus E1A-inducible E4 promotor (HeLa cells), **163**, 1143
  - in nuclear matrix, visualization and partial characterization of protein component (murine plasmocytoma), **162**, 175
- recombinant, restriction analysis, versatile nonradioactive technique (*Escherichia coli*), **164**, 1040
- repair, normal levels, detection in ultraviolet light-resista primary transfectants of xeroderma pigmentosu cells, **162**, 1351
- replicon initiation, role of oxygen-dependent regulation ribonucleotide reductase *in vivo* (Ehrlich ascit cells), **163**, 334
- ribosomal
  - nuclear and mitochondrial transcription, stringent reg lation, analysis (yeast), **164**, 362
  - transcription, effects of nerve growth factor and platele derived growth factor, comparison (human tum cells), **163**, 649
  - transcription initiation, analysis (rice), **160**, 1117
- single-strand breaks, sodium chromate(VI)-induced, e hancement by vitamin B_2: electron spin resonanc study (V-79 cells), **159**, 1080
- strand breaks, induction by dimethylated arsenics *via* pr duction of active oxygen (murine lung), **165**, 43
- supercoiled, activation energy of cruciform extrusion i effect of flanking AT-rich sequences, **158**, 423
- template with SV40 origin, requirement for generation dual-circular plasmids in COS7 cells and cell extract (monkey), **160**, 53
- thymocyte, glucocorticoid-induced fragmentation, activ tion by 2,3,7,8-tetrachlorodibenzo-*p*-dioxin after *vivo* exposure (rat), **160**, 1003
- torsionally constrained, structural transitions, interactio (plasmid pUC12), **158**, 696
- total, detection with single-stranded DNA-binding prote conjugates (bovine thymus, *Escherichia coli*), **16** 474
- variant sequences differing by single point mutation, titr tion by selective dot-blot hybridization with synthet oligonucleotides (human), **159**, 1233
- X-form, recognition and use as primer-template Klenow DNA polymerase, **161**, 1204
- Z-, supercoil-induced formation in c-*myb* proto-oncoge within 5′-end (chicken), **158**, 737

DNA adenine methylase
- encoding gene, mutation conferring 2-aminopurine se sitivity with intact GATC methylase activity (*Vibri cholerae*), **165**, 561

DNA (cytosine-5-)-methyltransferase
- active and asymmetric methylation of G4-DNA/B-DN junction at c-Ha-*ras* codon 12 (human), **160**, 139 *erratum*, **162**, 901
- hepatic, non-C–G recognition sequences, identificatio (rat), **160**, 1175

DNA methylase
- *Eco*RI, activity loss associated with histidine residue mo ification, **164**, 233

DNA nucleotidylexotransferase
- human gene, 5′-flanking region, promoter function de onstration (COS 7 cells), **164**, 863
- role as intracellular mutagen, analysis (C-127-1, COS- cells), **165**, 271
- tissue-specific expression, regulation at transcription level (human leukemic cells), **164**, 750

NA polymerase
- catalyzed DNA chain elongation, pausing in, sequence specificity, **164**, 1149
- DNA-directed, Klenow fragment, recognition and use of X-DNA as primer-template (*Escherichia coli*), **161**, 1204
- type α
  - effects of protein kinases and alkaline phosphatase, analysis (mouse), **159**, 1397
  - photoaffinity labeling with 1-β-D-arabinofuranosyl-5-(*E*)-(4-azidostyryl)-uracil 5′-triphosphate (salmon), **161**, 514
- types α, β, and γ, and HIV-1 reverse transcriptase and other human polymerases, effects of carbovir and AZT triphosphates and dideoxynucleoside triphosphates, comparison, **161**, 393

DNA primase
- alteration by phosphorylation and dephosphorylation of bovine histone H1 (mouse), **160**, 711
- detection in mitochondria of yeast, **160**, 525
- and HIV-1 reverse transcriptase and other human polymerases, effects of carbovir and AZT triphosphates and dideoxynucleoside triphosphates, comparison, **161**, 393

DNase I, *see* Deoxyribonuclease I

DNA synthesis
- associated pausing by DNA polymerase, sequence specificity, **164**, 1149
- in B cells during primary infection with Epstein–Barr virus, blockage by polyamine synthesis inhibition (human), **159**, 945
- bombesin-induced, abrogation by cell-surface sialoglycopeptide growth inhibitor (Swiss 3T3 cells), **161**, 468
- in breast cancer cells after mitogen-induced topoisomerase II synthesis, analysis (human), **160**, 12
- catalyzed by nuclear matrix, stimulation by microtubule-associated protein-2, **159**, 834
- differential stimulation by low-density lipoproteins and epidermal growth factor (rat smooth muscle cells), **159**, 624
- discontinuous, in *lig-7* strain of *Escherichia coli*, role of mismatch repair, nucleotide-excision repair, or base-excision repair of DNA uracil, **165**, 685
- effects of tyrosine kinase inhibitor genistein (murine fibroblasts, rat hepatocytes), **165**, 795
- endothelin-mediated stimulation (rat smooth muscle cells), **158**, 880
- HIV-1
  - proviral, inhibition by mismatched dsRNA (H9 cells), **158**, 943
  - reverse transcriptase-catalyzed, stereochemical course, analysis, **163**, 106
- inhibition in regenerating liver *in vivo* after thermal injury (rat), **160**, 196
- inhibitor nucleoside analogs, induction of stem cell differentiation and specific counterbalancing by normal nucleosides (F9 teratocarcinoma cells), **163**, 1290
- initiation in absence of NAD$^+$, inhibition by poly(ADP-ribose) polymerase (bovine thymus), **163**, 1113
- repair, bleomycin-induced in permeabilized HeLa cells, mechanisms, **164**, 1226
- stimulation by serum factor(s): enhancement by ethinyl estradiol (rat hepatocytes), **160**, 154

DNA topoisomerase
- related activity at specific hypersensitive sites in *Drosophila* histone gene cluster, characterization, **162**, 232
- type II
  - identification as potential target for novel antifungal agents (yeast), **160**, 257
  - matrix-associated, interaction with DNA fragments specifically binding to isolated nuclear matrix *in vitro* (chicken), **159**, 1263
  - mediated DNA damage, promotion by withangulatin A, **159**, 1128
  - mitogen-induced synthesis prior to enhancement of DNA synthesis in breast cancer cells (human), **160**, 12

Docosahexaenoic acid
- in fish oil, effect on renal microsomal platelet-activating factor synthesis after long-term dietary consumption (rat), **160**, 1238
- metabolism in primary cultures of normal and tumor mammary epithelial cells, analysis (mouse), **158**, 730

Dolichol
- increased levels in glucocorticoid-sensitive T-cell leukemia cells grown in dexamethasone (human), **158**, 163
- synthesis site in mitochondria, in characterization of submitochondrial compartments (mouse), **164**, 1009

Dopamine
- effect on β-endorphin release from pituitary and hypothalamus *in vitro* (rat), **161**, 221
- ^{3}H-labled, intracellular binding sites in normal and malignant cells, relationship to cell proliferation (human, mouse, rat), **165**, 391

Dopamine D_2 receptors
- detection on tumor cells (human), **162**, 575
- haloperidol-induced increase in striatal density, inhibition by chronic nicotine use (rat), **159**, 48

Doxorubicin
- binding to inner mitochondrial membrane, inhibition by spermine (bovine heart), **159**, 791
- and derivatives, effects on reconstituted mitochondrial tricarboxylate carrier, analysis (rat liver), **164**, 1281
- direct activation of human multidrug resistance gene (CV-1 cells), **165**, 1415
- induced cardiotoxicity, hypoxia as risk factor, NMR evaluation (rat), **163**, 682
- inhibition of tyrosine-protein kinase, **160**, 1309
- –polymer–immunoglobulin conjugate, disulfide linkage in, stabilization by microenvironmental control, **164**, 1234

Dystrophin
- and 15-kDa actin-binding fragment of caldesmon, sequence analysis (turkey gizzard), **160**, 210
- in skeletal and cardiac muscle, detection by 2-D gel electrophoresis (human, mouse, rabbit, rat), **161**, 726

E

- E64
  - improvement of abnormal down-regulation of protein kinase C and impaired natural killer activity in Chediak–Higashi syndrome beige mouse, **160**, 433
  - membrane-permeant derivative E64d, inhibition of calpain in intact platelets (human), **158**, 432
- Ecdysone 20-monooxygenase
  - regulation during larval–pupal development, role of neuroendocrine–endocrine axis (tobacco hornworm midgut), **165**, 442
- Egg envelope
  - tight binding of high choriolytic enzyme, demonstration (medaka), **162**, 58
- Eggs, *see also* Oocytes
  - insulin-like growth factor I storage in yolk (chicken), **162**, 1167
  - multicatalytic proteinase, sodium dodecyl sulfate-induced conformational and enzymatic changes, analysis (*Halocynthia roretzi*), **162**, 334
  - sodium–hydrogen antiport during fertilization, effects of protein kinase inhibitors (sea urchin), **161**, 1100
- Eglin C
  - related peptide fragments, synthesis and inhibitory effects on leukocyte elastase, cathepsin G, and α-chymotrypsin (human), **161**, 272
- Eicosanoids
  - effects on cytoplasmic calcium levels and amylase release in parotid cells (rat), **161**, 379
  - formation in chondrocytes, effects of recombinant interleukin 1β (rabbit), **165**, 1079
- Eicosapentaenoic acid
  - dietary, effects on cardiac β-adrenergic receptors (marmoset), **162**, 686
  - in fish oil, effect on renal microsomal platelet-activating factor synthesis after long-term dietary consumption (rat), **160**, 1238
  - reduction of invasive and metastatic activities of malignant tumor cells (human, mouse), **160**, 559
- Elastase
  - activity in bladder cancer cell lines derived from high-grade invasive tumors (human), **162**, 308
  - inhibition by *Ecballium elaterium* trypsin inhibitor II-related microproteins, **162**, 79
  - neutrophil, inactivation by free radicals (human), **159**, 821
- Elastin
  - synthesis in pulmonary arterial smooth muscle cells, stimulation by insulin-like growth factor I (bovine), **160**, 382
- Electrolytes
  - lymphocyte intracellular, rapid effects of aldosterone, role of cell membrane Na^+/H^+-exchanger (human), **164**, 961
- Electromagnetic fields
  - pulsed, extremely low frequency, augmentation of *in vitro* proliferation of lymphocytes from young and old subjects, **160**, 692
- Electron paramagnetic resonance
  - ferrihemoglobin vector spectroscopy with first and secon harmonic displays (human), **162**, 681
- Electron spin resonance
  - in analysis of vitamin B_2 effects on sodium chromate(VI induced DNA single-strand breaks (V-79 cells), **15** 1080
  - continuous-flow, with 3,3,5,5-tetramethyl-1-pyrroline- oxide spin trap, in monitoring hydroxyl radical gene ation in ischemic and reperfused myocardium (rat **164**, 1274
- Electron transfer
  - between cytochrome *c* and liposomal cytochrome *c* analysis: catalytic implications of electrostatic poten tials, **163**, 276
  - facilitation by Cu/Zn-containing superoxide dismutase role in membrane redox systems (bovine erythro cytes), **165**, 164
  - mitochondrial
    - acetylcholinesterase inhibitor-induced changes (ra myocardium), **164**, 997
    - adrenodoxin–adrenodoxin reductase system, rate en hancement by dicarboxylic acids (bovine adrena gland), **162**, 168
    - associated complex I, inhibition by 1,2,3,4-tetrahydro isoquinoline (murine brain), **162**, 1541
- Electropermeabilization
  - DC-3F cells, voltage-dependent effect on introduction d[α]octothymidylate, analysis, **159**, 633
- Electrophysiology
  - and simultaneous dual-emission microspectrofluorometr in measurement of Ca^{2+} transients in individual pitu tary cells (rat), **164**, 1045; *erratum*, **165**, 1446
- Electroporation
  - for insertion of xeno-glycophorin into erythrocyte men brane, assessment (human, mouse), **159**, 34
  - in transformation of intact yeast cells, **164**, 1157
- Electrostatic potentials
  - role in electron transfer between cytochrome *c* and lipo somal cytochrome c_1, **163**, 276
- Elgin
  - inactivation by free radicals (human neutrophils), **159**, 82
- Elongation factors
  - EF-2, ADP-ribosylatable content, cell cycle-associate changes (human fibroblasts, HeLa cells), **159**, 114
- Embryogenesis
  - cell recognition during, role of carbohydrate–carbohydrat interactions (F9 teratocarcinoma cells), **158**, 913
- Encephalopathy
  - with myopathy, associated multiple defects of mitocho drial respiratory chain including complex II (human **163**, 695
- Endocytosis
  - asialofetuin, intracellular fate (rat liver), **158**, 313
  - fluid phase and receptor-mediated, pathways and the modynamics, comparison (rat hepatocytes), **159**, 488
  - superoxide dismutase, electron microscopy of protein–gol adducts (rat hepatocytes), **162**, 940

- doglycoceramidase
  - artial liberation of oligosaccharides from glycosphingolipids on PC12 cell surface (rat), **162**, 1093
- donuclease
  - *TaqI*, arginyl–deoxyoligonucleotide interactions in, NMR study, **164**, 88
- do-oligopeptidase
  - and Pz-peptidase, identification as same enzyme (rabbit heart), **162**, 1460
- dopeptidase
  - calcium-dependent membrane-bound, with specificity to paired basic residues in hepatic Golgi fractions, partial purification and characterization (rat), **164**, 780
  - *KEX2*-encoded, characterization (yeast), **159**, 305
- doperoxides
  - prostaglandin, formation, role in thimerosal induction of platelet aggregation (human), **159**, 961
- doplasmic reticulum
  - high-capacity low-affinity calcium-binding protein, characterization (human liver), **165**, 973
  - rough, accumulation of unglycosylated hepatic secretory glycoproteins, analysis (Hep G2 cells), **160**, 1421
- ndoprotease-24.11
  - renal cortical membrane, degradation of brain natriuretic peptide (pig), **161**, 1177
- ndoproteinase Asp-N
  - protein cleavage at glutamyl residues (*Pseudomonas fragi*), **162**, 1528
- -Endorphin
  - binding sites on Sc5b-9 complement complex, localization on S-protein subunit, **159**, 799
  - immunoreactive, in ovary, ontogeny and effect of hypophysectomy (rat), **159**, 1171
  - release from pituitary and hypothalamus *in vitro*, effects of isoproterenol, dopamine, corticotropin-releasing factor, and arginine^8-vasopressin (rat), **161**, 221
- -Endorphin receptors
  - on cultured and freshly isolated lymphocytes, characterization (human), **163**, 642
- ndosomes
  - role in transendothelial transport of ceruloplasmin (rat liver), **162**, 1346
- ndothelial cell growth factor
  - and heparin, effects on collagen and proteoglycan production (human smooth muscle cells), **163**, 84
- ndothelial cells
  - aortic
    - antithrombin III-stimulated production of prostacyclin *in vitro* (bovine), **163**, 1404
    - detection of Ca^{2+}-dependent cytosolic enzyme converting L-arginine to activator of soluble guanylyl cylase (pig), **164**, 678
    - endothelin 1 biosynthetic pathway, analysis (pig), **162**, 1287
    - endothelin immunoreactivity in culture medium, correlation with biological activity (pig), **160**, 602
    - endothelin mRNA expression, stimulation by transforming growth factor β (pig), **159**, 1435
    - endothelin production *in vitro*, stimulation by hemodynamic shear stress (pig), **161**, 859
    - endotoxin-stimulated endothelin release *in vitro*, radioimmunoassay (bovine), **161**, 1220
    - intracellular glutathione protection against oxidized human low density lipoprotein (bovine), **163**, 1466
    - stimulation of atrial natriuretic factor secretion from rat atrial myocytes in co-culture, role of endothelin (bovine), **163**, 701
    - transformed, plasminogen activator induction by phorbol ester, role of protein kinase C (bovine), **160**, 682
    - tumor necrosis factor-α-induced 28-kDa stress protein phosphorylation, role in potection against cytotoxicity (bovine), **163**, 301
    - urokinase mRNA expression, effects of propranolol (bovine), **160**, 977
  - capillary, growth *in vitro*, stimulation by tumor-promoting phorbol esters (bovine brain), **158**, 584
  - cardiac, survival *in vitro*, effects of growth factors (rat), **162**, 1010
  - carotid artery
    - angiogenesis, effects of leukotrienes and prostaglandin E_2 *in vitro* (bovine), **159**, 572
    - Cl–K–Na cotransport, stimulation by atrial natriuretic factor (bovine), **159**, 734
    - secretion of immunoreactive endothelin *in vitro*, mechanism (bovine), **160**, 93
  - glomerular, binding of insulin-like growth factor I, analysis (murine kidney), **163**, 952
  - hepatic sinusoidal, synthesis of basic fibroblast growth factor, analysis (mouse), **164**, 1099
  - pulmonary artery
    - bradykinin-stimulated, phosphoinositide hydrolysis and prostacyclin sythesis, dissociation from phospholipase D activation by long-term phorbol ester treatment (bovine), **165**, 319
    - thromboxane receptors, biochemical characterization and functional implications (bovine), **158**, 326
  - umbilical vein
    - adhesion of neutrophils, induction by neutrophil activating factor (human), **162**, 387
    - associated tissue factor, inducing protein derived from J82 human bladder carcinoma cells, identification and partial purification (human), **160**, 222
    - cytokine-treated, expression of monocyte chemotactic protein gene (human), **162**, 694
    - expression of intercellular adhesion molecule 1, modulation by protein kinase C activation (human), **161**, 945
    - herpes simplex virus-infected, protein synthesis restoration by lithium chloride (human), **160**, 1073
    - inositol phosphate production, desensitization after agonist stimulation, role of protein kinase C (human), **161**, 1064
    - interleukin 6 gene expression: RNA start sites, multiple IL-6 proteins, and inhibition of proliferation (human), **159**, 991
    - permeability *in vitro*, effect of recombinant lymphotoxin (human), **162**, 1431
    - prostacyclin production, induction by shear flow, mechanism (human), **158**, 31

- vascular
  - citrulline-forming enzyme, discovery and implications in nitric oxide formation (pig), **158**, 348
  - concomitant secretion of big endothelin and carboxyl-terminal fragment, analysis (bovine, human), **162**, 217
  - neutrophil adherence, promotion by sulfhydryl reducing agents without increase of CD11b/CD18 surface expression (bovine, human), **165**, 51
  - prostacyclin production *in vitro*, stimulation by epidermal growth factor and transforming growth factor α, comparison (human), **160**, 1100
  - specific heparin-binding growth factor, secretion by pituitary follicular cells (bovine), **161**, 851

Endothelin
- action on vascular smooth muscle, role of inositol trisphosphate and calcium mobilization (rabbit aorta), **158**, 86
- activation of phospholipase A_2 in cultured vascular smooth muscle cells (bovine, human, rat), **158**, 279
- antiserum development and radioimmunoassay in endothelial cell culture medium (bovine), **160**, 662
- big, and carboxyl-terminal fragment, concomitant secretion from endothelial cells (bovine, human), **162**, 217
- binding to glomerular mesangial cells in culture: high- and low-affinity binding sites (rat), **161**, 776
- binding sites in renal papillary and glomerular membranes, identification and characterization (rat), **162**, 130
- bronchopulmonary action after aerosol administration, pharmacological modulation (guinea pig), **158**, 625
- calcium-independent induction of coronary artery contraction (pig), **160**, 1302
- detection in renal inner medulla by radioimmunoassay and decrease in spontaneously hypertensive rat, **162**, 38
- effects on
  - Ca^{2+} influx, free intracellular Ca^{2+} levels, and ligand binding to N and L type Ca^{2+} channels (rat brain), **162**, 1332
  - Ca^{2+} transients and oscillations in A10 vascular smooth muscle cells, **163**, 1223
  - cytosolic calcium, potentiation by depolarization (bovine adrenal chromaffin cells), **165**, 306
  - membrane voltage and intracellular calcium in cultured ciliary muscle cells (human), **164**, 1031
  - prostacyclin release from mesenteric arteries (pig, rat), **160**, 924
  - sodium transport mechanisms, role in intracellular Ca^{2+} mobilization (rat aortic smooth muscle cells), **163**, 458
- endotoxin-stimulated release, radioimmunoassay (bovine endothelial cells, rat serum), **161**, 1220
- enhancement of adrenergic vasoconstriction in perfused mesenteric arteries (rat), **159**, 1304
- ^{125}I-labeled, ventricular membrane-bound, displacement by asp sarafotoxins (rat), **161**, 89
- immunoassay in plasma: marked elevations in cardiogenic shock patients, **161**, 562
- immunological and structural characterization (human), **162**, 1317
- immunoreactive, secretory mechanism in cultured endothelial cells (bovine), **160**, 93
- immunoreactivity in medium from cultured aortic endot lial cells, correlation with biological activity (pi **160**, 602
- induction of
  - aortic contractions, blockade by dichlorobenzar mechanism (rat), **163**, 247
  - biphasic formation of 1,2-diacylglycerol in cultu smooth muscle cells: mass analysis with radioenzyr tic assay (rabbit aorta), **160**, 744
  - free calcium increase and mitogenesis (rat embryo glial cells), **165**, 1115
  - mobilization of Ca^{2+} in cultured vascular smooth m cle cells, role of platelet-activating factor and thro boxane A_2 (rabbit, rat), **160**, 751
  - uterine phasic contractions via voltage-dependent channels and developing contractions via second ty of Ca channel (rat), **159**, 317
  - vascular contraction, effects of K^+ channel ope BRL34915, specific K^+ ionophore valinomycin, a calcium channel blockers, comparison (rat aort **164**, 1003
- inhibition of presynaptic adrenergic neurotransmission isolated mesenteric artery (rat), **161**, 803
- inhibition by protein kinase C inhibitor and effect smooth muscle cell phosphatidylinositol response a cyclic nucleotide levels (rabbit, rat aorta), **158**, 1
- mediated inositol phosphate formation and Ca^{2+} mobili tion in A10 smooth muscle cells, inhibition by nic dipine, **160**, 758
- mobilization of intracellular Ca^{2+} (Swiss 3T3 cells), 1 489
- mRNA, expression by vascular endothelial cells, stim tion by transforming growth factor β (pig), **159**, 14
- in plasma and aortic endothelial cell culture medium, tection and characterization with radioimmunoas using monoclonal antibody (human), **161**, 320
- positive inotropic effect on heart *in vitro* (human, r **159**, 14
- production by cultured endothelial cells, stimulation hemodynamic shear stress (porcine aorta), **161**, 8
- radioimmunoassay
  - in identification of abundance in inner renal medu (pig), **161**, 348; *erratum*, **163**, 666
  - in medium from bovine and porcine cultured endothel cells and human plasma, **164**, 326
- role in
  - bovine endothelial cell-stimulated secretion of atrial n riuretic factor from rat atrial myocytes in cocultu **163**, 701
  - production of cerebral vasospasm (dog), **159**, 1345
- and sarafotoxin, competitive interaction: binding and ph phoinositide hydrolysis in rat atria and brain (pi **158**, 195
- sensitive intracellular Ca^{2+} stores, overlap with caffei sensitive stores in cultured smooth muscle cells (aorta), **158**, 235
- stimulation of
  - accumulation of cellular atrial natriuretic peptide a associated mRNA in cultured cardiocytes (rat), **1** 1431

    aldosterone synthesis by dispersed adrenocapsular cells (rabbit), **160**, 628
    DNA synthesis in vascular smooth muscle cells (rat), **158**, 880
    phosphoinositide hydrolysis and arachidonic acid release in vascular smooth muscle cells, dissociation by phorbol ester (rabbit), **160**, 868
    phospholipase C-mediated hydrolysis of phosphoinositides in cultured smooth muscle cells (rabbit aorta), **159**, 1072
    sustained 1,2-diacylglycerol increase and protein kinase C activation in aortic smooth muscle cells (bovine), **162**, 381
  structure–activity relationship, role of charged groups (rat), **163**, 424
  synthetic analogs, effects on receptor binding activity and cytosolic free calcium response in cultured vascular smooth muscle cells (rat), **160**, 228
  39-amino-acid precursor, chymotrypsin-activated, contractile activity in isolated aorta and pressor activity after injection *in vivo* (rat), **161**, 406
  tissue-specific distribution, clearance, and vascular effects (pig), **161**, 647
  type 1
    biosynthetic pathway in aortic endothelial cells, analysis (pig), **162**, 1287
    cardiac membrane binding sites
      density, effect of cyclosporine (mouse), **163**, 1270
      ischemia-induced externalization (rat), **164**, 1220
    effects on
      intracellular calcium mobilization and uptake in vascular smooth muscle cells (rabbit), **164**, 474
      release of arginine–vasopressin from perifused hypothalamus (rat), **163**, 1332
    induction of coronary artery vasoconstriction, role of phosphoinositide turnover (pig), **161**, 1049
    isolation and sequence analysis
      from porcine brain, **164**, 587
      from porcine spinal cord, **162**, 340
    related immunoreactivity, detection and characterization in plasma (rat), **163**, 1512
    vascular smooth muscle cell binding sites, down-regulation by angiotensin II and phorbol esters (rat), **164**, 809
  type 3
    detection of high levels in intestine, pituitary, and brain by sandwich enzyme immunoassay (rat), **164**, 74
    isolation and sequence analysis (porcine brain), **164**, 587
ndothelin receptors
  binding activity in cultured vascular smooth muscle cells, effects of synthetic endothelin analogs (rat), **160**, 228
  in cultured cardiocytes, identification and characterization (neonatal rat), **160**, 1438
  identification of two distinct types
    on cardiac membranes (chicken), **161**, 1252
    in mesangial cells (rat), **162**, 1396
  placental membrane-associated, solubilization and identification (human), **164**, 205
  renal glomerular, characterization (rat), **164**, 54
  structure–activity relationships and receptor subtypes (rat cardiac myocytes), **163**, 936
  uterine, functional characterization (rat), **162**, 952
  vascular, binding activity, effects of synthetic sarafotoxin analogs (rat), **162**, 441
Endothelium
  dependent vascular relaxation
    elicitation by polycations and basic amino acids (rat aorta), **158**, 177
    mechanism, mediation by hydroxylamines and oximes: conversion to nitrites (rat aorta), **164**, 889
    opposite effects of L-arginine and L-argininosuccinic acid (bovine pulmonary artery), **161**, 536
    reversible tolerance to, induction by arterial L-arginine depletion (bovine pulmonary artery), **164**, 714
  nitric oxide synthesis, role in blood pressure regulation, analysis with inhibitor N^G-methylarginine (guinea pig), **160**, 881
  platelet adhesion, thrombin-induced, modification by endothelial-derived relaxing factor (rat, sheep), **159**, 349
Endothelium-derived relaxing factor
  biosynthesis
    evidence for Ca^{2+}-dependent cytosolic enzyme in aortic cells converting L-arginine to activator of soluble guanylyl cylase (pig), **164**, 678
    inhibition, enhancement of hypoxic pulmonary vasoconstriction (rat), **164**, 1198
  effect on thrombin-induced platelet adhesion to endothelium (rat, sheep), **159**, 349
Endothia protease
  affinity purification with renin inhibitor SQ 32,970, **161**, 1
Endotoxin
  effect on microsomal superoxide anion generation, detection by lucigenin chemiluminescence (rat liver), **161**, 1042
  induction of
    increase in hepatic fructose 2,6-bisphosphate levels in fasted rats, **165**, 1072
    metallothionein in hepatic cells, role of macrophage-secreted transforming growth factor α (human, rat), **164**, 114
  stimulated endothelin release, radioimmunoassay (bovine endothelial cells, rat serum), **161**, 1220
Enkephalin
  cyclic pseudopeptides containing thioamides, biological activities, **162**, 1126
  precursor mRNA, modulatory effect of phorbol ester in testicular peritubular cells, analysis (rat), **161**, 568
Enkephalinase, *see* Membrane metallo-endopeptidase
Enoyl-CoA hydratase
  L- and D-specific forms, combined actions, role in peroxisomal 3-hydroxyacyl-CoA epimerase activity (rat liver), **160**, 988
  peroxisomal, identification as 70-kDa peroxisomal membrane protein (murine liver), **160**, 503
Enterocytes
  vasoactive intestinal peptide receptor/effector system *in vitro*, effects of lindane (rat), **159**, 1391

Enterotoxin
  Escherichia coli
    heat-stable, functional receptor sites, detection in kidney (opossum), **159**, 363
    long-acting heat-stable analogs with single D-amino acid, synthesis and toxic activity, **161**, 229
Enzymatic reactions
  NAD(P)H-dependent, chemical nature of hydrogen transfer in, micellar model, **159**, 1330
Enzyme immunoassay
  sandwich, endothelin 3 in intestine, pituitary, and brain (rat), **164**, 74
Enzyme kinetics
  rapid-equilibrium random and abortive ordered mechanisms, distinction using alternative substrates or kinetic isotopic effects, **152**, 406; *erratum*, **159**, 368
Eosinophils
  evidence for different platelet-activating factor receptors: dissociation of PAF-induced calcium mobilization, degranulation, and superoxide anion generation (guinea pig), **162**, 511
Epidermal cells
  JB6, anchorage-independent growth, promotion, correlation with protein kinase C depletion, **165**, 981
Epidermal growth factor
  binding by colon carcinoma cell monolayers, analysis (human), **160**, 317
  Ca^{2+}-signaling response in breast cancer cell line MDA-468, analysis (human), **159**, 1290
  effect on endothelial cell survival *in vitro* (rat heart), **162**, 1010
  induction of
    Alzheimer amyloid precursor release from PC 12 cells, **164**, 664
    cell proliferation and receptor binding in cultured intestinal epithelial cells, modulation by insulin (rat), **161**, 414
    prostaglandin E_2 release, synergistic effect of retinoic acid (rat lung cells), **162**, 1515
  labeled liposomes, preparation and uptake by hepatocytes (rat), **160**, 732
  and low-density lipoproteins, differential stimulation of growth-related metabolism in cultured smooth muscle cells (rat), **159**, 624
  produced in *Escherichia coli*, high-performance tandem mass spectrometric analysis (human), **163**, 1100
  related domain of blood coagulation factor IX, calcium binding and putative activity (human), **160**, 133
  stimulation of
    hepatic fat-storing cell proliferation (rat), **162**, 708
    prostacyclin production by cultured vascular endothelial cells, comparison with transforming growth factor α (human), **160**, 1100
Epidermal growth factor receptors
  in cultured intestinal epithelial cells, modulation by insulin (rat), **161**, 414
  expression in hepatocytes, reduction by phenobarbital independent of protein kinase C activation (rat), **158**, 652
  modulation by basic and acidic fibroblast growth facto
    via protein kinase C-independent pathway (Swiss 3T
    cells), **164**, 796
  monoclonal antibodies, induction of c-*fos* (human epide
    moid carcinoma cells), **158**, 129
  mRNA, modulation by phorbol ester in MCF-7 brea
    cancer cells (human), **162**, 415
  regulation by estrogen and antiestrogen in human brea
    cancer MCF-7 cells, **159**, 126
  tyrosine protein kinase activity, role in activation of rece
    tor-operated calcium channels (A431 cells), **158**, 527
Epinephrine
  activation of heparin-nonreleasable lipoprotein lipase i
    skeletal muscle fibers (rat), **164**, 615
  stimulated inositol trisphosphate-dependent Ca mobiliz
    tion, post-receptor signal tranduction mechanism: di
    sociation from cholinergic mechanism (rat paroti
    cells), **162**, 347
Epirubicin
  effect on reconstituted mitochondrial tricarboxylate carrie
    analysis (rat liver), **164**, 1281
Epithelial cells
  buccal, lipoxygenase activities (human), **160**, 545
  colonic T84, Ca^{2+}-mediated protein phosphorylatio
    stimulation by histamine, **165**, 810
  corneal, production of plasminogen activators and pla
    minogen activator inhibitor, analysis (bovine), **16**
    1021
  glomerular, binding of insulin-like growth factor I, analys
    (murine kidney), **163**, 952
  intestinal
    binding of vasoactive intestinal peptide, decrease in h
      pothyroidism (rat), **162**, 701
    epidermal growth factor-induced proliferation and rece
      tor binding *in vitro*, modulation by insulin (rat), **16**
      414
  lens, basic fibroblast growth factor receptors with bFG
    enhanced phosphorylation, isolation and identific
    tion (bovine), **160**, 1124
  mammary, normal and tumor, metabolism of linolenic an
    docosahexaenoic acids (mouse), **158**, 730
  renal
    apical and basolateral Na^+/H^+ exchange, separate re
      ulatory control, **165**, 833
    capable of expressing phospho*enol*pyruvate ca
      boxykinase, expressed chimeric genes, pH sensitivit
      conferment by 5′ region of PEPCK gene (rat), **164**, 8
  respiratory tract, transformed *in vitro* by 7,12-dimethy
    benz[*a*]anthracene, abscnce of mutations in codon 6
    of Ha-*ras* oncogene (rat), **165**, 1319
  tracheal
    chemically transformed *in vitro*, consistent methylatio
      changes (rat), **164**, 693
    leukotriene A_4 hydrolase activity, analysis (human
      164, 1
Epitopes
  corresponding to monoclonal antibody inhibiting von Wi
    lebrand factor binding to factor VIII, localizatio
    within 106 N-terminal amino acids of vWF, **163**, 618

  haring between herpes simplex virion 165-kDa protein and regulatory protein ICP4 (BHK cells), **163**, 124
  trongly neutralizing monoclonal antibody to interleukin 6, analysis (human), **165**, 728
xidation
  enzo[*a*]pyrene-7,8-dihydrodiol, catalysis by soybean lipoxygenase, **159**, 1199
xytetraenes
  tability during hydrolysis, enhancement by liposomes, **159**, 477
stein–Barr virus
  capsid antigen gene, methylation status and expression, relationship, **159**, 263
  membrane antigen gp220/340, encoding gene, characterization and selective expression of secreted form of gp220 (marmoset), **158**, 676
  primary infection in B cells, inhibition of polyamine synthesis during, effects on cellular DNA synthesis and EBV-encoded nuclear antigens (human), **159**, 945
uine infectious anemia virus
  intact capsids, preparation and biochemical characterization (Cf2Th cells), **160**, 486
ythrocytes
  as bioreactors for release of 2′,3′-dideoxycytidine, analysis (human), **164**, 446
  caldesmon localization (human, swine), **159**, 395
  inside-out membrane vesicles, active calcium transport, effects of cellular aging *in vivo* and *in vitro* (human), **159**, 432
  membrane proteins, proteolysis, inhibition by synthetic calpain inhibitor (rat), **157**, 1117; *erratum*, **159**, 371
  membranes
    electro-insertion of xeno-glycophorin, assessment (human, mouse), **159**, 34
    guanine nucleotide-binding properties, *in situ* characterization (human), **159**, 41
    ion channel formation by synthetic peptide with sequence of *Torpedo californica* M2δ transmembrane domain of human nicotinic acetylcholine receptor, **162**, 352
    morphological alterations, induction by 9-amino-1,2,3,4-tetrahydroacridine and 9-aminoacridine (human), **163**, 1351
  Plasmodium falciparum-infected, detection of
    diferric transferrin reductase (human), **158**, 469
    240-kDa protein on surface by naturally occurring anti-band 3 autoantibodies (human), **160**, 1357
  type III, from paroxysmal nocturnal hemoglobinuria patients, differential susceptibility to complement- and perforin-mediated lysis, **162**, 316
rythro-9(2-hydroxy-3-nonyl) adenine
  effects on HIV-1 production *in vitro*, **164**, 345
rythroid differentiation factor
  effect on erythroid precursor levels *in vivo* (mouse), **165**, 1155
rythropoiesis
  effects of erythroid differentiation factor *in vivo* (mouse), **165**, 1155
  stimulatory protein, purification from Actinomycetes strain, **163**, 888
Erythropoietin
  induction of fetal-to-adult globin gene switching, detection in MB-02 cells, **164**, 857
Erythropoietin receptors
  and prolactin, growth hormone, and interleukin-6 receptors, and p75 interleukin-2 receptor β-chain, common binding domain, analysis, **164**, 788
  transplantable erythroblastic leukemic cell, solubilization and characterization (mouse), **160**, 1140
Escherichia coli
  expressed human papillomavirus type 16 E6 protein, purification and DNA-binding properties, **164**, 1402
  expressed normal and abnormal porcine kidney D-amino acid oxidase, purification and characterization, **165**, 1422
  expression of
    bluetongue virus-17 fusion protein NS1 by pUC vectors, **162**, 892
    human poly(ADP-ribose) polymerase with DNA-dependent enzymatic activity, **163**, 739
    rat glucokinase, **165**, 817
    rat protein phosphatase 2C, **163**, 131
    rat renal γ-glutamyltransferase cDNA, **160**, 1040
  expression system, produced variant-type human transthyretin, tetramer formation, **163**, 851
  heat shock protein synthesis, effects of temperature downshift, **163**, 438
  HIV-1 *pol* gene expression: synthesis of crystallizable protease, **165**, 1043
  HIV-1 protease high-level expression with synthetic gene, **161**, 1056
  lig-7 strain, discontinuous DNA replication, role of mismatch repair, nucleotide-excision repair, or base-excision repair of DNA uracil, **165**, 685
  in lysogenic state, synthesis of minute amounts of RNA from several regions of bacteriophage mu DNA, **165**, 512
  pdxB gene product, identification as member of family of 2-hydroxyacid dehydrogenases, **165**, 1371
  produced human epidermal growth factor, high-performance tandem mass spectrometric analysis, **163**, 1100
  production of
    biologically active porcine D-amino-acid oxidase, **161**, 865
    PAF-acether under different experimental conditions, **161**, 939
    von Willebrand factor subfragment corresponding to platelet glycoprotein Ib-, collagen-, and heparin-binding domains, **164**, 1339
  type 1 fimbriated, activation of human granulocytes and peritoneal macrophages, role of protein kinase C, **165**, 1243
  and yeast, different conformation of purified human recombinant interleukin 1β from, effects on biological activity, **162**, 357
Esperamicin A_1
  light-induced DNA cleavage (bovine thymus, *Escherichia coli*), **164**, 903

Esterase
- activating molluscicidal saponins in *Phytolacca dodecandra*, location, **158**, 436

Estradiol
- binding of estrogen receptor from uterus, inhibition by aprotinin (bovine), **164**, 1206
- effect on acetylation of uterine nuclear high-mobility-group proteins (neonatal guinea pig), **161**, 1260
- regulation of epidermal growth factor receptors in human breast cancer MCF-7 cells, **159**, 126
- role in mouse mammary tumor virus expression in mammary gland (mouse), **159**, 1020
- stimulation of
  - insulin-like growth factor secretion by clonal osteoblastic UMR106 cells *in vitro* (rat), **158**, 407
  - osteoblast release of insulin-like growth factor carrier proteins, analysis (rat), **160**, 788
- type 17β
  - inhibition of parathyroid hormone-stimulated bone resorption and prostaglandin production in cultured neonatal calvariae (mouse), **163**, 1319
  - synthesis-induced 110K and 74K uterine secretory proteins, structural relationships to complement component C3 (rat), **158**, 898

Estradiol 17β-dehydrogenase
- placental, cofactor-binding region, affinity labeling by periodate-oxidized $NADP^+$ (human), **158**, 617

Estramustine
- binding protein, purification and radioimmunoassay (human, rat), **165**, 947

Estrogen
- biosynthesis, inhibition by 19-hydroxy-4-androsten-17-one, analysis (human), **160**, 1009
- stimulation of topoisomerase II synthesis prior to enhancement of DNA synthesis in breast cancer cells (human), **160**, 12

Estrogen receptors
- mRNA, modulation by phorbol ester in MCF-7 breast cancer cells (human), **162**, 415
- uterine, hormone binding *in vitro*, inhibition by aprotinin (bovine), **164**, 1206

Estrogen synthetase
- inactivation by phosphatases endogenous to placental microsomes (human), **162**, 498

Ethanol
- and *myo*-inositol, effects on cAMP levels in *Candida tropicalis*, **162**, 646
- oxidation, effects of oleate, comparison with lactate and glucose (deermouse hepatocytes), **163**, 418
- stimulation of Ap_4A-binding protein activity (*Escherichia coli*), **160**, 1379

Ethanolamine base exchange enzyme
- in astrocyte primary cultures and derived spontaneously transformed cell lines, effect of cell-surface trypsinization (rat), **159**, 1055

Ethanolaminephosphotransferase
- in astrocyte primary cultures and derived spontaneously transformed cell lines, effect of cell-surface trypsinization (rat), **159**, 1055

Ether
- linked antitumor phospholipids, molecular dynamics model membranes, spin-label analysis, **160**, 1189

Ethidium bromide
- and heat shock, comparative effects on histone methylati patterns (fruit fly), **162**, 1037

Ethinyl estradiol
- enhancement of serum factor(s) stimulatory for hepatocy DNA synthesis (rat), **160**, 154

Ethionine
- and other chemical carcinogens, and partial hepatectom effects on *in vivo* [^{35}S]methionine interaction wit hepatic tRNA (rat), **163**, 1412

Ethyl arachidonate
- potentiation of fatty acid-induced protein kinase C activa tion (rat pancreas), **160**, 1110

Ethylenediaminetetraacetate
- reacted highly purified nuclear DNA, dialysis-release phosphopeptides, characterization (bovine thymus **163**, 1135

Ethylisopropyl amiloride
- competitive inhibition of tritium-labled platelet-activatin factor binding to platelet membranes (rabbit), **16** 165

N-Ethylmaleimide
- effects on inositol phosphate production (NG108-15 cells **165**, 175

Ethyl oleate
- potentiation of fatty acid-induced protein kinase C activ tion (rat pancreas), **160**, 1110

Exocytosis
- steroid-induced, analysis with sperm acrosome reactio (human), **160**, 828

Eye
- iris and ciliary body, specific binding sites for platelet-a tivating factor, characterization (rabbit), **160**, 250
- lens
  - calcium-induced cleavage and breakdown of spectri (rat), **162**, 1472
  - crystallin, changes associated with amphibian metamo phosis, role of β-crystallin polypeptide, **164**, 1423
  - mRNA encoding cytoskeletal beaded-chain filament pr teins, *in vitro* translation (chicken), **163**, 589
- night blindness, retinoic acid-induced, molecular basi (frog), **161**, 825
- retina, *see* Retina

F

Factor B
- alternative complement pathway, polymerization via disu fide bonds in presence of Cu^{2+}, stimulation by C3 (human), **165**, 101

Factor VIII
- binding to von Willebrand factor, inhibition by monoclon antibody, localization of corresponding epitope withi 106 N-terminal amino acids of vWF, **163**, 618

tor IX
  epidermal growth factor-like domain, calcium binding and putative activity (human), **160**, 133
tor XIa
  cleavage of high-molecular-weight kininogen, effects on conformation (human plasma), **158**, 72
milial amyloidotic polyneuropathy
  inducing mutation, detection and localization on transthyretin gene (human), **164**, 1240
  type I, associated variant-type transthyretin, produced by *Escherichia coli*, tetramer formation (human), **163**, 851
sting
  intermittent, diabetes-like action on sarcoplasmic reticulum Ca^{2+}-pump ATPase and myosin isoenzymes, prevention by sucrose (rat), **164**, 319
at-storing cells
  proliferation, effects of epidermal growth factor and transforming growth factors α and β (rat liver), **162**, 708
atty acid chain elongation system
  hepatic microsomal, evidence for two separate β-ketoacyl-CoA reductase components (rat), **164**, 927; **165**, 1428; *erratum*, **165**, 1445
atty acid composition
  lipids copurifying with band 3 (human erythrocytes), **159**, 1012
atty acids
  biosynthetic auxotroph fabB2 of *Salmonella typhimurium*, abortive infection of virulent phage 9NA: effect of fatty acid supplementation, **161**, 923
  peroxisomal β-oxidation, role in ethanol metabolism in hepatocytes (deermouse), **163**, 418
  polyunsaturated
    attack by thiyl radicals, role in lipid peroxidation, **161**, 113
    content in mitochondrial membranes, role of lipid peroxidation, comparison in Ehrlich ascites cells and liver (mouse), **163**, 356
    and vitamins A and C, competing reactions with glutathione-derived thiyl free radicals, **161**, 1199
  stabilization of poliovirus against heat inactivation, **159**, 1177
  thiolester-linked, detection in apolipoprotein B (rat), **162**, 1508
  unsaturated, oxidation by peroxisomal 3-hydroxyacyl-CoA epimerase, role of combined actions of enoyl-CoA hydratases (rat liver), **160**, 988
  and vitamin D, binding properties of vitamin D-binding protein, relationship (bovine), **163**, 14
Fatty acid synthase
  mRNA, structure: identification of two NADPH binding sites (mouse), **158**, 690
Fatty acid synthetase
  active centers, negative functional interference (guinea pig), **164**, 434
Fatty acyl-CoA oxidase
  deficiency in infants with peroxisomal disorders, molecular anlysis, **161**, 242
5-F-BAPTA
  complexes with Zn^{2+} and Ca^{2+}, comparative stability, **165**, 838
Ferredoxin I
  α-helical structure, identification by NMR spectroscopy (*Desulfovibrio desulfuricans*), **159**, 592
Ferredoxin–$NADP^{+}$ reductase
  –adrenodoxin system, associated electron transfer, rate enhancement by dicarboxylic acids (bovine adrenocortical mitochondria), **162**, 168
Ferrihemoglobin, *see* Methemoglobin
Ferritin
  heavy-chain promotor, thyrotropin-stimulated transcription from (FRTL-5 cells), **165**, 506
  subunits, gene expression in hepatoma cell lines (human), **161**, 902
  synthesis in spleen, translational regulation, effects of iron and inflammation (rat), **160**, 453
Ferrocytochrome *c*-552
  oxidation by cytochrome oxidase at optimal pH 3.5 (*Thiobacillus ferrooxidans*), **160**, 839
α-Fetoprotein
  gene expression in lymphoblastoid cells and phytohemagglutinin-stimulated T-lymphocytes (human), **159**, 112
Fetuin
  binding to transformation-sensitive heat shock protein hsp47, analysis (chicken), **164**, 259
Fever
  central activation by interleukins 1β and 1α (rat), **162**, 591
Fibrinogen
  binding to platelets, inhibition by blockage of sodium–hydrogen antiport (human), **161**, 1228
  carboxy-γ terminus, low-affinity interaction with monocytes, induction of oxidative burst and modulation of effector functions (human), **165**, 7
  derived peptide, prevention of proteolytic degradation of protein kinase C by inhibition of platelet aggregation (human), **163**, 1256
Fibrinolysis
  fibrin-specific, by staphylokinase, role of α_2-plasmin inhibitor, **162**, 830
Fibroblast growth factor
  acidic
    detection in adult cardiac myocytes (rat), **157**, 1336; *erratum*, **159**, 1455
    encoding gene, structural analysis (human), **164**, 1121
    modulation of epidermal growth factor receptor by protein kinase C-independent pathway (Swiss 3T3 cells), **164**, 796
    mRNA, detection in ovary with reverse transcription–polymerase chain reaction amplification (rat), **165**, 82
    purification from omentum (bovine), **161**, 169
  basic
    binding site distribution in various tissue membrane preparations (guinea pig), **159**, 290
    biological activity, inhibition by human recombinant monoclonal antibodies (hamster, mouse, rat), **164**, 736

  - conjugated to saporin-6, biological and chemical characterization of resultant mitotoxin (BHK cells), **160**, 917
  - detection in adult cardiac myocytes (rat), **157**, 1336; *erratum*, **159**, 1455
  - modulation of epidermal growth factor receptor by protein kinase C-independent pathway (Swiss 3T3 cells), **164**, 796
  - recombinant, characterization of cysteine-free analog (human), **161**, 335
  - related molecule, demonstration in hepatic endothelial cells (mouse), **164**, 1099
  - 25-kDa
    - characterization in adult, regenerating, and fetal liver, (rat), **164**, 1182
    - purification and identification as amino-terminal extended and post-translationally modified form (guinea pig brain), **160**, 1267
- induced increases in [Ca^{2+}]$_i$ and plasma membrane hyperpolarization, resemblance to early signals generated by platelet-derived growth factor (NIH-3T3 fibroblasts), **163**, 1325

Fibroblast growth factor receptors
- basic, with bFGF-enhanced phosphorylation, isolation from epithelial cells (bovine lens), **160**, 1124
- number, regulation by cell density (NRK-49F, NR-6R cells), **159**, 694

Fibroblast-like growth factor
- basic, detection in conditioned medium of simian sarcoma virus-transformed NRK cells, **164**, 1323

Fibroblasts
- BALB/c 3T3
  - confluent, phorbol myristate acetate-induced expression of c-*fos*, *egr-1*, and c-*myc* genes, alteration by indomethacin (mouse), **161**, 508
  - 64-kDa protein, platelet-derived growth factor-mediated modulation (mouse), **162**, 394
- Balb 3T3/H-*ras*, antiproliferative effects of hypericin and pseudohypericin: relationship to antiretroviral activity (mouse), **165**, 1207
- chloride transport, activation by hypotonic shock (human), **160**, 1330
- clonal cultures from patients with Kearns-Sayre syndrome, genomic heteroplasmy, **160**, 765
- cytokine-treated, expression of monocyte chemotactic protein gene (human), **162**, 694
- dermal, arachidonic acid mobilization and phosphoinositide turnover, effect of platelet activating factor (human), **163**, 1344
- foreskin
  - GM_3 ganglioside metabolism (human), **162**, 1188
  - mitogenesis *in vitro*, role of intracellular Ca^{2+} concentration, single-cell fluorometric analysis (human), **159**, 862
- and HeLa cells, ADP-ribosylatable content of elongation factor-2, cell cycle-associated changes (human), **159**, 1141
- HSP 89 induction by heat shock, effect of cellular aging (human), **162**, 1302
- L929
  - permeabilized, lactate production, effects of glycolyti intermediates: evidence for intermediate channelin (mouse), **160**, 1409
  - variants deficient in glucocorticoid receptors, isolatio and characterization (mouse), **164**, 480
- LM, proliferation, relationship to intracellular [^{3}H]dopamine binding sites (mouse), **165**, 391
- NIH 3T3
  - high-level expression of thyroid hormone-binding pro tein p55 via retroviral vector (mouse), **164**, 238
  - human B-cell stimulatory factor 2 mRNA, high-leve expression and stabilization after deletion of 3′ un translated region (mouse), **163**, 1056
  - intracellular Ca^{2+} levels and plasma membrane hyperpolarization, fibroblast growth factor-induced increases: resemblance to early signals generated by platelet-derived growth factor (mouse), **163**, 1325
  - molecular cloning and conservation of 25-kbp region upstream of exon 0 of human KI-*RAS* oncogene in transformed cells (mouse), **159**, 324
  - oncogene-transformed, protein kinase C permanent activation and down-regulation by *de novo* synthesis of diacylglycerol (mouse), **164**, 816
  - transfection by herpes simplex virus type 2 BglII N fragment and subfragments, effects on morphological transformation and mutagenesis at *hprt* locus, **159**, 1249
  - transformation, role of atherosclerotic plaque DNA, **165**, 1067
- production of monocyte chemotactic and activating factor induction by interleukin 1 and tumor necrosis factor (human), **160**, 1403
- proliferation, stimulation by thrombospondin (human), **163**, 56
- Swiss 3T3
  - bombesin mitogenic activity, abrogation by cell-surface sialoglycopeptide growth inhibitor (mouse), **161**, 468
  - glucocorticoid-stimulated quiescent, lipocortin I cDNA cloning, sequencing, and expression (mouse), **159**, 155
  - intracellular Ca^{2+} levels
    - effects of mitogens: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
    - mobilization by endothelin (mouse), **161**, 489
  - nuclear inositol phospholipid levels, effects of insulin-like growth factor, **159**, 720
  - protein kinase C mitogenic desensitization and down-regulation, differential effects of diacylglycerols and phorbol ester, **163**, 201
- Swiss 3T6, identification of two distinct ATP receptor (mouse), **164**, 706
- 10T1/2, DNA synthesis and phospholipid-derived secon messenger generation, effects of tyrosine kinase inhibitor genistein (mouse), **165**, 795
- 3T3/HIR transfected, biological effects of monoclonal anti bodies to human insulin receptor, relationship to re ceptor kinase (mouse), **165**, 212

- 3T3-L1
  - differentiation to adipocytes, associated G protein mRNA levels (mouse), **165**, 929
  - preadipocyte, differentiation to adipocytes, associated expression of A-*raf*-1 and c-*raf*-1 genes, **162**, 1180
- tumor necrosis factor-induced proliferation and TNF cytotoxicity against transformed cells, suppression by transforming growth factor β, **158**, 155
- viral-transformed xeroderma pigmentosum group A, genomic transfectant line with highly amplified murine DNA and intermediate uv resistance, spontaneous reversion (human), **160**, 647
- V79, 8-azaguanosine-5′-monophosphate synthesis via nucleoside kinase and purine-nucleoside phosphorylase, analysis *in vitro* (hamster), **159**, 854
- 3Y1, c-*fos* mRNA levels, transient increase after addition of serum and cycloheximide to culture (rat), **159**, 501

ibronectin
- adhesion of myoblasts, effects of glycoprotein processing inhibitors (chicken, rat), **163**, 1338
- ED B isoform, expression in adult articular cartilage (human), **165**, 782
- modulation of platelet activation (human), **165**, 966
- mRNA levels in vascular smooth muscle cells, effect of heparin (human), **162**, 1100

ilaments
- paired helical, in brain of Alzheimer patients, selective incorporation of distinct form of tau phosphoprotein, **159**, 1221

lavonoids
- inhibition of murine liver sialidase, **163**, 25

luconazole
- resistance, role of defective sterol C5-6 desaturation (yeast), **164**, 1170

Fluo-3
- calcium binding, kinetics, determination by stopped-flow fluorescence, **163**, 309

N-2-Fluorenylacetamide
- verapamil-sensitive binding, analysis (mussel), **164**, 934

Fluorescein 5′-isothiocyanate
- labeled 3-phosphoglycerate kinase, participation of dye in interaction with D-glyceraldehyde-3-phosphate dehydrogenase (rabbit muscle), **161**, 187
- modification of glycine receptor, effect on interaction of glycine with binding site (rat), **160**, 374

Fluorescence
- bilayer membranes containing α-tocopherol, time-resolved anisotropy measurements, **158**, 386
- stopped-flow, in determination of kinetics of calcium binding to fluo-3, **163**, 309
- tryptophan, static quenching by oxidized dithiothreitol, **165**, 772

Fluoride
- activation of platelet phospholipase C, inhibition by cyclic AMP (human), **158**, 440

5-Fluorodeoxyuridine
- induced thymine-less death of androgen-independent prostatic cancer cells, molecular mechanism (rat), **165**, 73

5-Fluoro-2′-deoxyuridine
- induction of stem cell differentiation by inhibition of DNA synthesis, specific counterbalancing by normal nucleosides (F9 teratocarcinoma cells), **163**, 1290

Fluorouracil
- induced inhibition of thymidylate synthase, effects of interferon α2 (HL-60 cells), **163**, 867

FMRF-amide
- related neuropeptide schistoFLRF-amide, isolation, primary structure, and bioactivity (locust), **160**, 850

Follicle-stimulating hormone
- induced differentiation of cultured granulosa cells
  - inhibition by tumor necrosis factor α (rat), **163**, 1038
  - suppression by human interleukins 1α and 1β, comparison (rat), **163**, 764
- induction of G protein dissociation from FSH receptor–G protein complexes in reconstituted proteoliposomes, **162**, 1214
- secretion by pituitary cells, effect of somatostatin–activin A interaction (rat), **162**, 958
- stimulation of protein phosphorylation in granulosa cells *in vitro* (pig), **161**, 442

Follistatin
- and vascular endothelial growth factor, secretion by pituitary follicular cells (bovine), **165**, 292

N-Formyl chemotactic peptide receptors
- –ligand interaction, and cytoskeletal association, effects of ammonia (human neutrophils), **165**, 377

Formyl-methionyl-leucyl-phenylalanine
- induced translocation of calpain to neutrophil plasma membrane, subsequent enzyme activation (human), **160**, 737

Formylpeptide chemoattractant receptors
- multiple chromatographic forms, relationship to GTP-binding proteins (HL-60 cells), **161**, 276

Free radicals
- alloxan, generation in chemical and biological systems: implication in alloxan diabetogenic action (rat), **165**, 278
- Desferal, dye photosensitized production, amplification by superoxide dismutase, **160**, 1055
- inactivation of neutrophil elastase and inhibitors (human), **159**, 821
- mediated protein degradation, effects of liposomal membranes, **162**, 1076
- and micromolar Ca^{2+}, synergistic deleterious effect on respiratory function of cardiac mitochondria, localization at cytochrome *c* and salvage trial (guinea pig), **163**, 1397
- peroxide-stimulated production by mitochondria, correlation with tumor promoting activity (rat liver), **160**, 1067

Fructose-1,6-bisphosphatase
- expression in murine thymoma cell line, **158**, 929
- site of substrate and fructose 2,6-bisphosphate binding, analysis (rabbit liver), **161**, 689

Fructose-2,6-bisphosphatase
- gene regulation by glucocorticoids: sequencing of 5′-flanking region (rat), **162**, 753

Fructose 2,6-bisphosphate
- binding site in hepatic fructose-1,6-bisphosphatase, analysis (rabbit), **161**, 689
- hepatic levels, endotoxin-induced increase in fasted rats, **165**, 1072

Fructose 6-phosphate
- binding site in hepatic fructose-1,6-bisphosphatase, analysis (rabbit), **161**, 689

Fucose
- glycation of serum albumin *in vitro*, kinetics (bovine), **160**, 362

α-L-Fucosidase
- complete coding sequence from cDNA clones (human), **164**, 439
- inhibition of lysosomal enzyme-binding receptor phosphorylation (simian brain), **162**, 1244

Fumarate
- effect on rate of electron transfer of adrenodoxin–adrenodoxin reductase system in mitochondria (bovine adrenal cortex), **162**, 168

Fura-2
- and 2,7-biscarboxyethyl-5(6)-carboxyfluorescein, dual loading in isolated myocytes (rat heart), **163**, 500
- glucose-stimulated efflux in pancreatic β cells, prevention by probenecid (mouse), **159**, 223

Fusarinine-C ornithinesterase
- regulation of platelet-activating factor-acether output in peritoneal macrophages (mouse), **162**, 475

G

D-Galactosamine
- induction of increased hepatocyte growth factor mRNA levels in nonparenchymal liver cells (rat), **165**, 1229
- sensitized mice, tumor necrosis factor formation, suppression by lipoxygenase inhibitors, **159**, 748

Galactosaminoglycans
- oversulfated, production by Engelbreth–Holm–Swarm murine tumor, **162**, 189

α-Galactosidase
- isozyme B, full-length cDNA for, molecular cloning and primary structure (human placenta), **163**, 1498

β-Galactosidase
- *Escherichia coli*, secretion in yeast using signal sequence from glucoamylase-encoding *STA2* gene, **164**, 1331

Galactosyl receptors
- hepatocyte surface, monensin- or chloroquine-induced loss, role of receptor internalization via clathrin-coated pit pathway (rat), **161**, 261

Galactosyltransferase, *see* *N*-Acetyllactosaminide α-1,3-galactosyltransferase

β-1,4-Galactosyltransferase
- genomic structure (mouse), **162**, 1069

Galanin
- and other neuropeptides, mobilization of Ca^{2+} in small cell lung cancer cells, **164**, 66

Gangliosides
- and glycophorin, competitive binding to wheat germ agglutinin (bovine, human), **160**, 780
- GM$_3$
  - exogenous, binding and incorporation in HL-60 cells **161**, 782
  - metabolism in cultured foreskin fibroblasts (human). **162**, 1188
- lactones, determination of inner esterification sites (bovine brain), **162**, 838
- selective modulation of CD4 on T lymphocytes, mechanisms (human), **158**, 1050
- stimulated protein kinase, phosphorylation of myelin basic protein and peptides (rabbit), **165**, 93

Gap junctions
- cardiac, liposome-reconstituted, channeling activity, effect of microgravity (human), **161**, 358

Gas chromatography
- –mass spectrometry, in analysis of hexose monophosphate shunt activity (C6 glioma cells), **158**, 474
- in measurement of indole-3-pyruvate (tomato shoots), **162**, 761

Gastric acid
- secretion, inhibition by interleukin 1, role of prostaglandin E$_2$ (rat), **162**, 1578

Gastrin
- binding protein, 33–40-kDa, presence in human and murine colon cancer, **164**, 512
- NH$_2$-terminal fragments, purification and structural determination (human urine), **160**, 1364

Gastrin-releasing peptide
- antagonist containing ψ(CH$_2$O) amide bond surrogate evaluation (murine fibroblasts), **165**, 114

GDP (guanosine 5′-diphosphate)
- –agarose, binding to, in identification of 60-kDa substrate for insulin receptor tyrosyl kinase (NIH-3T3 cells), **158**, 743
- bound c-Ha-*ras* protein, conformation of antiparallel β-sheet effector-region residues, comparison with GTPγS-bound form (human), **162**, 1054
- dissociation from *rho*B p20 inhibiting protein, partial purification (rabbit intestine), **163**, 1523

Gelatinase
- digestion in normal and keratoconus keratocytes, comparison (human), **161**, 353
- properties in various metastatic tumor cells, comparison (mouse), **158**, 228

Gel electrophoresis
- polyacrylamide, caldesmon anomalous behavior (chicken gizzard), **160**, 174
- substrate, detection and analysis of neutral endopeptidase (bovine neck ligament, human kidney), **162**, 300
- two-dimensional, in detection of dystrophin in skeletal and cardiac muscle (human, mouse, rabbit, rat), **161**, 726

Gel retardation
- in detection *in situ* of enhancer binding proteins recognizing HIV long terminal repeat, **160**, 268

Gene amplification
- in detection of mitochondrial DNA deletions associated with ocular myopathy (human), **162**, 664

- ne regulatory elements
  - interferon consensus sequence, interactions with nuclear proteins, interferon-induced early changes (HeLa cells), **163**, 370
- nes
  - acidic fibroblast growth factor, structural analysis (human), **164**, 1121
  - adenovirus E1A-inducible E4 promoter, core sequences, role in formation of DNA–protein complexes (HeLa cells), **163**, 1143
  - adenovirus 12 E1A, factors bound at two sites in 5′-upstream region, interactions (Ehrlich ascites tumor cells), **158**, 685
  - *algR1*, regulatory role in alginate synthesis (*Pseudomonas aeruginosa*), **164**, 601
  - β-amyloid protein precursor, characterization of 5′-end region and first two exons (human), **159**, 297
  - apolipoprotein A-I, C-III, and A-IV, association with nuclear matrix, effects of triiodothyronine (rat liver), **161**, 576
  - apolipoprotein E*3-Leiden allele, formation by partial gene duplication in exon 4 (human), **165**, 851
  - A-*raf*-1, expression during differentiation of 3T3-L1 preadipocyte fibroblasts to adipocytes, **162**, 1180
  - atrial natriuretic peptide, expression in ventricles, effects of captopril and hydralazine (spontaneously hypertensive rat), **160**, 310
  - *Bacillus sphaericus* 1593M toxin, expressed in *Escherichia coli* and *Bacillus subtilis*, respective roles of encoded proteins, **164**, 1417
  - botulinum type A neurotoxin, characterization: delineation of N-terminal encoding region, **162**, 1388
  - brain natriuretic peptide, canine and human homologs of porcine form, sequence analyses, **165**, 650
  - C3(1), of prostatic binding protein, androgen response element in first intron, functional characterization (T-47D cells), **164**, 833
  - c-*abl*, methylation, alterations in cells transformed by phagocyte-generated oxidants (10T1/2 cells), **158**, 24
  - calbindin-D$_{28K}$, identification of 1,25-dihydroxyvitamin D$_3$ receptor-regulated promoter region (chicken), **162**, 869
  - calbindin 9-kDa, vitamin D-dependent, methylation, role in mediation of tissue and vitamin D expression regulation (rat), **160**, 1281
  - calmodulin
    - differential expression in fetal, adult, and neoplastic tissues (rat), **159**, 278
    - functional expression in yeast (chicken), **158**, 541
  - carcinoembryonic antigen family
    - isolation and sequencing of N-terminal domain exons (human), **158**, 996
    - related gene, expression in first-trimester placenta (human), **162**, 1486
    - related pregnancy-specific β1 glycoprotein/fetal liver nonspecific cross-reactive antigen glycoprotein, cDNA cloning (human), **161**, 525
  - cell cycle-dependent, identification of product as sialic acid-binding protein (human tissues), **163**, 506
  - c-*ERB* A, encoded proteins, localization in liver with monoclonal antibodies (rat), **164**, 1053
  - c-*fos*
    - cAMP-induced expression in melanocytic cells (mouse), **159**, 408
    - induction by monoclonal antibody to epidermal growth factor receptors (human epidermoid carcinoma cells), **158**, 129
    - mRNA
      - cellular levels, transient increase after addition of serum and cycloheximide to culture (rat 3Y1 fibroblasts), **159**, 501
      - induction in lymphoma Nb-2 cells (rat), **165**, 1359
    - phorbol myristate acetate-induced expression in confluent fibroblasts, kinetics, alteration by indomethacin (mouse), **161**, 508
  - c-Ha-*ras*, G4-DNA/B-DNA junction at codon 12, active and asymmetric methylation by DNA(cytosine-5)methyltransferase (human), **160**, 1397; *erratum*, **162**, 901
  - c-Ki-*ras* 2, encoded protein carboxyl terminal segment, effects on calmodulin phosphorylation and insulin-independent autophosphorylation of insulin receptor (human), **161**, 399
  - c-K-*ras*, hepatic expression, alteration by Δ-9-tetrahydrocannabinol exposure (rat), **160**, 217
  - clone coding for 5′ region of murine β-glucuronidase, identification with antisense RNA (mouse), **160**, 937
  - c-*mos*, enhancer, binding of murine nuclear factor 1-like protein (rat), **161**, 8
  - c-*myb*
    - activation in T-cells during lymphatic regeneration *in vivo*, analysis (mouse), **160**, 181
    - supercoil-induced Z-DNA formation within 5′-end (chicken), **158**, 737
  - c-*myc*
    - activation in T-cells during lymphatic regeneration *in vivo*, analysis (mouse), **160**, 181
    - expression in IM9 and HepG2 cells, regulation by glucose, **165**, 1123
    - murine, retroviral transfer into HL-60 cells, **163**, 321
    - phorbol myristate acetate-induced expression in confluent fibroblasts, kinetics, alteration by indomethacin (mouse), **161**, 508
    - structure and expression, analysis (human cervical tumor cells), **158**, 334
    - transcript levels during surgical resection of hepatocellular carcinoma, analysis (human), **162**, 1260
  - collagen α_1(I), expression loss, relationship to DNA methylation (rat bone cells), **162**, 1446
  - collagen-like, isolation from *Paracentrotus lividus*, **158**, 633; *erratum*, **162**, 900
  - c-*raf*-1, expression during differentiation of 3T3-L1 preadipocyte fibroblasts to adipocytes, **162**, 1180
  - c-*sis*, enhanced transcription in bronchoalveolar mononuclear cells from autoimmune disease patients with lung involvement, **164**, 1018
  - 2′,3′-cyclic-nucleotide 3′-phosphodiesterase, structure (mouse), **165**, 1213

cyclooxygenase-related, identification and role in prostaglandin formation (sheep), **164**, 1358
cystatin C, sequencing and localization on chromosome 20 (human), **162**, 1324
cytochrome $P450_{scc}$, 5′ region, identification of basal promoter and adrenal-specific activating domain, **160**, 276
dam, mutation conferring 2-aminopurine sensitivity with intact GATC methylase activity (*Vibrio cholerae*), **165**, 561
diuretic hormone, recombinant baculovirus with, increased insecticidal effects on silkworm larvae, **165**, 1177
Eco RI restriction endonuclease, increase in chromosomal radiosensitivity of inducibly expressing cells (CHO 10 cells), **160**, 1079
egr-1, phorbol myristate acetate-induced expression in confluent fibroblasts, kinetics, alteration by indomethacin (mouse), **161**, 508
env and *tat* of HIV , stable expression in specially prepared human cell lines, **161**, 305
Epstein–Barr virus
  capsid antigen, methylation status and expression, relationship, **159**, 263
  membrane antigen gp220/340, characterization and selective expression of secreted form of gp220 (marmoset), **158**, 676
ferritin
  heavy chain promotor, thyrotropin-stimulated transcription (FRTL-5 cells), **165**, 506
  subunits, expression in hepatoma cell lines (human), **161**, 902
α-fetoprotein, expression in lymphoblastoid cells and phytohemagglutinin-stimulated T-lymphocytes (human), **159**, 112
β-1,4-galactosyltransferase, nucleotide sequence (mouse), **162**, 1069
globin, fetal to adult switching in MB-02 cells in response to erythropoietin, **164**, 857
β-globin
  $β^{Malay}$ mutation, abnormal RNA processing (human), **163**, 8
  proximal CACCC box in promoter and similar sequence in enhancer, binding to nuclear proteins (human), **164**, 149
glucokinase, 5′ flanking region, characterization (rat), **164**, 1247
γ-glutamyltransferase, expression in *Escherichia coli* (rat), **160**, 1040
glutathione *S*-transferase π, expression regulation, comparison with rat GST subunit 7 (human), **163**, 815
β1-glycoprotein, pregnancy-specific, structure (HL-60 cells), **163**, 1021
growth, expression in colon carcinoma cells, modulation by selective alteration of polyamines (human), **165**, 384
Ha-*ras*, mutations in codon 61, absence in epithelial cells transformed *in vitro* by 7,12-dimethylbenz[*a*]anthracene (rat), **165**, 1319
*HIS*1 and *HIS*2, encoding of histatins, evidence from sequence analysis (human parotid gland), **160**, 495
histone cluster, topoisomerase-related activity at specifi hypersensitive sites in *Drosophila*, characterizatio **162**, 232
HIV-enhancer sequence, binding activity in T cells, activa tion by mild detergents (human), **162**, 238
HIV, expression in MOLT-4 cells, effect of interleukin (human), **165**, 715
HIV-1 protease
  chemical synthesis and expression in *Escherichia col* **159**, 87
  synthetic, high-level expression in *Escherichia coli*, **161** 1056
homeo domain, three-dimensional structure: similarity t repressors, **157**, 100; *erratum*, **159**, 1455
hprt locus, mutation frequency after transfection wit herpes simplex virus type 2 BglII N fragment an subfragments, relationship to transformation effect (NIH 3T3 cells), **159**, 1249
H-*ras*, transfected fibroblasts, antiproliferative activity of protein kinase C inhibitors hypericin and pseudohypericin, role in antiretroviral activity (mouse), **165** 1207
human breast carcinoma-associated DF3 antigen, 5′ region, sequence analysis, **165**, 644
human chorionic gonadotropin α and β subunits, expression, effects of adenine nucleotides, **160**, 6
human renin, tissue-specific expression in transgenic mice **165**, 826
human terminal deoxynucleotidyltransferase, 5′-flanking region, promoter function demonstration (COS 7 monkey kidney cells), **164**, 863
immediate early, herpes simplex virus type 1, trans-activation inhibition by human recombinant interferons **159**, 439
immunoglobin, rearranged, rapid cloning from hybridoma cells with mixed primers and polymerase chain reaction (human), **160**, 1250
interleukin 1β, lack of expression in macrophages of unresponsive C3H/HeJ mouse strain, role of calmodulin-binding protein defect, **158**, 723
interleukin 3, multicopy introduction and high-level expression by retroviral vector superinfection (ψ2, NIH/ 3T3 cells), **158**, 576
interleukin 6, expression in endothelial cells: RNA start sites, multiple IL-6 proteins, and inhibition of proliferation (human umbilical vein), **159**, 991
KEX2, endopeptidase product, characterization (yeast) **159**, 305
KI-*RAS*, 25-kbp region upstream of exon 0, molecula cloning and conservation in transformed murine NIH 3T3 cells (human), **159**, 324
lactate dehydrogenase C, interruption by six introns, pos itional homology with LDH-A and LDH-B gene (human testis), **159**, 579
leukotoxin, identification and expression (*Actinobacillu actinomycetemcomitans*). **159**, 256
leukotriene A_4 hydrolase, expression in Raji cells, **161**, 740
leu-2, transcription and translation response time to α-iso propylmalate (*Neurospora crassa*), **161**, 1286

pocortin I, cloning, sequencing, and expression in glucocorticoid-stimulated quiescent Swiss 3T3 fibroblasts (mouse), **159**, 155
-lipoxygenase, expression, analysis in Raji cells, **161**, 740
ow-density lipoprotein receptor, superinduction (human), **165**, 574
uxE, encoding acyl-protein synthetase component of fatty acid reductase complex, nucleotide sequence (*Vibrio harveyi*), **163**, 93
lysozyme, exon 2-coded residues, residual catalytic activity (chicken), **159**, 927
M4 α1-antitrypsin, nucleotide sequence (human), **162**, 1560
mas, transfected COS-7 cells, transient expression of functional angiotensin II receptors, **165**, 935
*MDR*1, encoded P-glycoprotein, cDNA sequence analysis: Gly→Val substitution at codon 185, role in multidrug resistance (human adrenal), **162**, 224
*met*E, *met*H, and *met*R, MetR-regulated expression *in vitro*, effect of homocysteine (*Escherichia coli*), **163**, 79
milk late-lactation protein, molecular cloning and characterization (wallaby), **164**, 1380
mitochondrial
  expression level, increase in polyps of familial polyposis coli patients, **159**, 1100
  NADH dehydrogenase and cytochrome oxidase subunits, detection of homologous DNA sequences in nuclei from normal tissue and hepatoma cells (rat), **162**, 258
monocyte chemotactic protein, expression by cytokine-treated fibroblasts and endothelial cells (human), **162**, 694
multidrug resistance, direct activation in CV-1 cells by anticancer agents (human), **165**, 1415
NADPH-cytochrome P450 reductase, disruption, induction of increase in sensitivity to ketoconazole (yeast), **160**, 1257
N-*myc*, repression by c-*myc* protein (human neuroblastoma cells), **162**, 991
nuclear, encoding ubiquinone-binding protein in Complex III of mitochondrial respiratory chain, isolation and nucleotide sequence (human), **161**, 371
oncogenic, consistent methylation changes in epithelial cells chemically transformed *in vitro* (rat), **164**, 693
ornithine decarboxylase
  linkage analysis and conversion mapping (yeast), **162**, 1409
  transient expression in CHO cells, effect of methylation before transfection (human), **162**, 528
steocalcin, identification of 1,25-dihydroxyvitamin D_3 receptor-regulated promoter regions (rat), **162**, 869
6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase, regulation by glucocorticoids: sequencing of 5′-flanking region (rat), **162**, 753
phospholipase C, cloning and sequencing (*Clostridium perfringens*), **160**, 33
phospho*enol*pyruvate carboxykinase, 5′ region, conferment of pH sensitivity to chimeric genes expressed in renal and hepatic cell lines capable of PEPCK expression (rat), **164**, 81
placental ribonuclease inhibitor, expression in *Escherichia coli* (human), **160**, 115
plasma membrane H^+-ATPase, cloning (*Nicotiana plumbaginifolia*), **162**, 567
platelet-derived growth factor family, identification of vascular endothelial growth factor as member (bovine), **165**, 1198
pol, bacterial expression: synthesis of crystallizable HIV-1 protease, **165**, 1043
pregnancy-specific glycoprotein, expression in fetal liver, demonstration by cDNA cloning (human), **163**, 1197
prokaryote, expression regulation by ribozymes, analysis, **162**, 1025
proliferating cell nuclear antigen/cyclin, expression in adult tissues and mammary tumor (rat), **161**, 873
prostaglandin endoperoxide synthase, cloning: enzyme primary structure (human), **165**, 888
prostate-specific antigen, characterization
  and comparison with human kallikrein-like gene, **159**, 95
  in human, **161**, 1151
prostatic acid phosphatase, cloning, mapping, and sequence analysis (human), **160**, 79
protein kinase C family, cell type-specific expression: down-regulation of mRNAs for PKCα and nPKCϵ upon *in vitro* differentiation (murine neuroblastoma cells), **165**, 533
pseudo-, cytochrome b_5, characterization (human liver), **163**, 18
PvuII polymorphism in familial lipoprotein lipase deficiency, analysis (human), **164**, 1391
ras
  detection and expression analysis during development (brine shrimp), **162**, 802
  point mutations, detection by polymerase chain reaction using mutation-specific inosine-containing oligonucleotide primers (human blood, EJ cells), **160**, 441
  product, immunologically related protein, agonist-induced phosphorylation in erythroleukemia cells (human), **161**, 972
  product p21, detection in cell lines by $[\gamma\text{-}^{35}S]GTP\gamma S$ binding (human, mouse), **159**, 1269
  related products, relationship to G25K GTP-binding protein (human placenta, platelets), **160**, 25
retinoblastoma, homology with L1 family repetitive sequences (human), **160**, 1061
reverse transcriptase, murine retroviral, expression in human cells, **158**, 595
rho, encoded protein
  identification as botulinum ADP-ribosyltransferase C3 substrate (*Escherichia coli*), **158**, 209
  sequence identity with botulinum ADP-ribosyltransferase substrate Gb (bovine adrenal gland), **163**, 1175
5S RNA, containing insertions, transcription and assembly of preinitiation complexes (*Xenopus laevis*), **162**, 639

  STA2, glucoamylase-encoding, signal sequence from, in secretion of *Escherichia coli* β-galactosidase in yeast, **164**, 1331
  tat, HIV type 1, chemical synthesis and expression in cell-free system (HeLa cells), **160**, 1429
  thyroglobulin, promoter
    cAMP-dependent binding of thyroid *trans*-acting factor (bovine, dog), **160**, 722
    determination of protein-binding domains (rat), **163**, 481
  tissue kallikrein, high homology to cDNA coding for entire prostate-specific antigen (human), **160**, 903
  transcription factor S-II, expression in *Bombyx mori* cells (mouse), **160**, 1093
  transfection, in production of chimeric bispecific antibodies (murine myeloma cells), **164**, 271
  transthyretin, mutation causing familial amyloidotic polyneuropathy, localization to exon 3 (human), **164**, 1240
  TRMP-2, role in mechanism of cytotoxic drug-induced thymine-less death of androgen-independent prostatic cancer cells (rat), **165**, 73
  tumor suppressor, encoded RB proteins, *in vitro* phosphorylation by mitosis-specific histone H1 kinase, **164**, 580
  tyrosinase, single base insertion, identification as cause of oculocutaneous albinism (human), **164**, 990
  uridine monophosphokinase, primary structure (yeast), **165**, 464
  v-*ros*, hybrid human insulin receptor containing, internalization and degradation in CHO cells, **158**, 705
  Zfy-1, post-meiotic expression in testis, detection by genomic clone of *Zfy* from Y^{DOM} strain (mouse), **165**, 1286
Genistein
  effects on DNA synthesis and phospholipid-derived second messenger generation (murine fibroblasts, rat liver cells), **165**, 795
Gerstmann-Sträussler syndrome
  associated prion protein, role of Pro→Leu change at position 102 and other mutations (human), **163**, 974
Glass transition
  deoxymyoglobin, analysis by optical absorption spectroscopy (horse), **160**, 948
Glial cells
  embryonic, free calcium increase and mitogenesis, induction by endothelin (rat), **165**, 1115
  steroidogenesis *in vitro*, effect of removal of aminoglutethimide blockade (rat), **161**, 917
β-Globin
  encoding gene, proximal CACCC box in promoter and similar sequence in enhancer, binding to nuclear proteins (human), **164**, 149
  synthesis, effects of α- and β-anomeric oligonucleotides: inhibitory effect of cap-targeted α-oligonucleotides (rabbit), **164**, 311; *erratum*, **165**, 1443
Globins
  encoding gene, β Malay mutation, abnormal mRNA processing (human), **163**, 8
  spectrin binding domains, analysis (human erythrocytes), **164**, 894
Globotriaosyl ceramide receptors
  membrane-associated, interaction with Shigella toxi
    fluorescence study (*Shigella dysenteria*), **160**, 126
Globulin
  thyroxine-binding, and thyroxine-binding prealbumi binding activities in serum: differential modulatio by T_3, T_4, oleic acid, diphenylhydantoin, and salicy late (rat), **159**, 919
Glomerulosa cells
  adrenal, calcium influx pathway, role of sodium–calciu exchanger (bovine), **158**, 1005
Glucagon
  and adrenocorticotropin, insulin, and isoproterenol, stimulation of same phosphodiesterase isoform in adipos tissue (rat), **162**, 814
  effects on
    alanine:glyoxylate aminotransferase 1, differences among mammalia, **165**, 372
    malic enzyme in cultured fetal hepatocytes (rat), **161** 1028
  portion 1–21, related peptide, presence in small intestinal mucosa (dog), **165**, 1010
Glucan 1,4-α-glucosidase
  encoding *STA2* gene, signal sequence from, role in secretion of *Escherichia coli* β-galactosidase in yeast, **164** 1331
Glucarate
  and 13-*cis*-retinoic acid, synergistic interaction against ra mammary tumor induction and MCF-7 cells, **163** 1364
Glucoamylase, *see* Glucan 1,4-α-glucosidase
Glucocorticoid receptors
  deficient murine L cell variant, isolation and characterization, **164**, 480
  and dioxin and oxysterol receptors, cytosolic, structura differences (rat liver), **163**, 444
  identification in fetal and adult adrenal cortical cell (sheep), **162**, 604
  untransformed, heteromeric structure, analysis by chemical crosslinking and monoclonal antibodies to 90K heat-shock protein (rat), **159**, 677
Glucocorticoids
  induction of 6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase gene expression in hepatocytes an skeletal muscle (rat), **162**, 753
Glucokinase, *see also* Hexokinase
  encoding gene, 5′ flanking region, characterization (rat) **164**, 1247
  expression in *Escherichia coli* (rat), **165**, 817
Glucose
  deuterium-labeled, in evaluation of hepatic glycogen synthetic pathway (rat), **159**, 522; *erratum*, **162**, 557
  effects on
    ethanol oxidation, in analysis of role of peroxisomal β-oxidation (deermouse hepatocytes), **163**, 418
    free and bound sodium in pancreatic β cells (mouse), **164**, 212
  hepatoma cell concentration, effect on insulin recepto mRNA levels (human), **160**, 1415

- nduced buffering of cytoplasmic Ca^{2+} in pancreatic β cells, analysis (mouse), **159**, 907
- -Na^+ cotransporter protein, functional lysyl residues, inhibition by pyrylium salt (rabbit brush border membranes), **163**, 1356
- plasma levels, effect of synthetic C-terminal fragment of pancreastatin (rat), **158**, 844
- polymer from PC12 cells, localization by trypsinization study, **159**, 1
- regulation of c-*myc* gene expression in IM9 and HepG2 cells, **165**, 1123
- stimulation of
  - fura-2 efflux in pancreatic β cells, prevention by probenecid (mouse), **159**, 223
  - insulin release, effect of synthetic C-terminal fragment of pancreastatin (rat), **158**, 844
  - insulin secretion from isolated pancreatic islets, inhibition by islet amyloid polypeptide (rat), **160**, 961
- transport, insulin-stimulated, suppression by calcitonin gene-related peptide (L6 myocytes), **164**, 461
- and xylose, identification of single active site on glucose/xylose isomerase (*Streptomyces*), **159**, 457

ucose-6-phosphate dehydrogenase
- reactive lysine residue, characterization: identification of limited structural variation within yeasts (*Pichia jadinii*), **160**, 1290

lucose transporter
- blood–brain barrier, mRNA levels, increase in diabetes mellitus (rat), **164**, 375
- and insulin receptor, colocalization in microsomes of insulin-treated adipocytes (rat), **159**, 1368
- mRNA in myotubes, regulation by monokines (L6 cells), **165**, 429

lucose/xylose isomerase, *see* Xylose isomerase

-Glucosidase
- mechanism-based inactivator conduritol aziridine, synthesis and testing (yeast), **163**, 495

-Glucosidase
- gene cloning and characterization: enhancement of crystalline cellulose degradation by *Clostridium thermocellum* cellulase complex, **161**, 706
- mechanism-based inactivator conduritol aziridine, synthesis and testing (*Alcaligenes faecalis*), **163**, 495

β-Glucuronidase
- genomic clone for 5′ region, identification with antisense RNA (mouse), **160**, 937
- inhibition of lysosomal enzyme-binding receptor phosphorylation (simian brain), **162**, 1244

Glutamine
- nonspecific elicitation of endothelium-dependent vascular relaxation at high dose (rat aorta), **158**, 177
- requirement for growth in peripheral lymphocytes, effects of asparagine and adenine (human), **164**, 1348
- residues in proteins, identification as cleavage sites for endoproteinase Asp-N (*Pseudomonas fragi*), **162**, 1528

γ-Glutamyltransferase
- mRNAs expressed in liver and kidney, characterization (human), **164**, 912
- renal, cDNA expression in *Escherichia coli* (rat), **160**, 1040

γ-Glutamyl transpeptidase, *see* γ-Glutamyltransferase

Glutaredoxin
- revised amino acid sequence (bovine thymus), **159**, 1448

Glutathione
- constituents of transthyretin, role in microheterogeneity and thyroxine binding (human), **158**, 341
- dependent enzyme activities, and verapamil-sensitive binding of xenobiotics, analysis (mussel), **164**, 934
- derived thiyl free radicals, reactions with vitamin A, polyunsaturated fatty acids, and vitamin C, comparison, **161**, 1199
- intracellular, protective role against oxidized human low-density lipoproteins in cultured bovine endothelial cells, **163**, 1466
- reduced form, effect on inhibition of v-*src* tyrosine kinase activity by herbimycin A (murine NIH 3T3 cells), **163**, 803
- role in intracellular copper transport in cultured hepatoma cells, **164**, 134
- specific stimulation of guanylate cyclase under anaerobic conditions (bovine lung), **161**, 75
- –styrene adducts, peroxidase-catalyzed formation, production of singlet oxygen from, **159**, 1051

Glutathione disulfide
- formation during cardiac ischemia and reflow *in vivo*, analysis (dog), **164**, 722
- stimulated Mg^{2+}-ATPase, purification and characterization (human erythrocytes), **162**, 1

Glutathione peroxidase
- impairment, role in cisplatin adverse effects on renal mitochondria (rat), **159**, 1121
- independent peroxidation, modulation by selenium (housefly), **165**, 158

Glutathione reductase
- catalyzed reduction of chromium(VI), role of chromium(V) and hydroxyl radicals, **163**, 627

Glutathione *S*-transferase
- identification as *in vitro* substrate for protein kinase C (rat liver), **162**, 903
- isozymes 1-1 and 2-2, specificities in prostaglandin endoperoxide conversion pathway, effect of amino acid substitution (human), **158**, 497
- π, expression regulation, comparison with rat GST subunit 7 (human), **163**, 815
- reaction with hepoxilin A_3, in isolation of hepoxilin metabolite 11-glutathione hepoxilin A_3, **163**, 1230
- Yb_1, baculovirus-mediated expression in *Spodoptera frugiperda* cells (rat liver), **162**, 1147

11-Glutathionyl hepoxilin A_3
- formation in hepoxilin pathway: isolation by reaction of hepoxilin A_3 with glutathione *S*-transferase, **163**, 1230

Glycation
- bovine serum albumin by mannose and fucose *in vitro*, kinetics, **160**, 362

Glyceraldehyde-3-phosphate dehydrogenase
- acid-limited proteolysis, induction of angiotensin-converting enzyme inhibitory activity (porcine, tuna muscle), **161**, 456

  complex formation with bovine tryptophanyl-tRNA synthetase (rabbit muscle), **161**, 481
  interaction with 3-phosphoglycerate kinase labeled with fluorescein-5′-isothiocyanate, role of dye (rabbit muscle), **161**, 187
Glycerol
  induced cell swelling, induction of immediate high-amplitude thyrotropin and prolactin secretion (rat adenohypophyseal cells), **163**, 471
L-Glycerol-3-phosphate dehydrogenase
  mitochondrial, enzyme function, role of cardiolipin (rat liver), **159**, 132
β-Glycerophosphate
  induced mineralization in osteogenic MC3T3-E1 cell line, effect on heparin-stimulated collagenase synthesis (mouse), **162**, 773
Glyceryl trinitrate, *see* Nitroglycerin
Glycine
  antagonist 6,7-dichloroquinoxaline-2,3-dione, abolition of *N*-methyl-D-aspartate-mediated responses (rat synaptic membranes), **164**, 841
  conversion to glyoxylate and formic acid *in vitro*, catalysis by melanin, **159**, 1161
  interaction with receptor binding site, effect of receptor modification by fluorescein 5′-isothiocyanate (rat), **160**, 374
  in position 24 of streptokinase, site-specific alteration, effect on plasminogen activation, **165**, 1085
  replacement of Thr-246 in L-lactate dehydrogenase, effect on specificity (*Bacillus stearothermophilus*), **161**, 59
Glycine receptors
  modification with fluorescein 5′-isothiocyanate, effect on interaction of glycine with binding site (rat), **160**, 374
Glycogen
  bound type 1 phosphatase complex with undegraded G subunit, isolation and dissociation (rabbit muscle), **162**, 1465
  synthetic pathway, evaluation with deuterium-labeled glucose (rat liver), **159**, 522; *erratum*, **162**, 557
Glycogenolysis
  direct activation by increase in inositol 1,4,5-trisphosphate, role of prostaglandin $F_{2\alpha}$ and thromboxane A_2 (rat hepatocytes), **163**, 1235
Glycogen phosphorylase
  phenylephrine-induced activation in isolated liver cells, role of calcium (rat), **160**, 480
N-Glycolylneuraminic acid
  localization in colonic tumor and mucosal glycopeptides from carrageenan- and 1,2-dimethylhydrazine-treated rats, **159**, 452
Glycolysis
  associated metabolites, effects on malic enzyme in cultured fetal hepatocytes (rat), **161**, 1028
  in permeabilized L-929 cells, analysis: evidence for channelling of pathway intermediates (mouse), **160**, 1409
Glycopeptides
  colonic tumor and mucosal, in carrageenan- and 1,2-dimethylhydrazine-treated rats, localization of *N*-acetylneuraminic acid and *N*-glycolylneuraminic acid, **159**, 452
Glycophorin
  exogenous, electro-insertion into erythrocyte membrane assessment (human, mouse), **159**, 34
  and gangliosides, competitive binding to wheat germ agglutinin (bovine, human), **160**, 780
Glycoproteins
  cuticular, stage-specific, *in vivo* biosynthesis during earl metamorphosis (medfly), **164**, 251
  deaminated neuraminic acid-rich, isolation and characterization in ovarian fluid (rainbow trout), **164**, 744
  GMP-140, platelet, characterization as heparin-binding protein (human), **164**, 1373
  GPIb, platelet, associated binding domain of von Willebrand factor, production of corresponding subfragment in *Escherichia coli*, **164**, 1339
  gp120, HIV envelope, binding to soluble CD4, solution immunoassay, **163**, 172
  identification of corticotropin-releasing factor-binding protein as (human), **165**, 703
  identification as Hanganutziu–Deicher antigen in gastric cancer cell line (human), **160**, 1149
  major maturational, on cauda epididymal sperm surface linkage to membrane via phosphatidylinositol (rat) **160**, 460
  myelin-associated, cDNA cloning
    alternative splicing pattern (mouse), **165**, 1162
    and amino acid sequence (human), **163**, 1473
  neural cell recognition, F11, mode of membrane interaction: role of covalently attached phosphatidylinositol (chicken), **161**, 931
  110K, anchored into membrane via glycosyl-phosphatidylinositol, identification in NIH/3T3 cells after expression of nonspecific cross-reacting antigen cDNA, **161**, 1126
  P-, *see* P-glycoprotein
  pp-120, identification as common endogenous substrate for insulin and insulin-like growth factor I receptor-associated tyrosine kinase in AS-30D hepatoma cells (rat), **160**, 168
  pregnancy-specific
    gene expression in fetal liver, demonstration by cDNA cloning (human), **163**, 1197
    type β1
      –fetal liver nonspecific cross-reactive antigen, carcinoembryonic antigen gene-related, cDNA cloning (human), **161**, 525
      structures of gene, mRNA, and protein (HL-60 cells), **163**, 1021
  processing inhibitors, effects on integrin and adhesion of myoblasts to extracellular matrix proteins (chicken, rat), **163**, 1338
  secretory, intracellular transport, delay by bromocondurito (human hepatoma cells), **161**, 1013
  sphingolipid hydrolase activator, *see* Saposins
  IIb–IIIA complex, platelet membrane-associated, modulation of RGDS binding site, **160**, 189
Glycosidase
  autolytic, purification and characterization (*Streptococcus pneumoniae*), **158**, 251

Glycosidase
  associated activity of ricin on ribosomes, impairment by α-sarcin (brine shrimp), **160**, 857
ycosphingolipids
  on PC12 cell surface, partial liberation of oligosaccharides by endoglycoceramidase (rat), **162**, 1093
ycosylation
  neuroglandular antigen in melanoma cells, inhibition by phorbol ester (human), **158**, 837
  post-translational, poliovirus proteins, analysis (HeLa cells), **158**, 263
ycosyl-phosphatidylinositol
  anchored proteins, distribution in BC_3H1 myocytes and 3T3-L1 preadipocytes, differential regulation by serum and insulin, **164**, 824
  membrane anchoring of 110K glycoprotein expressed by nonspecific cross-reacting antigen cDNA (NIH/3T3 cells), **161**, 1126
lycylglycyl-L-histidine
  nickel(II) complex, and hydrogen peroxide, production of superoxide and hydroxyl radicals and singlet oxygen, ESR spectroscopic analysis, **159**, 445
lyoxalase I, *see* Lactoglutathione lyase
lyoxalase II, *see* Hydroxyacylglutathione hydrolase
lyoxalate
  formation from glycine by melanin, **159**, 1161
MP (guanosine 5′-monophosphate)
  platinated, in analysis of reversal reaction of platinated DNA with thiourea, **161**, 819
olgi complex
  derived nascent very-low-density lipoproteins, enrichment in phosphatidylethanolamine (rat hepatocytes), **160**, 162
  enriched fraction, demonstration of GTP-binding and ADP-ribosylated proteins (rat liver), **164**, 333
Gonadotropin-releasing hormone
  dimeric analogs, enhanced biological activity (rat), **159**, 893
Gonadotropin-releasing hormone receptors
  in epithelial ovarian carcinomata, photoaffinity labeling (human), **161**, 1086
Gonadotropins, *see also specific types*
  induction of trypsin-like protease production by granulosa cells (rat), **165**, 624
  stimulation of protein phosphorylation in granulosa cells (pig), **161**, 442
Gossypol
  and 6-aminonicotinamide, effects on tumor cell metabolism, ^{31}P-magnetic resonance spectroscopic study (T47-D cells), **164**, 947
G proteins
  ADP-ribosylation by pertussis toxin, detection of endogenous inhibitor in bovine brain, **160**, 67
  binding to immobilized delipidated rhodopsin (bovine brain, retina), **162**, 544
  botulinum ADP-ribosyltransferase substrate Gb, cDNA cloning and identification as *rho* gene product (bovine adrenal gland), **163**, 1175
  and calcium, role in phospholipase D activity in homogenates from HL-60 granulocytes, **163**, 657
  demonstration in Golgi fraction (rat liver), **164**, 333
  detection in cell lines by [γ-^{35}S]GTPγS binding (human, mouse), **159**, 1269
  dissociation from FSH receptor–G protein complexes, induction by FSH in reconstituted proteoliposomes, **162**, 1214
  identification of chromatin-associated Yp20 as (yeast), **165**, 667
  identification in plasma membrane (Metarhizium anisopliae), **164**, 562
  inhibitory, ADP-ribosylation and phosphorylation in intact hepatocytes, effects of insulin (rat), **165**, 251
  membrane-associated, detection in *Stigmatella aurantiaca*, **158**, 562
  m22KG(I), phosphorylation by cAMP-dependent protein kinase in platelet membranes (human), **160**, 235
  mRNA levels during adipocyte differentiation (3T3-L1 cells), **165**, 929
  pertussis toxin-insensitive, role in neutrophil activation by surface-bound IgG (human), **164**, 983
  pertussis toxin-sensitive
    purification and identification (bovine spleen), **161**, 1280
    receptor-coupled form, ADP-ribosylation by cholera toxin (NG108-15 cells), **165**, 554
    role in wasp venom mastoparan stimulation of pancreatic islet insulin release (rat), **158**, 712
  recombinant α subunits in excess of βγ subunits, membrane attachment in transfected COS cells, **164**, 46
  relationship to multiple chromatographic forms of formylpeptide chemoattractant receptor (HL-60 cells), **161**, 276
  *rho*B p20, *ras* p21-like, binding to guanine nucleotides, kinetic analysis (bovine brain), **163**, 674
  role in
    actin assembly in electropermeabilized neutrophils (human), **164**, 700
    epidermal growth factor-induced Ca^{2+}-signaling response in breast cancer cell line MDA-468 (human), **159**, 1290
    phospholipase C activity in permeabilized pituitary cells (rat), **159**, 209
  with same effector domain as *ras* p21s, identification as *smg* p21 in aortic smooth muscle membranes (bovine), **163**, 1418
  smg-21, with same effector domain as *ras* proteins, GTPase-activating proteins for, purification (human platelets), **159**, 1411
  smg-p25A
    kinetic analysis of binding (bovine brain), **162**, 273
    mRNA, tissue-specific expression and increase by nerve growth factor and cyclic AMP in rat pheochromocytoma PC-12 cells, **158**, 377
  25-kDa, characterization and relationship to *ras*-related gene products (human placenta, platelets), **160**, 25
Gramicidin A
  and lipid chains in model membrane, Monte Carlo studies, **165**, 1
Granule cells
  cerebellar, *N*-methyl-D-aspartate-activated channels, changes with time in culture (rat), **165**, 481

- Granulocytes
  - activation by type 1 fimbriated *Escherichia coli*, role of protein kinase C (human), **165**, 1243
  - derived proteases, conversion of endothelial cell-derived high-molecular-weight von Willebrand factor into plasma multimer pattern (human), **158**, 980
  - HL-60, homogenates, phospholipase D activity: implication of calcium and G protein control, **163**, 657
  - –platelet suspensions, transcellular conversion of endogenous arachidonic acid to lipoxins (human), **157**, 801; *erratum*, **159**, 370
- Granulosa cells
  - follicle-stimulating hormone-induced differentiation
    - inhibition by tumor necrosis factor α *in vitro* (rat), **163**, 1038
    - suppression by human interleukin 1α and 1β, comparison (rat), **163**, 764
  - production of trypsin-like protease after gonadotropin treatment (rat), **165**, 624
  - protein phosphorylation, stimulation by gonadotropin *in vitro* (pig), **161**, 442
- Growth factors, *see also specific types*
  - bone cell-derived macromolecular, regulation of osteoclast formation (chicken, mouse, rat), **159**, 1383
  - heparin-binding, 17-kDa purification and N-terminal sequence (bovine uterus), **165**, 1096
  - in *Xenopus* oocytes, properties, **160**, 615
- Growth hormone, *see* Somatotropin
- Growth inhibitors
  - mammary-derived, hydrodynamic and circular dichroic analysis (bovine), **161**, 363
- GTP (guanosine 5′-triphosphate)
  - and analog, regulation of adenylate cyclase in platelets, effects of hypertension (rat), **162**, 1265
  - binding proteins, *see* G proteins
  - binding to *rho*B p20, inhibiting protein, partial purification (rabbit intestine), **163**, 1523
  - binding to rod outer segments, analysis (toad retina), **163**, 363
  - dependent calcium release in hepatic microsomal fractions, effects of cytosolic nondialyzable factors (rat), **163**, 823
  - destabilization of RNA polymerase II transcription complexes, **162**, 1133
  - effect on microsomal membrane permeability for calcium (NG108-15 cells), **164**, 1060
  - hydrolysis by
    - hepatic transglutaminase (guinea pig), **162**, 1370
    - oncogenic and nononcogenic amino-terminal *ras* p21 protein segments, comparison, **160**, 282
  - interactions with chromatin-associated protein Yp20 (yeast), **165**, 667
- GTPase
  - associated activity of *smg*-21 GTP-binding protein with same effector domain as *ras* proteins, activating proteins for, purification (human platelets), **159**, 1411
- GTP-γ-S [guanosine 5′-*O*-(3-thiotriphosphate)]
  - augmentation of myofilament Ca^{2+} sensitivity in α-toxin-permeabilized arterial smooth muscle (rabbit), **157**, 677; *erratum*, **165**, 1442
  - binding
    - in detection of *ras* p21 and other Gn proteins in cell lines (human, mouse), **159**, 1269
    - to *ras* p21-like GTP-binding protein *rho*B p20, kinetic analysis (bovine brain), **163**, 674
  - bound c-Ha-*ras* protein, conformation of antiparallel β-sheet effector-region residues, comparison with GDP-bound form (human), **162**, 1054
  - effects on inositol phosphate production (NG108-15 cells), **165**, 175
  - induced calcium release in smooth muscle cells, effects of heparin (rabbit trachea), **163**, 262
- Guanine
  - N7 position, alkylation, lack of involvement in formation of phosphoramide mustard–nucleotide adduct, **163**, 843
- Guanine nucleotides
  - binding to
    - erythrocyte membranes, *in situ* characterization (human), **159**, 41
    - *ras* p21-like GTP-binding protein *rho*B p20, kinetic analysis (bovine), **163**, 674
    - *smg* p25A, kinetic analysis (bovine brain), **162**, 273
  - binding proteins, *see* G proteins
  - effect on phospholipase C activity in permeabilized pituitary cells: possible role of inhibitory GTP-binding protein (rat), **159**, 209
  - stimulation of phosphatidylinositol bisphosphate hydrolysis in myelin membranes (human), **162**, 282
- Guanosine
  - analog 7-thia-8-oxoguanosine, stimulation of phosphoinositide signaling pathway in B lymphocytes (mouse), **163**, 1306
- Guanylate cyclase
  - activation in cardiac sarcolemma, role of atrial natriuretic peptide receptors (rat), **162**, 1339
  - atrial natriuretic peptide receptor-associated activity, detection in in HeLa cells, **164**, 671
  - particulate
    - activation by atrial natriuretic peptide, mechanism, radiation inactivation analysis (bovine adrenal gland, lung), **158**, 603
    - in adrenal cortex, activation by β-atrial natriuretic factor and urodilatin (bovine), **163**, 37
    - monoclonal antibodies, production and characterization (porcine kidney), **164**, 653
  - soluble
    - converted L-arginine, as activator: production by Ca^{2+}-dependent cytosolic enzyme in aortic endothelial cells (pig), **164**, 678
    - specific stimulation by glutathione under anaerobic conditions (bovine lung), **161**, 75
    - stimulation in adrenal gland by nitric oxide from L-arginine (bovine, rat), **165**, 802
- Guanylyl cyclase, *see* Guanylate cyclase

H

- 7
  - effects on
    - sodium–hydrogen antiport during egg fertilization (sea urchin), **161**, 1100
    - T-cell tumor growth *in vitro*, role of protein kinase C and cyclic nucleotide-dependent kinases (mouse), **162**, 138
  - inhibition of endothelin action (rabbit aorta), **158**, 170
  - and staurosporine and UCN-01, comparative effects on phorbol ester-induced CD4 down-regulation and augmentation of HIV replication (human T cells), **164**, 339
- aloperidol
  - induced increase in striatal D_2-dopamine receptor density, inhibition by chronic nicotine use (rat), **159**, 48
- arvey murine sarcoma virus
  - derived vector, high-level expression of thyroid hormone-binding protein p55 in transfected fibroblasts, **164**, 238
- atching enzyme
  - constituent high choriolytic enzyme, tight binding to egg envelope (medaka), **162**, 58
- eart, *see also* Myocardium
  - atrial natriuretic factor mRNA and peptide levels during ontogenetic development, analysis (human), **159**, 777
  - atria, sarafotoxin and endothelin binding and phosphoinositide hydrolysis, competitive interaction, analysis (rat), **158**, 195
  - brain natriuretic peptide
    - detection (pig), **158**, 360
    - distribution and molecular forms
      - in pig, **165**, 872
      - in rat, **165**, 880
  - cell membranes, endothelin-1 binding site density, effect of cyclosporine (mouse), **163**, 1270
  - cells and microsomal membranes, binding of 1,4-dihydropyridine calcium channel activator (−) S Bay K 8644 (guinea pig), **158**, 149
  - detection of endogenous inhibitor of angiotensin-converting enzyme (rat), **159**, 1093
  - doxorubicin-induced toxicity, hypoxia as risk factor, NMR evaluation (rat heart), **163**, 682
  - effects of platelet-activating factor alkyl chain homologs (guinea pig), **161**, 1341
  - ischemia and reflow *in vivo*, associated glutathione disulfide formation and lipid peroxidation, analysis (dog), **164**, 722
  - membrane fractions, endothelin-1 binding sites, ischemia-induced externalization (rat), **164**, 1220
  - myocytes
    - detection of fibroblast growth factors (adult rat), **157**, 1336; *erratum*, **159**, 1455
    - functional endothelin and sarafotoxin receptors, structure–activity relationships and receptor subtypes (rat), **163**, 936
  - positive inotropic effects of endothelin *in vitro* (human, rat), **159**, 14
  - sarcolemma, phosphoinositide phospholipase C, demonstration of cytosolic protein activator (dog), **163**, 567
  - secreted distinct natriuretic peptide, identification (rat), **161**, 732
  - ventricles, atrial natriuretic peptide gene expression, effects of captopril and hydralazine (spontaneously hypertensive rat), **160**, 310

- Heat inactivation
  - poliovirus, stabilizing ability of fatty acids and lyotropic salts against, **159**, 1177
- Heat shock
  - induction of
    - HSP 89, effect of cellular aging (human fibroblasts), **162**, 1302
    - microsomal heme oxygenase mRNA human Hep 3B hepatoma cells, **165**, 437
  - and transcriptional inhibitors, comparative effects on histone methylation patterns (fruit fly), **162**, 1037
- Hematopoietic cells
  - effects of okadaic acid (mouse), **165**, 539
  - leukocyte adherence receptor CD11c subunit, surface antigen and mRNA expression, analysis (human), **160**, 346
  - stem, production, enhancement by continuous interleukin-6 perfusion (mouse), **159**, 933

- Heme
  - binding to semi-α-hemoglobin, kinetics (human), **162**, 522
  - and lysine 384 of cytochrome P450 LM2, distance between, fluoresence energy transfer measurements (rabbit hepatic microsomes), **163**, 1282
  - orientational preference in myoglobin, effect of iron oxidation/ligation/spin state, ^{1}H NMR study (sperm whale, tuna), **158**, 462
  - proteins, cation radicals in, photochemical generation and reactions, **159**, 472

- Heme oxygenase (decyclizing)
  - microsomal, mRNA, induction by heat shock (human Hep 3B hepatoma cells), **165**, 437
  - post-translational and direct integration into microsomal membranes (rat liver), **163**, 1086
- Hemin
  - regulation of γ-aminolevulinate synthase mRNA stability (chicken embryo liver), **162**, 102
- Hemodynamics
  - shear stress, stimulation of endothelin production by cultured endothelial cells (porcine aorta), **161**, 859
- Hemoglobin
  - crosslinking by bis(3,5-dibromosalicyl) fumarate, effect on autoxidation properties (human), **163**, 733
  - semi-α, binding of heme, kinetics (human), **162**, 522
  - synthesis, induction in erythroleukemia cell line by transforming growth factor β (human), **165**, 145
  - T-state, stabilization with inositol hexaphosphate and bezafibrate (human), **165**, 226
  - Zurich mutant, abnormal beta site, similarity to binding site on myoglobin resulting from distal His→Arg mutation (bovine), **158**, 110

Hemoglobinuria
- paroxysmal nocturnal
  - associated complete deficiency of 20-kDa homologous restriction factor, restoration with purified HRF20 (human erythrocytes), **164**, 468
  - type III erythrocytes from afflicted patients, differential susceptibility to complement- and perforin-mediated lysis, **162**, 316

Hemolymph
- immunized and parasitized, peptide identification by mass spectrometry (honeybee), **165**, 637

Hemoprotein H-450
- active site, comparison to cytochrome P450 and sensitivity to pH effects, magnetic circular dichroism studies (rat liver), **165**, 1170

Heparan sulfate
- sulfate-deficient, production by Engelbreth–Holm–Swarm murine tumor, **162**, 189

Heparin
- associated binding domain of von Willebrand factor, corresponding subfragment, production in *Escherichia coli*, **164**, 1339
- binding to platelet GMP-140, demonstration (human), **164**, 1373
- binding polypeptide growth factor for hepatocytes: NH_2-terminal amino acid sequence of hepatopoietin A (rabbit blood), **163**, 1370
- binding 17-kDa growth factor, purification and N-terminal sequence (bovine uterus), **165**, 1096
- effects on
  - inositol 1,4,5-trisphosphate- and guanosine 5′-*O*-(3-thio triphosphate)-induced calcium release in smooth muscle cells (rabbit trachea), **163**, 262
  - thrombospondin and fibronectin mRNA levels in vascular smooth muscle cells (human), **162**, 1100
- and endothelial cell growth factor, effect on collagen and proteoglycan production (human smooth muscle cells), **163**, 84
- lipoprotein lipase nonreleasable by, activation by epinephrine in skeletal muscle fibers (rat), **164**, 615
- stimulated collagenase synthesis in osteogenic MC3T3-E1 cells, effect of β-glycerophosphate-induced mineralization (mouse), **162**, 773

Heparinase, *see* Heparin lyase

Heparin-binding growth factor
- specific for vascular endothelial cells, secretion by pituitary follicular cells (bovine), **161**, 851

Heparin lyase
- endogenous activity, presence in retina (bovine), **161**, 604

Hepatectomy
- partial
  - and chemical carcinogens, effects on *in vivo* [^{35}S]methionine interaction with hepatic tRNA (rat), **163**, 1412
  - subsequent hepatocyte metabolic responsiveness to phorbol ester and protein kinase C activity (rat), **158**, 294

Hepatitis
- autoimmune
  - associated anti-liver/kidney microsome antibody type recognition of cytochrome P450 db1 (human), **15** 542
  - chronic, identification of cytochrome P450 as antige recognized by associated anti-liver/kidney microsom antibodies (human), **159**, 283

Hepatitis B virus
- X protein, synthesized in cell-free system, dimerizatio **164**, 14

Hepatocyte growth factor
- cDNA, cloning and sequence analysis (human), **163**, 967
- mRNA, increase in nonparenchymal liver cells after trea ment with hepatotoxins (rat), **165**, 1229

Hepatocytes, *see also* Liver
- accumulation of taurocholate, interspecific compariso (human, pig, rat), **162**, 619
- binding of plasminogen from various species *in vitr* analysis (rat), **164**, 1288
- cultured, killing by cystamine, effects of protease i hibitors (rat), **163**, 412
- DNA synthesis, stimulation by serum factors: enhance ment by ethinyl estradiol (rat), **160**, 154
- endocytosis of superoxide dismutase: electron microscop of protein–gold adducts (rat), **162**, 940
- epidermal growth factor receptor expression, reduction b phenobarbital independent of protein kinase C activ tion (rat), **158**, 652
- ethanol metabolism, role of peroxisomal fatty acid β-ox dation (deermouse), **163**, 418
- fetal, precocious malic enzyme induction by hormonal an nutritional factors (rat), **161**, 1028
- fluid-phase and receptor-mediated endocytosis, pathway and thermodynamics, comparison (rat), **159**, 488
- glycogenolysis, direct activation by increase in inosit 1,4,5-trisphosphate, role of prostaglandin $F_{2\alpha}$ an thromboxane A_2, (rat), **163**, 1235
- heparin-binding polypeptide growth factor for: NH_2-term nal amino acid sequence of hepatopoietin A (rabbi blood), **163**, 1370
- HepG-2, ribosomal protein S6 phosphorylation in respons to insulin, kinetics (human), **161**, 797
- intact, G_i ADP-ribosylation and phosphorylation, effect of insulin (rat), **165**, 251
- isolated, phenylephrine-induced activation of glycoge phosphorylase, role of calcium (rat), **160**, 480
- ketogenesis, synergistic inhibition by insulin and cAM antagonist (rat), **159**, 741
- lipid peroxidation and cell membrane damage induced b oxygen radicals, role of protein kinase C (rat), **16** 836
- metabolic responsiveness to phorbol ester and protei kinase C activity after partial hepatectomy (rat), **15** 294
- multicellular spheroids formed in presence of liver-derive proteoglycans, albumin production, analysis (rat **161**, 385
- phosphatidylethanolamine biosynthesis, role of CD ethanolamine pathway (rat), **160**, 1275

urface galactosyl receptors, monensin- or chloroquine-induced loss, role of receptor internalization via clathrin-coated pit pathway (rat), **161**, 261
argeting of cathepsins D and H to lysosomes, inhibition by brefeldin A (rat), **163**, 220
ptake of epidermal growth factor-labeled liposomes (rat), **160**, 732
vasopressin-stimulated metabolism of inositol lipids, effect of tumor necrosis factor infusion (rat), **161**, 197
patopoietin A
NH_2-terminal amino acid sequence (rabbit blood), **163**, 1370
poxilin
metabolic products: isolation of 11-glutathionyl hepoxilin A_3 by reaction of hepoxilin A_3 with glutathione *S*-transferase, **163**, 1230
poxilin A_3
reaction with glutathione *S*-transferase, in isolation of hepoxilin metabolite 11-glutathionyl hepoxilin A_3, **163**, 1230
rbimycin A
irreversible inhibition of v-*src* tyrosine kinase activity, effects of sulfhydryl compounds (murine NIH 3T3 cells), **163**, 803
rpes simplex virus
infected cells, mRNA-associated proteins, structure (human), **164**, 355
replication, inhibition by cyclopentanone prostaglandin-induced proteins, mechanism (human embryonic fibroblasts), **158**, 189
type I
effect of 9-β-D-arabinofuranosyladenine, enhancement by dideoxyriboside derivatives of 2,6-diaminopurine, **159**, 61
immediate early gene trans-activation, specific inhibition by human recombinant interferons, **159**, 439
infected endothelial cells, protein synthesis restoration by lithium chloride (human), **160**, 1073
type II
BglII N fragment and subfragments, transfection of NIH 3T3 cells, effects on morphological transformation and mutagenesis at *hprt* locus, **159**, 1249
virion 165-kDa protein, epitope similarity with ICP4 regulatory protein (BHK cells), **163**, 124
Hexadecane
effect on epidermal ornithine decarboxylase (pig), **161**, 1291
-(*N*,*N*-Hexamethylene) amiloride
effect on ATP-dependent Cl^- uptake by plasma membrane vesicles from brain (rat), **160**, 469
Hexaprenyl diphosphate synthase, *see trans*-Pentaprenyl-*trans*transferase
Hexokinase, *see also* Glucokinase
degradation during reticulocyte maturation, analysis (rabbit), **162**, 612
Hexose monophosphate shunt
activity in C6 glioma cells, GC/MS analysis, **158**, 474
High choriolytic enzyme
proteolytic activity: tight binding to egg envelope (medaka), **162**, 158
High-performance liquid chromatography
Lichrospher 60 RP-8 column, partition coefficients and retention times of anti-HIV nucleoside analogs, role in estimation of lipophilicity, **158**, 413
Histamine
chloramine derivatives, formation, role in bronchoconstriction (guinea pig lung), **165**, 1018
formed in stimulated platelets, cytoplasmic origin (human), **164**, 164
stimulation of
Ca^{2+}-mediated protein phosphorylation in intact enterocytes, **165**, 810
endothelial cells, subsequent desensitization of inositol phosphate production, role of protein kinase C (human umbilical vein), **161**, 1064
Histamine H_1 receptors
role in short-term desensitization of phosphatidylinositol turnover (guinea pig), **162**, 733
Histatins
sequence analysis: evidence for encoding by loci *HIS*1 and *HIS*2 (human parotid gland), **160**, 495
Histidine
in EcoRI DNA methylase, modification, associated loss of enzymatic activity, **164**, 233
nonspecific elicitation of endothelium-dependent vascular relaxation at high dose (rat aorta), **158**, 177
residues, presence at active site of 2,3-dihydroxybenzoic acid decarboxylase (*Aspergillus niger*), **165**, 20
Histidine decarboxylase
interferon-induced activity in basophilic leukemic cells, prevention by coincubation with ADP-ribosyltransferase inhibitors (rat), **158**, 94
Histone H1 kinase
mitosis-specific, *in vitro* phosphorylation of tumor suppressor gene RB protein, **164**, 580
Histones
acetylated, interactions with DNA, analysis by ultraviolet laser-induced histone–DNA crosslinking (bovine thymus), **164**, 304
H1, phosphorylation
and dephosphorylation, effect on murine DNA primase activity (bovine), **160**, 711
by protein kinase C, inhibition by mono- and divalent cations (rat), **162**, 45
identification as putative nucleases associated with glucocorticoid-induced cell death of T-cell leukemia line (human), **162**, 30
methylation patterns, comparative effects of transcriptional inhibitors and heat shock (fruit fly), **162**, 1037
HIV, *see* Human immunodeficiency virus
Homocysteine
effect on MetR regulation of *met*E, *met*R, and *met*H expression *in vitro* (*Escherichia coli*), **163**, 79
Homologous restriction factor
20-kDa
of complement, similarity to T-cell-activating protein, **162**, 1553

    - complete deficiency and restoration with purified HRF20 (human erythrocytes), **164**, 468
- Hormonotoxins
  - superactive, preparation with truncated diphtheria toxin and luteinizing hormone (murine tumor cells), **163**, 161
- Horseradish peroxidase
  - –single-stranded DNA-binding protein conjugate, in detection of total DNA, **165**, 474
- HTLV-I, *see* Human T-cell leukemia virus type I
- Human chorionic gonadotropin
  - secretion by JAR choriocarcinoma cells, effects of interleukin 1α and tumor necrosis factor α (human), **164**, 284
  - α subunit
    - carbohydrate moiety, processing by first trimester placenta tissue, effects of cyclic nucleotides (human), **159**, 26
    - and β subunit synthesis, effects of adenine nucleotides, **160**, 6
- Human immunodeficiency virus, *see also* Acquired immune deficiency syndrome
  - associated protease, inhibition by cerulenin and analogs, **163**, 980
  - augmented gene expression in MOLT-4 cells, effect of interleukin 1 (human), **165**, 715
  - enhancer binding activity in T cells, activation by mild detergents (human), **162**, 238
  - envelope glycoprotein gp120, binding to soluble CD4, immunoassay, **163**, 172
  - *env* and *tat* gene products, stable expression in specially prepared human cell lines, **161**, 305
  - infection, enhanced therapeutic efficacy of zidovudine prodrug (human, mouse), **160**, 656; *erratum*, **162**, 1591
  - infectivity
    - and cytopathic effect, inhibition by water-soluble lignin in extract from culture medium of *Lentinus edodes* mycelia, **160**, 367
    - inhibitor 2′,3′-dideoxycytidine, erythrocytes as bioreactors for release (human), **164**, 446
  - inhibitor 3′-azido-2′,3′-dideoxyribosylthymine, structure and conformation, NMR analysis, **164**, 1086
  - long terminal repeat-recognizing enhancer-binding proteins, detection by *in situ* gel retardation, **160**, 268
  - nucleoside analog inhibitors, partition coefficients and retention times on Lichrospher 60 RP-8 HPLC column, role in estimation of lipophilicity, **158**, 413
  - production in infected cells, inhibitory effects of *gag* protein antimyristoylation with *N*-myristoyl glycinal diethylacetal, **165**, 1145
  - provirus, detection of unusual DNA structures at integration site, **161**, 134
  - replication in cultured T4 cells
    - inhibition by 3′-fluoro-modified nucleosides with low cytotoxicity (human), **165**, 488
    - phorbol ester-induced augmentation, effects of protein kinase C inhibitors (human), **164**, 339
    - tumor necrosis factor-induced enhancement (human), **158**, 307
  - reverse transcriptase, inhibition by 5,6,7-trihydroxyfl vone, **160**, 982
  - type 1
    - anti-retroviral activity of 2′,3′-didehydro-2′,3′-dideox 5-chlorocytidine, analysis (MT-4 cells), **164**, 1190
    - associated protease
      - affinity purification, **164**, 955
      - continuous spectrophotometric assay, **163**, 1079
      - crystallizable, derivation from bacterial expression o viral *pol* gene, **165**, 1043
      - gene, chemical synthesis and expression in *Esche richia coli*, **159**, 87
      - high-level expression with synthetic gene (*Escherich ia coli*), **161**, 1056
      - highly conserved arginine 87, substitution mutation resulting loss of proteolytic activity, **164**, 30
      - peptide substrates and inhibitors, analysis, **159**, 42
    - induction of giant cell formation in MOLT-4 cells, effec of pH (human), **158**, 973
    - inhibition
      - by 2′,3′-dideoxy nucleosides, role of *anti* conforma tion: evidence from 2′,3′-dideoxyformacin A crys tal structure, **161**, 910
      - highly specific, in T4 cell cultures by 6-substitute acyclouridine derivative (human), **165**, 1375
    - production *in vitro*, effects of erythro-9(2-hydroxy-3 nonyl) adenine, **164**, 345
    - proviral DNA synthesis and RNA accumulation, inhib tion by mismatched dsRNA (H9 cells), **158**, 943
    - reverse transcriptase-catalyzed DNA synthesis, stereo chemical course, analysis, **163**, 106
    - *rev* protein, functional similarity to HTLV-I *rex* protein **162**, 963
    - *tat* gene, chemical synthesis and expression in cell-fre system (HeLa cells), **160**, 1429
  - type 2, anti-retroviral activity of 2′,3′-didehydro-2′,3′ dideoxy-5-chlorocytidine, analysis (MT-4 cells), **164** 1190
  - zidovudine antiviral activity, augmentation by vitamin E (human lymphocytes), **165**, 401
- Human papillomavirus type 16
  - E6 protein, expressed in *Escherichia coli*, purification an DNA-binding properties, **164**, 1402
- Human T-cell leukemia virus type I
  - minus strand, transcription in infected T cells (human) **163**, 1006
  - *rex* protein, functional similarity to HIV-I *rev* protein, **162** 963
- Human T-cell lymphotropic virus type I, *see* Human T-cel leukemia virus type I
- Hybridization
  - dot-blot, with synthetic oligonucleotides, in titration o variant DNA sequences differing by single point mu tation (human), **159**, 1233
- Hybrid selection
  - antiproliferative mRNA from liver, associated cDNA, iso lation (rat), **164**, 1316
- Hydralazine
  - suppression of atrial natriuretic peptide gene expression i ventricles (spontaneously hypertensive rat), **160**, 310

drochloric acid
  reatment of pyrroloquinoline quinone, promotion of tautomeric lactonization and oxidation–reduction, **163**, 755
drogen
  ATP-dependent transport
    in synaptosomal membrane vesicles of brain, analysis (rat), **159**, 1045
    vanadate-insensitive, in urinary bladder epithelial membrane vesicles, inhibition by NBD-Cl (turtle), **161**, 312
  $-Na^+$ antiport
    activation, role of cAMP, analysis (murine macrophages), **165**, 131
    blockage, inhibition of fibrinogen binding to platelets (human), **161**, 1228
    during egg fertilization, effects of protein kinase inhibitors (sea urchin), **161**, 1100
  $-Na^+$ exchange
    apical and basolateral, in renal epithelial cells, separate regulatory control, **165**, 833
    in lymphocyte plasma membrane, role in aldosterone effects on intracellular electrolytes (human), **164**, 961
    system in brush border membranes from cortical and medullary proximal tubule, analysis (rabbit kidney), **163**, 269
ydrogenase
  activity of sulfate reducing and methanogenic bacteria, effects of acetylene, **161**, 127
  metal composition analysis by proton-induced X-ray emission spectroscopy (*Thiocapsa roseopersicina*), **162**, 422
ydrogen peroxide
  formation
    in plasma membrane, relationship to leukotoxin biosynthesis (porcine neutrophils), **161**, 1077
      in synaptosomes, ionomycin-promoted, reversibility (guinea pig brain), **165**, 1104
    tumor necrosis factor-α-induced, effects of pertussis toxin and extracellular Ca^{2+} removal (human neutrophils), **159**, 763
  and glycylglycyl-L-histidine nickel(II) complex, production of superoxide and hydroxyl radicals and singlet oxygen, ESR spectroscopic analysis, **159**, 445
  and superoxide, generated in xanthine/xanthine oxidase system, reactions of chloroperoxidase with, **159**, 1086
ydrogen transfer
  in NAD(P)H-dependent enzymatic reactions, chemical nature, micellar model for investigation, **159**, 1330
ydrolysis
  leukotriene A_4 and epoxytetraenes, stabilization by liposomes, **159**, 477
  phosphatidylinositol in myelin membranes, stimulation by guanine nucleotides (human), **162**, 282
  phosphoinositides
    and arachidonic acid release stimulated by endothelin in vascular smooth muscle cells, dissociation by phorbol ester (rabbit), **160**, 868
    associated TRH receptors, pharmacological characterization (GH_3 cells), **161**, 1306
    in bradykinin-stimulated endothelial cells, dissociation from phospholipase D activation by long-term phorbol ester treatment (bovine), **165**, 319
    in cultured smooth muscle cells, phospholipase C-mediated, stimulation by endothelin (rabbit aorta), **159**, 1072
    mediation of vasopressin-stimulated Ca^{2+} influx in smooth muscle cells (rat), **161**, 677
Hydroperoxides
  phospholipid, vesicles with, lifetime distributions of 1,6-diphenyl-1,3,5-hexatriene, **164**, 169
Hydroperoxyeicosatetraenoic acid
  specific high-affinity binding by liver fatty acid-binding protein (rat), **161**, 448
5(*S*)-Hydroperoxyeicosatetraenoic acid
  inactivation of potato lipoxygenase, role of epoxide intermediate, **164**, 1384
15(*S*)-Hydroperoxyeicosatetraenoic acid
  inactivation of potato lipoxygenase, role of epoxide intermediate, **164**, 1384
9(*S*)-Hydroperoxyoctadecatrienoic acid
  inactivation of potato lipoxygenase, role of epoxide intermediate, **164**, 1384
  role as suicide substrate of soybean lipoxygenase, **162**, 1357
Hydrophobic moment
  relationhip to secondary structures of lingual and pancreatic lipases, circular dichroism studies (rat), **162**, 95
3-Hydroxyacyl-CoA epimerase, *see* 3-Hydroxybutyryl-CoA epimerase
Hydroxyacylglutathione hydrolase
  effects of mating factor (yeast), **165**, 1091
11β-Hydroxyandrostenedione
  isolation from testicular vein blood (boar), **162**, 1194
3-Hydroxybutyryl-CoA epimerase
  peroxisomal activity, role of combined actions of enoyl-CoA hydratases (rat liver), **160**, 988
25-Hydroxycholesterol
  mediated suppression of 3-hydroxy-3-methylglutaryl-CoA reductase mRNA levels in cultured cells, role of protein synthesis (hamster), **161**, 267
26-Hydroxycholesterol
  formation in renal mitochondria, catalysis by cytochrome P450 (pig), **159**, 1135
Hydroxyeicosatetraenoic acid
  specific high-affinity binding by liver fatty acid-binding protein (rat), **161**, 448
1-[(2-Hydroxyethoxy)methyl]-6-phenylthiothymine
  highly specific inhibition of HIV-1 in T4 cell cultures (human), **165**, 1375
Hydroxylamine
  mediation of vascular relaxation: conversion to nitrites and mechanism of endothelium-dependent vascular relaxation (rat aorta), **164**, 889
  vasorelaxant properties and role as intermediate in L-arginine oxidative conversion to nitric oxide (rat), **163**, 527

- Hydroxylation
  - acetanilide by cytochrome P450d, regiospecificity, effects of mutations at distal and proximal sites of enzyme (yeast), **160**, 669
  - leukotriene B_4 in leukocytes from various mammals, analysis: identification of major metabolite and relative importance of 19- and 20-hydroxylations, **159**, 1283
- Hydroxyl radicals
  - detection in mitochondria of ischemic-reperfused myocardium by trapping with salicylate (rat), **165**, 1004
  - direct scavenging by captopril, analysis, **158**, 52
  - generation
    - during glutathione reductase-catalyzed reduction of chromium(VI), **163**, 627
    - from hydrogen peroxide and glycylglycyl-L-histidine nickel(II) complex, ESR spectroscopic analysis, **159**, 445
    - in ischemic and reperfused myocardium, continuous-flow ESR monitoring with 3,3,5,5-tetramethyl-1-pyrroline-1-oxide spin trap (rat), **164**, 1274
    - in neutrophil plasma membranes, relationship to leukotoxin biosynthesis (pig), **161**, 1077
- Hydroxymethylglutaryl-CoA reductase (NADPH)
  - mRNA levels in cultured cells, sterol-mediated suppression, role of protein synthesis (hamster), **161**, 267
- α-Hydroxy-*N*-nitrosopiperidine phosphate ester
  - directly mutagenic, formation by near-ultraviolet irradiation of *N*-nitrosopiperidine in phosphate buffer, **162**, 1140
- 17α-Hydroxyprogesterone
  - purification from preovulatory ovarian follicular fluid and role in inducing acrosome reaction (human), **160**, 828
- 2β-(3-Hydroxypropoxy)-1α,25-dihydroxyvitamin D_3
  - regulation of calcium metabolism (rat), **163**, 1444
- Hydroxypyruvate reductase
  - NADH-dependent, identification as member of family of 2-hydroxyacid dehydrogenases (cucumber), **165**, 1371
- Hydroxysteroid sulfotransferase, *see* Alcohol sulfotransferase
- Hydroxytamoxifen
  - regulation of epidermal growth factor receptors in human breast cancer MCF-7 cells, **159**, 126
- 11β-Hydroxytestosterone
  - isolation from testicular vein blood (boar), **162**, 1194
- Hypercalcemia
  - role of circulating parathyroid hormone-like bioactivity, analysis in model of humoral hypercalcemia of malignancy (mouse), **161**, 1166
- Hypericin
  - specific inhibition of protein kinase C, relationship to antiretroviral activity (mouse, rat), **165**, 1207
- Hyperoxia
  - pulmonary artery smooth muscle cells, protective effect of butyrate, role of increased catalase activity (rat), **164**, 1143
- Hypersensitivity
  - leukotriene-mediated, relationship to leukotriene metabolism in serum (human, mouse), **164**, 626
- Hypertension
  - essential, neutrophils from affected patients, enhanced a
    tivation of respiratory burst oxidase, **158**, 966
  - spontaneous
    - association with increased immunoreactive neuropepti
      Y levels in platelets (rat), **165**, 1399
    - effect on endothelin levels in renal inner medulla (ra
      162, 38
    - impaired β-adrenoceptor desensitization in myocardiu
      of affected rats, role of cytosolic factors, **159**, 103
- Hypochlorous acid
  - direct scavenging by captopril, analysis, **158**, 52
- Hypohalite radicals
  - direct scavenging by captopril, analysis, **158**, 52
- Hypothalamus
  - perifused, arginine–vasopressin release, effect of endoth
    lin 1 (rat), **163**, 1332
  - produced parotid hormone-releasing factor, biological an
    chemical evidence for existence (pig), **159**, 899
  - release of β-endorphin *in vitro*, effects of isoprotereno
    dopamine, corticotropin-releasing factor and arginine
    vasopressin (rat), **161**, 221
  - ventromedial, lesion-induced obesity, association with i
    creased levels of hepatic apolipoprotein B mRN
    (rat), **163**, 1107
- Hypothyroidism
  - effect on vasoactive intestinal peptide interaction with i
    testinal epithelial cells (rat), **162**, 701
  - primary, effects on secreted thyrotropin sialylation and su
    fation (mouse), **159**, 755
- Hypotonic shock
  - activation of fibroblast chloride transport (human), **16**
    1330
- Hypoxia
  - induced hepatic injury, subsequent generation of reacti
    oxygen species by mitochondria and xanthine oxidas
    (rat), **160**, 140
  - induced pulmonary vasoconstriction, enhancement by i
    hibition of endothelium-derived relaxing factor (rat
    164, 1198
  - as risk factor for doxorubicin-induced cardiotoxicity, NM
    evaluation (rat heart), **163**, 682

I

- Idarubicin
  - effect on reconstituted mitochondrial tricarboxylate carri
    (rat liver), **164**, 1281
- Idoxuridine
  - induction of stem cell differentiation by inhibition of DN
    synthesis, specific counterbalancing by normal nucl
    osides (F9 teratocarcinoma cells), **163**, 1290
- IgGsorb
  - precipitation of phosphotyrosine-containing proteins in a
    sence of antibody (human placenta), **159**, 332
- Iloprost
  - effect on phosphorylation of immunologically ras-relat
    protein in erythroleukemia cells (human), **161**, 972

dazole
  nduced tyrosinase expression in B16 melanoma cultures, comparative effects of retinoic acid and triiodothyronine (mouse), **162**, 288
mune response
  humoral, to liposomal antigens, suppression by prostaglandin and thromboxane in liposomes (rabbit), **160**, 565
  suppression *in vitro* by α-mannosidase inhibitor plantagoside isolated from *Plantago asiatica* seeds (mouse), **165**, 1292
munoassay
  endothelin in plasma: marked elevations in cardiogenic shock patients, **161**, 562
  particle concentration fluorescent, binding of HIV glycoprotein to soluble CD4 in solution, **163**, 172
mmunoenzymatic assay
  with monoclonal antibodies, in interspecific analysis of alcohol dehydrogenase (fruit fly), **160**, 638
  noncompetitive, for peptides, evaluation, **160**, 40
mmunoglobulins
  covalently bound to glycosylated prolactin species, detection in amniotic fluid (human), **165**, 299
  encoding genes, rearranged, rapid cloning from hybridoma cells with mixed primers and polymerase chain reaction (human), **160**, 1250
  IgA, secretory, induced by synthetic peptide P50-75, neutralization of cholera toxin (mouse), **159**, 707
  IgG
    –drug–polymer conjugate, disulfide linkage in, stabilization by microenvironmental control, **164**, 1234
    and IgM, production in peripheral blood mononuclear cells, proliferation-independent promotion by 1-oleoyl-2-acetylglycerol (human), **161**, 1319
    murine–human chimeric, occurrence of murine-type oligosaccharides in, **164**, 245
    surface-bound, activation of neutrophils, role of pertussis toxin-insensitive G protein (human), **164**, 983
nmunoliposomes
  highly efficient, preparation method compatible with various lipid compositions, evaluation (mouse), **165**, 1272
ndo-1
  intracellular, non-calcium interactions, spectral evidence (murine spleen cells), **163**, 328
−)-Indolactam V
  activation of protein kinase C and induction of changes in muscarinic receptor functions (human neuroblastoma cells), **162**, 1207
ndole-3-pyruvate
  measurement and mass spectral identification (tomato shoots), **162**, 761
ndomethacin
  alteration of kinetics of phorbol myristate acetate-induced c-*fos*, *egr-1*, and c-*myc* gene expression in confluent fibroblasts (mouse), **161**, 508
Infarction
  myocardial, associated reoxygenation injury, mechanism: implications of myoglobin redox cycle (rat), **160**, 1162
Inflammation
  effect on translational regulation of ferritin synthesis in spleen (rat), **160**, 453
  neurological regulation, role of substance P priming of neutrophil activation (human), **161**, 520
Inhibin
  α-subunit monomer from follicular fluid, isolation and characterization (bovine), **159**, 1323
Inorganic phosphate
  cerebral levels, effects of hyperammonemia, ^{31}P NMR spectroscopy (rat), **159**, 815
  –sodium cotransport in renal brush border membranes, adaptive increase elicited by thyroid hormone, blockage by dexamethasone (rat), **161**, 1160
  and water, oxygen exchange catalyzed by yeast inorganic pyrophosphatase, pathways, **161**, 475
Inorganic pyrophosphatase
  phosphate/water oxygen exchange, pathways (yeast), **161**, 475
Inosine
  containing oligonucleotide primers, mutation-specific, in detection of *ras* point mutations by polymerase chain reaction (EJ cells, human blood), **160**, 441
myo-Inositol
  derived mechanism-based glucosidase inactivator conduritol aziridine, synthesis and testing (*Alcaligenes faecalis*, yeast), **163**, 495
  and ethanol, effects on cAMP levels in *Candida tropicalis*, **162**, 646
Inositol 1,2-cyclic 4,5-trisphosphate
  and inositol 1,4,5-trisphosphate, mobilization of intracellular calcium stores in acinar cells, comparison (murine pancreas), **159**, 561
Inositol hexaphosphate
  and bezafibrate, stabilization of hemoglobin T state (human), **165**, 226
Inositol lipids
  metabolism in vasopressin-stimulated hepatocytes, effect of tumor necrosis factor infusion (rat), **161**, 197
Inositol phosphates
  cyclic and noncyclic, formation by phospholipase C isozymes in different ratios (bovine brain), **163**, 177
  production in
    A10 smooth muscle cells, endothelin-mediated, inhibition by nicardipine, **160**, 758
    endothelial cells, desensitization after agonist stimulation, role of protein kinase C (human umbilical vein), **161**, 1064
    erythroleukemia cells, neuropeptide Y-induced increase, correlation with intracellular calcium mobilization (human), **165**, 1138
    NG108-15 cells, effects of bradykinin, GTPγS, R59022, and *N*-ethylmaleimide, **165**, 175
Inositol phospholipids
  nuclear levels in intact cells, effects of insulin-like growth factor I (Swiss 3T3 cells), **159**, 720
Inositol 1,3,4,5-tetrakisphosphate
  binding site identification in parathyroid glands (bovine), **159**, 200

- Inositol 1,4,5-trisphosphate
  - binding site identification in parathyroid glands (bovine), **159**, 200
  - dependent Ca mobilization, α-adrenergic- and cholinergic-stimulated, dissociation at post-receptor level (rat parotid cells), **162**, 347
  - endogenous, radioreceptor assay (rat brain), **159**, 976
  - generation in OK cells, correlation with parathyroid hormone inhibition of Na$^+$/phosphate cotransport, **158**, 951
  - independent increase of intracellular free calcium and amylase secretion in pancreatic acini (rat), **164**, 8
  - induction of calcium release
    - in smooth muscle cells, effect of heparin (rabbit trachea), **163**, 262
    - from vacuoles, analysis (*Neurospora crassa*), **162**, 852
  - and inositol 1,2-cyclic 4,5-trisphosphate, mobilization of intracellular calcium stores in acinar cells, comparison (murine pancreas), **159**, 561
  - intracellular levels, effects of prostaglandin $F_{2\alpha}$ and thromboxane A_2, role in direct activation of glycogenolysis (rat hepatocytes), **163**, 1235
  - role in endothelin action on vascular smooth muscle cells (rabbit aorta), **158**, 86
  - transient accumulation during vasopressin stimulation, correlation with intracellular calcium mobilization (WRK$_1$ cells), **159**, 953
- Insulin
  - activation of membrane kinase activating factor FA, promotion of ATP.Mg-dependent phosphatase activation (rat adipocytes), **158**, 762
  - and cAMP antagonist, synergistic inhibition of hepatic ketogenesis (rat), **159**, 741
  - effects on
    - endothelial cell survival *in vitro* (rat heart), **162**, 1010
    - G$_i$ ADP-ribosylation and phosphorylation in intact hepatocytes (rat), **165**, 251
    - malic enzyme in cultured fetal hepatocytes (rat), **161**, 1028
  - induced S6 ribosomal protein phosphorylation by HepG-2 cells, kinetics (human), **161**, 797
  - internalization and degradation by human insulin receptor–v-*ros* hybrid (CHO cells), **158**, 705
  - and lipolytic hormones, stimulation of same phosphodiesterase isoform in adipose tissue (rat), **162**, 814
  - modulation of epidermal growth factor-induced proliferation and receptor binding in cultured intestinal epithelial cells (rat), **161**, 414
  - pancreatic production *in vitro*, effect of 1α,25-dihydroxyvitamin D$_3$ (neonatal rat), **164**, 413
  - producing cells, recovery from elevated cytoplasmic Ca^{2+}, augmentation by protein kinase C activation, role of Ca^{2+} efflux stimulation, **165**, 416
  - regulatory effect on malic enzyme expression in fetal brown adipocyte primary cultures (rat), **163**, 341
  - secretion
    - glucose-stimulated
      - from isolated pancreatic islets, inhibition by islet amyloid polypeptide (rat), **160**, 961
      - and plasma levels, effects of synthetic C-termin fragment of pancreastatin (rat), **158**, 844
    - by pancreatic islets, stimulation by wasp venom ma toparan, role of pertussis toxin-sensitive GTP-bindi protein (rat), **158**, 712
    - by perifused and electrically permeabilized islets, e fects of calcium, cAMP, and phorbol ester (rat), **16** 998
    - stimulation by transforming growth factor β (rat), **15** 1060
  - and serum, differential regulation of distribution glycosyl-phosphatidylinositol-anchored proteins BC$_3$H1 myocytes and 3T3-L1 pre-adipocytes, **16** 824
  - stimulated calmodulin phosphorylation and -independe insulin receptor autophosphorylation, mediation b carboxyl terminal segment of human c-Ki-*ras* 2 ge product, **161**, 399
  - stimulated glucose transport, suppression by calciton gene-related peptide (L6 myocytes), **164**, 461
- Insulin-like growth factor
  - binding proteins
    - BP-25, expression by breast cancer cells (human), **15** 38
    - in cultured astroglial and neuronal cells, characterizati (rat), **159**, 1316
    - from human cerebrospinal fluid, 34-kDa, identificati as homolog to rat BRL-3A binding protein, **163**, 875
    - identification in adult rat serum, **165**, 189
    - IGF-BP3, cDNA structure and tissue distribution mRNA (rat), **165**, 907
  - carrier proteins, release by osteoblasts: stimulation by e tradiol and growth hormone (rat), **160**, 788
- Insulin-like growth factor I
  - amino terminal tripeptide Gly–Pro–Glu, identification neuroactive peptide (rat), **165**, 766
  - binding by glomerular endothelial and epithelial cell analysis (murine kidney), **163**, 952
  - binding protein, identification in serum from rats with di betes mellitus, **163**, 882
  - and corticotropin, synergistic effects on corticotropin r ceptors and corticotropin responsiveness in culture adrenocortical cells (bovine), **165**, 355
  - effect on nuclear inositol phospholipid levels in intact cel (Swiss 3T3 cells), **159**, 720
  - human, infusion during malnourished state, reduction hepatic IGF-I mRNA abundance (rat), **160**, 795
  - mRNA splicing variants, expression and stability (GH cells), **162**, 1174
  - production and receptor binding in medullary thyroid ca cinoma cell line, analysis (rat), **161**, 589
  - secretion by clonal osteoblastic UMR106 cells, stimulatio by estradiol *in vitro* (rat), **158**, 407
  - stimulation of elastin synthesis in pulmonary arteri smooth muscle cells (bovine), **160**, 382
  - storage in egg yolk (chicken), **162**, 1167
- Insulin-like growth factor II
  - –mannose 6-phosphate receptor, interactions with recomb nant and platelet transforming growth factor-β1 pr cursor (rat), **160**, 393

secretion by clonal osteoblastic UMR106 cells, stimulation by estradiol *in vitro* (rat), **158**, 407
sulin-like growth factor I receptors
  associated tyrosine kinase activity, phosphorylation of pp-120 in AS-30D hepatoma cells (rat), **160**, 168
  and insulin receptors, abundance in adrenal gland, comparison (hamster, human, and rat), **165**, 204
  regulation by corticotropin and angiotensin II *in vitro* (bovine adrenocortical cells), **163**, 32
sulin mediator
  prepared from insulin-treated hepatocytes, effects on cGMP-activated and insulin-activated cAMP phosphodiesterases, **156**, 290; *erratum*, **158**, 1072
sulin receptors
  associated tyrosine kinase activity, phosphorylation of pp-120 in AS-30D hepatoma cells (rat), **160**, 168
  dephosphorylation in adipocytes, effect of manganese and role of receptor kinase (rat), **162**, 1200
  and glucose transporter, colocalization in microsomes of insulin-treated adipocytes (rat), **159**, 1368
  human
    monoclonal antibodies, spectrum of biological effects in transfected 3T3/HIR fibroblasts, relationship to receptor kinase, **165**, 212
    receptor v-*ros* hybrid molecule, internalization and degradation in CHO cells, **158**, 705
  induction by sodium butyrate in Burkitt lymphoma cell Raji, **161**, 101
  insulin-independent autophosphorylation, stimulation by carboxyl terminal segment of human c-Ki-*ras* 2 gene product (rat liver), **161**, 399
  and insulin-like growth factor-I receptors, abundance in adrenal gland, comparison (hamster, human, rat), **165**, 204
  mRNA
    alternative splicing (human), **159**, 312
    heterogenity, analysis by ribonuclease H mapping (human, rat), **159**, 664
    levels in hepatoma cells, effects of glucose concentration (human), **160**, 1415
  mutated, binding kinetics in transfected CHO cells grown in suspension culture, **164**, 191
  190-kDa activated precursor, detection of exogenous substrate phosphorylation and dimer formation *in vitro* (IM-9 lymphocytes), **160**, 296
  overexpression in pre-B acute lymphocytic leukemia cell line, correlation with t(1;19) chromosome translocation near insulin receptor locus (human), **159**, 1275
  β-subunit extracellular domain, analysis with polyclonal antipeptide antibodies (human, rat), **162**, 1236
  tyrosine kinase activity in adipocytes, decrease during aging (rat), **160**, 303
  tyrosyl kinase, 60-kDa substrate, identification by binding to GDP–agarose in NIH-3T3 cells transfected with human insulin receptor (mouse), **158**, 743
ntegrin
  accumulation at myoblast cell surface, effects of glycoprotein processing inhibitors (chicken, rat), **163**, 1338
Intercellular adhesion molecule 1
  expression by endothelial cells, modulation by protein kinase C activation (human umbilical vein), **161**, 945
  induction by sodium butyrate in Burkitt lymphoma cell Raji, **161**, 101
Interferon α
  IFN-α1 and -α4, biological activity, influences of distinct N-terminal regions (mouse), **164**, 22
  induction of histidine decarboxylase in basophilic leukemic cells, prevention by coincubation with ADP-ribosyltransferase inhibitors (rat), **158**, 94
  recombinant, specific inhibition of herpes simplex virus type 1 immediate early gene trans-activation (human), **159**, 439
Interferon α2
  effect on fluorouracil-induced inhibition of thymidylate synthase (HL-60 cells), **163**, 867
Interferon γ
  recombinant, specific inhibition of herpes simplex virus type 1 immediate early gene trans-activation (human), **159**, 439
Interferons
  induced early changes in nuclear protein interactions with interferon consensus sequence, analysis (HeLa cells), **163**, 370
  inducers, effects on microsomal superoxide anion generation, detection by lucigenin chemiluminescence (rat liver), **161**, 1042
Interleukin 1
  effect on augmentation of HIV gene expression (MOLT-4 cells), **165**, 715
  induction of monocyte chemotactic and activating factor production in fibroblasts (human), **160**, 1403
  inhibition of gastric acid secretion, role of prostaglandin E_2 (rat), **162**, 1578
  lethality in adrenalectomized or actinomycin D-sensitized mice, protective effect of chlorpromazine, **165**, 942
  lipopolysaccharide-induced production by peritoneal macrophages, suppression by intracellular accumulation of cholesteryl esters (rat), **160**, 874
  stimulated porcine cartilage degradation *in vitro*, partial inhibition by transforming growth factor β (human), **162**, 144
  and tumor necrosis factor, synergistic stimulation of prostaglandin synthesis and phospholipase A2 release from mesangial cells (rat kidney), **159**, 385
Interleukin 1α
  effects on
    adrenocorticotropic hormone release *in vivo*, comparison with human IL-1α (rat), **164**, 1262
    human chorionic gonadotropin secretion by JAR choriocarcinoma cells (human), **164**, 284
    tumor necrosis factor lethal action (human, mouse), **163**, 378
  and IL-1β
    central activation of thermogenesis and fever, comparison (rat), **162**, 591
    suppression of follicle-stimulating hormone-induced differentiation of rat ovarian granulosa cells, comparison (human), **163**, 764

- induced lymphocyte migration *in vitro*, potent and specific inhibition by calcium channel antagonists (human), **165**, 349

Interleukin 1β
- effect on lethal action of tumor necrosis factor (human, mouse), **163**, 378
- gene expression, lack in macrophages of unresponsive C3H/HeJ mouse strain, role of calmodulin-binding protein defect, **158**, 723
- human recombinant, from *Escherichia coli* and yeast, effects of conformation differences on biological activity, **162**, 357
- identification as dominant IL-1 form released by peritoneal macrophages (mouse), **160**, 404
- and IL-1α
  - central activation of thermogenesis and fever, comparison (rat), **162**, 591
  - suppression of follicle-stimulating hormone-induced differentiation of rat ovarian granulosa cells, comparison (human), **163**, 764
- induced lymphocyte migration *in vitro*, potent and specific inhibition by calcium channel antagonists (human), **165**, 349
- inhibition of thyrotropin-releasing hormone-stimulated prolactin secretion and phosphoinositide metabolism (rat pituitary cells), **165**, 496
- natural, regulatory effects on bone-derived cells *in vitro* (human), **159**, 1242
- recombinant, effects on phospholipase A_2 activity and mRNA levels, and on eicosanoid formation (rabbit chondrocytes), **165**, 1079
- stimulation of phospholipase A_2 mRNA synthesis in articular chondrocytes (rabbit), **164**, 488

Interleukin 2
- dependent T lymphocytes, apoptosis, inhibition by phorbol esters (mouse), **164**, 1069
- effect on adrenocorticotropic hormone release *in vivo*, comparison with human IL-2 (rat), **164**, 1262
- production, and protein phosphorylation, interleukin-2 receptor expression, and cellular proliferation in lymphocytes oxidized by periodic acid, temporal progression (rat), **158**, 590
- related molecules, visualization in 1-methyl-4-phenylpyridinium-lesioned brain (rat), **165**, 1312

Interleukin 3
- genes, multicopy introduction and high-level expression by retroviral vector superinfection (ψ2, NIH/3T3 cells), **158**, 576
- stimulated 33-kDa protein rapidly phosphorylated in IL-3-dependent cells, characteristics (mouse), **164**, 520
- stimulation of phosphatidylcholine turnover in murine mast/megakaryocyte cell line, **164**, 804

Interleukin 4
- effect on neonatal B-cell tolerance (mouse), **164**, 199

Interleukin 6
- continuous perfusion, enhancement of hematopoietic stem cell production (mouse), **159**, 933
- gene expression in endothelial cells: RNA start sites, multiple IL-6 proteins, and inhibition of proliferation (human umbilical vein), **159**, 991
- produced in response to differentiation-inducing factor and 1α,25-dihydroxyvitamin D_3, role in macrophage differentiation of myeloid leukemia cells (mouse), **158**, 660
- production by osteogenic cells, stimulation by parathyroid hormone and PTH-like protein (rat), **162**, 1546
- strongly neutralizing monoclonal antibody, establishment and epitope analysis (human), **165**, 728

Interleukin 8
- induced lymphocyte migration *in vitro*, potent and specific inhibition by calcium channel antagonists (human), **165**, 349

Interleukin-2 receptors
- β-chain (p75), and prolactin, growth hormone, erythropoietin, and interleukin-6 receptors, common binding domain, analysis, **164**, 788
- expression
  - and protein phosphorylation, interleukin-2 production, and cellular proliferation in lymphocytes oxidized by periodic acid, temporal progression (rat), **158**, 590
  - in T-cells during lymphatic regeneration *in vivo*, analysis (mouse), **160**, 181
- p55 and p70/75 subunits, differential induction (human lymphocytes), **164**, 686

Interleukin-3 receptors
- on multifactor-dependent cell line, characterization (human), **161**, 16

Interleukin-6 receptors
- and prolactin, growth hormone, and erythropoietin receptors, and p75 interleukin-2 receptor β-chain, common binding domain, analysis, **164**, 788

Interproton distances
- in macromolecular systems, estimation from nuclear Overhauser enhancement data: quadratic approach, **159**, 886

Intestine
- colonic mucosa, glycopeptides, localization of *N*-acetylneuraminic acid and *N*-glycolylneuraminic acid after carrageenan and 1,2-dimethylhydrazine treatment (rat), **159**, 452
- endothelin 3 levels, measurement by sandwich enzyme immunoassay (rat), **164**, 74
- ischemia, associated increase in blood levels of platelet-activating factor (dog), **158**, 353
- small
  - cholinergic and noncholinergic neurotransmission, inhibitory action of atrial natriuretic factor (guinea pig), **164**, 638
  - detection of glucagon-(1–21)-like immunoreactive substance (dog), **165**, 1010

5-Iodo-2′-deoxyuridine, *see* Idoxuridine

2-*p*-Iodophenyl-3-*p*-nitrophenyl-5-phenyltetrazolium chloride
- reduction by NAD(P)H, catalysis by micellar detergent implications for analyzing chemical nature of enzymatic hydrogen transfer, **159**, 1330

Iodothyronine deiodinase
- type I, comparison with protein disulfide-isomerase (rat liver), **162**, 857

channels
  cerebellar granule cell, *N*-methyl-D-aspartate-activated, changes with time in culture (rat), **165**, 481
  formation in erythrocyte membranes by synthetic peptide with sequence of electric ray M2δ transmembrane domain of human nicotinic acetylcholine receptor, **162**, 352
  stretch-activated, identification in cultured mesangial cells (rat kidney), **159**, 516
  voltage-gated cation-selective, formation in lipid bilayers by mast cell degranulating peptide, **163**, 155
nomycin
  promoted synaptosomal hydrogen peroxide production, reversibility (guinea pig brain), **165**, 1104
  stimulation of phospholipase D-like mechanism in pancreatic islet cells (rat), **163**, 922
nomycine
  and phorbol ester, differential induction of p55 and p70/75 interleukin-2 receptor subunits (human lymphocytes), **164**, 686
nophores
  A23187, aggregation in phospholipid vesicles into stacked dimeric pore, **158**, 891
  synthetic, TI30R2, calcium-dependent activation of neutrophils (human), **163**, 209
n permeation
  renal membrane, amphotericin B-induced changes: nephrotoxicity model (rabbit), **159**, 1165
on
  binding to α-tocopherol-containing phospholipid liposomes, analysis, **160**, 834
  effect on translational regulation of ferritin synthesis in spleen (rat), **160**, 453
  ferrous, requirement for tyrosine hydroxylase activity (rat), **161**, 211
  intramolecular location in hydrogenase, proton-induced X-ray emission spectroscopic study (*Thiocapsa roseopersicina*), **162**, 422
  –molybdenum cofactor
    of nitrogenase, Mössbauer spectroscopy of oxidized and semi-reduced states (*Azotobacter vinelandii*), **162**, 882
    purification and spectroscopic characterization in *N*-methylformamide (*Azotobacter vinelandii*), **163**, 746
  oxidation/ligation/spin state, effect on heme orientational preference in myoglobin, ^{1}H NMR study (sperm whale, tuna), **158**, 462
  stimulation of free radical-mediated porphyrinogen oxidation by hepatic and renal mitochondria (rat), **160**, 101
  testosterone-binding microsomal cytochromes P450, age-related changes in spin state (rat liver), **158**, 480
schemia
  associated increase in blood levels of platelet-activating factor (canine intestine), **158**, 353
  induction of externalization of endothelin 1 binding sites in cardiac membranes (rat), **164**, 1220
  and reflow *in vivo*, associated glutathione disulfide formation and lipid peroxidation, analysis (canine heart), **164**, 722
  and reperfusion, associated hydroxyl radical generation in myocardium, continuous-flow ESR monitoring with 3,3,5,5-tetramethyl-1-pyrroline-1-oxide spin trap (rat), **164**, 1274
Isoacceptors
  tRNA^{leu}, aminoacylation, functional significance of aminoacyl-tRNA synthetase complex (rat liver), **163**, 513
Isoelectric focusing
  in characterization of thromboxane A_2/prostaglandin H_2 receptors (human platelets), **163**, 183
  in immobilized pH gradient, cAMP-dependent protein kinase catalytic subunit: demonstration of several isoforms (bovine heart), **160**, 596
α-Isopropylmalate
  induction of *leu-2* gene transcription and translation, analysis of response time (*Neurospora crassa*), **161**, 1286
Isoproterenol
  and adrenocorticotropin, glucagon, and insulin, stimulation of same phosphodiesterase isoform in adipose tissue (rat), **162**, 814
  effect on β-endorphin release from pituitary and hypothalamus *in vitro* (rat), **161**, 221
  stimulated cAMP production, inhibition by ADP and ATP (C6 glioma cells), **163**, 1150
  stimulation of
    cAMP levels and mucin secretion in isolated submandibular acini, effects of cyclic AMP phosphodiesterase (rat), **161**, 661
    protein kinase C-mediated troponin phosphorylation in isolated myocytes (rat), **162**, 1105
1-(*S*-Isoquinolinesulfonyl)piperazine
  effect on neutrophil receptors for leukotriene B_4 (human), **163**, 1456
1-(5-Isoquinolynylsulfonyl)-2-methylpiperazine, *see* H-7
Isotope effects
  in kinetic distinction between rapid-equilibrium random and abortive ordered enzyme mechanisms, **152**, 406; *erratum*, **159**, 368
Isovaleryl-L-carnitine
  inhibition of proteolysis induced by amino acid deprivation in perfused liver (rat), **158**, 797

J

Juvenile hormone esterase
  electrophoretic variants in hemolymph, coordinate induction (cabbage looper), **162**, 1382

K

K252a
  differentiative action on protein kinase C and calcium-unresponsive phorbol ester/phospholipid-activated protein kinase (mouse, pig), **164**, 974
  effect on sodium–hydrogen antiport during egg fertilization (sea urchin), **161**, 1100

- Kaempferol
  - inhibition of myosin light chain kinase (bovine aorta), **164**, 419
- Kallikrein
  - cleavage of high-molecular-weight kininogen, effect on conformation (human plasma), **158**, 72
  - glandular, encoding gene, characterization (human), **161**, 1151
  - related gene, comparison with prostate-specific antigen gene (human), **159**, 95
  - tissue, encoding genes, high homology to cDNA coding for entire prostate-specific antigen (human), **160**, 903
- Kearns-Sayre syndrome
  - derived clonal cultures, heteroplasmy of mitochondrial genomes (human), **160**, 765
- Keratin 13
  - cDNA encompassing coil 1B through 3′ end, nucleotide sequence (human), **162**, 1522
- Keratinocytes
  - arachidonic acid mobilization and phosphoinositide turnover, stimulation by platelet activating factor (human), **163**, 1344
  - terminal, signal transduction in onset of 1α,25-dihydroxyvitamin D_3-induced differentiation, role of protein kinase C translocation (mouse), **163**, 1517
- Keratoconus
  - afflicted corneal cells, gelatinolytic activity *in vitro* (human), **161**, 353
- β-Ketoacyl-CoA reductase
  - in hepatic microsomal fatty acid chain elongation system: evidence for two separate components (rat), **164**, 927; **165**, 1428; *erratum*, **165**, 1445
- 3-Ketoacyl-CoA thiolase, *see* Acetyl-CoA acyl transferase
- Ketoconazole
  - sensitivity to, increase in NADPH-cytochrome P450 reductase gene disruption mutants (yeast), **160**, 1257
- Ketogenesis
  - hepatic, synergistic inhibition by insulin and cAMP antagonist (rat), **159**, 741
- α-Ketoglutarate
  - effect on rate of electron transfer of adrenodoxin–adrenodoxin reductase system (bovine adrenocortical mitochondria), **162**, 168
- Ketones
  - cinnamoyl-(1-^{13}C-Phe)-^{c}Gly-Pro-Pro, identification as tetrahedral transition state analog and collagenase inhibition, **159**, 426
- Kidney
  - COS7 cells, generation of dual-circular plasmids, requirement of template DNA with SV40 origin (monkey), **160**, 53
  - cyclosporin toxicity, role of protein kinase C (MDCK cells), **160**, 409
  - detection of functional receptor for *Escherichia coli* enterotoxin (opposum), **159**, 363
  - distribution, clearance, and vascular effects of endothelin (pig), **161**, 647
  - expression of γ-glutamyl transpeptidase mRNA, comparison with liver (human), **164**, 912
  - glomerulus
    - atrial natriuretic factor receptor levels and cGMP gener ation, effects of cardiomyopathy (hamster), **159**, 807
    - endothelin receptors, characterization (rat), **164**, 54
    - reactive oxygen metabolites, phorbol ester-stimulate production, inhibitory effect of cAMP (rat), **165**, 519
  - inner medulla
    - abundance of immunoreactive endothelin (pig), **16** 348; *erratum*, **163**, 666
    - collecting tubular cells, effects of calcium, pH, an parathyroid hormone: *in vitro* nephrocalcinosis mode (rabbit), **160**, 1169
    - endothelin detection by radioimmunoassay and decreas in spontaneously hypertensive rat, **162**, 38
    - necrosis, reduction of platelet-activating factor biosyn thesis by *de novo* pathway, role of cholinephospho transferase (rat), **163**, 1002
  - MDCK cells, bradykinin-stimulated prostaglandin E_2 pro duction, role of intracellular calcium changes, **16** 1333
  - protein processing in patients with essential hypertension role of atrial natriuretic factor: increased urinar excretion after ANF infusion, **158**, 936
  - proximal tubules
    - ammoniagenesis, regulatory role of α-adrenergic stimul (rat), **162**, 116
    - isolated early, intracellular free Ca^{2+} levels, biphasi increasing effect of angiotensin II (rat), **165**, 1221
  - renin expression, reciprocal control by captopril (rat), **15** 1065
- 3-Kinase
  - developmental changes in activity, analysis (rat brain) **164**, 370
- Kininogen
  - high-molecular-weight, conformation, effects of cleavage by kallikrein and factor XIa (human plasma), **158**, 72

L

- L662,025
  - photoactivable antagonist of platelet activating factor re ceptors, biochemical properties (human), **161**, 23
- LAB170250F
  - cytochrome P450 obtusifoliol-14-demethylase-inhibiting resistant callus, regenerated sterol mutant plant, bio chemical characterization (tobacco), **165**, 125
- α-Lactalbumin
  - folding and disulfide bond formation, regulation by cal cium (bovine milk), **163**, 1390
- Lactase-phlorizin hydrolase
  - intestinal, isolation and preparation of antiserum (human) **164**, 94
- Lactate
  - effect on ethanol oxidation, in analysis of role of perox isomal β-oxidation (deermouse hepatocytes), **163** 418
- Lactate dehydrogenase
  - testicular, encoding gene, interruption by six introns, posi

- tional homology with LDH-A and LDH-B genes (human), **159**, 579
- specificity, effect of Thr246→Gly mutation (*Bacillus stearothermophilus*), **161**, 59

ctate oxidase
- purification and properties (*Aerococcus viridans*), **164**, 919

ctogen receptors, *see also* Prolactin receptors
- ovarian, different forms, characterization (rat), **165**, 921

ctoglutathione lyase
- inhibitors, evaluation, **165**, 118

ctones
- ganglioside, determination of inner esterification sites (bovine brain), **162**, 838

ctonization
- tautomeric, pyrroloquinoline quinone, promotion by acid treatment, **163**, 755

actoperoxidase
- detection of high-affinity binding sites for calcium (bovine), **160**, 897
- norepinephrine oxidation, characterization, **160**, 1183

actoylglutathione lyase
- effects of mating factors (yeast), **165**, 1091

aminin
- A chain synthetic peptide, stimulation of neurite outgrowth (rat), **162**, 821
- adhesion of myoblasts, effects of glycoprotein processing inhibitors (chicken, rat), **163**, 1338

anthanum chloride
- inhibition of distinct bombesin receptor-regulated Ca^{2+} mobilizing mechanisms in peptic cells (frog esophagus), **159**, 599

aser
- helium-neon, irradiation of mitochondria, effects on RNA and protein synthesis (rat liver), **163**, 1428

aurate (ω-1)-hydroxylase
- substrate specificity, modification by point mutation at threonine-301 (rabbit liver), **158**, 717

ead
- binding protein, low-molecular-weight, high affinity cytosolic, preliminary purification and characterization (rat brain), **159**, 177

eucine
- transamination in skeletal muscle, analysis by heteronuclear $^{15}N/^{1}H$ spin echo NMR (rat), **160**, 1033

eukocyte adherence receptors
- CD11c subunit, surface antigen and mRNA expression in hematopoietic cells, analysis (human), **160**, 346

Leukocyte elastase
- inhibition
  - by eglin C-related peptide fragments (human), **161**, 272
  - irreversible, by peptidyl derivatives of α-aminoalkylphosphonate diphenyl esters, analysis (human), **161**, 143
  - by synthetic inhibitor MR 889, analysis (human), **165**, 568

Leukocytes
- oxidative metabolism of linoleic acid, analysis (human), **161**, 883
- polymorphonuclear, *see* Neutrophils

Leukodystrophy
- metachromatic, lysosulfatide accumulation in tissues of young patient, **159**, 605

Leukotoxin
- biosynthesis in neutrophil plasma membranes, mechanism and relationship to oxygen radicals (pig), **161**, 1077
- gene identification and expression (*Actinobacillus actinomycetemcomitans*), **159**, 256

Leukotriene A_4
- conversion to lipoxins
  - in granulocyte–platelet suspensions (human), **157**, 801; *erratum*, **159**, 370
  - in renal mesangial cells (rat), **162**, 626
- stability during hydrolysis, enhancement by liposomes, **159**, 477

Leukotriene A_4 hydrolase
- epithelial cell, effects of albumin, calcium, and A23187 (human trachea), **164**, 1
- gene expression, analysis in Raji cells, **161**, 740

Leukotriene B_4
- hydroxylation in leukocytes from various mammals, analysis: identification of major metabolite and relative importance of 19- and 20-hydroxylations, **159**, 1283

Leukotriene B_4 receptors
- effects of protein kinase C blockers (human neutrophils), **163**, 1456

Leukotriene C_4
- stimulation of angiogenesis in cultured endothelial cells (bovine carotid artery), **159**, 572

Leukotrienes
- metabolism in human and murine serum, comparison and relationship to hypersensitivity, **164**, 626

Leupeptin
- effects on
  - Ca^{2+}-dependent protein protease calpain I (human erythrocytes), **159**, 1297
  - killing of cultured hepatocytes by cystamine (rat), **163**, 412
- improvement of abnormal down-regulation of protein kinase C and impaired natural killer activity in Chediak–Higashi syndrome beige mouse, **160**, 433

Leydig cells
- testosterone production *in vitro*, effects of retinol and retinoic acid (rat), **158**, 400

Lignin
- water-soluble, from culture medium of *Lentinus edodes* mycelia, inhibition of HIV infectivity and cytopathic effect, **160**, 367

Lignin peroxidase
- compound III, stability and reaction with veratryl alcohol (*Phanerochaete chrysosporium*), **162**, 464
- isozymes, cDNA characterization (*Phanerochaete chrysosporium*), **162**, 673

Lindane
- effect on vasoactive intestinal peptide receptor/effector system in isolated enterocytes (rat), **159**, 1391

- Linoleic acid
  - desaturation by microsomal δ-6-desaturase, effects of aging (rat liver), **163**, 348
  - oxidative metabolism by leukocytes, analysis (human), **161**, 883
  - stimulation of breast cancer cell growth in culture (human), **164**, 277; *erratum*, **165**, 1443
- α-Linolenic acid
  - desaturation by microsomal δ-6-desaturase, effects of aging (rat liver), **163**, 348
  - metabolism in primary cultures of normal and tumor mammary epithelial cells, analysis (mouse), **158**, 730
- γ-Linolenic acid
  - in formation of 6,13-dihydroxyoctadecatrienoic acid isomers, **159**, 1154
- Lipase, *see* Triacylglycerol lipase
- Lipid peroxidation
  - *t*-butyl hydroperoxide-induced, role of phospholipase A_2 (rat hepatic microsomes), **158**, 1021
  - during cardiac ischemia and reflow *in vivo*, analysis (dog), **164**, 722
  - mitochondrial, comparison in Ehrlich ascites cells and liver, role of membrane polyunsaturated fatty acid content (mouse), **163**, 356
  - oxygen radical-induced, role of protein kinase C (rat hepatocytes), **163**, 836
  - phospholipids in spermatozoal membranes, mechanisms (boar), **158**, 769
  - role of thiyl radical attack on polyunsaturated fatty acids, **161**, 113
- Lipids
  - accumulation in cultured aortic intimal cells, effect of desialylation of low-density lipoproteins (human), **162**, 206
  - bilayers, voltage-gated cation-selective channels, formation by mast cell degranulating peptide, **163**, 155
  - chains, and gramicidin A in model membrane, Monte Carlo studies, **165**, 1
  - copurifying with band 3, fatty acid composition (human erythrocytes), **159**, 1012
  - intracellular accumulation in aortic intima, role of modified low-density-lipoprotein aggregation (human), **163**, 489
  - membranes, bimolecular mixed, phase separation induction by polylysine, **162**, 124
- Lipoamidase
  - liberation of lipoate from bovine cardiac pyruvate dehyrogenase, analysis (human serum), **162**, 658
- Lipoate
  - liberation from bovine cardiac pyruvate dehydrogenase by human serum lipoamidase, analysis, **162**, 658
- Lipocortin I
  - cDNA cloning, sequencing, and expression in glucocorticoid-stimulated quiescent Swiss 3T3 fibroblasts (mouse), **159**, 155
  - crosslinking and enhancement of Ca^{2+} sensitivity by tissue transglutaminase (human epidermoid carcinoma cells), **163**, 944
  - phosphorylation in A431 epidermoid carcinoma cells, effect of phorbol ester (human), **160**, 474
  - and uteroglobin, region of local homology between, derived peptides, inhibition of platelet aggregation and secretion (human), **165**, 27
- Lipocortins
  - role in inhibition of phospholipase A2 activity in thymocytes of dexamethasone-treated mice, **159**, 53
- Lipopeptides
  - *a*-mating factor, total synthesis (yeast), **162**, 253
- Lipophilicity
  - anti-HIV nucleoside analogs, estimation from partition coefficients and retention times determined on Lichrospher 60 RP-8 HPLC column, **158**, 413
- Lipopolysaccharides
  - B-cell tolerance to, effects of interleukin 4 (neonatal mouse), **164**, 199
  - induced interleukin 1 production by peritoneal macrophages, suppression by intracellular accumulation of cholesteryl esters (rat), **160**, 874
  - induced prostaglandin synthesis, associated sensitization of alveolar macrophages by exogenous prostaglandins (rabbit), **165**, 526
- Lipoprotein(a)
  - and plasminogen, functional analogy in binding to kringle-4-binding protein tetranectin, **161**, 427
- Lipoprotein lipase
  - familial deficiency, associated gene polymorphism identified by PvuII, analysis (human), **164**, 1391
  - heparin-nonreleasable, activation by epinephrine in skeletal muscle fibers (rat), **164**, 615
  - inhibiting protein, purification from cachexia-inducing melanoma cell line (human), **160**, 1085
- Lipoprotein receptors
  - low-density, encoding gene, superinduction (human), **165**, 574
- Lipoproteins
  - apolipoprotein A-containing particles secreted by hepatoma cells, identification and characterizatio (human), **163**, 574
  - high-density, non-leaky vesiculation of large unilamellar vesicles, detection by HPLC (human plasma), **160**, 1219
  - low-density
    - acetylated
      - and oxidized, multiple receptors in peritoneal mac rophages: different uptake mechanisms (mouse) **159**, 1375
      - promotion of arachidonic acid release and metabolis by macrophages (mouse), **161**, 461
    - in blood of atherosclerotic patients, sialic acid content **162**, 206
    - desialylation, effect on lipid accumulation in culture aortic intimal cells (human), **162**, 206
    - and epidermal growth factor, differential stimulation o growth-related metabolism in cultured smooth muscl cells (rat), **159**, 624
    - interaction with receptors, inhibition by monoclona antibody 5A (human), **162**, 908
    - modified, aggregation, role in intracellular lipid accumulation (human aorta), **163**, 489

oxidized, protective role of intracellular glutathione in cultured bovine endothelial cells (human), **163**, 1466
role in vasoconstriction, calcium and pH mechanisms (rat), **163**, 315
nascent very-low-density, from hepatocytic Golgi fractions, enrichment in phosphatidylethanolamine (rat), **160**, 162
osomes
  Ca^{2+}-induced fusion, effects of phorbol ester and teleocidin (bovine brain), **165**, 1256
  coupled to anti-Le^x monoclonal antibodies, sodium butyrate encapsulated in, inhibition of colonic cancer cell growth (human), **158**, 202
  epidermal growth factor-labeled, preparation and uptake by hepatocytes (rat), **160**, 732
  immuno-, *see* Immunoliposomes
  oxidized phosphatidylcholine, permeability, **163**, 241
  phospholipid, α-tocopherol-containing, binding of iron, analysis, **160**, 834
  plasma-stabilized, composed of dioleoylphosphatidylethanolamine and oleic acid, characterization (human), **162**, 326; *erratum*, **163**, 1539
  prostaglandin or thromboxane in, suppression of primary immune response to liposomal antigens (rabbit), **160**, 565
  reconstituted cardiac gap junction channeling activity, effect of microgravity (human), **161**, 358
  stabilization of epoxytetraenes and leukotriene A$_4$ during hydrolysis, **159**, 477
-Lipotropin
  immunoreactive, in ovary, ontogeny and effect of hypophysectomy (rat), **159**, 1171
ipoxins
  formation from leukotriene A$_4$ in renal mesangial cells (rat), **162**, 626
  transcellular formation from endogenous arachidonic acid in mixed platelet–granulocyte suspensions (human), **157**, 801; *erratum*, **159**, 370
ipoxygenase
  buccal epithelial cells, analysis (human), **160**, 545
  catalysis of benzo[*a*]pyrene-7,8-dihydrodiol epoxidation (soybean), **159**, 1199
  9(S)-hydroperoxyoctadecatrienoic acid as suicide substrate (soybean), **162**, 1357
  inactivation by hydroperoxy acids as suicide substrates (potato), **164**, 1384
Lipoxygenase
  gene expression, analysis in Raji cells, **161**, 740
ipoxygenase inhibitors
  inhibition of tumor necrosis factor formation in cultured macrophages and D-galactosamine-sensitized mice, **159**, 748
ithium chloride
  restoration of protein synthesis in herpes simplex virus-infected endothelial cells (human), **160**, 1073
iver, *see also* Hepatocytes
  apolipoprotein mRNA levels, increase in ventromedial hypothalamus-lesioned obese rat, **163**, 1107
  carbon tetrachloride- and chloroform-induced toxicity, effects of pyrazole treatment (rat), **161**, 615
  c-ERB A proteins, localization with monoclonal antibodies (rat), **164**, 1053
  c-*myc* transcript levels during surgical resection of hepatocellular carcinoma, analysis (human), **162**, 1260
  dioxin, glucocorticoid, and oxysterol receptors, structural differences (rat), **163**, 444
  DNA binding to 2-mercaptobenzothiazole *in vivo*, analysis (rat), **165**, 342
  fate of endocytosed asialofetuin in, analysis (rat), **158**, 313
  fructose 2,6-bisphosphate levels, endotoxin-induced increase in fasted rats, **165**, 1072
  γ-glutamyl transpeptidase mRNA expression, comparison with kidney (human), **164**, 912
  glycogen synthetic pathway, evaluation with deuterium-labeled glucose (rat), **159**, 522; *erratum*, **162**, 557
  half-life of proteasomes *in vivo* (rat), **159**, 1309
  insulin-like growth factor-I mRNA levels, reduction during malnourished state by infusion of human IGF-I (rat), **160**, 795
  isolated perfused, generation of reactive oxygen species by mitochondria and xanthine oxidase after hypoxic injury (rat), **160**, 140
  mRNA for α-1-acid glycoprotein, apolipoproteins B and E, and β-actin, levels after injection of murine recombinant tumor necrosis factor (rat), **161**, 81
  nonparenchymal cells, hepatocyte growth factor mRNA levels, increase after treatment with hepatotoxins (rat), **165**, 1229
  perfused
    proteolysis induced by amino acid deprivation, inhibition by isovaleryl-L-carnitine (rat), **158**, 797
    ubiquitous formation of catalase compound II: identification of spectral species (rat), **162**, 1272
  phenobarbital-inducible P450b and P450e and other neonatal P450 forms, suppression by thyroid hormone in hypophysectomized rat, **160**, 609
  regeneration
    alteration in transferrin receptor distribution (rat), **164**, 1105
    early elevation of diacylglycerol and phosphatidate (rat), **164**, 290
    inhibition of DNA synthesis *in vivo* after thermal injury (rat), **160**, 196
  transendothelial transport of ceruloplasmin, role of endosomes (rat), **162**, 1346
  tRNA, interaction with [^{35}S]methionine *in vivo*, effects of chemical carcinogens and partial hepatectomy (rat), **163**, 1412
Lovastatin
  tissue selectivity *in vivo* (rat), **158**, 667
Luciferase
  from bioluminescent bacteria, interaction with *Vibrio fischeri* Y-1 yellow fluorescent protein, **161**, 1191
Lucigenin
  chemiluminescence
    in alveolar macrophages, role of mitochondrial respiration (rat), **159**, 584
    in detection of interferon inducer effects on microsomal superoxide anion generation (rat liver), **161**, 1042

Lung
- distribution, clearance, and vascular effects of endothelin (pig), **161**, 647
- FRL cells, epidermal growth factor-induced prostaglandin E_2 release, synergistic effect of retinoic acid (rat), **162**, 1515
- hypoxic vasoconstriction, enhancement by inhibition of endothelium-derived relaxing factor (rat), **164**, 1198

Luteinizing hormone
- stimulation of protein phosphorylation in granulosa cells *in vitro* (pig), **161**, 442
- and truncated diphtheria toxin, in preparation of superactive hormonotoxin (murine tumor cells), **163**, 161

Luteinizing hormone-releasing hormone
- antagonism by conformationally restrained cyclic peptides, analysis, **159**, 1114
- antagonist, β-turn location, combined conformational search and molecular dynamics study, **165**, 1051

Lymphocytes
- B-cell
  - phosphoinositide signaling pathway, stimulation by 7-thia-8-oxoguanosine (mouse), **163**, 1306
  - polyamine synthesis during primary infection with Epstein–Barr virus, inhibition, effects on cellular DNA synthesis and EBV-encoded nuclear antigens (human), **159**, 945
  - Priess, proteins with tyrosine protein kinase activity, purification and characterization (human), **163**, 1128
  - tolerance, effects of interleukin 4 (neonatal mouse), **164**, 199
- common acute lymphoblastic leukemia antigen-positive and -negative, detection of neutral endopeptidase 24.11 and angiotensin-converting enzyme-like activity (human, mouse), **160**, 1323
- deoxycytidine salvaging into DNA and phospholipid precursors, effects of 1-β-D-arabinofuranosylcytosine (human), **163**, 1158
- IM9, c-*myc* gene expression, regulation by glucose (human), **165**, 1123
- interleukin-2-dependent, apoptosis, inhibition by phorbol esters (mouse), **164**, 1069
- intracellular electrolytes, rapid effects of aldosterone, mediation by cell membrane Na^+/H^+-exchanger (human), **164**, 961
- migration *in vitro*, interleukin-8-, IL-1α-, and IL-1β-induced, potent and specific inhibition by calcium channel antagonists (human), **165**, 349
- oxidized by periodic acid, associated protein phosphorylation, interleukin-2 receptor expression, interleukin-2 production, and cellular proliferation, temporal progression (rat), **158**, 590
- peripheral blood
  - and monocytes, phospholipase D, differential effects of phorbol ester (human), **162**, 788
  - $p56^{lck}$ phosphorylation by exogenous ATP (human), **162**, 51
- peripheral, glutamine requirement for growth, effects of asparagine and adenine (human), **164**, 1348
- plasma membrane electrogenic pump activity, role o ligand- and voltage-gated sodium channels in regulation (human, mouse, rat), **160**, 999
- T-cell
  - activation, suppressive effect of prostaglandin E_2, rol of protein kinase C translocation inhibition (human **161**, 1299
  - CD4 antigen selective modulation by ganglioside mechanisms (human), **158**, 1050
  - HIV-enhancer binding activity, activation by mild dete gents (human), **162**, 238
  - HTLV-I-infected, minus strand transcription (human **163**, 1006
  - MOLT-4
    - augmented HIV gene expression, effect of interleuki 1 (human), **165**, 715
    - HIV-induced giant multinucleate cell formation, effect of pH, **158**, 973
  - phytohemagglutinin-stimulated, α-fetoprotein gene expression, analysis (human), **159**, 112
  - p55 and p70/75 interleukin-2 receptor subunit expression, differential induction (human), **164**, 686
  - proliferation *in vivo*, mechanism: analysis of inte leukin-2 receptor expression and c-*myc* and c-*my* oncogene activation during lymphatic generatio (mouse), **160**, 181
  - streptococcal M protein-stimulated, serine and tyrosin phosphorylation of 28- and 35-kDa proteins (human **158**, 803
  - T-4, HIV-1 replication *in vitro*, inhibition by 6-subst tuted acyclouridine derivative (human), **165**, 1375
- from young and old subjects, proliferation *in vitro*, augmentation by extremely low frequency pulsed electr magnetic fields, **160**, 692

Lymphokines
- T-cell-derived maturation inducer, regulation of leukem cell growth and differentiation, mechanism (human **161**, 583

Lymphotoxin
- recombinant
  - effect on permeability of endothelial cell monolaye (human), **162**, 1431
  - human, effects on osteoblastic cell proliferation an prostaglandin synthesis (rat), **162**, 435

Lysine
- and arginine, usage by protein toxins, domain-specifi bias, **160**, 333
- functional residues of Na^+/glucose cotransporter protei inhibition by pyrylium salt (rabbit brush border membranes), **163**, 1356
- nonspecific elicitation of endothelium-dependent vascul relaxation at high dose (rat aorta), **158**, 177
- peptidyl dipeptidase-4, role in catalytic activity (*Pseud monas maltophilia*), **158**, 45
- at position 384 of cytochrome P450 LM2, distance to hem at active site, fluoresence energy transfer measur ments (rabbit liver), **163**, 1282
- reactive residue in glucose-6-phosphate dehydrogenas characterization: identification of limited structur variation within yeasts, **160**, 1290

sophospholipase
  similarity to bovine and human pancreatic cholesterol esterase (rat), **164**, 1302
sosomes
  membrane 96-kDa sialoglycoprotein, encoding cDNA clone, isolation and sequencing (rat liver), **164**, 1113
  targeting of cathepsins D and H to, inhibition by brefeldin A (rat liver), **163**, 220
sostaphin endopeptidase, *see* Peptidoglycan endopeptidase
sosulfatide
  accumulation in tissues of young metachromatic leukodystrophy patient, **159**, 605
sozyme
  residues coded by exon 2, residual catalytic activity (chicken), **159**, 927

M

$_2$-Macroglobulin
  inhibition of
    inflammatory proteinase medullasin (human plasma), **158**, 831
    insoluble trypsin (human), **165**, 14
  native and chymotrypsin-proteolyzed, structures, electron microscopic study (human), **161**, 216
  unglycosylated, solubility and accumulation in rough endoplasmic reticulum (Hep G2 cells), **160**, 1421
acromolecules
  interproton distances, estimation from nuclear Overhauser enhancement data: quadratic approach, **159**, 886
acropain
  latent form, role in ATP-dependent proteolysis in BHK cell extracts, **160**, 911; *erratum*, **161**, 944
acrophages
  activated
    nucleoside transport analysis (mouse), **160**, 354
    tumoricidal activity and generation of reactive nitrogen intermediates, *in vitro* and *ex vivo* analysis (rat), **164**, 968
  alveolar
    lucigenin chemiluminescence in, role of mitochondrial respiration (rat), **159**, 584
    sensitization to lipopolysaccharide-induced prostaglandin synthesis by exogenous prostaglandins (rabbit), **165**, 526
  cultured, tumor necrosis factor formation, suppression by lipoxygenase inhibitors (mouse), **159**, 748
  cytosolic synthesis of nitrogen oxides from L-arginine, role of inducible and constitutive components (mouse), **161**, 420
  cytotoxic activated, nitric oxide as molecular effector (mouse), **157**, 87; *erratum*, **158**, 624
  differentiation of myeloid leukemia cells into, role of interleukin 6 produced in response to differentiation-inducing factor and 1α,25-dihydroxyvitamin D_3 (mouse), **158**, 660
  lipopolysaccharide-nonresponder, lack of interleukin-1β gene expression, role of calmodulin-binding protein defect (C3H/HeJ mouse), **158**, 723
  mediated *N*-nitrosation of thioproline and proline, characterization (mouse), **159**, 373
  Na^+/H^+ antiporter activation, role of cAMP (mouse), **165**, 131
  peritoneal
    acetylated and oxidized low-density lipoproteins, multiple receptors: different uptake mechanisms (mouse), **159**, 1375
    activation by type 1 fimbriated *Escherichia coli*, role of protein kinase C (human), **165**, 1243
    identification of interleukin 1β as dominant IL-1 release product (mouse), **160**, 404
    lipopolysaccharide-induced interleukin 1 production, suppression by intracellular accumulation of cholesteryl esters (rat), **160**, 874
    platelet-activating factor-acether output, regulation by acetylhydrolase (mouse), **162**, 475
    tumor necrosis factor-α production, inhibition by cyclosporin A without decrease of TNF mRNA levels (mouse), **161**, 551
  release and metabolism of arachidonic acid, promotion by acetylated low-density lipoproteins (mouse), **161**, 461
  secreted transforming growth factor α, role in metallothionein induction by endotoxin (human, rat), **164**, 114
  tumor cytotoxicity in coculture, role of L-arginine (mouse), **165**, 1262
Magnesium
  dependent nonspecific binding of [^{125}I]prolactin to myelinated tracts in central nervous system (rat), **158**, 986
  free, levels in artificial membrane vesicles, reduction by phospholipase C activity (rat brain), **165**, 913
  inhibition of protein kinase C phosphorylation of histone H-1 (rat), **162**, 45
Magnesium monoperoxophtalate
  identification as efficient single oxygen atom donor in metalloporphyrin-catalyzed DNA cleavage, **160**, 1212
Magnesium-protoporphyrin methyltransferase
  ping-pong reaction mechanism, confirmation by exchange reaction (etiolated wheat), **162**, 483
Malate
  effect on rate of electron transfer of adrenodoxin–adrenodoxin reductase system (bovine adrenal cortex), **162**, 168
Malic enzyme
  expression in primary cultures of fetal brown adipocytes, hormonal regulation (rat), **163**, 341
  precocious induction by hormonal and nutritional factors in cultured fetal hepatocytes (rat), **161**, 1028
Mammary gland
  expression of mouse mammary tumor virus, role of sex steroids (mouse), **159**, 1020
Manganese
  inhibtion of insulin receptor dephosphorylation in adipocytes (rat), **162**, 1200
Mannose
  glycation of serum albumin *in vitro*, kinetics (bovine), **160**, 362

Mannose 6-phosphate
- inhibition of lysosomal enzyme-binding receptor phosphorylation (simian brain), **162**, 1244
- –insulin-like growth factor II receptor, interactions with recombinant and platelet transforming growth factor-β1 precursor (rat), **160**, 393

α-Mannosidase
- inhibitor plantagoside isolated from *Plantago asiatica* seeds, effect on murine immune response (jack bean), **165**, 1292
- vacuolar, structural gene *AMS1*, nucleotide sequence (yeast), **163**, 908

α-1,3-Mannosyl-glycoprotein-β-1,2-*N*-acetylglucosaminyltransferase
- deficient cells, restoration of enzyme activity after DNA-mediated transformation (CHO cells), **159**, 554

Mass spectrometry
- –gas chromatography, analysis of hexose monophosphate shunt activity (C6 glioma cells), **158**, 474
- high-performance tandem
  - in analysis of primary structure of *Escherichia coli*-produced human epidermal growth factor, **163**, 1100
  - in determination of amino acid sequence of α-amylase inhibitor Paim II (*Streptomyces coruchorushii*), **158**, 514
- in identification of peptides in unpurified immunized and parasitized hemolymph (honeybee), **165**, 637

Mastoparan
- from wasp venom, stimulation of insulin release by pancreatic islets, role of pertussis toxin-sensitive GTP-binding protein (rat), **158**, 712

Mating factors
- effects on enzyme activity in glyoxalase system (yeast), **165**, 1091

Matrices
- detergent-insoluble cytoplasmic, identification of protein cross-reacting with anti-phosphotyrosine antibodies (yeast), **160**, 887

Medullasin
- bone marrow, inhibition by α_2-macroglobulin and ovomacroglobulin, **158**, 831

Melanin
- catalysis of glyoxylate formation from glycine, **159**, 1161

Melanocytes
- derived cells, cAMP-induced c-*fos* expression (mouse), **159**, 408

Melittin
- effect on Ca^{2+}-dependent protein protease calpain I (human erythrocytes), **159**, 1297
- region-matched hydrophobic interaction with dimyristoylphosphatidylcholine in ternary mixture of phosphatidylcholines, **164**, 850

Membrane metallo-endopeptidase
- detection
  - and analysis with substrate gel electrophoresis (bovine neck ligament, human kidney), **162**, 300
  - in common acute lymphoblastic leukemia antigen-positive and -negative lymphoid cells (human, mouse), **160**, 1323
- inhibitor UK-69,578, production of natriuretic and diuretic responses and augmentation of endogenous atrial natriuretic factor levels (mouse), **164**, 58
- recombinant, preferential cleavage of amino- and carboxyl-terminal oligopeptides from vasoactive intestinal polypeptide (human), **158**, 850

Membrane potential
- epididymal sperm, polarity change during capacitation (mouse), **165**, 58

Membranes
- adrenal chromaffin cell, K^+ depolarization, potentiation of endothelin-induced effects on cytosolic calcium (bovine), **165**, 306
- aortic smooth muscle, GTP-binding protein with same effector domain as *ras* p21s, identification as *smg* p21s (bovine), **163**, 1418
- artificial, free Mg^{2+} levels, reduction by phospholipase C activity (rat brain), **165**, 913
- associated phospholipase A_2, primary structure (human spleen), **163**, 42
- associated proteins, heavy metal derivatives: selective mercurilation of bacteriorhodopsin (*Halobacterium halobium*), **161**, 640
- bilayer, with α-tocopherol, time-resolved fluorescence anisotropy study, **158**, 386
- bound α-amidating enzyme precursors, post-translational processing, role of generation of secreted enzyme (rat medullary thyroid carcinoma cells), **163**, 959
- brush border
  - from cortical and medullary proximal tubule, analysis of Na^+/H^+ exchange system (rabbit kidney), **163** 269
  - identification of P-glycoproteins (canine, human, rat kidney), **162**, 244
  - ion permeation, amphotericin B-induced changes: nephrotoxicity model (rabbit kidney), **159**, 1165
  - Na^+–P_i cotransport, adaptive increase elicited by thyroid hormone, blockage by dexamethasone (rat kidney), **161**, 1160
- cardiac
  - binding of 1,4-dihydropyridine calcium channel activator (−) S Bay K 8644 (guinea pig), **158**, 149
  - endothelin-1 binding sites
    - density, effect of cyclosporine (mouse), **163**, 1270
    - ischemia-induced externalization (rat), **164**, 1220
  - identification of two distinct endothelin receptor types (chicken), **161**, 1252
- cauda epididymal sperm, linkage of major maturational glycoprotein, role of phosphatidylinositol (rat), **160**, 460
- cerebral, order, effect of vitamin E deficiency (mouse) **163**, 860
- chromaffin granule, association with endogenous synenkephalin-containing peptides (bovine adrenal medulla), **158**, 790
- ciliary muscle cell, voltage, effect of endothelin (human) **164**, 1031
- COS cell, attachment of recombinant G protein α subunits in excess of βγ subunits in transfected cells, **164**, 46

- gg, *see* Egg envelope
- rythrocyte
  - electro-insertion of xeno-glycophorin, assessment (human, mouse), **159**, 34
  - guanine nucleotide-binding properties, *in situ* characterization (human), **159**, 41
  - inside-out vesicles, active calcium transport, effect of cellular aging (human), **159**, 432
  - ion channel formation by synthetic peptide with sequence of electric ray M2δ transmembrane domain of human nicotinic acetylcholine receptor, **162**, 352
  - morphological alterations, induction by 9-amino-1,2,3,4-tetrahydroacridine and 9-aminoacridine (human), **163**, 1351
  - *Plasmodium falciparum*-infected, detection of 240-kDa protein on surface by naturally occurring anti-band 3 autoantibodies (human), **160**, 1357
- fetal, prostaglandin production, local stimulation by corticotropin-releasing hormone (human), **159**, 192
- fibroblast growth factor binding sites, distribution in various tissues (guinea pig), **159**, 290
- glomerular
  - B_2-kinin receptor-like binding, characterization (rat), **158**, 99
  - and papillary, endothelin binding sites, identification and characterization (rat kidney), **162**, 130
- lipid, bimolecular mixed, phase separation induction by polylysine, **162**, 124
- liposomal, effects on free radical-mediated protein degradation, **162**, 1076
- lysosomal, 96-kDa sialoglycoprotein, encoding cDNA clone, isolation and sequencing (rat liver), **164**, 1113
- microsomal
  - arachidonate 5-lipoxygenase activation, optimization (RBL-1 cells), **161**, 1327
  - chromanoxyl radical accumulation, prevention by free radical reductase activity (rat liver), **159**, 229
  - occurrence of NADH- and NADPH-linked aquacobalamin reductases (rat liver), **165**, 675
  - permeability for calcium, GTP-dependent increase (NG108-15 cells), **164**, 1060
  - protein kinase C translocation to, induction by oleate (rat liver), **160**, 1243
- milk-fat globule, derived mucin, disulfide linkage to 70-kDa protein (human), **165**, 1305
- mitochondrial
  - chromanoxyl radical accumulation, prevention by free radical reductase activity (rat liver), **159**, 229
  - inner, adriamycin binding to, inhibition by spermine (bovine heart), **159**, 791
  - occurrence of NADH- and NADPH-linked aquacobalamin reductases (rat liver), **165**, 675
  - rnithine carbamoyltransferase precursor transfer across, role of polyamines (rat), **158**, 287
- model, lipid chains and gramicidin A, Monte Carlo studies, **165**, 1
- multilamellar vesicle, molecular dynamics of antitumor ether-linked phospholipids in, spin-label analysis, **160**, 1189
- myelin, hydrolysis of phosphatidylinositol bisphosphate, stimulation by guanine nucleotides (human), **162**, 282
- neuronal, toxin-binding sites, interaction of voltage-dependent K^+ channel blocker dendrotoxin I and Ca^{2+}-activated K^+ channel blocker charybdotoxin (rat brain), **163**, 394
- peroxisomal, 70-kDa protein, identification as peroxisomal enoyl-CoA hydratase bifunctional protein (murine liver), **160**, 503
- pertussis toxin-sensitive G proteins, receptor-coupled forms, ADP-ribosylation by cholera toxin (NG108-15 cells), **165**, 554
- phospholipid
  - bilayer, chemically synthesized mitochondrial signal sequence in, secondary structure and orientation in phosphlipid bilayers, **158**, 610
  - disruption by amphiphilic polymers, characterization, **159**, 566
- placental, endothelin-1 receptors, solubilization and identification (human), **164**, 205
- plasma, *see* Plasma membranes
- platelet
  - associated glycoprotein IIb–IIIa complex, modulation of RGDS binding site, **160**, 189
  - competitive inhibition of tritium-labeled platelet-activating factor binding by amiloride and analogs (rabbit), **163**, 165
  - differential membrane association of protein kinase C subspecies, induction by phorbol ester (human), **161**, 556
  - prostaglandin H_2 and thromboxane A_2 receptors, isoelectric and mass characterization (human), **163**, 183
- potassium channel-inducing proteins, encoding genomic DNA, amino acid sequence analysis and molecular cloning (human), **161**, 176
- protein kinase C activity, measurement in native state (murine lymphoma cells), **160**, 340
- redox systems, superoxide dismutase-facilitated electron transfer as model (bovine erythrocytes), **165**, 164
- sarcolemmal, *see* Sarcolemma
- stretch-activated ion channels, identification in cultured mesangial cells (rat kidney), **159**, 516
- synaptic, taipoxin-binding protein, identification by affinity labeling (guinea pig brain), **165**, 689
- thylakoid, reversibility of thermal transitions (cucumber, pea), **158**, 11
- urinary bladder epithelial, vesicles, vanadate-insensitive ATP-dependent H^+ transport, inhibition by NBD-Cl (turtle), **161**, 312
- ventricular, displacement of bound ^{125}I-endothelin by asp sarafotoxins, analysis (rat), **161**, 89

2-Mercaptobenzothiazole
- binding to DNA in selected tissues *in vivo*, analysis (rat), **165**, 342

2-Mercaptoethanol
- effect on inhibition of v-*src* tyrosine kinase activity by herbimycin A (NIH 3T3 cells), **163**, 803

S-Mercuric-*N*-dansylcysteine
- labeling of free sulfhydryl groups of serum cholinesterase, reactivity (human), **158**, 503

Mercurilation
  selective, bacteriorhodopsin (*Halobacterium halobium*), **161**, 640
Mesangial cells
  binding to endothelin *in vitro*: high- and low-affinity binding sites (rat), **161**, 776
  detection of high- and low-affinity binding sites for endothelin (rat), **119**, 776
  identification of two endothelin receptor types (rat), **162**, 1396
  prostaglandin synthesis and phospholipase A2 release, synergistic stimulation by interleukin 1 and tumor necrosis factor (rat), **159**, 385
  stretch-activated ion channels, identification (rat), **159**, 516
  transformation of leukotriene A_4 to lipoxins (rat), **162**, 626
Mesentery
  isolated perfused artery, presynaptic adrenergic neurotransmission, inhibiton by endothelin (rat), **161**, 803
  perfused, adrenergic arterial vasoconstriction, enhancement by endothelin (rat), **159**, 1304
Metallo-endoprotease
  somatostatin-28-generating, from brain cytosol, characterization (rat), **160**, 968
Metallohydrolases
  zinc-, superfamily, identification of aminopeptidase M as member (rat), **161**, 236
Metalloporphyrin
  catalyzed DNA cleavage, single oxygen atom donation by magnesium monoperoxophtalate, **160**, 1212
Metallothionein
  induction by endotoxin in hepatic cells, role of macrophage-secreted transforming growth factor α (human, rat), **164**, 114
  metal binding to, associated unique low-frequency Raman band (*Neurospora crassa*, rabbit liver), **163**, 1093
  role in intracellular copper transport in cultured hepatoma cells, **164**, 134
Metals
  binding to metallothionein, associated unique low-frequency Raman band (*Neurospora crassa*, rabbit liver), **163**, 1093
  divalent ions, complexes with mithramycin, interaction with DNA, **160**, 517
  heavy, derivatization of membrane proteins: selective mercurilation of bacteriorhodopsin (*Halobacterium halobium*), **161**, 640
Metamorphosis
  associated lens crystallin changes, role of β-crystallin polypeptide (bullfrog), **164**, 1423
  early, associated *in vivo* biosynthesis of stage-specific cuticular glycoprotein (medfly), **164**, 251
Metastasis
  melanoma, role of membrane-associated cathepsin L (human, mouse), **164**, 556; *erratum*, **165**, 1444
  pulmonary, malignant tumor cells, effects of prior culturing in eicosapentaenoic acid-supplemented media (human, mouse), **160**, 559
Methemoglobin
  vector EPR spectroscopy with first and second harmonic displays (human), **162**, 681
Methionine
  ^{35}S-labeled, interaction with hepatic tRNA *in vivo*
    analysis (rat), **163**, 255
    effects of chemical carcinogens and partial hepatectomy (rat), **163**, 1412
Methotrexate
  CCRF-CEM cells with high-level resistance to, display of atypical multidrug resistance, role of P-glycoprotein **164**, 928; **165**, 1435; *erratum*, **165**, 1445
3-Methoxybenzamide
  potentiation of *N*-Methyl-*N*′-nitro-*N*-nitrosoguanidine-induced O^6-methylguanine-DNA-methyltransferase activity (rat hepatoma cells), **163**, 599
4-(4-Methoxy-3-sulfophenyl)-2,6-bis(4-sulfophenyl)pyrylium
  inhibition of Na$^+$/glucose cotransporter functional lysyl residues (rabbit brush border membranes), **163**, 1356
5-Methoxytryptophol
  mass spectrometric identification and quantification in retina (quail), **165**, 1331
3-Methyladenine
  induction of increase in parathyroid cell secretion (bovine), **160**, 1339
L-N^G-Methylarginine
  effect on blood pressure, in assessment of role of nitric oxide release (guinea pig), **160**, 881
  role in duration of acetylcholine-induced systemic vasodilation *in vivo* (guinea pig), **163**, 710
N-Methyl-D-aspartate
  activated channels of cerebellar granule cells, changes with time in culture (rat), **165**, 481
  mediated responses, abolition by 6,7-dichloroquinoxaline-2,3-dione (rat synaptic membranes), **164**, 841
Methylation
  adenine residue in GATC sequence, intact activity associated with 2-aminopurine sensitivity in *dam* gene mutation (*Vibrio cholerae*), **165**, 561
  asymmetric, G4-DNA/B-DNA junction at c-Ha-*ras* codon 12 by DNA(cytosine-5)methyltransferase (human), **160**, 1397; *erratum*, **162**, 901
  c-*abl* gene, alterations in cells transformed by phagocyte-generated oxidants (10T1/2 cells), **158**, 24
  calbindin vitamin D-dependent gene, role in mediation of tissue and vitamin D expression regulation (rat), **160**, 1281
  Epstein–Barr virus, capsid antigen gene, relationship to expression, **159**, 263
  histone, comparative effects of transcriptional inhibitors and heat shock on histone methylation patterns (fruit fly), **162**, 1037
  oncogene, consistent changes in epithelial cells chemically transformed *in vitro* (rat), **164**, 693
  ornithine decarboxylase gene before transfection, effect on transient expression in CHO cells (human), **162**, 528
2-Methyl-N^1-benzenesulfonyl-N^4-bromoacetylquinonediimide
  heterobifunctional crosslinking of monoclonal antibody, **158**, 640
3-Methylcholanthrene
  inducible cytochrome P450 isozyme with high activity toward aflatoxin B_1, complete cDNA sequence analysis (hamster), **162**, 265

Methyl-1-deoxynojirimycin
  effects on integrin and adhesion of myoblasts to extracellular matrix proteins (chicken, rat), **163**, 1338
  and other oligosaccharide-processing inhibitors, differential effects on thyrotropin secretion from dispersed pituitary cells (rat), **165**, 788
Methyl-7,8-dihydropterin
  as model compound for natural substrate dihydrofolate, computational studies for analysis of dihydrofolate reductase mechanism of action, **161**, 64
-Methylformamide
  Azotobacter vinelandii Fe–Mo cofactor in solution of, spectroscopic characterization, **163**, 746
lethylglyoxal reductase
  effects of mating factor (yeast), **165**, 1091
O^6-Methylguanine-DNA-methyltransferase
  N-methyl-*N'*-nitro-*N*-nitrosoguanidine-induced activity, potentiation by poly(ADP-ribose) synthesis inhibitors (rat hepatoma cells), **163**, 599
N-Methyl hydroxylamine
  mediation of vascular relaxation: conversion to nitrites and mechanism of endothelium dependent vascular relaxation (rat aorta), **164**, 889
N-Methylisoquinolinium ion
  N-methyl-1,2,3,4-tetrahydroisoquinoline as precursor, formation by *N*-methyltransferase (human brain), **161**, 1213
N-Methyl-*N'*-nitro-*N*-nitrosoguanidine
  induced O^6-methylguanine-DNA-methyltransferase activity, potentiation by poly(ADP-ribose) synthesis inhibitors (rat hepatoma cells), **163**, 599
N-Methyl-*N*-nitrosourea
  induced mutagenesis, *o*-vanillin comutagenic activity, mechanism, **162**, 1376
  and other chemical carcinogens, and partial hepatectomy, effects on *in vivo* (^{35}S)methionine interaction with hepatic tRNA (rat), **163**, 1412
1-Methyl-4-phenyl-2,3,-dihydropyridinium
  ionic and deprotonated forms, oxidation/reduction intermediates, characterization, **158**, 63
1-Methyl-4-phenylpyridinium
  induced respiratory inhibition in electron transport particles and intact mitochondria, potentiation by tetraphenylborate (rat), **161**, 809
  ionic, interaction with mitochondria, enhancement by tetraphenylboron (rat liver), **159**, 983
  lesioned brain, interleukin-2-like molecules in, visualization (rat), **165**, 1312
N-Methyltransferase
  N-methylation of 1,2,3,4-tetrahydroisoquinoline (human brain), **161**, 1213
Mevinolin
  cholesterol biosynthesis inhibition, stimulation of anchorage-independent proliferation of adrenocortical carcinoma cells (human), **165**, 219
Micelles
  Triton X-100, application in model for analysis of chemical nature of hydrogen transfer in NAD(P)H-dependent enzymatic reactions, **159**, 1330
Microemulsions
  water-in-oil, solubilization and activity of yeast cells, **161**, 1244
Microfilaments
  role in protein kinase C translocation in polymorphonuclear leukocytes (mouse), **160**, 1344
Microgravity
  effects on
    channeling activity of liposome-reconstituted cardiac gap junctions (human), **161**, 358
    osmotic processes, analysis, **164**, 351
Microproteins
  chimeric 32-residue, inhibiting trypsin and carboxypeptidase A, design and chemical synthesis, **162**, 1425; *erratum*, **164**, 594
β-Microseminoprotein
  cDNA cloning and mRNA tissue distribution (human), **164**, 1310
Microsomal aminopeptidase
  molecular cloning and amino acid sequence: identification as member of superfamily of zinc-metallohydrolases (rat kidney), **161**, 236
Microsomes
  digestive gland, determination of multiple forms of cytochrome P450 (chiton), **163**, 476
  hepatic
    chromanoxyl radical accumulation, prevention by free radical reductase activity (rat), **159**, 229
    and cytosol, NAD(P)H:quinone reductase purified by Cibacron Blue F3Ga affinity chromatography, structural comparison (rat), **161**, 434
    denitration of glyceryl trinitrate, associated formation of nitric oxide and role of cytochrome P450 (rat), **163**, 1210
    fatty acid elongation system, evidence for two separate β-ketoacyl CoA reductase components (rat), **164**, 927; **165**, 1428; *erratum*, **165**, 1445
    GTP-dependent calcium release, effects of hepatic cytosolic nondialyzable factors (rat), **163**, 823
    linoleate and α-linoleate desaturation, age-related changes (rat), **163**, 348
    mediation of aflatoxin B_1 binding to DNA, alteration by Δ-9-tetrahydrocannabinol exposure (rat), **160**, 217
    membranes
      integration of heme oxygenase post-translationally and directly (rat), **163**, 1086
      protein kinase C translocation to, induction by oleate (rat), **160**, 1243
    and mitochondria, occurrence in membranes of NADH- and NADPH-linked aquacobalamin reductases (rat), **165**, 675
    NADPH-monooxygenase, distinct forms, homology of form 2 NH_2-terminus with *Pseudomonas fluorescens* flavin-containing enzyme (rabbit), **163**, 49
    pentachlorobenzene metabolism: nature of reactive intermediates (rat), **163**, 1275
    and renal, type 1 antibodies to, recognition of cytochrome P450 db1 (human), **159**, 542
    steroid 5α-reductase, role of NADPH-cytochrome P450 reductase (rat), **165**, 590

    - superoxide anion generation, effects of interferon inducers, detection by lucigenin chemiluminescence (rat), **161**, 1042
  - of insulin-treated adipocytes, colocalization of glucose transporter and insulin receptor (rat), **159**, 1368
  - membrane permeability for calcium, GTP-dependent increase (NG108-15 cells), **164**, 1060
  - placental, estrogen synthetase inactivation by endogenous phosphatases (human), **162**, 498
  - renal, platelet-activating factor synthesis, effects of long-term fish oil consumption (rat), **160**, 1238
- Microspectrofluorometry
  - dual-emission, and simultaneous electrophysiological recording, in measurement of Ca^{2+} transients in individual pituitary cells (rat), **164**, 1045; *erratum*, **165**, 1446
- Microvessels
  - protein phosphorylation, regulatory action of vanadate (rat brain), **163**, 771
  - substance P-stimulated protein kinase C translocation (bovine brain), **164**, 595
- Milk
  - late-lactation protein gene, molecular cloning and characterization (wallaby), **164**, 1380
- Mineralization
  - tissues, association with sulfation of secreted phosphoprotein I (rat bone marrow cells), **165**, 234
- Mithramycin
  - interaction with metal ions and DNA, analysis, **160**, 517
- Mitochondria
  - alveolar macrophage, respiration, role in lucigenin chemiluminescence (rat), **159**, 584
  - autoantibodies to, from primary biliary cirrhosis patients, analysis of 2-oxo acid dehydrogenase complex biosynthetic regulation (yeast), **158**, 220
  - brown adipose tissue
    - F_1-ATPase and uncoupling protein content, rapid postnatal changes (rat), **159**, 216
    - photoaffinity labeling with $[^{125}I]$coenzyme A derivative: differential interaction with uncoupling protein and ADP/ATP carrier (hamster), **161**, 502
  - cardiac
    - adriamycin binding to inner membrane, inhibition by spermine (bovine), **159**, 791
    - carnitine translocation, effect of diazepam (rat), **161**, 295
    - and hepatic, intact, and derived electron transport particles, respiratory inhibition by 1-methyl-4-phenylpyridinium, potentiation by tetraphenylborate (rat), **161**, 809
    - phosphate carrier, inhibition by reaction with carboxyl group reagent (bovine), **162**, 212
    - respiratory function, synergistic deleterious effect of micromolar Ca ions and free radicals, localization at cytochrome *c* and salvage trial (guinea pig), **163**, 1397
  - cerebral
    - complex I of electron transport system, inhibition by 1,2,3,4-tetrahydroisoquinoline (mouse), **162**, 1541
    - complex I subunits of respiratory chain, deficiencies associated with Parkinson's disease (human), **163**, 1450
  - characterization of submitochondrial compartments: site of synthesis of dolichol and dolichol-linked sugars (mouse), **164**, 1009
  - in clonal cultures from Kearns-Sayre syndrome patients, genomic heteroplasmy, **160**, 765
  - complex III of respiratory chain, associated ubiquinone-binding protein: isolation and nucleotide sequence of encoding nuclear gene (human), **161**, 371
  - DNA
    - from brothers with familial mitochondrial myopathy, multiple deletions at direct repeats of non-D-loop regions, **164**, 1352
    - deleted, in myopathic patients, direct sequencing, **164**, 156
    - deletions associated with ocular myopathy, detection by gene amplification (human), **162**, 664
  - energy depletion by bongkrekic acid and op_1 mutation in rho^- mutants, role in cell growth defects (yeast), **159**, 612
  - evidence for presence of DNA primase (yeast), **160**, 525
  - gene expression levels, increase in polyps of familial polyposis coli patients, **159**, 1100
  - genes for NADH dehydrogenase and cytochrome oxidase subunits, detection of homologous DNA sequences in nuclei from normal tissue and hepatoma cells (rat), **162**, 258
  - hepatic
    - ATPase–ATP synthase complex, β-subunit, N-terminal sequence (rat), **164**, 1165
    - ATP synthase, orientation of chargerin II in, determination by antibodies against chargerin II peptides (rat), **165**, 449
    - chromanoxyl radical accumulation, prevention by free radical reductase activity (rat), **159**, 229
    - generation of reactive oxygen species in isolated perfused liver after hypoxic injury (rat), **160**, 140
    - interaction with 1-methyl-4-phenylpyridinium ion, enhancement by tetraphenylboron (rat), **159**, 983
    - internal, degradation of ornithine aminotransferase extrapeptide (rat), **163**, 215
    - matrix proteins, release through Ca^{2+}-requiring, cyclosporin-sensitive pathway (rat), **161**, 619
    - and microsomes, occurrence in membranes of NADH- and NADPH-linked aquacobalamin reductases (rat), **165**, 675
    - and muscle, respiratory chain, complex I tissue-specific defect (human), **160**, 623
    - ornithine carbamoyltransferase precursor transfer into, induction by polyamines (rat), **158**, 287
    - permeability transition, role of cyclosporin A-sensitive and -insensitive mechanisms (rat), **163**, 561
    - radical production, stimulation by peroxides, correlation with tumor promoting activity (rat), **160**, 1067
    - reconstituted tricarboxylate carrier system, effects of anthracycline antibiotics (rat), **164**, 1281
    - and renal, free radical-mediated oxidation of porphyrinogen, stimulation by iron (rat), **160**, 101

  respiration, ammonium salt-induced alterations, protective effects of carnitine (rat), **158**, 181
  respiratory functions, age-associated decline (human), **165**, 994
  RNA and protein synthesis, effect of irradiation by He-Ne laser (rat), **163**, 1428
  staining by nonyl-acridine orange independently of energetic state (rat), **164**, 185
  suborganelle compartments, characterization: site of synthesis of dolichol and dolichol-linked sugars (mouse), **164**, 1009
 lipid peroxidation, comparison in Ehrlich ascites cells and liver, role of membrane polyunsaturated fatty acid content (mouse), **163**, 356
 myocardial
  electron transport activity, acetylcholinesterase inhibitor-induced changes (rat), **164**, 997
  hydroxyl radical detection after ischemia–reperfusion by trapping with salicylate (rat), **165**, 1004
 P1-related protein, amino acid sequence, comparison with chloroplast and bacterial proteins, evidence for endosymbiotic origin (hamster, human, yeast), **163**, 780
 renal
  adverse effects of cisplatin: disturbances in glutathione peroxidase activity (rat), **159**, 1121
  26-hydroxycholesterol formation, catalysis by cytochrome P450 (pig), **159**, 1135
  ornithine uptake, mechanism: demonstration of ornithine/phosphate antiporter (rat), **158**, 870
 skeletal muscle
  and hepatic, respiratory chain, complex I tissue-specific defect (human), **160**, 623
  respiratory chain multiple defects including complex II in patient with encephalopathy and myopathy, **163**, 695
 yeast
  ATPase β-subunit, site-directed mutagenesis, **164**, 381
  rDNA transcription, stringent regulation, analysis, **164**, 362
Mitochondrial respiratory chain complex II, *see* Succinate dehydrogenase (ubiquinone)
Mitogenesis
 induction by endothelin (rat embryonic glial cells), **165**, 1115
Mitogens
 Schwann cell, derivation from myelin basic protein (mouse), **164**, 883
Moloney murine leukemia virus
 gp70/p15 E, turnover and compartmentation in ψ_2 cells, **161**, 596
 in retroviral transfer of murine c-*myc* gene into HL-60 cells, **163**, 321
 reverse transcriptase, inhibition by α-anomeric oligonucleotides, **161**, 1184
Molybdenum
 –iron cofactor
  of nitrogenase, Mössbauer spectroscopy of oxidized and semi-reduced states (*Azotobacter vinelandii*), **162**, 882
  purification and spectroscopic characterization in *N*-methylformamide (*Azotobacter vinelandii*), **163**, 746
Monensin
 induced loss of hepatic surface galactosyl receptors, role of receptor internalization via clathrin-coated pit pathway (rat), **161**, 261
Monoamine oxidase, *see* Amine oxidase (flavin-containing)
Monoclonal antibodies
 alcohol dehydrogenase, in interspecific immunoenzymatic assay (fruit fly), **160**, 638
 to DNA, induced by nucleoprotein shed in systemic lupus erythematosus, binding to DNA on membrane receptors (human), **159**, 1441
 anti-idiotypic, location of neuronal nicotinic receptors (rat brain), **162**, 1085
 anti-Le^x, coupling to liposome-encapsulated sodium butyrate, inhibition of colonic cancer cell growth (human), **158**, 202
 atrial natriuretic factor C-terminus, production by *in vitro* immunization (rat spleen), **162**, 634
 epidermal growth factor receptor, induction of c-*fos* (human epidermoid carcinoma cells), **158**, 129
 5A, binding of apolipoprotein B-48 and inhibition of low-density lipoprotein–receptor interaction (human), **162**, 908
 to human hybridoma cells, heterobifunctional crosslinking with 2-methyl-N^1-benzenesulfonyl-N^4-bromoacetylquinonediimide, **158**, 640
 human insulin receptor, spectrum of biological effects in transfected 3T3/HIR fibroblasts, relationship to receptor kinase, **165**, 212
 to human recombinant basic fibroblast growth factor, inhibition of bFGF biological activity (hamster, mouse, rat), **164**, 736
 in identification of
  dihydropyridine-sensitive calcium channel (chicken brain), **163**, 1182
  P-glycoprotein in renal brush border membranes (dog, human, rat), **162**, 244
 immobilized nitrate reductase, NADH substrate inhibition and enhancement of thermal stability (corn), **161**, 496
 interleukin 6, strongly neutralizing, establishment and epitope analysis (human), **165**, 728
 in localization of hepatic c-ERB A proteins (rat), **164**, 1053
 MAb 418, to von Willebrand factor, inhibiting factor VIII binding, localization of associated epitope within 106 N-terminal amino acids of vWF, **163**, 618
 to main immunogenic region of nicotinic acetylcholine receptor, interaction with synthetic peptides (human), **165**, 865
 90K heat-shock protein, in analysis of untransformed glucocorticoid receptor heteromeric structure (rat), **159**, 677
 OKB-7, anti-EBV/C3dR, enhancement of EBV/C3dR and p120 ribonucleoprotein phosphorylation in subcellular fractions (Raji cells), **159**, 1213
 to particulate guanylate cyclase from porcine kidney, production and characterization, **164**, 653

  - in radioimmunoassay for detection and characterization of endothelin in plasma and aortic endothelial cell culture medium (human), **161**, 320
  - to *smg* p25A, preparation and use in analysis of protein tissue distribution (bovine, rat), **162**, 1438
  - 2E11, binding to 4-aminobiphenyl in organic solvents, description (mouse), **158**, 80
- Monocyte-activating factor
  - cDNA cloning and sequencing (human), **159**, 249
  - production by fibroblasts in response to interleukin 1 and tumor necrosis factor (human), **160**, 1403
- Monocyte chemotactic factor
  - cDNA cloning and sequencing (human), **159**, 249
  - production by fibroblasts in response to interleukin 1 and tumor necrosis factor (human), **160**, 1403
- Monocytes
  - low-affinity interaction with fibrinogen carboxy-γ terminus, induction of oxidative burst and modulation of effector functions (human), **165**, 7
  - nuclei, specific translocation of natural immunomodulating peptide tuftsin into (human), **159**, 1147
  - and peripheral blood lymphocytes, phospholipase D, differential effects of phorbol ester (human), **162**, 788
- Monokines
  - regulation of glucose transporter mRNA in myotubes (L6 cells), **165**, 429
- N^{G}-Monomethyl-L-arginine
  - inhibition of synthesis of endothelium-derived relaxing factor, enhancement of hypoxic pulmonary vasoconstriction (rat), **164**, 1198
- Mononuclear cells
  - bronchoalveolar, from autoimmune disease patients with lung involvement, enhanced transcription of c-*sis* protooncogene, **164**, 1018
  - peripheral blood, immunoglobulin production, proliferation-independent promotion by 1-oleoyl-2-acetylglycerol (human), **161**, 1319
  - stimulated, associated β-thromboglobulin cleavage product, activation of neutrophils (human), **159**, 969
- Monooxygenase
  - cytochrome P450-dependent, regio- and stereoselective regulation by isoenzyme-selective phosphorylation of cytochrome P450 (rat liver), **160**, 46
- Monophenol monooxygenase
  - encoding gene, single base insertion, identification as cause of oculocutaneous albinism (human), **164**, 990
  - Himalayan mutant, cDNA, molecular cloning and localization of mutation site by comparison with normal nucleotide sequences (mouse), **161**, 252
  - imidazole-induced expression in B16 melanoma cultures, comparative effects of retinoic acid and triiodothyronine (mouse), **162**, 288
  - precursor, functional analysis of encoding cDNA (human), **162**, 984
  - variant cDNAs, isolation and characterization (mouse), **159**, 848
- Morphogenetic field
  - second messenger system, realization: derivation of gene transcription as hysteretic function of second messenger, **165**, 1267
- Mössbauer spectroscopy
  - zero-field, human diferric transferrin, **158**, 755; *erratum*, **160**, 417
- Mouse mammary tumor virus
  - based conditional retroviral vectors, packaging cell line for, construction and characterization (feline kidney), **159**, 1191
  - expression in mammary gland, role of sex steroids (mouse), **159**, 1020
- MR 889
  - proteinase inhibitory activity, analysis, **165**, 568
- Mucin
  - milk-fat globule membrane-derived, disulfide linkage to 70-kDa protein (human), **165**, 1305
  - secretion by isolated submandibular acini, and cAMP levels, isoproterenol-stimulated, effects of cyclic AMP phosphodiesterase (rat), **161**, 661
- Murine leukemia virus
  - reverse transcriptase, inhibition by 5,6,7-trihydroxyflavone, **160**, 982
- Muscarinic receptors
  - functions, effect of (−)-indolactam V (human neuroblastoma cells), **162**, 1207
  - pineal, phosphoinositide response: pertussis toxin resistant signaling with very low receptor number (rat), **164**, 645
- Muscles
  - ciliary, membrane voltage and intracellular calcium in cultured cells, effects of endothelin (human), **164**, 1031
  - clonal cell cultures, regulation of cytosolic calcium (human), **165**, 1130
  - endothelin distribution, clearance, and vascular effects (pig), **161**, 647
  - papillary, intracellular loading of aequorin by different methods, evaluation (ferret), **162**, 402
  - retractor penis, inhibitory factor, generation mechanism (bovine), **164**, 544
  - skeletal
    - carnitine content, age-dependent decrease (human, mouse), **161**, 1135
    - heparin-nonreleasable lipoprotein lipase in different fibers, activation by epinephrine (rat), **164**, 615
    - leucine transamination, analysis by heteronuclear ^{15}N/^{1}H spin echo NMR (rat), **160**, 1033
    - monoADP-ribosylation of proteins, enzymatic and nonenzymatic types (rat), **163**, 1063
    - sarcoplasmic reticulum, release of calcium, enhancement by phosphatidylinositol 4,5-bisphosphate (guinea pig), **163**, 1487
    - tissue-specific defect of complex I of mitochondrial respiratory chain (human), **160**, 623
  - smooth
    - A10 cells, endothelin-mediated inositol phosphate formation and Ca^{2+} mobilization, inhibition by nicardipine, **160**, 758
    - angiotensin II-induced calcium mobilization, effect of valinomycin (rat aorta), **162**, 491
    - arterial, relaxing action of okadaic acid, mechanism (dog, pig), **162**, 971

  - calcium channel binding sites, localization (canine intestine), **159**, 119
  - cAMP levels, depression by angiogenin, role of pertussis toxin-sensitive mechanism (rat aorta), **163**, 902
  - catalase activity and cellular hyperoxia, effects of butyrate (rat pulmonary artery), **164**, 1143
  - cerebral artery, stretch-induced tone, potentiation by protein kinase C-induced increase in intracellular Ca^{2+} sensitivity (rabbit), **165**, 312
  - cGMP production induced by atrial natriuretic factor, competitive peptide antagonists (rat aorta), **164**, 108
  - circular, neurotensin receptors, role of disulfide bridges (canine intestine), **165**, 422
  - collagen and proteoglycan production *in vitro*, effects of heparin and endothelial cell growth factor (human), **163**, 84
  - constriction by endothelin, role of inositol trisphosphate and calcium mobilization (rabbit aorta), **158**, 86
  - contractile elements, Ca^{2+} sensitivity, regulatory effects of cAMP, cGMP, and phorbol 12,13-dibutyrate (rat), **163**, 929
  - 1,2-diacylglycerol levels and protein kinase C activation, effects of endothelin (bovine aorta), **162**, 381
  - differential effects of human and recombinant B chain homodimer platelet-derived growth factors (bovine, human), **160**, 1047
  - elastin synthesis, stimulation by insulin-like growth factor I (bovine pulmonary artery), **160**, 382
  - endothelin-1 binding sites, down-regulation by angiotensin II and phorbol esters (rat aorta), **164**, 809
  - endothelin- and caffeine-sensitive intracellular Ca^{2+} stores, overlap (rat aorta), **158**, 235
  - endothelin-induced biphasic 1,2-diacylglycerol formation *in vitro*: mass analysis with radioenzymatic assay (rabbit aorta), **160**, 744
  - endothelin receptor binding activity and cytosolic free Ca^{2+} concentration, effects of synthetic sarafotoxin analogs (rat), **162**, 441
  - endothelin-stimulated phosphoinositide hydrolysis and arachidonic acid release in cultured cells, dissociation by phorbol ester (rabbit renal artery), **160**, 868
  - endothelium-dependent relaxation, opposite effects of L-arginine and L-argininosuccinic acid (bovine pulmonary artery), **161**, 536
  - growth-related metabolism in cultured cells, differential activation by low-density lipoproteins and epidermal growth factor (rat), **159**, 624
  - inositol 1,4,5-trisphosphate- and guanosine 5′-*O*-(3-thio triphosphate)-induced calcium release, effects of heparin (rabbit trachea), **163**, 262
  - intracellular calcium mobilization and uptake, effects of endothelin 1 (rabbit aorta), **164**, 474
  - permeabilized, phosphatase inhibition with okadaic acid, effect on relationship between force and myosin light chain phosphorylation (rabbit), **161**, 838
  - phosphatidylinositol response and cyclic nucleotide levels, effects of endothelin (rat aorta), **158**, 170
  - phospholipase C-mediated hydrolysis of phosphoinositides *in vitro*, stimulation by endothelin (rabbit aorta), **159**, 1072
  - proliferation
    - inhibition by staurosporine (rabbit aorta), **158**, 105
    - platelet-derived growth factor-stimulated, inhibition by atrial natriuretic factor (rat aorta), **160**, 1392
  - receptor binding activity and free calcium response *in vitro*, effects of synthetic endothelin analogs (rat aorta), **160**, 228
  - α-toxin-permeabilized
    - calcium sensitivity, regulation, role of actomyosin–ADP complex (rabbit), **165**, 408
    - myofilament Ca^{2+} sensitivity, augmentation by norepinephrine and GTP-γ-S (rabbit mesenteric artery), **157**, 677; *erratum*, **165**, 1442
  - uterine, Ca^{2+}-independent contraction (rat), **165**, 722
  - vascular
    - A10 cells, Ca^{2+} transients and oscillations, effects of endothelin, **163**, 1223
    - DNA synthesis in cloned cells, endothelin-mediated stimulation (rat), **158**, 880
    - endothelin-induced intracellular Ca^{2+} mobilization in cultured cells, role of platelet-activating factor and thromboxane A$_2$ (rabbit, rat), **160**, 751
  - vasopressin-stimulated Ca^{2+} influx, mediation by phosphoinositide hydrolysis (rat aorta), **161**, 677
  - vasorelaxant properties of phosphorylated and dephosphorylated urodilatin (rabbit aorta), **163**, 830

- Mutagenesis
  - colony-stimulating factor cDNA, in analysis of structure–function relationship (human granulocytes), **159**, 103
  - at *hprt* locus, and morphological transformation, effects of transfection with herpes simplex virus type 2 BglII N fragment and subfragments (NIH 3T3 cells), **159**, 1249
  - intracellular, effects of terminal deoxynucleotidyl transferase (C-127-1, COS-7 cells), **165**, 271
  - *N*-methyl-*N*-nitrosourea-induced, *o*-vanillin comutagenic activity, mechanism, **162**, 1376
  - site-directed
    - porcine citrate (*si*)-synthase, analysis, **164**, 1437
    - at threonine-301 of cytochrome P450 enzymes laurate (ω-1)-hydroxylase and testosterone 16α-hydroxylase, modification of substrate specificities (rabbit hepatic microsomes), **158**, 717
    - yeast mitochondrial ATPase β-subunit, **164**, 381
- Mutants
  - carboxyl-terminal deletion, human macrophage colony-stimulating factor, expression analysis (COS-1 cells), **161**, 892
  - *lys2* and *lys5*, revertants, enzyme properties (yeast), **161**, 182
  - sterol, regenerated from cytochrome P450-obtusifoliol-14-demethylase inhibitor-resistant callus, biochemical characterization (tobacco), **165**, 125
  - with temperature-sensitive cell growth, isolation from embryonal carcinoma cells: control of stem cell differentiation by incubation temperatures (mouse), **165**, 65
  - vasopressin, differential polyadenylation during development (rat), **158**, 555
- Mutations
  - [Arg292→Val] or [Arg292→Leu], enhancement of aspar-

tate aminotranferase reactivity with aromatic amino acids (*Escherichia coli*), **159**, 337
  β^{Malay}, in β-globin gene, associated β-thalassemia, role of abnormal RNA processing (human), **163**, 8
  causing familial amyloidotic polyneuropathy, detection and localization on transthyretin gene (human), **164**, 1240
  in codon 61 of Ha-*ras* oncogene, absence in epithelial cells transformed *in vitro* by 7,12-dimethylbenz[*a*]anthracene (rat), **165**, 1319
  cytochrome P450d at distal and proximal sites, effects on regiospecificity of acetanilide hydroxylations (yeast), **160**, 669
  dam gene of *Vibrio cholerae*: 2-aminopurine sensitivity with intact GATC methylase activity, **165**, 561
  deletion
    mitochondrial DNA in myopathic patients, direct sequencing, **164**, 156
    NADPH-cytochrome P450 reductase gene, induction of increase in sensitivity to ketoconazole (yeast), **160**, 1257
    3′ untranslated region of human B-cell stimulatory factor 2 mRNA, induction of mRNA stabilization and high-level expression in NIH 3T3 cells, **163**, 1056
  distal His→Arg, myoglobin, resulting ligand binding site, similarity to hemoglobin Zurich abnormal beta site (bovine), **158**, 110
  Himalayan, localization by comparison of normal and mutant tyrosinase cDNA sequences (mouse), **161**, 252
  insulin receptor, effects on binding kinetics in transfected CHO cells grown in suspension culture, **164**, 191
  point
    ras gene, detection by polymerase chain reaction using mutation-specific inosine-containing oligonucleotide primers (EJ cells, human blood), **160**, 441
    single, variant DNA sequences differing by, titration by selective dot-blot hybridization with synthetic oligonucleotides (human), **159**, 1233
  prion protein, Pro→Leu change at position 102, and other mutations, role in associated Gerstmann-Sträussler syndrome (human), **163**, 974
  rho^- and op_1, inhibition of mitochondrial oxidative phosphorylation and adenine nucleotide exchange, role in cell growth defects (yeast), **159**, 612
  substitution
    highly conserved arginine 87 of HIV-1 protease, resulting loss of proteolytic activity, **164**, 30
    for introduction of disulfide bridges and prolines into proteins, geometric paramaters, **160**, 109
  β^0-thalassemia/HbE-associated, characterization (human), **162**, 846; *erratum*, **163**, 1540
  Thr246→Gly in L-lactate dehydrogenase, effect on specificity (*Bacillus stearothermophilus*), **161**, 59
Muteins
  tumor necrosis factor, induction of differentiation of monoblastic and myeloblastic leukemia cell lines, analysis (human), **160**, 820; *erratum*, **161**, 1348
Myelin
  associated glycoprotein, cDNA cloning
    alternative splicing pattern (mouse), **165**, 1162
    and amino acid sequence (human), **163**, 1473
  membranes, hydrolysis of phosphatidylinositol bisphosphate, stimulation by guanine nucleotides (human), **162**, 282
Myelin basic protein
  phosphorylation by ganglioside-stimulated protein kinase (rabbit), **165**, 93
  role in derivation of mitogen for Schwann cells (mouse), **164**, 883
Myeloperoxidase
  detection of high-affinity binding sites for calcium (bovine), **160**, 897
Myoblasts
  adhesion to extracellular matrix proteins, and surface accumulation of integrin, effects of glycoprotein processing inhibitors (chicken, rat), **163**, 1338
  clonal cultures from patients with Kearns-Sayre syndrome, genomic heteroplasmy, **160**, 765
Myocardium, *see also* Heart
  action of angiotensin II and atrial natriuretic peptide: analysis in isolated ventricular cardiomyocytes (rat), **163**, 1435
  β-adrenoceptors, impaired desensitization in spontaneously hypertensive rats, role of cytosolic factors, **159**, 1039
  creatine kinase system, alterations in cardiomyopathic hamsters, analysis, **165**, 748
  ischemic-reperfused, hydroxyl radicals
    detection in mitochondria by trapping with salicylate (rat), **165**, 1004
    generation, continuous-flow ESR monitoring with 3,3,5,5-tetramethyl-1-pyrroline-1-oxide spin trap (rat), **164**, 1274
  mitochondrial electron transport activity, effects of acetylcholinesterase inhibitor (rat), **164**, 997
  subcellular distribution and immunocytochemical localization of protein kinase C (rat), **162**, 1105
Myocytes, *see also* Muscles
  atrial, secretion of atrial natriuretic factor, stimulation by cocultured bovine endothelial cells, role of endothelin (rat), **163**, 701
  BC3H-1, phorbol ester-treated, retention of specific protein kinase C isozymes, **161**, 327
  cardiac, detection of fibroblast growth factors (rat), **157**, 1336; *erratum*, **159**, 1455
  effects of dual loading of fura-2 and 2,7-biscarboxyethyl-5(6)-carboxyfluorescein (rat), **163**, 500
  endothelin and sarafotoxin receptors, structure–activity relationships and receptor subtypes (rat heart), **163**, 936
  L6
    insulin-stimulated glucose transport, suppression by calcitonin gene-related peptide, **164**, 461
    myotubes, glucose transporter mRNA levels, regulation by monokines, **165**, 429
  smooth, identification of two functionally distinct types of protein kinase C (rabbit aorta), **161**, 1020
Myofibrils
  cardiac, detection of latent form of protein phosphatase 1 (bovine), **159**, 72
Myofilaments
  Ca^{2+} sensitivity, in α-toxin-permeabilized arterial smooth

    muscle, augmentation by norepinephrine and GTP-γ-S (rabbit), **157**, 677; *erratum*, **165**, 1442

yoglobin
  heme orientational preference in, effect of iron oxidation/ligation/spin state, ^{1}H NMR study (sperm whale, tuna), **158**, 462
  ligand binding site resulting from distal His→Arg mutation, similarity to hemoglobin Zurich abnormal beta site (bovine), **158**, 110
  metastable form generated by reconstitution, optical spectroscopic observation (sperm whale), **161**, 290
  redox cycle, implications in reoxygenation injury in myocardial infarction (rat), **106**, 1162
  reduced, oxidation by ceruloplasmin, analysis (horse), **159**, 482

yometrium
  force development, induction by phorbol and agonists, effect of pregnancy (rat), **158**, 302

yopathy
  associated mitochondrial DNA deletion, direct sequencing (human), **164**, 156
  with encephalopathy, associated multiple defects of mitochondrial respiratory chain including complex II (human), **163**, 695
  familial mitochondrial, mitochondrial DNA from affected brothers, multiple deletions at direct repeats of non-D-loop regions, **164**, 1352
  ocular, associated with mitochondrial DNA deletions, diagnosis by gene amplification method (human), **162**, 664

yosin
  binding regions in smooth muscle caldesmon, characterization (chicken), **160**, 1316
  cardiac, isoenzymes, diabetes-like effects of intermittent fasting, prevention by sucrose (rat), **164**, 319
  light chain, phosphorylation, relationship to force production in permeabilized smooth muscle, effect of phosphatase inhibition with okadaic acid (rabbit), **161**, 838

yosin light chain kinase
  inhibition by
    amiloride (turkey gizzard), **162**, 1253
    kaempferol (bovine aorta), **164**, 419

Myotubes
  cultured, calcium flux through dihydropyridine-sensitive channels, alteration by extracellular ATP (chicken), **159**, 878

-Myristoyl glycinal diethylacetal
  antimyristoylation of *gag* proteins in HIV-infected cells, inhibitory effects on virus production, **165**, 1145

Myristoyl glycine
  amino-terminal moiety, antibodies to, detection of NH_2-terminal myristoylated proteins in retrovirus-infected cells, **162**, 724

N

NAD$^+$ (oxidized nicotinamide adenine dinucleotide)
  DNA synthesis initiation in absence of, inhibition by poly(ADP-ribose) polymerase (bovine thymus), **163**, 1113

NAD$^+$ ADP-ribosyltransferase
  copurification with *in vivo* poly(ADP-ribosyl)ation target p66 (murine fibroblasts), **165**, 631
  DNA-dependent, expression in *Escherichia coli*, **163**, 739
  inhibition of DNA synthesis initiation in absence of NAD$^+$ (bovine thymus), **163**, 1113

NADH (reduced nicotinamide adenine dinucleotide)
  dependent enzymatic reaction, chemical nature of hydrogen transfer in, micellar model, **159**, 1330
  substrate inhibition of monoclonal antibody-immobilized nitrate reductase, analysis (corn), **161**, 496

NADH-cytochrome b_5 reductase
  microsomal, affinity modification by NAD(P) 2′,3′-dialdehydes (rat liver), **164**, 758

NADH dehydrogenase
  subunit 6, mitochondrial gene, detection of homologous DNA sequences in nuclei from normal tissue and hepatoma cells (rat), **162**, 258

NADH dehydrogenase (ubiquinone)
  mitochondrial
    subunit deficiencies associated with Parkinson's disease (human brain), **163**, 1450
    tissue-specific defects (human liver, muscle), **160**, 623

NADP$^+$ (oxidized nicotinamide adenine dinucleotide phosphate)
  periodate-oxidized, in affinity labeling of cofactor-binding region of placental estradiol 17β-dehydrogenase (human), **158**, 617

NAD(P) 2′,3′-dialdehydes
  affinity modification of microsomal flavoproteins (rat liver), **164**, 758

NADPH (reduced nicotinamide adenine dinucleotide phosphate)
  activation of arachidonate 5-lipoxygenase, optimization (RBL-1 cells), **161**, 1327
  binding sites on fatty-acid synthase, identification (mouse), **158**, 690
  dependent enzymatic reaction, chemical nature of hydrogen transfer in, micellar model, **159**, 1330

NADPH-cytochrome P450 reductase
  encoding gene, disruption, induction of increase in sensitivity to ketoconazole (yeast), **160**, 1257
  microsomal, affinity modification by NAD(P) 2′,3′-dialdehydes (rat liver), **164**, 758
  role in hepatic microsomal steroid 5α-reductase activity, analysis (rat), **165**, 590

NAD(P)H dehydrogenase (quinone)
  purification by Cibacron Blue F3Ga affinity chromatography from cytosol and microsomes and structural comparison (rat liver), **161**, 434

NADPH-monooxygenase
  microsomal, distinct forms: homology of form 2 NH_2-terminus with *Pseudomonas fluorescens* flavin-containing enzyme (rabbit liver), **163**, 49

NADPH oxidase
  activation *in vitro* by catalytic fragment of protein kinase C (human neutrophils), **158**, 884

  cell-free activation, inhibition by inositol lipids and phosphatidic acid (human), **161**, 712
  cytosolic activation factors, differential expression in HL-60 leukemic cells (human), **161**, 1109
  membrane-associated, enhanced activation in hypertensive patients, **158**, 966
NADPH–protochlorophyllide oxidoreductase, *see* Protochlorophyllide reductase
NAD(P)H:quinone reductase, *see* NAD(P)H dehydrogenase (quinone)
Nafenopin
  acyl-coenzyme A thioester, potentiation of diacylglycerol-activated protein kinase C (rat brain, liver), **159**, 1026
Naphthalene
  utilizing bacterial strains, nucleotide sequence homology, **164**, 772
Natriuretic response
  production by membrane metallo-endopeptidase inhibitor UK-69,578 (mouse), **164**, 58
Natural killer cells
  impaired activity in Chediak–Higashi syndrome beige mouse, improvement by thiol proteinase inhibitors, **160**, 433
NBD-Cl, *see* 7-Chloro-4-nitrobenzo-2-oxa-1,3-diazole
Necrosis
  renal, effect on platelet-activating factor levels in blood, role of cholinephosphotransferase in *de novo* PAF biosynthesis pathway in inner medulla (rat), **163**, 1002
Neocarzinostatin, *see* Zinostatin
Nephrocalcinosis
  effect on inner medullary collecting tubular cells, *in vitro* analysis (rabbit), **160**, 1169
Nerve fibers
  myelinated tracts in brain, magnesium-dependent nonspecific binding of [^{125}I]prolactin (rat), **158**, 986
Nerve growth factor
  effect on GTP-binding protein mRNA expression in rat pheochromocytoma PC-12 cells, **158**, 377
  induction of Alzheimer amyloid precursor release from PC 12 cells, **164**, 664
  and platelet-derived growth factor, effects on ribosomal DNA transcription and tumor cell proliferation, comparison (human tumor cells), **163**, 649
  role in pheochromocytoma cell electrical excitability (rat), **163**, 810
Nerves
  perivascular, release of calcitonin gene-related peptide, role in neurogenic vasodilation in mesenteric artery (rat), **165**, 1391
  small intestinal, calcium channel binding sites, localization (dog), **159**, 119
Nervous system
  central, brain natriuretic peptide distribution and molecular forms (rat), **165**, 880
  peripheral, superior cervical ganglia, detection of brain natriuretic peptide receptors (rat), **159**, 1032
Neuraminic acid
  deaminated, enriched glycoprotein, isolation and characterization in ovarian fluid (rainbow trout), **164**, 744
Neuroendocrine–endocrine axis
  role in regulation of cytochrome P450-dependent steroid hydrolase during larval–pupal development (tobacco hornworm), **165**, 442
Neurofilaments
  subunit NF-M, amino acid sequences at extreme carboxyterminus, identification of previously unrecognized motifs in published avian and mammalian sequences, **162**, 294
Neurons
  axonal outgrowth, stimulation by laminin A chain synthetic peptide (rat), **162**, 821
  membrane binding sites, associated interaction of mamba venom dendrotoxin I and scorpion venom charybdotoxin (rat brain), **163**, 394
  spinal, isolated, identification of high-voltage-activated calcium currents (rat), **159**, 379
  sympathetic, phosphorylation of intermediate filament protein peripherin (rat), **160**, 772
Neuropeptides
  identification of insulin-like growth factor I aminoterminal tripeptide Gly–Pro–Glu as (rat), **165**, 766
  mobilization of Ca^{2+} in small cell lung cancer cells, **164**, 66
  pheromone biosynthesis-activating, isolation and amino acid sequence (silkworm), **163**, 520
  schistoFLRF-amide, FMRF-amide-like, isolation, primary structure, and bioactivity (locust), **160**, 850
Neuropeptide Y
  immunoreactive, increased levels in platelets from spontaneously hypertensive rats, **165**, 1399
  mobilization of intracellular Ca^{2+}, correlation with increased inositol phosphate production (human erythroleukemia cells), **165**, 1138
Neurospora crassa
  leu-2 gene transcription and translation, response time to α-isopropylmalate, **161**, 1286
  mutagen-sensitive mutants, deoxyribonucleoside triphosphate levels, measurement, **162**, 583
Neurotensin
  inhibition of neuroblastoma cell cAMP production, role of pertussis toxin, **161**, 1144
  and other neuropeptides, mobilization of Ca^{2+} in small cell lung cancer cells, **164**, 66
Neurotensin receptors
  circular smooth muscle of small intestine, binding activity and *in vitro* response to neurotensin, role of disulfide bridges (dog), **165**, 422
Neurotransmission
  adrenergic, in mesenteric artery, inhibition by endothelin (rat), **161**, 803
  cholinergic and nonadrenergic noncholinergic, in small intestine, inhibitory action of atrial natriuretic factor (guinea pig), **164**, 638
Neutral endopeptidase, *see* Membrane metallo-endopeptidase
Neutrophil-activating factor
  induction of neutrophil adherence to endothelial cells and subendothelial matrix proteins (human), **162**, 387

utrophil elastase, *see* Leukocyte elastase
utrophils
  activated, generated oxidants, transformed 10T1/2 cells, associated alterations in c-*abl* gene methylation, **158**, 24
  activation
    calcium-dependent, by synthetic ionophore, analysis (human), **163**, 209
    by surface-bound IgG, role of pertussis toxin-insensitive G protein (human), **164**, 983
    by β-thromboglobulin cleavage product formed in cultures of stimulated mononuclear cells (human), **159**, 969
  adherence to endothelial cells and subendothelial matrix proteins, induction by neutrophil activating factor (human), **162**, 387
  calpain activation after phorbol ester- or fMet-Leu-Phe-induced translocation to plasma membrane (human), **160**, 737
  CD11b/CD18 surface expression, and adherence to bovine and human endothelial cells, effects of sulfhydryl reducing agents (human), **165**, 51
  chemotactic factor for, identification of calcium-dependent cysteine proteinase as precursor (human), **164**, 875
  chemotaxis and 64-kDa protein phosphorylation, role of N-terminus of LUCT/IL-8 protein (human), **163**, 1298
  electropermeabilized
    actin assembly, role of G-proteins (human), **164**, 700
    receptor-mediated actin assembly, role of intracellular pH (human), **160**, 18
  endogenous acceptor proteins, DNA-regulated arginine-specific mono(ADP-ribosyl)ation and de-ADP-ribosylation reactions (human), **163**, 452
  N-formyl chemotactic peptide receptor–ligand interaction and cytoskeletal association, effects of ammonia (human), **165**, 377
  generation of nitric oxide, analysis (human), **160**, 813
  H_2O_2 formation, tumor necrosis factor-α-induced, effects of pertussis toxin and extracellular Ca^{2+} removal (human), **159**, 763
  from hypertensive patients, enhanced activation of respiratory burst oxidase, **158**, 966
  leukotoxin biosynthesis in plasma membrane, mechanism and relationship to oxygen radicals (pig), **161**, 1077
  leukotriene B_4 receptors, effects of protein kinase C blockers (human), **163**, 1456
  mammalian, leukotriene B_4 hydroxylation, analysis: identification of major metabolite and relative importance of 19- and 20-hydroxylations, **159**, 1283
  protein kinase C translocation, role of microfilaments (mouse), **160**, 1344
  protein tyrosine phosphorylation, analysis (human), **162**, 1478
  receptor-mediated accumulation of phosphatidate and diglycerides, mass determination by Coomassie blue staining and densitometry (human), **159**, 79
  respiratory burst
    and migration, priming by substance P: role in neurological regulation of inflammation (human), **161**, 520
    potentiation by R59022 and dioctanoylethylene glycol, mediation by elevation of cytosolic Ca^{2+} (human), **161**, 95
  superoxide radicals
    production, effect of extracellular ATP (human), **162**, 377
    release, association with phosphorylation of 47- and 49-kDa proteins (guinea pig), **158**, 1029
  translocation of natural immunomodulating peptide tuftsin, comparison with monocytes (human), **159**, 1147
Nicardipine
  inhibition of endothelin-mediated inositol phosphate formation and Ca^{2+} mobilization in A10 smooth muscle cells, **160**, 758
  and verapamil, BRL34915, and valinomycin, effects on endothelin-induced vascular contraction, comparison (rat aorta), **164**, 1003
Nickel
  intramolecular location in hydrogenase, proton-induced X-ray emission spectroscopic study (*Thiocapsa roseopersicina*), **162**, 422
  Ni(II), glycylglycyl-L-histidine complex, and hydrogen peroxide, production of superoxide and hydroxyl and oxygen radicals, ESR spectroscopic analysis, **159**, 445
Nicotinamide
  prevention of interferon-induced histidine decarboxylase activity in basophilic leukemic cells after coincubation (rat), **158**, 94
Nicotine
  binding to nicotinic cholinergic receptor, inhibition by monospecific antibodies against synthetic peptide predicted from α-3 nicotinic receptor cDNA (rat brain), **165**, 151
  inhibition of haloperidol-induced increase in striatal D_2-dopamine receptor density after chronic exposure (rat), **159**, 48
Nicotine receptors
  neuronal, location by anti-idiotypic antibody probes (rat brain), **162**, 1085
  α-3 subunit cDNA-predicted synthetic peptide, monospecific antibodies to, inhibition of $[^3H]$nicotine binding to nicotinic cholinergic receptor (rat brain), **165**, 151
  and voltage-sensitive calcium channels, mediation of calcium influx in SK-N-SH neuroblastoma cells (human), **162**, 1230
Nifedipine
  in analysis of 1,4-dihydropyridine regulation of voltage-dependent Ca^{2+} channels (PC12 cells), **160**, 929
  potent and specific inhibition of interleukin-8-, IL-1α-, and IL-1β-induced lymphocytic migration *in vitro* (human), **165**, 349
Night blindness
  retinoic acid-induced, molecular basis (frog), **161**, 825
Nitrate
  biosynthesis, demonstration of L-arginine as precursor (human), **163**, 1032
  enzymatic formation from L-arginine in cytosol (bovine brain), **165**, 284

- transport into cell, relationship to 47-kDa cytoplasmic membrane polypeptide levels (*Anacystis nidulans*), **158**, 257

Nitrate reductase (NADH)
- immobilized with monoclonal antibody, substrate inhibition and enhancement of thermal stability (corn), **161**, 496

Nitric oxide
- L-arginine-derived, stimulation of soluble guanylate cyclase in adrenal gland (bovine, rat), **165**, 802
- L-arginine oxidative conversion to, role of hydroxylamine as intermediate (rat), **163**, 527
- generation
  - during microsomal hepatic denitration of glyceryl trinitrate, role of cytochrome P450 (rat), **163**, 1210
  - by neutrophils, analysis (human), **160**, 813
  - in vascular endothelial cells, role of citrulline-forming enzyme (pig), **158**, 348
- identification as cytotoxic activated macrophage effector molecule (mouse), **157**, 87; *erratum*, **158**, 624
- release from endothelial cells, role in blood pressure regulation, analysis with NO synthesis inhibitor N^G-methylarginine (guinea pig), **160**, 881

Nitrite reductase
- blue copper-containing, copper-nitrosyl intermediate in nitrate reduction by, spectroscopic evidence (*Achromobacter cycloclastes*, *Alcaligenes* sp.), **164**, 1366

Nitrites
- conversion from hydroxylamines and oximes, role in endothelium-dependent vascular relaxation (rat aorta), **164**, 889
- enzymatic formation from L-arginine in cytosol (bovine brain), **165**, 284
- reduction by blue copper-containing nitrite reductase, copper–nitrosyl intermediate in, spectroscopic evidence (*Achromobacter cycloclastes*, *Alcaligenes* sp.), **164**, 1366

Nitrogenase
- iron–molybdenum cofactor, Mössbauer spectroscopy of oxidized and semi-reduced states (*Azotobacter vinelandii*), **162**, 882

Nitrogen intermediates
- reactive, generation by activated macrophages, and tumoricidal activity, *in vitro* and *ex vivo* comparison (rat), **164**, 968

Nitrogen oxides
- synthesis from L-arginine by macrophage cytosol, role of inducible and constitutive components (mouse), **161**, 420

Nitroglycerin
- inhibition of secretagogue-induced corticotropin release by anterior pituitary cells (rat), **158**, 824
- microsomal hepatic denitration, associated formation of nitric oxide and role of cytochrome P450 (rat), **163**, 1210

5-Nitro-2-(3-phenylpropylamino)-benzoic acid
- inhibition of prostaglandin E$_2$ synthesis (rat mesangial cells), **163**, 398

N-Nitrosation
- macrophage-mediated, thioproline and proline, characterization (mouse), **159**, 373

N-Nitrosodimethylamine
- and other chemical carcinogens, and partial hepatectomy, effects on *in vivo* [^{35}S]methionine interaction with hepatic tRNA (rat), **163**, 1412

Nitrosomonas europaea
- degradation of trichloroethylene, analysis, **159**, 640

N-Nitrosopiperidine
- near-ultraviolet irradiation in phosphate buffer, formation of directly mutagenic α-hydroxy-*N*-nitrosopiperidine phosphate ester, **162**, 1140

Nitrosyl
- –copper intermediate in nitrite reduction by blue copper-containing nitrite reductase, spectroscopic evidence (*Achromobacter cycloclastes*, *Alcaligenes* sp.), **164**, 1366

Nonyl-acridine orange
- mitochondrial staining independent of energetic state (rat liver), **164**, 185

Noradrenaline, *see* Norepinephrine

Norepinephrine
- augmentation of myofilament Ca^{2+} sensitivity in α-toxin-permeabilized arterial smooth muscle (rabbit), **157**, 677; *erratum*, **165**, 1442
- oxidation by lactoperoxidase, characterization, **160**, 1183
- regulatory effect on malic enzyme expression in fetal brown adipocyte primary cultures (rat), **163**, 341

Novobiocin
- and heat shock, comparative effects on histone methylation patterns (fruit fly), **162**, 1037

Nuclear factor I
- homology with protein kinase family (human, pig, rat), **162**, 427
- related protein, binding by enhancer in rat c-*mos* locus (mouse), **161**, 8
- repression of reverse-oriented transcription from adenovirus type 5 DNA terminus (HeLa cells), **164**, 1212

Nuclear factors
- bound at two sites in 5′-upstream region of adenovirus 12 E1A gene, interactions (Ehrlich ascites tumor cells), **158**, 685
- target site in early-replicated DNA sequence, analysis: highly conserved binding motif (human), **165**, 956

Nuclear magnetic resonance
- analysis of arginyl–deoxyoligonucleotide interactions in *Taq* I endonuclease, **164**, 88
- and CD joint study of conformational variations in d(TGACGTCA) and reverse sequence d(ACTGCAGT), **165**, 602
- ^{13}C and ^{1}H, analysis of structure and conformation of HIV inhibitor 3′-azido-2′,3′-dideoxyribosylthymine, **164**, 1086
- heteronuclear
  - ^{15}N/^{1}H spin echo, in analysis of leucine transamination in skeletal muscle (rat), **160**, 1033
  - 3-D, CMP-KDO synthetase (*Escherichia coli*), **159**, 842

- ^{1}H, heme orientational preference in myoglobin, effect of iron oxidation/ligation/spin state (sperm whale, tuna), **158**, 462
- high-energy phosphate levels in brain of hyperammonemic rats, **159**, 815
- ^{23}Na and ^{31}P, in analysis of sonicated cardiolipin sodium salt in aqueous medium (bovine heart), **161**, 979
- two-dimensional, ferredoxin I, evidence for α-helix (*Desulfovibrio desulfuricans*), **159**, 592

uclear matrix
- association with apolipoprotein A-I, C-III, and A-IV genes, effects of triiodothyronine (rat liver), **161**, 576
- catalysis of DNA synthesis, stimulation by microtubule-associated protein-2 (*Physarium polycephalum*), **159**, 834
- isolated, DNA fragments specifically binding to, interaction with matrix-associated DNA topoisomerase II (chicken), **159**, 1263

ucleases
- putative, associated with glucocorticoid-induced cell death in T-cell leukemia line, identification as histones (human), **162**, 30

uclei
- ADP-ribose pyrophosphorolysis: evidence for metabolic pathway of (ADP-ribose)$_n$ (HeLa S3 cells), **163**, 1047
- extracts
  - catalysis of homologous recombinant DNA, fidelity and DNAase protection (human), **158**, 454
  - from lymphoblastoid cells of ataxia-telangiectasia patients, abnormality in DNA–protein binding, **158**, 749
- isolation, effects on 4,5′,8-trimethylpsoralen affinity for chromatin (human), **163**, 1384; *erratum*, **165**, 919
- monocyte, specific translocation of natural immunomodulating peptide tuftsin into (human), **159**, 1147
- phosphorylation of EBV/C3dR and p120 ribonucleoprotein, enhancement by specific EBV/C3dR ligands (Raji cells), **159**, 1213
- plasmacytoma, matrix DNA–protein complexes, visualization and partial characterization of protein component (mouse), **162**, 175
- sperm, RNA localization (rat testis), **158**, 272
- thymic, EDTA-reacted highly purified DNA, dialysis-released phosphopeptides, characterization (bovine), **163**, 1135
- yeast, rDNA transcription, stringent regulation, analysis, **164**, 362

Nucleoli
- associated protein, autoantibodies, detection (human serum), **163**, 1119

Nucleoproteins
- shed in systemic lupus erythematosus, induced monoclonal anti-DNA antibody, binding to DNA on membrane receptors (human), **159**, 1441

Nucleoside kinase
- role in 8-azaguanosine-5′-monophosphate synthesis *in vitro* (hamster fibroblasts), **159**, 854

Nucleosides
- 3′-fluoro-modified, inhibition of HIV replication in cultured cells with low cytotoxicity (human, mouse), **165**, 488
- purine, isomeric ring-expanded, and 5′-mono- and -diphosphate derivatives, conformational study, **165**, 106

Nucleotide sequence
- acid phosphatase cDNA (rat liver), **162**, 1044
- alcohol dehydrogenase cDNA
  - class III (human), **164**, 631
  - class III(χ) (human liver), **164**, 453
- Alzheimer's disease amyloid peptide (human), **163**, 1248
- β-amyloid protein precursor gene 5′-end region and first two exons (human), **159**, 297
- aromatic-L-amino-acid decarboxylase cDNA, **164**, 1024
- botulinum type A neurotoxin gene, delineation of N-terminal encoding region, **162**, 1388
- brown adipose tissue uncoupling protein cDNA (rabbit), **161**, 156
- *h*-caldesmon cDNA (chicken embryo gizzard), **164**, 503
- calmodulin-dependent protein phosphatase catalytic subunit cDNA (rat), **165**, 1352
- carcinoembryonic antigen gene family: analysis of N-terminal domain exons (human), **158**, 996
- cauliflower mosaic virus 35 S RNA promotor region, hexameric sequence (sunflower), **164**, 387
- cDNA corresponding to
  - F$_1$-β-subunit of ATP synthase complex (rat), **159**, 1184
  - 3-methylcholanthrene-inducible cytochrome P450 isozyme with high activity toward aflatoxin B$_1$ (hamster), **162**, 265
  - murine homolog of human cytochrome b_{558} small subunit, **165**, 902
  - pulmonary surfactant-associated protein-B (rabbit), **160**, 325
  - Rieske iron-sulfur protein of cytochrome bc_1 complex (rat), **159**, 19
- 2′,3′-cyclic-nucleotide 3′-phosphodiesterase gene (mouse), **165**, 1213
- cystatin C gene (human), **162**, 1324
- cytochrome b_5 pseudogenes (human liver), **163**, 18
- deleted mitochondrial DNA in myopathic patients, **164**, 156
- fatty-acid synthase cDNA (mouse), **158**, 690
- flanking AT-rich, effect on activation energy of cruciform extrusion in supercoiled DNA, **158**, 423
- α-L-fucosidase cDNA clones (human), **164**, 439
- β-1,4-galactosyltransferase gene (mouse), **162**, 1069
- gene encoding human breast carcinoma-associated DF3 antigen, 5′ region, **165**, 644
- γ-glutamyl transpeptidase cDNA (human kidney), **164**, 912
- growth hormone cDNA (grass carp), **161**, 1239
- hepatocyte growth factor cDNA (human), **163**, 967
- histatin cDNA clones, evidence for encoding by loci *HIS*1 and *HIS*2 (human parotid gland), **160**, 495
- homology between naphthalene-utilizing *Pseudomonas* strains, **164**, 772
- keratin 13 cDNA encompassing coil 1B through 3′ end (human), **162**, 1522
- lignin peroxidase cDNAs (*Phanerochaete chrysosporium*), **162**, 673
- lipocortin I cDNA (mouse), **159**, 155
- *luxE* gene (*Vibrio harveyi*), **163**, 93
- M4 α1-antitrypsin gene (human), **162**, 1560

- monocyte chemotactic and activating factor cDNA (human), **159**, 249
- nuclear gene encoding ubiquinone-binding protein of complex III of mitochondrial respiratory chain (human), **161**, 371
- nucleolar phosphoprotein B23 cDNA (human), **163**, 72
- numatrin cDNA (human), **164**, 176
- pancreatic cholesterol esterase cDNA, homology with rat lysophospholipase (bovine), **164**, 1302
- pancreatic secretory trypsin inhibitor cDNAs (rat), **162**, 151
- partial, gene encoding acidic fibroblast growth factor (human), **164**, 1121
- 6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase gene, 5′-flanking region (rat), **162**, 753
- phospholipase A_2
  - cDNA (rat), **162**, 1030; *erratum*, **164**, 1452
  - membrane-associated (human spleen), **163**, 42
- phospholipase C gene (*Clostridium perfringens*), **160**, 33
- prechymotrypsinogen cDNA (human pancreas), **158**, 569
- pregnancy-specific glycoprotein cDNA clones (human fetal liver), **163**, 1197
- pregnancy-specific β1-glycoprotein cDNA and genomic clones (human), **163**, 1021
- proline-rich protein cDNA: identification of PRP as C4b-binding protein (human liver), **165**, 138
- prostate-specific antigen gene
  - comparison with human kallikrein-like gene, **159**, 95
  - in human, **161**, 1151
- prostatic acid phosphatase cDNA (human), **160**, 79
- protein carboxyl methyltransferase cDNA (rat brain), **161**, 342
- putative collagen-like gene (sea urchin), **158**, 633; *erratum*, **162**, 900
- pyruvate dehydrogenase α subunit cDNA (yeast), **164**, 941
- retinoblastoma gene, homology with L1 family repetitive sequences (human), **160**, 1061
- ribosomal DNA intergenic spacer (rice), **160**, 1117
- ribosomal protein L21 recombinant cDNA (rat), **162**, 364
- sialyltransferase partial cDNA (human), **164**, 225
- substance K receptor cDNA (rat), **165**, 695
- testicular lactate dehydrogenase-C gene (human), **159**, 579
- thyrotropin receptor cDNA
  - evidence for autoantibody binding (human), **165**, 1250
  - in human, **165**, 1184
- transmembrane secretory component cDNA (human), **158**, 783
- TR2-9 and TR2-11 steroid receptors with multiple ligand-binding domains, analysis of cDNA clones (human prostate, testis), **165**, 735
- tyrosinase
  - cDNA from Himalayan mutant (mouse), **161**, 252
  - encoding gene, single base insertion identified as cause of oculocutaneous albinism (human), **164**, 990
  - precursor cDNA (human), **162**, 984
  - variant cDNA (mouse), **159**, 848
- urate oxidase full-length cDNA clone (rat liver), **158**, 991
- uridine monophosphokinase gene (yeast), **165**, 464
- vacuolar α-mannosidase structural gene *AMS1* (yeast), **163**, 908

Numatrin
- cDNA isolation and characterization (human), **164**, 176

Nutrition, *see also* Diet
- inadequate, infusion of human insulin-like growth factor-I into affected rats, reduction of hepatic IGF-I mRNA abundance, **160**, 795

Nystatin
- and amphotericin B, differential effects on sterol-free vesicles, **164**, 609

O

Obesity
- ventromedial hypothalamus lesion-induced, associated increased levels of hepatic apolipoprotein B mRNA (rat), **163**, 1107

Ochratoxin A
- effects on phospho*enol*pyruvate carboxykinase activity and mRNA content (rat kidney), **162**, 916

Octaldoxime
- mediation of vascular relaxation: conversion to nitrites and mechanism of endothelium-dependent vascular relaxation (rat), **164**, 889

d[α]Octothymidylate
- voltage-dependent introduction into electropermeabilized cells, analysis (DC-3F cells), **159**, 633

Oil
- and water, microemulsions, solubilization and activity of yeast cells, **161**, 1244

Okadaic acid
- apparent activation of protein kinases (murine brain), **159**, 939
- effects on murine hemopoietic cells, **165**, 539
- inhibition of
  - phosphatase in permeabilized smooth muscle, effect on relationship between force and myosin light chain phosphorylation (rabbit), **161**, 838
  - protein phosphatase activity, analysis (sea sponge), **159**, 871
- relaxation of arterial smooth muscle, mechanism (dog, pig), **162**, 971

Oleate
- effect on ethanol oxidation, in analysis of role of peroxisomal β-oxidation (deermouse hepatocytes), **163**, 418
- induction of protein kinase C translocation to hepatic microsomal membranes (rat), **160**, 1243

Oleic acid
- and dioleoylphosphatidylethanolamine, plasma-stabilized liposomes composed of, characterization (human), **162**, 326; *erratum*, **163**, 1539
- induced protein kinase C activation, potentiation by fatty acyl esters (rat pancreas), **160**, 1110
- modulation of binding activities of thyroxine-binding globulin and prealbumin in serum, comparison (rat), **159**, 919
- monolayer, dynamic behavior at air–water interface, characteristic effects of taste compounds, **160**, 699

- Oleoyl-2-acetylglycerol
  - effects on mitogenic desensitization and down-regulation of protein kinase C (Swiss 3T3 cells), **163**, 201
  - proliferation-independent promotion of peripheral blood mononuclear cell immunoglobulin production (human), **161**, 1319
- igonucleotides
  - α-anomeric
    - and β-anomeric, effects on β-globin synthesis: inhibitory effect of cap-targeted α-oligonucleotides (rabbit), **164**, 311; *erratum*, **165**, 1443
    - inhibition of Moloney murine leukemia virus reverse transcriptase, **161**, 1184
  - mixed primers, and polymerase chain reaction, in rapid cloning of rearranged immunoglobin genes from hybridoma cells (human), **160**, 1250
  - mutation-specific inosine-containing primers, in polymerase chain reaction for detection of *ras* point mutations (EJ cells, human blood), **160**, 441
  - specificity of TMP-reactive autoantibodies in systemic lupus erythematosis sera, demonstration of thymine dependence (human), **161**, 204
  - sugar-modified, synthesis of carbo-oligodeoxynucleotides and identification as potential antisense agents, **165**, 742
  - synthetic, dot-blot hybridization with, in titration of variant DNA sequences differing by single point mutation (human), **159**, 1233
- ligopeptides
  - amino- and carboxyl-terminal, preferential cleavage from vasoactive intestinal polypeptide by recombinant enkephalinase (human), **158**, 850
- ligosaccharides
  - chitin, chemotactic response of *Vibrio furnissii*, **161**, 1172
  - murine-type, occurrence in murine–human chimeric immunoglobulin G, **164**, 245
  - partial liberation from glycosphingolipids on PC12 cell surface by endoglycoceramidase (rat), **162**, 1093
  - processing inhibitors, differential effects on thyrotropin secretion from dispersed pituitary cells (rat), **165**, 788
  - sequence determination by relayed NOE spectroscopy in rotating frame, analysis, **159**, 618
- ligo-α-thymidylate
  - binding to complementary oligo-β-adenylate sequences, thermodynamic parameters, **162**, 505
- Oocytes, *see also* Eggs
  - associated growth factor, properties (frog), **160**, 615
  - competence to meiotic resumption, role of polyamine levels (frog), **158**, 520
  - expression of injected α3 subunit mRNA of rat brain Na$^+$,K$^+$-ATPase, analysis (frog), **163**, 102
  - follicle-enclosed, cAMP-mediated potassium currents, activation by prostaglandins E_1 and E_2 (frog), **162**, 1535
  - unfertilized, localization of tumor growth inhibiting and promoting factors (shad), **159**, 713
- Opioid receptors
  - selection and binding potency, differential roles of dermenkephalin and dermorphin C-terminal regions (rat brain), **163**, 726
- Opsin
  - affinity labeling by *trans*-retinoyl chloromethane (bovine retina), **160**, 942
- Organogenesis
  - cell recognition during, role of carbohydrate–carbohydrate interaction (F9 teratocarcinoma cells), **158**, 913
- Ornithine
  - uptake in renal mitochondria, mechanism: demonstration of ornithine/phosphate antiporter (rat), **158**, 870
- Ornithine aminotransferase
  - synthetic extrapeptide, intramitochondrial degradation (rat liver), **163**, 215
- Ornithine carbamoyltransferase
  - precursor, transfer into hepatic mitochondria, induction by polyamines (rat), **158**, 287
- Ornithine decarboxylase
  - biochemical and genetic characterization (yeast), **162**, 1409
  - effect of hexadecane (porcine skin), **161**, 1291
  - measurement and analysis of stability in promastigotes (*Leishmania mexicana mexicana*), **161**, 754
  - stabilization in ATP-depleted erythroleukemia cells (mouse), **163**, 1217
  - transient expression in CHO cells, effect of methylation before transfection (human), **162**, 528
- Osmosis
  - effect of microgravity, analysis, **164**, 351
- Osteoblasts
  - calcification *in vitro*, stimulation by prostaglandin D_2 (human), **159**, 1206
  - MC3T3-E1, β-glycerophosphate-induced mineralization, effect on heparin-stimulated collagenase synthesis (mouse), **162**, 773
  - proliferation and prostaglandin synthesis, effects of human recombinant lymphotoxin (rat), **162**, 435
  - related cells
    - bone-derived, regulatory actions of natural human interleukin 1β *in vitro* (human), **159**, 1242
    - bone tumor virus infection and neoplastic transformation, detection by computer-assisted imaging cytometry of nuclear chromatin (mouse), **164**, 728
    - effects of recombinant granulocyte–macrophage colony-stimulating factor *in vitro* (human), **160**, 588
    - free and tRNA-bound proline specific activities, alteration by parathyroid hormone (mouse), **161**, 994
  - release of insulin-like growth factor carrier proteins, stimulation by estradiol and growth hormone (rat), **160**, 788
- Osteocalcin
  - encoding gene, identification of 1,25-dihydroxyvitamin D_3 receptor-regulated promoter regions (rat), **162**, 869
  - production by bone cells, 1,25-dihydroxyvitamin D_3 stimulatory action, modulation by agents affecting adenylate cyclase activity (human), **164**, 1076
- Osteoclasts
  - formation, regulation by bone cell-derived macromolecular factor (chicken, mouse, rat), **159**, 1383
  - isolated, activation of murine bone-derived latent transforming growth factor β complex (chicken), **158**, 817
  - regulation by calcium-activated intracellular calcium elevation (rat bone), **163**, 1461

- Osteogenic cells
  - interleukin 6 production, stimulation by parathyroid hormone and PTH-like protein (rat), **162**, 1546
- Osteogenin
  - bone extracellular matrix-associated, affinity for concanavalin A (bovine), **160**, 419
- Osteopontin, *see* Secreted phosphoprotein I
- Ouabain
  - resistant renal Na,K-ATPase, sodium transport defect (rat), **165**, 360
- Ovary
  - follicles, endogenous response, stimulation by angiotensin II (frog), **159**, 658
  - and uterus, superoxide radical presence during early pregnancy: role in blastocyst implantation (mouse), **161**, 762
- Ovomacroglobulin
  - inhibition of inflammatory proteinase medullasin (chicken), **158**, 831
- Oxaloacetate
  - effect on rate of electron transfer of adrenodoxin–adrenodoxin reductase system in mitochondria (bovine adrenal cortex), **162**, 168
- Oxidants
  - phagocyte-generated, transformed cells, associated alterations in c-*abl* gene methylation (10T1/2 cells), **158**, 24
- Oxidase
  - superoxide radical-generating membrane-bound, activation parameters in cell-free system (bovine neutrophils), **159**, 783
- Oxidation
  - in conversion of L-arginine to nitric oxide, role of hydroxylamine as intermediate (rat), **163**, 527
  - deoxynucleotide esters, terminal base elimination, **162**, 1155
  - ethanol, comparative effects of oleate, lactate, and glucose, in analysis of role of peroxisomal β-oxidation (deermouse hepatocytes), **163**, 418
  - heme proteins by ceruloplasmin, analysis, **159**, 482
  - 1-methyl-4-phenyl-2,3-dihydropyridinium ions, resulting intermediates, characterization, **158**, 63
  - porphyrinogen, free radical-mediated, by hepatic and renal mitochondria, stimulation by iron (rat), **160**, 101
  - –reduction, pyrroloquinoline quinone, promotion by acid treatment, **163**, 755
  - unsaturated fatty acids by peroxisomal 3-hydroxyacyl-CoA epimerase, role of combined actions of enoyl-CoA hydratases (rat liver), **160**, 988
- Oxidative burst
  - and modulation of effector functions, induction by low-affinity interaction of monocytes and fibrinogen carboxy-γ terminus (human), **165**, 7
- Oxidoreductase
  - catalyzing UDP-galactose oxidation, isolation from *Penicillium charlesii*, **49**, 76; *erratum*, **163**, 665
  - oxidation of adenosine diphosphoribose (*Penicillium charlesii*), **75**, 739; *erratum*, **163**, 665
- 2-Oxo acid dehydrogenase
  - biosynthetic regulation, analysis with anti-mitochondrial autoantibodies from primary biliary cirrhosis patients (yeast), **158**, 220
- 2-Oxoisovalerate dehydrogenase (lipoamide)
  - transacylase subunit, sequence analysis (human), **161**, 1035
- Oxophenylarsine
  - effect on protein synthesis (3T3-L1 adipocytes), **161**, 633
- Oxygen
  - active, production, role in induction of DNA strand breaks by dimethylated arsenics (murine lung), **165**, 43
  - binding to hemoglobin, effects of inositol hexaphosphate and bezafibrate (human), **165**, 226
  - dependent regulation of ribonucleotide reductase *in vivo*, role in replicon initiation (Ehrlich ascites cells), **163**, 334
  - exchange between P_i and water by yeast inorganic pyrophosphatase, pathways, **161**, 475
  - generation in respiring mitochondria, role in lucigenin chemiluminescence in alveolar macrophages (rat), **159**, 584
  - reactive metabolites, phorbol ester-stimulated production by renal glomeruli, inhibitory effect of cAMP (rat), **165**, 519
  - reactive species, generation by mitochondria and xanthine oxidase in isolated perfused liver after hypoxic injury (rat), **160**, 140
  - single atom, donation by magnesium monoperoxophtalate in metalloporphyrin-catalyzed DNA cleavage, **160**, 1212
  - singlet, generation from
    - hydrogen peroxide and glycylglycyl-L-histidine nickel(II) complex, ESR spectroscopic analysis, **159**, 445
    - peroxidase-catalyzed formation of styrene–glutathione adducts, **159**, 1051
- Oxygen radicals
  - formation in brain, effects of vitamin E deficiency (mouse), **163**, 860
  - induced lipid peroxidation and cell membrane damage, role of protein kinase C (rat hepatocytes), **163**, 836
- Oxyhemoglobin
  - oxidation by ceruloplasmin, analysis (rabbit), **159**, 482
- Oxysterol receptors
  - and dioxin and glucocorticoid receptors, cytosolic, structural differences (rat liver), **163**, 444
- Oxytocin
  - induced force development in myometrium, effect of pregnancy (rat), **158**, 302

P

- Pancreas
  - acini, intracellular free calcium and amylase secretion, inositol trisphosphate-independent increase (rat), **164**, 8
  - DNA binding to 2-mercaptobenzothiazole *in vivo*, analysis (rat), **165**, 342
  - endocrine, bioactivity of synthetic C-terminal fragment of pancreastatin (rat), **158**, 844

- islet amyloid polypeptide identification, radioimmunoassay (human), **164**, 394
- islets
  - bioactivity and localization of human pancreastatin (human, rat), **159**, 913
  - cellular phospholipase D-like mechanism, stimulation by ionomycin, phorbol ester, and sodium fluoride (rat), **163**, 922
  - insulin secretion
    - effect of 1α,25-dihydroxyvitamin D_3 *in vitro* (neonatal rat), **164**, 413
    - glucose-stimulated *in vitro*, inhibition by islet amyloid polypeptide (rat), **160**, 961
    - stimulation by transforming growth factor β (rat), **158**, 1060
    - stimulation by wasp venom mastoparan through pertussis toxin-sensitive GTP-binding protein (rat), **158**, 712
- ontogenetic expression of peptidyl-glycine α-amidating monooxygenase mRNA (rat), **158**, 244
- perifused and electrically permeabilized, insulin secretion, effects of calcium, cAMP, and phorbol ester (rat), **162**, 998

ncreastatin
- bioactivity in rat islets and localization in pancreas (human), **159**, 913
- inhibition of parietal cell secretion, role of signal transduction (rabbit), **163**, 667
- related protein, tumor-derived, isolation and characterization (human), **164**, 141
- synthetic C-terminal fragment, bioactivity in endocrine pancreas (rat), **158**, 844

ncreatic elastase
- inhibition
  - irreversible, by peptidyl derivatives of α-aminoalkylphosphonate diphenyl esters, analysis (pig), **161**, 143
  - by synthetic inhibitor MR 889, analysis (pig), **165**, 568

ncreatic secretory trypsin inhibitor
- types I and II, cDNA, cloning and analysis of nucleotide and amino acid sequences (rat), **162**, 151

rathion
- activation by brain *in situ*, analysis (rat), **165**, 327

rathymosin
- amino acid sequence deduced from cloned human kidney cDNA, **158**, 855

arathyroid cells
- clonal, expression of parathyroid hormone and related peptide, analysis (rat), **162**, 108
- secretion of parathyroid hormone and secretory protein 1, effects of cellular proteolysis inhibitors (bovine), **160**, 1339

rathyroid gland
- identification of distinct binding sites for inositol 1,4,5-trisphosphate and inositol 1,3,4,5-tetrakisphosphate (bovine), **159**, 200

arathyroid hormone
- alteration of free and tRNA-bound proline specific activities in cultured osteoblast-like cells (mouse), **161**, 994
- effect on inner medullary collecting tubular cells *in vitro*, role in nephrocalcinosis (rabbit), **160**, 1169
- expression in clonal parathyroid cell line, analysis (rat), **162**, 108
- inhibition of Na^+/phosphate cotransport, correlation with generation of second messengers in regulatory cascade (opossum kidney cells), **158**, 951
- rat 1–34, and 3–34 and 7–34 analogs, effects on protein kinase C translocation (opossum kidney cells), **159**, 1352
- related peptide, circulating form, role in hypercalcemia and bone resorption, analysis in model of humoral hypercalcemia of malignancy (mouse), **161**, 1166
- related protein, synthesis and antagonistic activity *in vitro* and *in vivo* (mouse, ROS 17/2.8 cells), **158**, 1036
- secretion by parathyroid cells, effects of cellular proteolysis inhibitors (bovine), **160**, 1339
- stimulated bone resorption and prostaglandin production, inhibition by estradiol-17β in cultured neonatal calvariae (mouse), **163**, 1319
- stimulation of interleukin 6 production by osteogenic cells (rat), **162**, 1546

Parathyroid hormone receptors
- demonstration on cultured costal chondrocytes (rabbit), **162**, 1222
- identification on hemopoietic blast cells (mouse), **163**, 1481

Parietal cells
- secretory activity, inhibition by pancreastatin, role of signal transduction (rabbit), **163**, 667

Parkinson's disease
- associated deficiencies in mitochondrial complex I subunits of respiratory chain (human brain), **163**, 1450
- chemically induced, 1-methyl-4-phenyl-2,3-dihydropyridinium oxidation/reduction intermediates in, characterization, **158**, 63

Parotid gland
- acinar cells, P_2 purinergic responses, comparative effects of Coomassie Brilliant Blue G and Reactive Blue 2 (rat), **165**, 1279
- cytoplasmic calcium levels and amylase release in isolated cells, effects of eicosanoids (rat), **161**, 379

Parotid hormone-releasing factor
- hypothalamic, biological and chemical evidence for existence (pig), **159**, 899

Parvalbumin
- identification as avian thymic hormone (chicken), **160**, 1155

Penicillium charlesii
- detection of oxidoreductase catalyzing UDP-galactose oxidation, **49**, 76; *erratum*, **163**, 665

Pennisetin
- viscometric characterization (pearl millet), **165**, 334

Pentachlorobenzene
- metabolism by hepatic microsomes, nature of reactive intermediates (rat), **163**, 1275

1-Pentanol
- 4-aminobiphenyl binding to monoclonal antibody 2E11 in, description (mouse), **158**, 80

trans-Pentaprenyl*trans*transferase
  components A and B, formation of stable and catalytically active complex (*Micrococcus luteus*), **160**, 448
Pepsin
  urea-induced reversible unfolding above pH 6, implications for pepsinogen folding mechanism (pig), **158**, 115
Pepsinogen
  folding mechanism, implications of urea-induced reversible pepsin unfolding above pH 6 (pig), **158**, 115
Peptic cells
  distinct bombesin receptor-regulated Ca^{2+} mobilizing mechanisms, discriminatory inhibition by somatostatin and lanthanum (frog esophagus), **159**, 599
Peptides
  allatostatin, identification and nucleotide sequencing (cockroach brain complex), **163**, 1243
  amyloid, Alzheimer's disease, encoding by two exons and sequence similarity to soybean trypsin inhibitor (human), **163**, 1248
  angiogenin, carboxy-terminal, inhibition of angiogenin biological and enzymatic activities (BHK cells), **162**, 535
  Arg–Gly–Tyr–Ser–Leu–Gly, significant phosphorylation by protein kinase *in vitro* (*Escherichia coli*), **160**, 552
  α-bungarotoxin-binding, of acetylcholine receptor α-subunit, antibodies, in characterization of receptor binding site (electric ray), **160**, 289
  calcitonin gene-related, *see* Calcitonin gene-related peptide
  carboxyl terminal flanking, of progastrin, characterization (rat), **161**, 69
  c-*erb* A, antibodies, recognition of nuclear T$_3$ receptors (rat kidney, liver), **160**, 148
  chargerin II, antibodies, determination of orientation of chargerin II in mitochondrial ATP synthase (rat liver), **165**, 449
  connective tissue activating CTAP-III, biologically active cleavage products, amino acid sequence (human), **163**, 1071
  cyclic, conformationally restrained, effectiveness as antagonists of luteinizing hormone-releasing hormone, **159**, 1114
  derived from region of local homology between uteroglobin and lipocortin 1, inhibition of platelet aggregation and secretion (human), **165**, 27
  eglin C-related fragments, synthesis and inhibitory effects on leukocyte elastase, cathepsin G, and α-chymotrypsin (human), **161**, 272
  encoded by (−)mRNA complementary to angiotensin II (+)mRNA, identification as angiotensin receptor antagonist (human), **160**, 1387
  endothelin-related, analysis in aortic endothelial cells: evidence for biosynthetic pathway of endothelin 1 (pig), **162**, 1287
  fibrinogen-derived, prevention of proteolytic degradation of protein kinase C by inhibition of platelet aggregation (human), **163**, 1256
  N-formyl chemotactic, interaction with receptor, effect of ammonia (human neutrophils), **165**, 377
  gastrin-releasing, *see* Gastrin-releasing peptide
  glucagon-(1–21)-like, detection in small intestinal mucosa (dog), **165**, 1010
  Gly–Pro–Glu, cleaved from aminoterminus of insulin-like growth factor I, identification as neuroactive peptide (rat), **165**, 766
  hypothalamic, regulating secretion of parotid hormone from parotid glands, biological and chemical evidence for existence (pig), **159**, 899
  intrapeptide steric interactions in active site of cAMP-dependent protein kinase, effect on enzyme specificity, **158**, 136
  isolated from diamine oxidase and bound to pyrroloquinoline quinone, structural analysis (porcine kidney), **159**, 726
  laminin A chain synthetic, stimulation of neurite outgrowth (rat), **162**, 821
  leader peptide p25 of cytochrome-*c* oxidase subunit IV, secondary structure and orientation in phospholipid bilayers, **158**, 610
  long-acting heat-stable enterotoxin analogs with single D-amino acid, synthesis and toxic activity (*Escherichia coli*), **161**, 229
  mast cell degranulating, formation of voltage-gated cation-selective channels in lipid bilayers, **163**, 155
  myelin basic protein-related, phosphorylation by ganglioside-stimulated protein kinase (rabbit), **165**, 93
  natriuretic, cardiac-secreted, identification (rat), **161**, 732
  neutrophil-activating, NAP-2, identification as β-thromboglobulin cleavage product formed in cultures of stimulated mononuclear cells (human), **159**, 969
  noncompetitive enzyme immunoassay for, evaluation, **160**, 40
  parathyroid hormone-related, expression in clonal parathyroid cell line (rat), **162**, 108
  P50-75, induced secretory IgA antibodies, neutralization of cholera toxin (mouse), **159**, 707
  residues coded by exon 2 of lysozyme, residual catalytic activity (chicken), **159**, 927
  retro-inverso pseudosubstrate analogs, inhibition of protein kinase C (bovine brain), **165**, 1382
  RNA polymerase II-derived, phosphorylation by protein kinase, inhibition by 5,6-dichloro-1-β-D-ribofuranosylbenzimidazole (HeLa cells), **159**, 508
  with sequence of *Torpedo californica* M2δ transmembrane domain of nicotinic cholinergic receptor, formation of ion channels in erythrocyte membranes (human), **162**, 352
  substrates for cAMP-dependent protein kinase, increased efficacy with multiple arginine residues, **165**, 368
  synenkephalin-containing, endogenous, association with adrenal medulla intracellular membranes (bovine), **158**, 790
  synthetic
    interaction with monoclonal antibodies to main immunogenic region of nicotinic acetylcholine receptor (human), **165**, 865
    pancreastatin C-terminal fragment, bioactivity in endocrine pancreas (rat), **158**, 844

13- to 18-kDa murine pituitary, antibodies to, crossreaction with growth hormone and prolactin (human, pig, rat, sheep), **163**, 386
n unpurified immunized and parasitized hemolymph, mass spectrometric identification (honeybee), **165**, 637
ptidoglycan endopeptidase
plasmid-encoded resistance in *Staphylococcus simulans* biovar. *staphylolyticus*, analysis, **160**, 1106
ptidyl dipeptidase-4
catalytic activity, essential amino acid residues, identification (*Pseudomonas maltophilia*), **158**, 45
detection of functional arginine residue, assessment as anion-binding site (*Pseudomonas maltophilia*), **160**, 243
ptidyl-glycine α-amidating monooxygenase
mRNA, ontogenetic expression in pancreas (rat), **158**, 244
rforin
and complement-mediated lysis, differential susceptibility of type III erythrocytes from paroxysmal nocturnal hemoglobinuria patients, **162**, 316
lymphocyte, sequence analysis (mouse), **158**, 1
riodate
oxidized $NADP^+$, in affinity labeling of cofactor-binding region of placental estradiol 17β-dehydrogenase (human), **158**, 617
riodic acid
oxidized lymphocytes, associated protein phosphorylation, interleukin-2 receptor expression, IL-2 production, and cellular proliferation, temporal progression (rat), **158**, 590
eripherin
phosphorylation in neuroblastoma cells and sympathetic neurons (mouse, rat), **160**, 772
roxidase
anionic and cationic isozymes, immunological similarity (peanut), **163**, 689
catalyzed formation of styrene–glutathione adducts, production of singlet oxygen from, **159**, 1051
release, and superoxide anion generation, platelet-activating factor-induced, dissociation in eosinophils (guinea pig), **162**, 511
thyroid, human, stable high-level expression in cultured CHO cells, **164**, 1268
eroxidation
lipids, *see* Lipid peroxidation
modulation by selenium in absence of glutathione peroxidase (housefly), **165**, 158
eroxides
tumor-promoting activity, correlation with stimulation of radical production in mitochondria (rat liver), **160**, 1067
eroxisomes
disorders in infants, molecular analysis of associated β-oxidation enzymes, **161**, 242
hepatic
  enoyl-CoA hydratase bifunctional protein and 70-kDa membrane protein, identity (mouse), **160**, 503
  fatty acid β-oxidation, role in ethanol metabolism (deermouse), **163**, 418
  3-hydroxyacyl-CoA epimerase activity, role of combined actions of enoyl-CoA hydratases (rat), **160**, 988
  L-pipecolate oxidase identification and localization (human), **164**, 550
renal, alanine–glyoxylate aminotransferase, detection as apoenzyme (chicken), **161**, 696
Pertussis toxin
  ADP-ribosylation of
    GTP-binding proteins, detection of endogenous inhibitor in bovine brain, **160**, 67
    Nb_2 lymphoma cell membrane proteins, effect of prolactin, **156**, 776; *erratum*, **161**, 392
  effect on tumor necrosis factor-α-induced H_2O_2 formation (human neutrophils), **159**, 763
  inhibition of retinoic acid-induced differentiation in HL-60 cells, **163**, 797
  insensitive G protein, role in neutrophil activation by surface-bound IgG (human), **164**, 983
  interaction with adenylate cyclase inhibitors in isolated adipocytes (human), **161**, 654
  resistant signaling with very low receptor number: analysis of pineal muscarinic phosphoinositide response (rat), **164**, 645
  role in
    angiogenin depression of smooth muscle cell cAMP levels (rat aorta), **163**, 902
    inhibition of neuroblastoma cell cAMP production by bradykinin, neurotensin, and somatostatin, **161**, 1144
  sensitive G proteins
    GTP-binding, purification and identification (bovine spleen), **161**, 1280
    receptor-coupled form, ADP-ribosylation by cholera toxin (NG108-15 cells), **165**, 554
P-glycoprotein
  encoding *MDR*1 gene, cDNA sequence analysis: Gly→Val substitution at codon 185, role in multidrug resistance (human adrenal gland), **162**, 224
  identification in renal brush border membranes (dog, human, rat), **162**, 244
  multidrug resistance-related, binding of vincristine, inhibition by steroid hormones (K562 cells), **158**, 1066
  photoaffinity labeling in multidrug-resistant cells with photoactive colchicine analogs (hamster lung), **162**, 1402
  role in mediating atypical multidrug resistance in CCRF-CEM cells selected for high-level methotrexate resistance, **164**, 928; **165**, 1435; *erratum*, **165**, 1445
pH
  effects on
    giant cell formation induced by HIV-I (MOLT-4 cells), **158**, 973
    hemoprotein H-450 active site structure, magnetic circular dichroism studies (rat liver), **165**, 1170
    inner medullary collecting tubule cells *in vitro*, role in nephrocalcinosis (rabbit), **160**, 1169
    prostatic acid phosphatase inhibition by vanadate monomers and dimers (human seminal fluid), **165**, 246

    - urea-induced reversible pepsin unfolding at values above 6, implications for pepsinogen folding mechanism (pig), **158**, 115
  - high, associated wobble structure of 2-aminopurine•cytosine mismatch, characterization by ^{15}N NMR spectroscopy, **165**, 89
  - intracellular
    - and $[Ca^{2+}]_i$, simultaneous measurement in isolated myocytes by fluorescence of dually loaded fura-2 and 2,7-biscarboxyethyl-5(6)-carboxyfluorescein (rat heart), **163**, 500
    - increase, role in Ca^{2+} mobilization, phosphatidic acid formation, and protein phosphorylation (human platelets), **161**, 1007
    - role in receptor-mediated actin assembly in electropermeabilized neutrophils (human), **160**, 18
  - sensitivity, conferment by phospho*enol*pyruvate carboxykinase gene 5′ region to chimeric genes expressed in renal and hepatic cell lines capable of PEPCK expression (rat), **164**, 81
  - smooth muscle cell
    - differential elevation by low-density lipoproteins and epidermal growth factor (rat aorta), **159**, 624
    - role in low-density lipoprotein-induced vasoconstriction (rat aorta), **163**, 315
  - stability of cyclodextrin glucanotransferase, role of carboxy-terminal region (*Bacillus* sp.), **161**, 1273
- *Phanerochaete chrysosporium*
  - shuttle vector-based transformation system, description, **161**, 720
- Phenobarbital
  - inducible P450b and P450e and other neonatal P450 forms, hepatic levels, suppression by thyroid hormone in hypophysectomized rat, **160**, 609
  - induction of hepatic microsomal aminopyrine *N*-demethylase, effect of cimetidine (rat), **162**, 1363
  - reduction of hepatocyte epidermal growth factor receptor expression independent of protein kinase C activation (rat), **158**, 652
- Phenol
  - anaerobic transformation to benzoate by *para*-carboxylation, analysis with fluorinated analogs, **162**, 945
- Phenylalanine
  - aspartate aminotranferase reactivity, enhancement by [Arg292→Val] or [Arg292→Leu] mutations (*Escherichia coli*), **159**, 337
- Phenylarsine oxide, *see* Oxophenylarsine
- Phenylephrine
  - effect on renal ammoniagenesis and role of Ca^{2+} (rat), **162**, 116
  - induced activation of glycogen phosphorylase in isolated liver cells, role of calcium (rat), **160**, 480
- Phenylisopropyl adenosine
  - interaction with adenylate cyclase inhibitors in isolated adipocytes (human), **161**, 654
- Phenyllactic acid
  - substitution in dipeptide glycols at P_3, preparation and characterization of orally active glycol renin inhibitor (marmoset), **160**, 1
- Phenytoin
  - modulation of binding activities of thyroxine-binding globulin and prealbumin in serum, comparison (rat), **159**, 919
- Pheromones
  - biosynthesis activating neuropeptides, isolation and amino acid sequence (silkworm), **163**, 520
- Phorbol 12,13-dibutyrate
  - and diacylglycerols, differential effects on protein kinase C mitogenic desensitization and down-regulation (Swiss 3T3 cells), **163**, 201
  - down-regulation of endothelin-1 binding sites in vascular smooth muscle cells (rat), **164**, 809
  - inhibition of apoptosis in interleukin-2-dependent T lymphocytes (mouse), **164**, 1069
  - regulatory effect on Ca^{2+} sensitivity of contractile elements of mesenteric artery, analysis (rat), **163**, 929
  - stimulation of cerebral cortex capillary endothelial cell growth *in vitro* (bovine), **158**, 584
- Phorbol 12,13-didecanoate
  - effect on endothelin-1 binding sites in vascular smooth muscle cells (rat), **164**, 809
- Phorbol 12-myristate 13-acetate
  - dissociation of
    - endothelin-stimulated phosphoinositide hydrolysis and arachidonic acid release in vascular smooth muscle cells (rabbit), **160**, 868
    - phospholipase D activation from phosphoinositide hydrolysis and prostacyclin synthesis after long-term treatment of bradykinin-stimulated endothelial cells (bovine), **165**, 319
  - effects on
    - Ca^{2+}-induced insulin secretion from perifused and electrically permeabilized islets of Langerhans (rat), **162**, 998
    - lipocortin I phosphorylation in A431 epidermoid carcinoma cells (human), **160**, 474
  - induced c-*fos*, *egr-1*, and c-*myc* gene expression in confluent fibroblasts, alteration by indomethacin (mouse), **161**, 508
  - induced translocation of calpain to neutrophil plasma membrane, subsequent enzyme activation (human), **160**, 737
  - inhibition of neuroglandular antigen glycosylation in melanoma cells (human), **158**, 837
  - and ionomycine, differential induction of p55 and p70/75 interleukin-2 receptor subunits (human lymphocytes), **164**, 686
  - metabolic responsiveness of isolated hepatocytes after partial hepatectomy (rat), **158**, 294
  - stimulated production of reactive oxygen metabolites in renal glomeruli, inhibitory effect of cAMP (rat), **165**, 519
- Phosphatase
  - endogenous to placental microsomes, inactivation of estrogen synthetase (human), **162**, 498
  - glycogen-bound type 1, complex containing undegraded G subunit, isolation and dissociation (rabbit muscle), **162**, 1465

- nhibition with okadaic acid in permeabilized smooth muscle, effect on relationship between force and myosin light chain phosphorylation (rabbit), **161**, 838
- various, inhibitory activity of calyculin A and okadaic acid, analysis, **159**, 871

hosphatase
- developmental changes in activity, analysis (rat brain), **164**, 370

osphate
- norganic, *see* Inorganic phosphate
- -Na$^+$ cotransport, inhibition by parathyroid hormone, correlation with generation of second messengers in regulatory cascade (opossum kidney cells), **158**, 951
- -ornithine translocator, role in ornithine transport in mitochondria (rat kidney), **158**, 870

osphatidic acid
- early elevation in regenerating liver (rat), **164**, 290
- formation in platelets, role of cytosolic alkalinization (human), **161**, 1007
- inhibition of cell-free activation of neutrophil NADPH oxidase (human), **161**, 712
- receptor-mediated accumulation in neutrophils, mass determination by Coomassie blue staining and densitometry (human), **159**, 79

osphatidylcholine
- egg-derived, sterol-free vesicles, differential effects of nystatin and amphotericin B, **164**, 609
- mixture of three derivatives and melittin: region-matched hydrophobic interaction between melittin and dimyristoylphosphatidylcholine, **164**, 850
- oxidized, liposomes from, permeability, **163**, 241
- turnover in mast/megakaryocyte cell line, stimulation by interleukin 3 (mouse), **164**, 804
- vesicles, globotriaosyl ceramide receptor-containing, interaction with Shigella toxin, fluorescence study (*Shigella dysenteria*), **160**, 126

osphatidylethanolamine
- biosynthesis in isolated hepatocytes, role of CDP-ethanolamine pathway (rat), **160**, 1275
- enrichment in nascent very-low-density lipoproteins from hepatocytic Golgi fractions (rat), **160**, 162
- stimulation of Ap$_4$A-binding protein activity (*Escherichia coli*), **160**, 1379

osphatidylinositol
- associated pathway, and cGMP, depression induced by tiazofurin and selenazofurin (L1210 cells), **164**, 869
- covalently attached, role in membrane interaction of neural cell recognition molecule F11 (chicken), **161**, 931
- formation by phospholipase C isozymes in different ratios (bovine brain), **163**, 177
- role in membrane linkage of cauda epididymal sperm surface major maturational glycoprotein (rat), **160**, 460
- turnover in
  - retinoic acid-sensitive and -resistant neuroblastoma cells, effect of retinoic acid (human), **161**, 284
  - smooth muscle
    - effect of endothelin (rat aorta), **158**, 170
    - short-term desensitization via muscarinic acetylcholine receptors and histamine H$_1$ receptors, analysis (guinea pig), **162**, 733

Phosphatidylinositol 4,5-bisphosphate
- activation of plasma membrane ATPase (carrot, sunflower), **162**, 1295
- enhancement of calcium release from sarcoplasmic reticulum (guinea pig muscle), **163**, 1487
- formation by phospholipase C isozymes in different ratios (bovine brain), **163**, 177
- hydrolysis in myelin membranes, stimulation by guanine nucleotides (human), **162**, 282

Phosphatidylinositol 4-kinase
- types I and II, separation and identification (bovine uterus), **160**, 202

Phosphatidylinositol 4-phosphate
- activation of plasma membrane ATPase (carrot, sunflower), **162**, 1295
- formation by phospholipase C isozymes in different ratios (bovine brain), **163**, 177

Phosphatidylinositol trisphosphate
- identification with *in vivo* techniques (rat brain), **163**, 995

Phosphocholine transferase
- *de novo* biosynthesis of platelet activating factor (rat brain), **161**, 107

Phosphocreatine
- levels in brain, effects of hyperammonemia, ^{31}P NMR spectroscopy (rat), **159**, 815

Phosphodiester
- levels in brain, effects of hyperammonemia, ^{31}P NMR spectroscopy (rat), **159**, 815

Phosphodiesterase
- adipose tissue, stimulation of same isoform by insulin and lipolytic hormones (rat), **162**, 814

6-Phosphofructo-2-kinase
- gene regulation by glucocorticoids: sequencing of 5′-flanking region (rat), **162**, 753

3-Phosphoglycerate
- effect on lactate production in permeabilized L-929 cells: evidence for intermediate channelling (mouse), **160**, 1409

Phosphoglycerate dehydrogenase
- identification as member of family of 2-hydroxyacid dehydrogenases (*Escherichia coli*), **165**, 1371

3-Phosphoglycerate kinase
- fluorescein-5′-isothiocyanate-labeled, interaction with D-glyceraldehyde-3-phosphate dehydrogenase, role of dye (rabbit muscle), **161**, 187
- X-chromosome-linked, cDNA cloning and sequencing (rat), **165**, 1337

Phosphoglycerate mutase
- cDNA, sequence analysis (rat muscle), **165**, 1345

Phosphoinositide phospholipase C
- evidence for activation by cytosolic protein (canine cardiac sarcolemma), **163**, 567

Phosphoinositides
- endothelin-1-mediated breakdown, role in endothelin-1 vasoconstrictive action (porcine coronary artery), **161**, 1049
- hydrolysis
  - and arachidonic acid release in vascular smooth muscle cells, endothelin-stimulated, dissociation by phorbol ester (rabbit), **160**, 868

    associated TRH receptors, pharmacological characterization (GH$_3$ cells), **161**, 1306
    in bradykinin-stimulated endothelial cells, dissociation from phospholipase D activation by long-term phorbol ester treatment (bovine), **165**, 319
    mediation of vasopressin-stimulated Ca^{2+} influx in smooth muscle cells (rat), **161**, 677
    phospholipase C-mediated, in cultured smooth muscle cells, stimulation by endothelin (rabbit aorta), **159**, 1072
    by sarafotoxin and endothelin, competitive interaction (rat atrium, brain), **158**, 195
  inhibition of cell-free activation of neutrophil NADPH oxidase (human), **161**, 712
  levels in osteoblastic cells, effect of thrombin (human), **164**, 119
  metabolism
    and prolactin secretion, thyrotropin-releasing hormone-stimulated, inhibition by interleukin 1β (rat pituitary cells), **165**, 496
    in smooth muscle cells, differential stimulation by low-density lipoproteins and epidermal growth factor (rat), **159**, 624
  pineal muscarinic response: pertussis toxin-resistant signaling with very low receptor number (rat), **164**, 645
  platelet activating factor-stimulated turnover in keratinocytes and fibroblasts (human), **163**, 1344
  signaling pathway, stimulation by 7-thia-8-oxoguanosine (murine B cells), **163**, 1306

Phospholipase A$_2$
  activity and mRNA levels, effects of recombinant interleukin 1β (rabbit chondrocytes), **165**, 1079
  inhibition in thymocytes of dexamethasone-treated mice, implication for role of lipocortins, **159**, 53
  membrane-associated
    cDNA cloning and sequencing (rat), **162**, 1030; *erratum*, **164**, 1452
    primary structure (human spleen), **163**, 42
  mRNA, interleukin-1β-stimulated synthesis in articular chondrocytes (rabbit), **164**, 488
  release from mesangial cells, synergistic stimulation by interleukin 1 and tumor necrosis factor (rat kidney), **159**, 385
  role in *t*-butyl hydroperoxide-induced lipid peroxidation (rat liver), **158**, 1021
  stimulation by auxins *in vivo* and *in vitro* (soybean cells, zucchini hypocotyls), **163**, 111
  vascular smooth muscle cell, activation by endothelin *in vitro* (bovine, human, rat), **158**, 279

Phospholipase C
  activation by fluoride, effect of cyclic AMP (human platelets), **158**, 440
  activity in permeabilized pituitary cells, effect of guanine nucleotides: role of inhibitory GTP-binding protein (rat), **159**, 209
  developmental changes in activity, analysis (rat brain), **164**, 370
  encoding gene, cloning and sequencing (*Clostridium perfringens*), **160**, 33
  isozymes, formation of cyclic and noncyclic inositol phosphates in different ratios (bovine brain), **163**, 177
  mediated hydrolysis of phosphoinositides in cultured smooth muscle cells, stimulation by endothelin (rabbit aorta), **159**, 1072
  reduction of free Mg^{2+} levels in artificial membrane vesicles (rat brain), **165**, 913
  role in inhibition of angiotensin-induced aldosterone secretion in adrenal glomerulosa cells by atrial natriuretic peptide (bovine), **159**, 148
  TPA-induced activity in cultured cells, inhibition by antiviral and antitumoral xanthate compound (hamster human), **162**, 198
  types I–IV, inositol phospholipid-specific, encoding mRNAs, tissue- and cell-type-specific expression (rat), **164**, 406

Phospholipase D
  activation in bradykinin-stimulated endothelial cells, dissociation from phosphoinositide hydrolysis and prostacyclin synthesis by long-term phorbol ester treatment (bovine), **165**, 319
  activity in homogenates from HL-60 granulocytes: implications of calcium and G protein control, **163**, 657
  in peripheral blood lymphocytes and monocytes, differential effects of phorbol ester (human), **162**, 788
  related mechanism in pancreatic islet cells, stimulation by ionomycin, phorbol ester, and sodium fluoride (rat), **163**, 922

Phospholipids
  antitumor ether-linked, molecular dynamics in mode membranes, spin-label analysis, **160**, 1189
  bilayers, chemically synthesized mitochondrial signal sequence in, secondary structure and orientation, **158** 610
  boundary and bulk-phase, modulation of mitochondrial F$_0$F$_1$ catalysis, **158**, 1013
  –calcium-regulated 32-kDa proteins, identification and partial separation (bovine spleen), **162**, 15
  derived second messengers, generation, effects of tyrosine kinase inhibitor genistein (murine fibroblasts, rat liver cells), **165**, 795
  interactions with
    cytidylate cyclase (rat brain), **162**, 1502
    protein kinase C, fluorometric analysis, **159**, 495
  liposomes, α-tocopherol-containing, binding of iron, **160**, 834
  membrane
    effects on cytosolic protein-tyrosine kinase (porcine spleen), **165**, 680
    spermatozoal, peroxidation mechanisms (boar), **158**, 769
  precursors, deoxycytidine salvaging into, effects of 1-β-D-arabinofuranosylcytosine (human lymphoid cells), **163**, 1158

Phosphomonoester
  levels in brain, effect of hyperammonemia, ^{31}P NMR spectroscopic analysis (rat), **159**, 815

Phosphopeptides
  released during dialysis of EDTA-reacted highly purified

nuclear DNA, characterization (bovine thymus), **163**, 1135
osphoprotein I
secreted, *see* Secreted phosphoprotein I
osphoprotein phosphatase
ATP,Mg-dependent, activation, role of insulin activation of membrane kinase activating factor FA (rat adipocytes), **158**, 762
calmodulin-dependent, catalytic subunit, evidence for second isoform (rat), **165**, 1352
type 1
latent form, association with cardiac myofibrils (bovine), **159**, 72
and type 2A, homology with calcineurin A primary structure (rat brain), **163**, 1492
type 2C, cDNA expression in *Escherichia coli* (rat), **163**, 131
osphoproteins
B23, nucleolar nucleotide sequence of encoding cDNA (human), **163**, 72
pp64, nuclear, induced by platelet-derived growth factor, characterization (NRK cells), **161**, 1118
tau, selective incorporation of distinct form into paired helical filaments in brain of Alzheimer patients, **159**, 1221
hospho*enol*pyruvate carboxykinase
activity and mRNA content, effects of ochratoxin A (rat kidney), **162**, 916
gene, 5′ region, conferment of pH sensitivity to chimeric genes expressed in renal and hepatic cell lines capable of PEPCK expression (rat), **164**, 81
hosphoramide mustard
–nucleotide adduct, formation by phosphoester linkage to 2′-deoxyguanosine 3′-monophosphate, **163**, 843
hosphorylase kinase
skeletal muscle, τ subunit, bacterial expression and characterization (rabbit), **161**, 746
hosphorylation
agonist-promoted
β_2-adrenergic receptors, enhancement by substitution of extracellular cysteine (CHW cells), **165**, 257
immunologically *ras*-related protein in erythroleukemia cells (human), **161**, 972
basic fibroblast growth factor-enhanced, associated bFGF receptors, isolation from epithelial cells (bovine lens), **160**, 1124
chemical, proteins by zinc-ATP, **163**, 64
cytochrome P450 isoenzymes IIB1 and IIB2, role in regio- and stereoselective regulation of monooxygenase activities (rat liver), **160**, 46
and dephosphorylation, bovine histone H1, effect on DNA primase activity (mouse), **160**, 711
EBV/C3dR and p120 ribonucleoprotein in subcellular fractions, enhancement by specific EBV/C3dR ligands (Raji cells), **159**, 1213
exogenous, detection in activated 190-kDa insulin receptor precursor *in vitro* (IM-9 lymphocytes), **160**, 296
47- and 49-kDa proteins, association with superoxide release (guinea pig neutrophils), **158**, 1029
G_i in intact hepatocytes, and ADP-ribosylation, effects of insulin (rat), **165**, 251
histone H-1 by protein kinase C, inhibition by mono- and divalent cations (rat), **162**, 45
hormone-specific, and transformation, oviduct progesterone receptor, analysis (chicken), **164**, 295
insulin-stimulated, calmodulin *in vitro*, mediation by carboxyl terminal segment of human c-Ki-*ras* 2 gene product, **161**, 399
intermediate filament protein peripherin, analysis in neuroblastoma cells and sympathetic neurons (mouse, rat), **160**, 772
intracellular proteins by phytochrome in protoplasts, measurement of associated action spectra (oat), **162**, 9
lipocortin I in A431 epidermoid carcinoma cells, effect of phorbol ester (human), **160**, 474
lymphocyte differentiation antigen CD5, analysis (mouse), **159**, 536
lysosomal enzyme-binding receptor, inhibition by α-L-fucosidase, β-glucuronidase, and mannose-6-phosphate (simian brain), **162**, 1244
myelin basic protein and peptides by ganglioside-stimulated protein kinase (rabbit), **165**, 93
$p56^{lck}$ by exogenous ATP in intact lymphoid cells (human, mouse), **162**, 51
pigment organelle protein p57 in permeabilized xanthophores, role in organelle dispersion stages (goldfish), **161**, 626
plasma membrane proteins, stimulation by atrial natriuretic factor (bovine adrenal cortical cells), **163**, 988
post-translational, poliovirus proteins, analysis (HeLa cells), **158**, 263
progesterone receptors by cAMP-dependent protein kinase (bovine uterus), **162**, 160
proteins
Ca^{2+}-mediated, in intact enterocytes, stimulation by histamine, **165**, 810
in cerebral microvessels, regulatory action of vanadate (rat), **163**, 771
and interleukin-2 receptor expression, IL-2 production, and cellular proliferation in lymphocytes oxidized by periodic acid, temporal progression (rat), **158**, 590
in platelets, role of cytosolic alkalinization (human), **161**, 1007
protein tyrosine in neutrophils, analysis (human), **162**, 1478
rapid, 33-kDa protein in interleukin-3-dependent cells (mouse), **164**, 520
ribosomal protein S6 by HepG-2 cells in response to insulin, kinetics (human), **161**, 797
serine and tyrosine, 28- and 35-kDa proteins in T lymphocytes stimulated by streptococcal M protein (human), **158**, 803
64-kDa protein in polymorphonuclear leukocytes, role of N-terminus of LUCT/IL-8 protein (human), **163**, 1298
tubulin during platelet activation, time resolved analysis (human), **159**, 170

  28-kDa stress proteins in endothelial cells, tumor necrosis factor-α-induced, role in protection against cytotoxicity (bovine aorta), **163**, 301
  urodilatin, and dephosphorylation, effects on bioactivity (rabbit aorta), **163**, 830
Phosphotyrosine
  antibodies, cross-reacting protein in insoluble cytoplasmic matrices, identification (yeast), **160**, 887
Photoaffinity labeling
  brown adipose tissue mitochondria with [^{125}I]coenzyme A derivative: differential interaction with uncoupling protein and ADP/ATP carrier (hamster), **161**, 502
  DNA polymerase α with 1-β-D-arabinofuranosyl-5-(*E*)-(4-azidostyryl)-uracil 5′-triphosphate (salmon), **161**, 514
  gonadotropin-releasing hormone binding sites in epithelial ovarian carcinomata (human), **161**, 1086
  high-molecular-weight proteins from chloroquine-resistant *Plasmodium falciparum* with ^{3}H-azidopine, **162**, 809
  P-glycoprotein in multidrug resistant cells with photoactive colchicine analogs (hamster lung), **162**, 1402
  platelet-activating factor binding sites on platelet membranes (rabbit), **161**, 1070
Phycocyanin
  and related peptides, associated chromophores, conformational analysis by surface-enhanced Raman spectroscopy (*Synechococcus* 6301), **159**, 1227
Physical mapping
  alcohol dehydrogenase class III(χ) locus (human liver), **164**, 453
Phytochrome
  role in intracellular protein phosphorylation in protoplasts: measurement of associated action spectra (oat), **162**, 9
Phytoene desaturase reaction
  characterization with *in vitro* carotenogenesis system (*Anacystis* sp.), **163**, 916
Phytohemagglutinin
  stimulated T-lymphocytes, α-fetoprotein gene expression, analysis (human), **159**, 112
Piceatannol
  inhibition of protein-tyrosine kinase (LSTRA cells), **165**, 241
Pineal gland
  muscarinic phosphoinositide response: pertussis toxin resistant signaling with very low receptor number (rat), **164**, 645
  protein kinase C ontogeny (rat), **159**, 701
L-Pipecolate oxidase
  identification and localization in hepatic peroxisomes (human), **164**, 550
Pituitary
  anterior
    corticotropin release by dispersed cells, secretagogue-induced, inhibition by cyclic GMP and guanylate cyclase activators (rat), **158**, 824
    prolactin release stimulated by repetitive Ca^{2+} spikes in isolated perifused cells, dependence on frequency (rat), **158**, 811
    thyrotropin-releasing hormone-stimulated prolactin secretion and phosphoinositide metabolism in cultured cells, inhibition by interleukin 1β (rat), **165**, 496
  Ca^{2+} transients in individual cells, measurement with simultaneous dual-emission microspectrofluorometry and electrophysiology (rat), **164**, 1045; *erratum*, **165**, 1446
  DNA binding to 2-mercaptobenzothiazole *in vivo*, analysis (rat), **165**, 342
  β-endorphin release *in vitro*, effects of isoproterenol, dopamine, corticotropin-releasing factor and arginine^8-vasopressin (rat), **161**, 221
  endothelin 3 levels, measurement by sandwich enzyme immunoassay (rat), **164**, 74
  follicle-stimulating hormone secretions in cultured cells, effect of activin A–somatostatin interaction (rat), **162**, 958
  follicular cells, secretion of
    heparin-binding growth factor specific for vascular endothelial cells (bovine), **161**, 851
    vascular endothelial growth factor and follistatin (bovine), **165**, 292
  signal transduction of vasopressin and corticotropin-releasing factor in cultured cells, critical role of protein kinase C (rat), **163**, 1014
  thyrotropin secretion in dispersed cells, differential effects of oligosaccharide-processing inhibitors (rat), **165**, 788
Placenta
  first-trimester, expression of carcinoembryonic antigen-related genes (human), **162**, 1486
  prostaglandin production, local stimulation by corticotropin-releasing hormone (human), **159**, 192
Plantagoside
  inhibition of jack bean α-mannosidase and effect on murine immune response *in vitro* (plantain seeds), **165**, 1292
Plasma, *see also* Blood, Serum
  atrial natriuretic factor increase, induction by acute airway obstruction (human), **160**, 808
  cholesteryl ester hydroperoxide detection (human), **165**, 988
  endothelin
    distribution, clearance, and vascular effects (pig), **161**, 647
    identification and characterization with radioimmunoassay using monoclonal antibody (human), **161**, 320
    immunoassay: marked elevations in cardiogenic shock patients, **161**, 562
    radioimmunoassay (human), **164**, 326
  endothelin-1-like immunoreactivity, detection and characterization (rat), **163**, 1512
  glucose and insulin levels, effect of synthetic C-terminal fragment of pancreastatin (rat), **158**, 844
  islet amyloid polypeptide levels, radioimmunoassay (human), **164**, 394
Plasma membranes
  adrenal cortical, protein phosphorylation, stimulation by atrial natriuretic factor (bovine), **163**, 988
  cerebral
    ATP-dependent Cl$^-$ uptake in derived vesicles, effects of proton pump inhibitors (rat), **160**, 469

  - ATP-dependent H^+ transport in derived synaptosomal vesicles, analysis (rat), **159**, 1045
  - interaction with neural cell recognition molecule F11, role of covalently attached phosphatidylinositol (chicken), **161**, 931
- DNA-interacting, targeting by monoclonal anti-DNA antibody induced by nucleoprotein shed in systemic lupus erythematosus (HT-29 cells, human placenta), **159**, 1441
- Epstein–Barr virus-infected cell, antigen gp220/340-encoding gene, characterization and selective expression of secreted form of gp220 (marmoset), **158**, 676
- fibroblast
  - glycosyl-phosphatidylinositol anchoring of 110K glycoprotein expressed by nonspecific cross-reacting antigen cDNA (mouse), **161**, 1126
  - hyperpolarization, and $[Ca^{2+}]_i$ increase, induction by fibroblast growth factor: resemblance to early signals generated by platelet-derived growth factor (mouse), **163**, 1325
- hepatic
  - interaction with casein kinase I, dependence on ionic strength (rat), **160**, 633
  - oxygen radical-induced damage, role of protein kinase C (rat), **163**, 836
- light-independent activity of protochlorophyllide reductase, demonstration (*Anacystis nidulans*), **162**, 71
- lipid physical state, temperature dependence (MDCK cells), **162**, 1004
- lymphocyte, electrogenic pump activity regulation, role of ligand- and voltage-gated sodium channels (human, mouse, rat), **160**, 999
- *Metarhizium anisopliae*, identification of GTP-binding proteins, **164**, 562
- Na^+/H^+-exchanger, role in aldosterone effects on intracellular electrolytes (human), **164**, 961
- neutrophil
  - leukotoxin biosynthesis, mechanism and relationship to oxygen radicals (pig), **161**, 1077
  - translocation of calpain induced by phorbol ester or fMet-Leu-Phe, subsequent enzyme activation (human), **160**, 737
- phosphorylation of EBV/C3dR, enhancement by specific EBV/C3dR ligands (Raji cells), **159**, 1213
- platelet, platelet-activating factor binding sites, photoaffinity labeling (rabbit), **161**, 1070
- renal brush border, ion permeation, amphotericin B-induced changes: model of nephrotoxicity (rabbit), **159**, 1165
- sperm, isolated, identification of calcium channels (pig), **161**, 162

asmids
- altered, isolation and characterization in mutant strains of *Pseudomonas putida* NCIB 9816, **164**, 764
- dual-circular, generation in COS7 cells and cell extracts, requirement of template DNA with SV40 origin (monkey), **160**, 53
- expressing τ subunit of rabbit skeletal muscle phosphorylase kinase, construction, **161**, 746
- pACK1, encoded lysostaphin endopeptidase resistance, expression in *Staphylococcus simulans* biovar *staphylolyticus*, **160**, 1106
- pRR12, as shuttle vector for transformation of *Phanerochaete chrysosporium*, description, **161**, 720

α_2-Plasmin inhibitor
- role in fibrin-specific fibrinolysis by staphylokinase, **162**, 830

Plasminogen
- activation by streptokinase, effect of site-specific alteration of Gly-24 in enzyme, **165**, 1085
- and apolipoprotein(a), functional analogy in binding to kringle-4-binding protein tetranectin, **161**, 427
- from various mammalian species, binding to rat C6 glioma cells and hepatocytes *in vitro*, **164**, 1288

Plasminogen activator
- induction by phorbol ester in transformed fetal aortic endothelial cells, role of protein kinase C (bovine), **160**, 682
- mRNA expression in aortic endothelial cells, effects of propranolol (bovine), **160**, 977
- tissue- and urokinase-type, production by corneal epithelial cells, analysis (bovine), **160**, 1021

Plasminogen activator inhibitor
- production by corneal epithelial cells, analysis (bovine), **160**, 1021

Plasmodium falciparum
- chloroquine-resistant
  - antimalarial activity of tetrandrine, **159**, 242
  - and sensitive strains, effects of chloroquine and qinghaosu, potentiating action of tetrandrine, **165**, 758

Platelet-activating factor
- acether, output in peritoneal macrophages, regulation by acetylhydrolase (mouse), **162**, 475
- agonist BN 52021, and cyclosporin A, effects on PAF- and antigen-induced bronchoconstriction (guinea pig), **163**, 118
- alkyl chain homologs, cardiac and coronary effects (guinea pig), **161**, 1341
- binding sites
  - on platelet membranes, photoaffinity labeling (rabbit), **161**, 1070
  - specific, in iris and ciliary body, characterization (rabbit), **160**, 250
- biosynthesis by
  - *de novo* pathway in renal inner medulla, decrease during renal necrosis, role of cholinephosphotransferase (rat), **163**, 1002
  - phosphocholine transferase in *de novo* pathway (rat brain), **161**, 107
- blood levels, increase after intestinal ischemia (dog), **158**, 353
- differential activation of skin cells: stimulation of phosphoinositide turnover and arachidonic acid mobilization in keratinocytes and fibroblasts (human), **163**, 1344
- effect on calcium channel activation (human platelets), **162**, 24
- induced intracellular Ca^{2+} mobilization and degranulation, dissociation from superoxide anion generation: evi-

dence for different eosinophil PAF receptors (guinea pig), **162**, 511
  induced platelet aggregation, inhibition bv hetrazepine WEB2086, role of benzodiazepine receptors (rabbit), **160**, 263
  production
    by *Escherichia coli*, analysis, **161**, 939
    in renal microsomes, effects of long-term fish oil consumption (rat), **160**, 1238
  role in endothelin-induced Ca^{2+} mobilization in cultured vascular smooth muscle cells (rabbit, rat), **160**, 751
  tritium-labeled, binding to platelet membranes, competitive inhibition by amiloride and analogs (rabbit), **163**, 165
Platelet-activating factor receptors
  eosinophil, evidence for multiple forms: dissociation of PAF-induced calcium mobilization, degranulation, and superoxide anion generation (guinea pig), **162**, 511
  photoactivable antagonist L662,025, biochemical properties (human), **161**, 23
Platelet-derived growth factor
  effect on intracellular free Ca^{2+} levels in fibroblasts: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
  gene family, identification of vascular endothelial growth factor as member (bovine), **165**, 1198
  generated early signals, resemblence to plasma membrane hyperpolarization and [Ca^{2+}]i increases induced by fibroblast growth factor (NIH-3T3 fibroblasts), **163**, 1325
  human and recombinant B chain homodimer, differential effects on smooth muscle cells (bovine, human), **160**, 1047
  induced nuclear phosphoprotein pp64, characterization (NRK cells), **161**, 1118
  and nerve growth factor, effects on ribosomal DNA transcription and tumor cell proliferation, comparison (human tumor cells), **163**, 649
  role in rapid modulation of 64-kDa fibroblast protein (mouse), **162**, 394
  stimulation of vascular smooth muscle cell proliferation, inhibition by atrial natriuretic factor (rat), **160**, 1392
Platelets
  activation, modulation by fibronectin (human), **165**, 966
  adhesion to endothelium, thrombin-induced, modification by endothelial-derived relaxing factor (rat, sheep), **159**, 349
  aggregation
    induction by thimerosal, role of [Ca^{2+}]$_i$ mobilization and secondary prostaglandin endoperoxide formation (human), **159**, 961
    inhibition of fibrinogen-derived peptide, role in prevention of protein kinase C proteolytic degradation (human), **163**, 1256
    platelet-activating factor-induced, inhibition by hetrazepine WEB2086, role of benzodiazepine receptors (rabbit), **160**, 263
    and secretion, inhibition by peptides derived from region of local homology between uteroglobin and lipocortin 1 (human), **165**, 27
    thrombin-induced, associated aggregin cleavage, mediation by high-affinity thrombin receptors (human), **162**, 1017
  binding of fibrinogen, inhibition by blockage of sodium–hydrogen antiport (human), **161**, 1228
  circulating, isolation of appreciable amounts of poly(A)$^+$ RNA (human), **160**, 705
  cytosolic alkalinization, role in Ca^{2+} mobilization, phosphatidic acid formation, and protein phosphorylation (human), **161**, 1007
  differential membrane association of protein kinase C subspecies, induction by phorbol ester (human), **161**, 556
  –granulocyte suspensions, transcellular conversion of endogenous arachidonic acid to lipoxins (human), **157**, 801; *erratum*, **159**, 370
  immunoreactive neuropeptide Y, increased levels in spontaneously hypertensive rats, **165**, 1399
  intact, calpain inhibition by thiol protease inhibitor E-64d (human), **158**, 432
  phospholipase C activation by fluoride, effect of cyclic AMP (human), **158**, 440
  platelet-activating factor binding sites, photoaffinity labeling (rabbit), **161**, 1070
  receptor-operated calcium channel activation, monitoring (human), **162**, 24
  stimulated, formation of histamine: localization in cytoplasm (human), **164**, 164
  γ-thrombin-induced arachidonic acid release, inhibition by cGMP analogs (human), **165**, 708
  tubulin phosphorylation during activation, time resolved analysis (human), **159**, 170
Podophyllotoxin
  antifungal action of derivatives, correlation with topoisomerase II inhibition (yeast), **160**, 257
Poliovirus
  proteins, post-translational modifications, analysis (HeLa cells), **158**, 263
  stabilization against heat inactivation, analysis, **159**, 1177
Polyadenylation
  differential, mutant vasopressin mRNA during development (rat), **158**, 555
  signals, role in processing of brown adipose tissue uncoupling protein mRNA (rabbit), **161**, 156
Poly(ADP-ribose)
  synthesis inhibitors, potentiation of *N*-methyl-*N*′-nitro-*N*-nitrosoguanidine-induced *O*^{6}-methylguanine-DNA-methyltransferase activity (rat hepatoma cells), **163**, 599
Poly(ADP-ribose) polymerase, *see* NAD$^+$ ADP-ribosyltransferase
Poly(ADP-ribosyl)ation
  in vivo target p66, copurification with poly(ADP-ribose) polymerase (murine fibroblasts), **165**, 631
Polyamines
  synthesis in B cells during primary infection with Epstein–Barr virus, inhibition, effects on cellular DNA synthe-

  - sis and EBV-encoded nuclear antigens (human), **159**, 945
- olyarginine
  - effect on substrate protein phosphorylation by cytosolic protein-tyrosine kinase (porcine spleen), **158**, 1043
  - elicitation of endothelium-dependent vascular relaxation (rat aorta), **158**, 177
- oly(aspartic acid)
  - –poly(ethylene glycol) block copolymer, conjugate with adriamycin and immunoglobulin G, disulfide linkage in, stabilization by microenvironmental control, **164**, 1234
- olyesters
  - amphiphilic, for disruption of lipid membranes, characterization, **159**, 566
- olyethylene glycol
  - –poly(aspartic acid) block copolymer, conjugate with adriamycin and immunoglobulin G, disulfide linkage in, stabilization by microenvironmental control, **164**, 1234
- olyhistidine
  - elicitation of endothelium-dependent vascular relaxation (rat aorta), **158**, 177
- olyinosinic•polycytidylic acid
  - effect on microsomal superoxide anion generation, detection by lucigenin chemiluminescence (rat liver), **161**, 1042
- Polylysine
  - –agarose-immbolized $GABA_A$ receptors, ligand binding characteristics (rat cerebral cortex), **163**, 611
  - effect on substrate protein phosphorylation by cytosolic protein-tyrosine kinase (porcine spleen), **158**, 1043
  - elicitation of endothelium-dependent vascular relaxation (rat aorta), **158**, 177
  - induction of phase separation in bimolecular mixed lipid membranes, **162**, 124
- Polymerase chain reaction
  - and mixed oligomer primers, in rapid cloning of rearranged immunoglobin genes from hybridoma cells (human), **160**, 1250
  - using mutation-specific inosine-containing oligonucleotide primers, in detection of *ras* point mutations (EJ cells, human blood), **160**, 441
- Polymerization
  - factor B of alternative complement pathway via disulfide bonds in presence of Cu^{2+}, stimulation by C3b (human), **165**, 101
- Polyornithine
  - effect on substrate protein phosphorylation by cytosolic protein-tyrosine kinase (porcine spleen), **158**, 1043
- Polypeptide growth factor
  - for hepatocytes, heparin-binding: NH_2-terminal amino acid sequence of hepatopoietin A (rabbit blood), **163**, 1370
- Polypeptides
  - β-crystallin, associated with amphibian lens development, identification, **164**, 1423
  - 47-kDa cytoplasmic membrane, relationship to nitrate transport (*Anacystis nidulans*), **158**, 257
  - islet amyloid
    - associated with type 2 diabetes mellitus, antibodies, characterization (human, monkey), **159**, 402
    - inhibition of glucose-stimulated insulin secretion from isolated pancreatic islets (rat), **160**, 961
    - isolation and sequence determination (rat pancreas), **164**, 400
    - and tissue content and plasma concentration, radioimmunoassay (human), **164**, 394
  - ovine hypothalamic, 38-residue, stimulating rat pituitary adenylate cyclase, isolation, **164**, 567
- Polyposis coli
  - familial, polyps from patients, increased level of mitochondrial gene expression, **159**, 1100
- Polysaccharides
  - protein-bound, PSK, stimulation of tumor necrosis factor-induced human myelogenous leukemic cell differentiation (*Coriolus versicolor*), **162**, 597
- Polyubiquitin
  - synthesis, mechanism: implications of des-Gly–Gly-ubiquitin inhibition of ubiquitin-dependent proteolysis (rabbit reticulocytes), **162**, 89
- Polyvinyl alcohol
  - effects on amine oxidase activity (bovine serum), **163**, 1168
- Porphyrinogen
  - free radical-mediated oxidation by hepatic and renal mitochondria, stimulation by iron (rat), **160**, 101
- Potassium
  - cAMP-mediated currents, activation by prostaglandins E_1 and E_2 in follicle-enclosed oocytes (frog), **162**, 1535
  - high-concentration stimulation in whole cell clamped GH_3 cells, effect on Ca^{2+} current, **158**, 534; *erratum*, **160**, 416
  - –Na–Cl cotransport in vascular endothelial cells, stimulation by atrial natriuretic factor (bovine), **159**, 734
- Potassium channels
  - inducing membrane protein, encoding genomic DNA, amino acid sequence analysis and molecular cloning (human), **161**, 176
  - opener BRL34915, and valinomycin and calcium channel blockers, effects on endothelin-induced vascular contraction, comparison (rat aorta), **164**, 1003
  - stretch-activated, identification in cultured mesangial cells (rat kidney), **159**, 516
  - voltage-dependent and calcium-activated, associated blockers dendrotoxin and charybdotoxin, interactions at binding sites on neuronal membranes (rat brain), **163**, 394
- Potassium chloride
  - induced corticotropin release by anterior pituitary cells, inhibition by cyclic GMP and guanylate cyclase activators (rat), **158**, 824
- Pravastatin
  - tissue selectivity *in vivo* (rat), **158**, 667
- Preadipocytes
  - 3T3, morphology and tubulin expression, growth hormone-induced alterations (mouse), **163**, 895

Prealbumin
  processing to serum albumin by COS-1 cells transfected with rat albumin cDNA, **163**, 194
  thyroxine-binding, and thyroxine-binding globulin, binding activities in serum: differential modulation by T_3, T_4, oleic acid, diphenylhydantoin, and salicylate (rat), **159**, 919
Pregnancy
  blastocyst implantation, role of superoxide radical (mouse), **161**, 762
  effect on myometrial force development induction by phorbol and agonists (rat), **158**, 302
Δ5-Pregnene-3β,20α-diol
  ^{3}H-labeled, biosynthesis, analysis in cultured glial cells after release of aminoglutethimide blockade (rat), **161**, 917
Probenecid
  prevention of glucose-stimulated efflux of fura-2 in pancreatic beta cells (mouse), **159**, 223
Procarboxypeptidase A
  autolysis in binary complex with proproteinase E, generation of subunit III-like protein (human, porcine pancreas), **163**, 1191
Progastrin
  carboxyl terminal flanking peptide, characterization (rat), **161**, 69
Progesterone
  purification from preovulatory ovarian follicular fluid and role in inducing acrosome reaction (human), **160**, 828
  role in mouse mammary tumor virus expression in murine mammary gland, **159**, 1020
Progesterone receptors
  hormone-specific phosphorylation and transformation, analysis (chicken oviduct), **164**, 295
  phosphorylation by cAMP-dependent protein kinase (bovine uterus), **162**, 160
Prolactin
  cross-reaction with antibodies to murine 13- to 18-kDa pituitary peptides (human, pig, rat, sheep), **163**, 386
  effects on bacterial toxin-induced ADP-ribosylation of lymphoma cell membrane proteins, **156**, 776; *erratum*, **161**, 392
  glycosylated species, covalent binding to immunoglobulin in amniotic fluid (human), **165**, 299
  ^{125}I-labeled, magnesium-dependent nonspecific binding to myelinated tracts in central nervous system (rat), **158**, 986
  release stimulated by repetitive Ca^{2+} spikes, dependence on frequency (rat pituitary cells), **158**, 811
  secretion
    immediate high-amplitude, induced by cell swelling after administration of permeant molecules glycerol or urea (rat pituitary cells), **163**, 471
    and phosphoinositide metabolism, thyrotropin-releasing hormone-stimulated, inhibition by interleukin 1β (rat pituitary cells), **165**, 496
Prolactin receptors, *see also* Lactogen receptors
  and growth hormone, erythropoietin, and interleukin-6 receptors, and p75 interleukin-2 receptor β-chain, common binding domain, analysis, **164**, 788
Proline
  free and tRNA-bound, specific activities in cultured osteoblast-like cells, alteration by parathyroid hormone (mouse), **161**, 994
  macrophage-mediated *N*-nitrosation, characterization (mouse), **159**, 373
  modification of protein stability, geometric criteria for mutation sites, **160**, 109
1-Propanol, *see n*-Propyl alcohol
Propranolol
  effect on urokinase mRNA expression in aortic endothelial cells (bovine), **160**, 977
Proproteinase E
  autolysis in binary complex with procarboxypeptidase A, generation of subunit III-like protein (human, porcine pancreas), **163**, 1191
n-Propyl alcohol
  4-aminobiphenyl binding to monoclonal antibody 2E11 in, description (mouse), **158**, 80
Prorenin-converting enzyme
  tissue distribution and characterization (mouse), **158**, 369
Prostacyclin
  production by vascular endothelial cells
    antithrombin III-stimulated, analysis (bovine), **163**, 1404
    bradykinin-stimulated, dissociation from phospholipase D activation by long-term phorbol ester treatment (bovine), **165**, 319
    epidermal growth factor- and transforming growth factor α-stimulated, comparison (human), **160**, 1100
    induction by shear flow, mechanism (human), **158**, 31
  release from mesenteric arteries, effect of endothelin (pig, rat), **160**, 924
  synthesis in osteoblastic cells, effects of human recombinant lymphotoxin (rat), **162**, 435
Prostaglandin D_2
  stimulation of osteoblastic cell calcification *in vitro* (human), **159**, 1206
Prostaglandin E_1
  activation of cAMP-mediated potassium currents in follicle-enclosed oocytes (frog), **162**, 1535
  effect on intracellular free Ca^{2+} levels in fibroblasts: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
Prostaglandin E_2
  activation of cAMP-mediated potassium currents in follicle-enclosed oocytes (frog), **162**, 1535
  effects on
    intracellular free Ca^{2+} levels in fibroblasts: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
    vascular endothelial cell formation in culture (bovine carotid artery), **159**, 572
  epidermal growth factor-induced release, synergistic effect of retinoic acid (rat lung cells), **162**, 1515
  liposomal, suppression of primary immune response to liposomal antigens (rabbit), **160**, 565
  role in interleukin 1 inhibition of gastric acid secretion (rat), **162**, 1578

suppressive effect on T-cell activation, role of protein kinase C translocation inhibition (human), **161**, 1299
synthesis
  bradykinin-stimulated, role of intracellular calcium changes (MDCK cells), **161**, 1333
  in cultured fetal calvaria, effect of cadmium (mouse), **158**, 508
  in fetal membranes and placenta, local stimulation by corticotropin-releasing hormone (human), **159**, 192
  inhibition by epithelial chloride channel blocker (rat mesangial cells), **163**, 398
  lipopolysaccharide-induced, associated sensitization of aveolar macrophages, by exogenous prostaglandins (rabbit), **165**, 526
  by mesangial cells, synergistic stimulation by interleukin 1 and tumor necrosis factor (rat kidney), **159**, 385
  in osteoblastic cells, effects of human recombinant lymphotoxin (rat), **162**, 435
  parathyroid hormone-stimulated, and bone resorption, inhibition by estradiol-17β in cultured neonatal calvariae (mouse), **163**, 1319
rostaglandin endoperoxide
  conversion pathway, specificity of glutathione *S*-transferases, effect of amino acid substitution (human), **158**, 497
rostaglandin endoperoxide synthase, *see* Prostaglandin synthase
rostaglandin $F_{2\alpha}$
  direct activation of glycogenolysis by increase in inositol 1,4,5-trisphosphate (rat hepatocytes), **163**, 1235
  effect on intracellular free Ca^{2+} levels in fibroblasts: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
  production in fetal membranes and placenta, local stimulation by corticotropin-releasing hormone (human), **159**, 192
rostaglandin H_2 receptors
  isoelectric and mass characterization (human platelets), **163**, 183
rostaglandins
  formation, role of identified cyclooxygenase-related gene (sheep), **164**, 1358
rostaglandin synthase
  gene cloning and amino acid sequence determination (human), **165**, 888
  related gene, identification and role in prostaglandin formation (sheep), **164**, 1358
rostate-specific antigen
  cDNA, high homology to tissue kallikrein genes (human), **160**, 903
  encoding gene
    characterization and comparison with human kallikrein-like gene, **159**, 95
    cloning and sequencing (human), **161**, 1151
rotease nexin-1
  formation of complex with and inhibition of murine T-cell serine proteinase-1 (human), **161**, 300
roteinase
  calcium-activated, role in proteolytic conversion of xanthine dehydrogenase to xanthine oxidase, analysis: calpain effects (rat), **165**, 858
  endogenous, cleavage of *Clostridium botulinum* type A neurotoxin, **162**, 767
  granulocyte, conversion of endothelial cell-derived high-molecular-weight von Willebrand factor into plasma multimer pattern (human), **158**, 980
  high choriolytic enzyme, tight binding to egg envelope (medaka), **162**, 58
  HIV-associated, inhibition by cerulenin and analogs, **163**, 980
  HIV-1-associated
    affinity purification, **164**, 955
    crystallizable, derivation from *pol* gene, **165**, 1043
    encoding gene, chemical synthesis and expression in *Escherichia coli*, **159**, 87
    high-level expression with synthetic gene (*Escherichia coli*), **161**, 1056
    peptide substrates and inhibitors, analysis, **159**, 420
    proteolytic activity, loss after substitution mutation of highly conserved arginine 87, **164**, 30
    and retroviral avian myeloblastosis virus, continuous spectrophotometric assay, **163**, 1079
  multicatalytic complexes
    autodegradation after urea treatment (rat liver), **158**, 548
    half-life in liver *in vivo*, analysis (rat), **159**, 1309
    sodium dodecyl sulfate-induced conformational and enzymatic changes (*Halocynthia roretzi*), **162**, 334
    subunit, separation: immunoreactivity with antibodies against bacterial ATP-dependent proteases (yeast), **164**, 1253
  Ti, antibodies, immunoreactivity with separated yeast proteasome subunits (*Escherichia coli*), **164**, 1253
  trypsin-like, production by granulosa cells after gonadotropin treatment (rat ovary), **165**, 624
α_1-Proteinase inhibitor
  inactivation by free radicals (human neutrophils), **159**, 821
  inhibitory properties, primary role of $P_1{}'$ ser^{359} residue (human), **159**, 271
  unglycosylated, solubility and accumulation in rough endoplasmic reticulum (Hep G2 cells), **160**, 1421
Proteinase inhibitors
  amyloid β-protein precursors with, tissue-specific mRNA expression: enhancement in Alzheimer's disease brain (human), **165**, 1406
  effects on cystamine killing of cultured hepatocytes (rat), **163**, 412
  secretory leukocyte, inactivation by free radicals (human neutrophils), **159**, 821
Protein carboxyl methyltransferase
  amino acid sequence, deduction from cDNA clone (rat brain), **161**, 342
Protein disulfide-isomerase
  comparison with type I iodothyronine deiodinase (rat liver), **162**, 857
  homologous thyroid hormone-binding protein p55, high-level expression in retroviral vector (mouse), **164**, 238
Protein-glutamine γ-glutamyltransferase
  crosslinking of lipocortin I and enhancement of Ca^{2+} sensitivity (human), **163**, 944

  - hepatic, hydrolysis of GTP (guinea pig), **162**, 1370
  - membrane-associated, increased activity in psoriasis (human), **164**, 219
- Protein kinase
  - apparent activation by okadaic acid-class tumor promoters (murine brain), **159**, 939
  - calcium-unresponsive phorbol ester/phospholipid-activated, and protein kinase C, differentiative action of K252a (mouse, pig), **164**, 974
  - cAMP-dependent
    - catalytic subunit isoforms, isoelectric focusing in immobilized pH gradient (bovine heart), **160**, 596
    - peptide substrates, increased efficacy with multiple arginine residues, **165**, 368
    - phosphorylation of
      - GTP-binding protein in platelet membranes (human), **160**, 235
      - progesterone receptors (bovine uterus), **162**, 160
    - specificity, regulation by intrasubstrate steric interactions in active site, **158**, 136
    - substrate, interaction with Ca^{2+}-ATPase, analysis (human platelets), **159**, 644
  - cyclic nucleotide-dependent, role in H-7 effects on T-cell tumor growth *in vitro* (mouse), **162**, 138
  - demonstration of exogenous *in vitro* peptide substrate (*Escherichia coli*), **160**, 552
  - ganglioside-stimulated, phosphorylation of myelin basic protein and peptides (rabbit), **165**, 93
  - homology with nuclear factor I (human, pig, rat), **162**, 427
  - MAP, microtubule-associated protein 2 phosphorylation, role of projection domain, **160**, 993
  - phosphorylation of RNA polymerase II-derived peptide, inhibition by 5,6-dichloro-1-β-D-ribofuranosylbenzimidazole (HeLa cells), **159**, 508
  - tyrosine-specific *see* Tyrosine kinase
  - various, effects on murine DNA polymerase α activity (rabbit, rat), **159**, 1397
- Protein kinase activating factor
  - plasma membrane, insulin-induced activation, promotion of ATP,Mg-dependent phosphatase activation (rat adipocytes), **158**, 762
- Protein kinase C
  - abnormal down-regulation in Chediak–Higashi syndrome beige mouse, improvement by thiol proteinase inhibitors, **160**, 433
  - activation
    - in aortic smooth muscle cells, stimulation by endothelin (bovine), **162**, 381
    - assisted recovery from elevated cytoplasmic Ca^{2+} in insulin-producing cells, role of Ca^{2+} efflux stimulation, **165**, 416
    - by (−)-indolactam V (human neuroblastoma cells), **162**, 1207
    - modulation of intercellular adhesion molecule 1 expression by endothelial cells (human umbilical vein), **161**, 945
  - assay in gastrointestinal cancer and normal tissue, comparison (human), **163**, 407
  - blockers, effects on neutrophil receptors for leukotriene B$_4$ (human), **163**, 1456
  - and calcium-unresponsive phorbol ester/phospholipid-activated protein kinase from porcine spleen, differentiative action of K252a (murine brain), **164**, 974
  - catalytic fragment PK-M, activation of neutrophil NADPH oxidase *in vitro* (human), **158**, 884
  - critical role in signal transduction of vasopressin and corticotropin-releasing factor in cultured pituitary cells (rat), **163**, 1014
  - diacylglycerol-activated, potentiation by acyl-coenzyme A thioesters of hypolipidemic drugs (rat brain, liver), **159**, 1026
  - fatty acid-induced activation, potentiation by fatty acyl esters (rat pancreas), **160**, 1110
  - gene family, cell type-specific expression: down-regulation of mRNAs for PKCα and nPKCε upon *in vitro* differentiation (murine neuroblastoma cells), **165**, 533
  - glutathione *S*-transferase identification as substrate *in vitro* (rat liver), **162**, 903
  - identification of two functionally distinct types in smooth muscle cells (rabbit aorta), **161**, 1020
  - inhibition by
    - calphostin C (*Cladosporium cladosporioides*), **159**, 548
    - cyclosporin A, role in nephrotoxicity (MDCK cells), **160**, 409
    - parenteral vehicle Cremophor EL *in vitro* (human), **159**, 1359
    - retro-inverso pseudosubstrate analogs (bovine brain), **165**, 1382
    - sphingosine, correlation with presence of positive charge, **164**, 102
    - staurosporine
      - interference with arterial smooth muscle cell proliferation (rabbit aorta), **158**, 105
      - subsequent attenuation of Ca^{2+}-dependent stretch-induced vascular tone (rabbit facial vein), **158**, 58
    - triphenylacrylonitrile antiestrogens, modes (rat brain), **163**, 1377
  - inhibitors H-7, staurosporine, and UCN-01, comparative effects on phorbol ester-induced CD4 down-regulation and augmentation of HIV replication (human T cells), **164**, 339
  - interactions with phospholipids, fluorometric analysis, **159**, 495
  - in isolated hepatocytes after partial hepatectomy, analysis (rat), **158**, 294
  - mitogenic desensitization and down-regulation, differential effects of diacylglycerols and phorbol ester (Swiss 3T3 cells), **163**, 201
  - in native membrane-associated state, measurement (murine lymphoma cells), **160**, 340
  - in oncogene-transformed cells, permanent activation and down-regulation by synthesis of diacylglycerol *de novo* (NIH/3T3 fibroblasts), **164**, 816
  - phorbol ester-induced depletion, correlation with tumor promotion (JB6 epidermal cells), **165**, 981
  - and phosphoinositols, role in endothelin action on smooth muscles (rabbit aorta), **158**, 170
  - phosphorylation of histone H1, inhibition by mono- and divalent cations (rat), **162**, 45
  - pineal, ontogeny (rat), **159**, 701

potentiation of stretch-induced cerebral artery tone by increase in intracellular Ca^{2+} sensitivity (rabbit), **165**, 312
proteolytic degradation, prevention by fibrinogen-derived peptide inhibition of platelet aggregation (human), **163**, 1256
role in
  activation of granulocytes and peritoneal macrophages by type 1 fimbriated *Escherichia coli* (human), **165**, 1243
  basic and acidic fibroblast growth factor modulation of epidermal growth factor (Swiss 3T3 cells), **164**, 796
  desensitization of inositol phosphate production in endothelial cells after agonist stimulation (human umbilical vein), **161**, 1064
  epidermal growth factor-induced Ca^{2+}-signaling response in breast cancer cell line MDA-468 (human), **159**, 1290
  H-7 effects on T-cell tumor growth *in vitro* (mouse), **162**, 138
  lipid peroxidation and cell membrane damage induced by oxygen-based radicals (rat hepatocytes), **163**, 836
  phenobarbital reduction of hepatocyte epidermal growth factor receptor expression (rat), **158**, 652
  phorbol ester induction of plasminogen activator in transformed fetal bovine aortic endothelial cells, **160**, 682
specific inhibition by hypericin and pseudohypericin: relationship to antiretroviral activity (rat brain), **165**, 1207
specific isozymes, retention after chronic phorbol ester treatment (BC3H-1 myocytes), **161**, 327
subcellular distribution and immunocytochemical localization in myocardium and troponin phosphorylation in myocytes stimulated by isoproterenol or phorbol ester (rat), **162**, 1105
translocation
  to hepatic microsomal membranes, induction by oleate (rat), **160**, 1243
  inhibition, role in suppressive effect of prostaglandin E_2 on T-cell activation (human), **61**, 1299
  in microvessels, substance P-stimulated (bovine brain), **164**, 595
  in neuroblastoma NCB-20 cells, bradykinin-induced, dependence on 1,2-diacylglycerol content and free calcium, **162**, 1279
  in OK cells, effects of parathyroid hormones 1–34, 3–34, and 7–34, **159**, 1352
  in polymorphonuclear leukocytes, role of microfilaments (mouse), **160**, 1344
  role in signal transduction in onset of 1α,25-dihydroxyvitamin D_3-induced terminal keratinocyte differentiation (mouse), **163**, 1517
type III, selective low levels in tumor promoter-dependent leukemia cell line (mouse), **164**, 1397
types α and β, phorbol ester-induced differential membrane association (human platelets), **161**, 556
rotein kinase inhibitors
  effects on sodium–hydrogen antiport during egg fertilization (sea urchin), **161**, 1100
Protein phosphatase, *see* Phosphoprotein phosphatase
Proteins
  A1, identification as fourth member of 13-kDa-type acidic ribosomal protein family (yeast), **161**, 1001
  activating GTPase activity of *smg*-21 GTP-binding protein with same effector domain as *ras* proteins, purification (human platelets), **159**, 1411
  ADP/ATP carrier and uncoupling protein, differential interaction with [^{125}I]coenzyme A derivative photolabel in brown adipose tissue mitochondria (hamster), **161**, 502
  ADP-ribosylated, demonstration in Golgi fraction (rat liver), **164**, 333
  advanced glycation products on, specific antibodies, production and characterization, **162**, 740
  alarmone Ap_4A-binding, stimulation by ethanol and phosphatidylethanolamine (*Escherichia coli*), **160**, 1379
  α-amidating enzyme precursors with transmembrane domains, specific post-translational processing, role in generation of secreted enzyme (rat thyroid carcinoma cells), **163**, 959
  amino-terminal myristoylated, in retrovirus-infected cells, detection by antibodies to NH_2-terminal myristoyl glycine, **162**, 724
  amyloid, *see* Amyloid
  annexin, recognition of entire family by affinity-purified site-directed antibody (rabbit), **160**, 1233
  assembly AP-2, clathrin-binding domain, identification (bovine brain), **158**, 17
  band 3
    copurifying lipids, fatty acid composition (human erythrocytes), **159**, 1012
    porter, quaternary structure, modulation by transport site ligands (human erythrocytes), **159**, 1337
  bifunctional, with enoyl-CoA hydratase–3-hydroxy acyl-CoA dehydrogenase activities, deficiency in infants with peroxisomal disorders, molecular analysis, **161**, 242
  binding to
    core sequences of adenovirus E1A-inducible E4 promotor (HeLa cells), **163**, 1143
    DNA in nuclear extracts, abnormality in ataxia-telangiectasia (human), **158**, 749
  binding domains of thyroglobulin promoter, identification (rat), **163**, 481
  bone morphogenetic, bone matrix-derived, purification (bovine), **165**, 595
  calcium-binding
    high-capacity low-affinity, endoplasmic reticulum-associated, characterization: calsequestrin-like and divergent properties (human liver), **165**, 973
    sequence homology with calregulin and human Ro/SS-A antigen (canine brain), **164**, 575
    with synexin-like activity, purification and characterization (human platelets), **159**, 236
  calcium/phospholipid-regulated 32-kDa, identification and partial separation (bovine spleen), **162**, 15
  calmodulin-binding
    defect, role in lack of interleukin-1β gene expression

  by lipopolysaccharide-nonresponder macrophages (C3H/HeJ mouse), **158**, 723
 81-kDa heat-stable, purification and characterization (bovine brain), **163**, 581
carrier, insulin-like growth factor-bound, release by osteoblasts: stimulation by estradiol and growth hormone (rat), **160**, 788
C4b-binding
 identification of proline-rich protein as (human liver), **165**, 138
 identity as acute-phase protein, demonstration (Hep G2 cells), **164**, 1446
cell wall-incorporated, formation of covalent bonds (*Candida albicans*), **162**, 1118
c-ERB A, localization in liver with monoclonal antibodies (rat), **164**, 1053
c-Ha-*ras*, antiparallel β-sheet effector-region residues, conformations in GDP- and GTPγS-bound forms, comparative two-dimensional NMR study (human), **162**, 1054
chromosomal 42-kDa rapidly phosphorylated, characterization as subunit of larger protein complexes (midge), **165**, 895
c-Ki-*ras* 2-encoded, carboxyl terminal segment, effects on calmodulin phosphorylation and insulin-independent autophosphorylation of insulin receptor (human), **161**, 399
cleavage at glutamyl residues by endoproteinase Asp-N (*Pseudomonas fragi*), **162**, 1528
c-*myc*, repression of N-*myc* gene (human neuroblastoma cells), **162**, 991
corticotropin-releasing factor-binding, structure and glycoprotein nature, analysis (human), **165**, 703
cross-reacting with anti-phosphotyrosine antibodies in insoluble cytoplasmic matrices, identification (yeast), **160**, 887
cyclopentanone prostaglandin-induced, identification and inhibition of herpes simplex virus replication (human embryonic fibroblasts), **158**, 189
cytoskeletal beaded-chain filament, translation *in vitro* from lens mRNA (chicken), **163**, 589
cytosolic, role in activation of sarcolemmal phosphoinositide phospholipase C (canine heart), **163**, 567
dicyclohexylcarbodiimide-binding, identification as subunit of *Methanosarcina barkeri* ATPase complex, **162**, 1585
–DNA complexes of nuclear matrix, visualization and partial characterization of protein component (murine plasmocytoma), **162**, 175
E6, human papillomavirus type 16, expressed in *Escherichia coli*, purification and DNA-binding properties, **164**, 1402
encoded by *Bacillus sphaericus* 1593M toxin genes expressed in *Escherichia coli* and *Bacillus subtilis*, respective roles, **164**, 1417
endogenous acceptor, DNA-regulated arginine-specific mono(ADP-ribosyl)ation and de-ADP-ribosylation reactions (human neutrophils), **163**, 452
endogenous sulfhydryl, with angiotensin-converting enzyme inhibitory activity, detection in heart (rat), **159**, 1093
endothelial tissue factor-inducing tumor-derived, identification and partial purification (human), **160**, 222
estramustine-binding, purification and radioimmunoassay (human, rat), **165**, 947
extracellular matrix, adhesion of myoblasts, effects of glycoprotein processing inhibitors (chicken, rat), **163**, 1338
47- and 49-kDa, phosphorylation during superoxide release (guinea pig neutrophils), **158**, 1029
free radical-mediated degradation, effects of liposomal membranes, **162**, 1076
gag, in HIV-infected cells, antimyristoylation with *N*-myristoyl glycinal diethylacetal, inhibitory effects on virus production, **165**, 1145
gastrin-binding, 33- to 40-kDa, presence on human and murine colon cancer, **164**, 512
glycosyl-phosphatidylinositol anchored, distribution in BC$_3$H1 myocytes and 3T3-L1 pre-adipocytes, differential regulation by serum and insulin, **164**, 824
gp70/p15 E, of Moloney murine leukemia virus, turnover and compartmentation in ψ_2 cells, **161**, 596
granulosa cell, gonadotropin-stimulated phosphorylation (pig), **161**, 442
guanine nucleotide-binding, *see* G proteins
heat shock
 42°C-specific, common antigenicity with hsp 105 (mouse), **160**, 60
 hsp47, transformation-sensitive, specific binding to fetuin (chicken), **164**, 259
 HSP 89, hyperthermic induction, effect of cellular aging (human fibroblasts), **162**, 1302
 hsp 90, detection of DNA-like structure in cDNA-derived amino acid sequence: potential site of interaction with steroid receptors (chicken), **159**, 140
 90K, monoclonal antibodies, in analysis of untransformed glucocorticoid receptor heteromeric structure (rat), **159**, 677
 synthesis, effects of temperature down-shift (*Escherichia coli*), **163**, 438
heme, cation radicals, photochemical generation and reactions, **159**, 472
high-mobility group
 endosperm-derived, phosphorylation by casein kinase II isolated from nuclear lysates (maize), **162**, 456
 HMG-Y, amino acid sequence, relation to HMG-I, and domains for specific binding to stretches of A–T base pairs (human placenta), **158**, 646
 nuclear, estradiol-enhanced acetylation (neonatal guinea pig uterus), **161**, 1260
high-molecular-weight, from chloroquine-resistant *Plasmodium falciparum*, [^{3}H]azidopine photoaffinity labeling, **162**, 809
HIV-I *rev* and HTLV-I *rex*, functional similarity, **162**, 963
ICP4, epitope similarity with 165-kDa protein of herpes simplex virion (BHK cells), **163**, 124
immunologically *ras*-related, agonist-induced phosphorylation in erythroleukemia cells (human), **161**, 972

- β-inhibin, *see* β-Microseminoprotein
- inhibiting GDP dissociation and subsequent binding of GTP_1 to *rho*B p20, partial purification (rabbit intestine), **163**, 1523
- insulin-like growth factor binding
  - BP-25, expression by breast cancer cells (human), **158**, 38
  - from cerebrospinal fluid and A673 rhabdomyosarcoma cells, identification as homologs to rat BRL-3A binding protein, **163**, 875
  - in cultured astroglial and neuronal cells, characterization (rat), **159**, 1316
  - identification (rat serum), **165**, 189
  - IGF-BP3, cDNA structure and mRNA tissue distribution (rat), **165**, 907
- insulin-like growth factor I-binding, identification in serum from rats with diabetes mellitus, **163**, 882
- intermediate filament, peripherin, phosphorylation in neuroblastoma cells and sympathetic neurons (mouse, rat), **160**, 772
- intermolecular crosslinking and immobilization by Schiff base copper(II) chelate, evaluation, **161**, 52
- intracellular, phosphorylation by phytochrome in protoplasts, measurement of associated action spectra (oat), **162**, 9
- lead-binding, low-molecular-weight high-affinity cytosolic: preliminary purification and characterization (rat brain), **159**, 177
- lipoprotein lipase-inhibiting, purification from cachexia-inducing melanoma cell line (human), **160**, 1085
- liver fatty acid-binding, specific high-affinity binding of lipoxygenase metabolites of arachidonic acid (rat), **161**, 448
- LUCT/IL-8, N-terminus, role in chemotaxis and 64-kDa protein phosphorylation (human neutrophils), **163**, 1298
- lymphocyte pore-forming, sequence analysis (mouse), **158**, 1
- lysosomal enzyme-binding, phosphorylation, inhibition by α-L-fucosidase, β-glucuronidase, and mannose-6-phosphate (simian brain), **162**, 1244
- M1 and M2 components of ribonucleotide reductase, effects of phobol ester (BALB/c 3T3 fibroblasts), **162**, 1417
- MEKA, retina-specific, identification as 33K phosphoprotein (bovine eye), **162**, 1063
- membrane
  - ADP-ribosylation by bacterial toxins, effects of prolactin (Nb_2 lymphoma cells), **156**, 776; *erratum*, **161**, 392
  - heavy metal derivatives: selective mercurilation of bacteriorhodopsin (*Halobacterium halobium*), **161**, 640
  - phosphorylation, stimulation by atrial natriuretic factor (bovine adrenal cortical cells), **163**, 988
  - potassium channel-inducing, encoding genomic DNA, amino acid sequence analysis and molecular cloning (human), **161**, 176
  - proteolysis, inhibition by synthetic calpain inhibitor (rat erythrocytes), **157**, 1117; *erratum*, **159**, 371
- *met*E, *met*R, and *met*H expression, MetR regulation *in vitro*, effect of homocysteine (*Escherichia coli*), **163**, 79
- microtubule-associated MAP-2
  - projection domain, role in phosphorylation by MAP kinase, **160**, 993
  - stimulation of DNA synthesis catalyzed by nuclear matrix (porcine brain), **159**, 834
- milk late-lactation-associated, gene molecular cloning and characterization (wallaby), **164**, 1380
- mitochondrial matrix, release through Ca^{2+}-requiring cyclosporin-sensitive pathway (rat liver), **161**, 619
- monoADP-ribosylation in skeletal muscle, enzymatic and nonenzymatic types (rat), **163**, 1063
- monocyte chemotactic, gene expression by cytokine-treated fibroblasts and endothelial cells (human), **162**, 694
- mRNA-associated, in herpes simplex virus-infected cells, structure (human), **164**, 355
- M, streptococcal, stimulated T lymphocytes, serine and tyrosine phosphorylation of 28- and 35-kDa proteins (human), **158**, 803
- myelin basic, *see* Myelin basic protein
- Na^+/glucose cotransporter, functional lysyl residues, inhibition by pyrylium salt (rabbit brush border membranes), **163**, 1356
- neutrophil, tyrosine phosphorylation, analysis (human), **162**, 1478
- NS1, bluetongue virus-17, expression in *Escherichia coli* by pUC vectors, **162**, 892
- nuclear
  - binding to proximal CACCC box of β-globin promoter and similar sequence in enhancer (human), **164**, 149
  - interactions with interferon consensus sequence, interferon-induced early changes (HeLa cells), **163**, 370
- nuclear factor 1-like, binding to enhancer in rat c-*mos* locus (mouse), **161**, 8
- nucleolar B23, *see* Numatrin
- nucleolar, detection of autoantibodies (human serum), **163**, 1119
- 165-kDa, of herpes simplex virion, epitope similarity with ICP4 regulatory protein (BHK cells), **163**, 124
- P1-related, amino acid sequence, phylogenetic comparison: evidence for endosymbiotic origin of mitochondrion and chloroplast (bacteria, hamster, human, wheat, yeast), **163**, 780
- p55, thyroid hormone-binding, homologous to protein disulfide-isomerase, high-level expression in retroviral vector (mouse), **164**, 238
- p56^{lck}, phosphorylation by exogenous ATP in intact lymphoid cells (human, mouse), **162**, 51
- p66, copurification with poly(ADP-ribose) polymerase: *in vivo* target for poly(ADP-ribosyl)ation (murine fibroblasts), **165**, 631
- pancreastatin-related, tumor-derived, isolation and characterization (human), **164**, 141
- parathyroid hormone-related
  - stimulation of interleukin-6 production by osteogenic cells (rat), **162**, 1546

  synthesis and *in vitro* and *in vivo* antagonistic activity (mouse, ROS 17/2.8 cells), **158**, 1036
peroxisomal, enoyl-CoA hydratase bifunctional and 70-kDa membrane-associated, identity (murine liver), **160**, 503
phosphorylation
  by cytosolic protein-tyrosine kinase, effects of polybasic amino acids (porcine spleen), **158**, 1043
  in intact enterocytes, Ca^{2+}-mediated, stimulation by histamine, **165**, 810
  and interleukin-2 receptor expression, interleukin-2 production, and cellular proliferation in lymphocytes oxidized by periodic acid, temporal progression (rat), **158**, 590
  in platelets, role of cytosolic alkalinization (human), **161**, 1007
phosphotyrosine-containing, precipitation by IgGsorb in absence of antibody (human placenta), **159**, 332
pigment organelle p57, phosphorylation, role in organelle dispersion stages in permeabilized xanthophores (goldfish), **161**, 626
poliovirus, post-translational modifications, analysis (HeLa cells), **158**, 263
prenylated, detection of thioether linkage to cysteine (CHO cells), **163**, 143
prion, Pro→Leu change at position 102 and other mutations, role in associated Gerstmann-Sträussler syndrome (human), **163**, 974
proline-rich, cDNA cloning: identification as C4b-binding protein (human liver), **165**, 138
prostatic binding, C3(1) gene, androgen response element in first intron, functional characterization (T-47D cells), **164**, 833
PSP$_{94}$, *see* β-Microseminoprotein
RB, tumor suppressor gene-encoded, *in vitro* phosphorylation by mitosis-specific histone H1 kinase, **164**, 580
ras p21
  detection in cell lines by [γ-^{35}S]GTPγS binding (human, mouse), **159**, 1269
  oncogenic and nononcogenic amino-terminal segments, conformation and GTP-hydrolyzing ability, comparison, **160**, 282
RegA, identification with anti-RegA antibody (*Pseudomonas aeruginosa*), **163**, 1312
renin-binding, biosynthesis *in vitro*, **164**, 265
retinoic acid-binding
  16.2-kDa cellular form, purification and partial characterization (chicken embryo), **157**, 1302; *erratum*, **159**, 371
  type II, cellular, distribution (chicken embryo), **164**, 531
rho A, identification as botulinum ADP-ribosyltransferase C3 substrate (*Escherichia coli*), **158**, 209
*rho*B p20, dissociation of bound GDP and subsequent binding of GTP$_1$, inhibition by protein partially purified from intestine (rabbit), **163**, 1523
ribosomal
  L21, primary structure (rat), **162**, 364
  S6, phosphorylation by HepG-2 cells in response to insulin, kinetics (human), **161**, 797
Rieske iron-sulfur, in mitochondrial cytochrome *bc*$_1$ complex, cDNA cloning and sequence analysis (rat), **159**, 19
rod outer segment, binding with calmodulin and GTP (toad retina), **163**, 363
secretory SP-1, secretion by parathyroid cells, effects of cellular proteolysis inhibitors (bovine), **160**, 1339
70-kDa, disulfide linkage to mucin derived from human milk-fat globule membrane, **165**, 1305
sialic acid-binding, identification as cell cycle-dependent gene product (human), **163**, 506
64-kDa
  fibroblast, platelet-derived growth factor-mediated rapid modulation (mouse), **162**, 394
  phosphorylation in polymorphonuclear leukocytes, role of N-terminus of LUCT/IL-8 protein (human), **163**, 1298
S, localization of β-endorphin-binding sites after complex formation with complement proteins, **159**, 799
smg p25A
  binding to guanine nucleotide, kinetic analysis (bovine brain), **162**, 273
  tissue distribution, analysis with monoclonal antibody (bovine, rat), **162**, 1438
smg-21, GTP-binding, with same effector domain as *ras* proteins, GTPase-activating proteins for, purification (human platelets), **159**, 1411
SP-B, pulmonary surfactant-associated, cDNA isolation and characterization (rabbit), **160**, 325
ssDNA-binding, conjugated with horseradish peroxidase or urease, in detection of total DNA (bovine thymus, *Escherichia coli*), **165**, 474
stability, modification by introduction of disulfide bridges and prolines: geometric criteria for mutation sites, **160**, 109
stimulating murine erythroid progenitor growth, purification from actinomycete strain, **163**, 888
stress, 28-kDa tumor necrosis factor-α-induced phosphorylation in endothelial cells, role in protection against cytotoxicity (bovine aorta), **163**, 301
structure prediction by computer program, **159**, 687
subendothelial matrix, adhesion of neutrophils, induction by neutrophil activating factor (human), **162**, 387
subunit III-like, generation by autolysis of proproteinase E in binary complex with procarboxypeptidase A (human, porcine pancreas), **163**, 1191
T-cell-activating, similarity to 20-kDa homologous restriction factor, **162**, 1553
taipoxin-binding, on synaptic membranes, identification by affinity labeling (guinea pig), **165**, 689
target site in early-replicated DNA sequence, analysis: highly conserved binding motif (human), **165**, 956
TAT, HIV-1, encoding gene, chemical synthesis and expression in cell-free system (HeLa cells), **160**, 1429
tau, calpain-induced proteolysis (bovine brain, microtubules), **163**, 1505
32-kDa, purification from spermatozoa and activation of proacrosin (pig), **160**, 1026
33-kDa, rapidly phosphorylated in interleukin-3-dependent cells, characteristics (mouse), **164**, 520

translation inhibitory, characterization (Luffa gourd seeds), **160**, 509
transmembrane secretory component, cloning and mRNA expression in tissues (human), **158**, 783
28- and 35-kDa, from T lymphocytes stimulated by streptococcal M protein, serine and tyrosine phosphorylation (human), **158**, 803
240-kDa, detection on surface of *Plasmodium falciparum*-infected erythrocytes by naturally occurring anti-band 3 autoantibodies (human), **160**, 1357
with tyrosine protein kinase activity, purification and characterization (human B cells), **163**, 1128
ubiquinone-binding, in complex III of mitochondrial respiratory chain, isolation and nucleotide sequence of encoding nuclear gene (human), **161**, 371
uncoupling
  and ADP/ATP carrier, differential interaction with [^{125}I]coenzyme A derivative photolabel in brown adipose tissue mitochondria (hamster), **161**, 502
  brown adipose tissue-derived, mRNA processing: use of one of two polyadenylation signals (rabbit), **161**, 156
  content in brown adipose tissue mitochondria, rapid postnatal changes (rat), **159**, 216
  expression in brown adipocytes in primary culture, adrenergic regulation (fetal rat), **163**, 541
urinary excretion, augmentation by atrial natriuretic factor in patients with essential hypertension: ANF role in renal handling of protein, **158**, 936
uterine secretory, estrogen-responsive 110K and 74K, structural relationships to complement component C3 (rat), **158**, 898
vitamin D-binding, properties of binding of fatty acids and vitamin D, relationship (bovine), **163**, 14
X
  hepatitis B viral, synthesized in cell-free system, dimerization, **164**, 14
  role in function of pyruvate dehydrogenase complex (bovine kidney), **160**, 715
yellow fluorescent, interaction with luciferases from bioluminescent bacteria (*Vibrio fischeri* Y-1), **161**, 1191
Yp20, chromatin-associated, binding to GTP (yeast), **165**, 667
zinc-ATP-dependent chemical phosphorylation, **163**, 64
Protein synthesis
  heat shock proteins, effects of temperature down-shift (*Escherichia coli*), **163**, 438
  in herpes simplex virus-infected endothelial cells, restoration by lithium chloride (human), **160**, 1073
  mitochondrial, increase after irradiation with helium–neon laser (rat liver), **163**, 1428
  role in sterol-mediated suppression of 3-hydroxy-3-methylglutaryl-CoA reductase mRNA levels in cultured cells (hamster), **161**, 267
  in 3T3-L1 adipocytes, effect of phenylarsine oxide, **161**, 633
Protein-tyrosine kinase
  cytosolic
    effects of membrane phospholipids (porcine spleen), **165**, 680
    phosphorylation of substrate proteins, effects of polybasic amino acids (porcine spleen), **158**, 1043
  epidermal growth factor-associated, role in activation of receptor-operated calcium channels (A431 cells), **158**, 527
  inhibition
    by adriamycin, **160**, 1309
    by naturally occurring piceatannol (LSTRA cells), **165**, 241
    selective, by synthetic multisubstrate analog in RSV-transformed cells (quail), **165**, 1324
  inhibitor genistein, effects on DNA synthesis and phospholipid-derived second messenger generation (murine fibroblasts, rat hepatocytes), **165**, 795
  insulin receptor-associated
    adipocyte, decrease during aging (rat), **160**, 303
    and insulin-like growth factor I receptor-associated, phosphorylation of pp-120 in AS-30D hepatoma cells (rat), **160**, 168
    role in
      biological effects of monoclonal antibodies to human insulin receptor in transfected 3T3/HIR fibroblasts, **165**, 212
      insulin receptor dephosphorylation in adipocytes (rat), **162**, 1200
    60-kDa substrate, identification by binding to GDP–agarose in NIH-3T3 cells transfected with human insulin receptor (mouse), **158**, 743
  related proteins, purification and characterization (human B cells), **163**, 1128
  36/40-kDa, purification and characterization (HL-60 cells), **160**, 1203
  v-*src*, irreversible inhibition by herbimycin A, effects of sulfhydryl compounds (NIH 3T3 cells), **163**, 803
Proteoglycans
  interleukin 1-stimulated loss from cartilage *in vitro*, partial inhibition by human transforming growth factor β (pig), **162**, 144
  liver-derived, hepatocyte multicellular spheroids formed in presence of, albumin production, analysis (rat), **161**, 385
  production in smooth muscle cells, effect of endothelial cell growth factor and heparin (human), **163**, 84
Proteoliposomes
  reconstituted, G protein dissociation from FSH receptor–G protein complexes, induction by FSH, **162**, 1214
Proteolysis
  acid-limited, glyceraldehyde-3-phosphate dehydrogenase, induction of angiotensin-converting enzyme inhibitory activity (porcine, tuna muscle), **161**, 456
  associated activity of
    HIV-1 protease, loss after substitution mutation of highly conserved arginine 87, **164**, 30
    human *Campylobacter pylori* and ferret gastric Campylobacter-like organism, analysis, **163**, 1
  associated degradation routes of β_1-adrenoreceptor, analysis with antipeptide antibodies against receptor N-terminal sequence (turkey), **165**, 264

  - ATP-dependent, in BHK cell extracts, role of macropain, **160**, 911; *erratum*, **161**, 944
  - induced by amino acid deprivation in perfused liver, inhibition by isovaleryl-L-carnitine (rat), **158**, 797
  - membrane proteins, inhibition by synthetic calpain inhibitor (rat erythrocytes), **157**, 1117; *erratum*, **159**, 371
  - protein kinase C, prevention by fibrinogen-derived peptide inhibition of platelet aggregation (human), **163**, 1256
  - routes for β_1-adrenoreceptor, analysis with antipeptide antibodies against receptor N-terminal sequence (turkey), **165**, 264
  - ubiquitin-dependent, inhibition by des-Gly–Gly-ubiquitin: implications for mechanism of polyubiquitin synthesis (rabbit reticulocytes), **162**, 89
- Protochlorophyllide reductase
  - light-independent activity in purified plasma membrane, demonstration (*Anacystis nidulans*), **162**, 71
- Proton pump
  - coupling with superoxide radical–superoxidase dismutase system in maturing spermatozoa, role in sperm motility (human, rat), **161**, 771
- Protoplasts
  - intracellular protein phosphorylation by phytochrome, measurement of associated action spectra (oat), **162**, 9
- Protoporphyrinogen oxidase
  - purified, characterization (barley), **161**, 790
- Pseudohypericin
  - specific inhibition of protein kinase C, relationship to antiretroviral activity (mouse, rat), **165**, 1207
- *Pseudomonas*
  - alginate synthesis, regulatory role of *algR1* gene (*P. aeruginosa*), **164**, 601
  - 2-chlorobenzoate degradation: identification of metabolite 2,3-dihydroxybenzoate, **161**, 700
- ψ_2 cells
  - turnover and compartmentation of Moloney murine leukemia virus proteins gp70/p15 E, **161**, 596
- Psoriasis
  - associated increase in membrane transglutaminase activity and crosslinked protein envelope (human), **164**, 219
- Pterins
  - keto/enol tautomerization, as mechanism of dihydrofolate reductase action, computational studies, **161**, 64
- Purine-nucleoside phosphorylase
  - role in 8-azaguanosine-5′-monophosphate synthesis *in vitro* (hamster fibroblasts), **159**, 854
- Purinergic receptors
  - P_2, responses in parotid acinar cells, comparative effects of Coomassie Brilliant Blue G and Reactive Blue 2 (rat), **165**, 1279
- Putrescine
  - induction of ornithine carbamoyltransferase precursor transfer into hepatic mitochondria (rat), **158**, 287
  - levels during oogenesis, role in oocyte competence to meiotic resumption (frog), **158**, 520
  - regulation of adenosylmethionine decarboxylase mRNA cell content and translational efficiency (bovine), **160**, 1196
  - selective alteration in colon carcinoma cells, modulation of expression of growth genes (human), **165**, 384
- Pyrazole
  - effect on carbon tetrachloride- and chloroform-induced hepatotoxicity after treatment *in vivo*, analysis (rat), **161**, 615
- Pyridostigmine
  - effects on myocardial mitochondrial electron transport activity, analysis (rat), **164**, 997
- Pyrocarbonic acid diethyl ester
  - modification of histidine residue in EcoRI DNA methylase, associated loss of enzymatic activity, **164**, 233
- Pyrophosphorolysis
  - ADP-ribose in nuclei: metabolic pathway of (ADP-ribose)$_n$ (HeLa S3 cells), **163**, 1047
- Pyrroloquinoline quinone
  - acid-promoted tautomeric lactonization and oxidation–reduction, **163**, 755
  - bound peptides isolated from diamine oxidase, structural analysis (porcine kidney), **159**, 726
- Pyruvate
  - effect on rate of electron transfer of adrenodoxin–adrenodoxin reductase system in mitochondria (bovine adrenal cortex), **162**, 168
- Pyruvate dehydrogenase complex
  - catalytic and binding properties, role of protein X (bovine kidney), **160**, 715
- Pyruvate dehydrogenase (lipoamide)
  - lipoamidase-mediated lipoate liberation from, analysis (bovine heart), **162**, 658
  - α subunit, nucleotide and deduced amino acid sequence (yeast), **164**, 941
- 6-Pyruvoyl tetrahydropterin reductase
  - hepatic, and cerebral aldose reductase, biochemical and immunological identity (human), **164**, 1130
- 6-Pyruvoyl tetrahydropterin (2′-oxo) reductase
  - role in tetrahydrobiopterin biosynthesis, immunological studies (rat), **165**, 845
- Pz-peptidase
  - and endo-oligopeptidase, identification as same enzyme (rabbit heart), **162**, 1460

Q

- Qinghaosu
  - effect on chloroquine-sensitive and -resistant falciparum malaria, potentiating action of tetrandrine, **165**, 758

R

- R59022
  - effects on inositol phosphate production (NG108-15 cells), **165**, 175
  - potentiation of neutrophil respiratory burst, mediation by elevation of cytosolic Ca^{2+} (human), **161**, 95

- Radiation inactivation analysis
  - mechanism of particulate guanylate cyclase activation by atrial natriuretic peptide (bovine adrenal gland, lung), **158**, 603
- Radioimmunoassay
  - brain natriuretic factor (dog), **158**, 120
  - endothelin in medium from cultured vascular endothelial cells, **160**, 602, 662
  - endotoxin-stimulated endothelin release (bovine endothelial cells, rat serum), **161**, 1220
  - estramustine-binding protein in prostate (human, rat), **165**, 947
  - in identification and characterization of endothelin in plasma and aortic endothelial cell culture medium (human), **161**, 320
  - islet amyloid polypeptide in tissues and plasma (human), **164**, 394
- Radioreceptor assay
  - endogenous inositol 1,4,5-trisphosphate (rat brain), **159**, 976
- Radiosensitivity
  - chromosomal, increase in cells inducibly expressing *Eco* RI restriction endonuclease (CHO 10 cells), **160**, 1079
- Reactive Blue 2
  - and Coomassie Brilliant Blue G, antagonism of P_2 purinergic responses in parotid acinar cells, comparison (rat), **165**, 1279
- Redox systems
  - membrane, superoxide dismutase-facilitated electron transport as model (bovine erythrocytes), **165**, 164
- Reduction
  - 1-methyl-4-phenyl-2,3-dihydropyridinium ions, resulting intermediates, characterization, **158**, 63
  - nitrites by blue copper-containing nitrite reductase, copper–nitrosyl intermediate in, spectroscopic evidence (*Achromobacter cycloclastes*, *Alcaligenes* sp.), **164**, 1366
  - –oxidation, pyrroloquinone quinone, promotion by acid treatment, **163**, 755
- Renin
  - binding protein, biosynthesis, *in vitro* analysis, **164**, 265
  - expression in brain and kidney, reciprocal control by captopril (rat), **159**, 1065
  - human, tissue-specific expression in transgenic mice, **165**, 826
- Renin inhibitors
  - BW-175, nonpeptidic orally active, bioactivity (marmoset, rat), **159**, 999
  - orally active, with phenyllactic acid at P_3, preparation and characterization (marmoset), **160**, 1
  - SQ 32,970, in affinity purification of endothia protease, **161**, 1
- Reoxygenation
  - associated injury in myocardial infarction, mechanism: implications of myoglobin redox cycle (rat), **160**, 1162
- Reperfusion
  - postischemic myocardial, associated hydroxyl radical generation, continuous-flow ESR monitoring with 3,3,5,5-tetramethyl-1-pyrroline-1-oxide spin trap (rat), **164**, 1274
- Resistance
  - lysostaphin endopeptidase, plasmid-encoded, expression in *Staphylococcus simulans* biovar *staphylolyticus*, **160**, 1106
  - multidrug
    - associated human gene, direct activation by anticancer agents (CV-1 cells), **165**, 1415
    - atypical, in CCRF-CEM cells selected for high-level methotrexate resistance, role of P-glycoprotein, **164**, 928; **165**, 1435; *erratum*, **165**, 1445
    - role of Gly→Val substitution at codon 185 of P-glycoprotein encoding *MDR*1 gene (human adrenal gland), **162**, 224
  - verapamil, analysis in medulloblastoma cell line (human), **161**, 1312
- Respiration
  - in electron transport particles and intact mitochondria, inhibition by 1-methyl-4-phenylpyridinium, potentiation by tetraphenylborate (rat), **161**, 809
  - mitochondrial
    - age-associated decline (human liver), **165**, 994
    - associated complex I, tissue-specific defect (human liver, muscle), **160**, 623
    - associated ubiquinone-binding protein in complex III, isolation of encoding nuclear gene (human), **161**, 371
    - multiple defects including complex II in patient with encephalopathy and myopathy, **163**, 695
    - synergistic deleterious effects of micromolar Ca ions and free radicals, localization at cytochrome *c* and salvage trial (guinea pig heart), **163**, 1397
- Respiratory burst
  - neutrophil, potentiation by R59022 and dioctanoylethylene glycol, mediation by elevation of cytosolic Ca^{2+} (human), **161**, 95
- Restriction analysis
  - associated enzyme PvuII, in identification of gene polymorphism in familial lipoprotein lipase deficiency (human), **164**, 1391
  - recombinant DNA, versatile nonradioactive technique, **164**, 1040
- Restriction endonuclease
  - *Eco* RI, increase in chromosomal radiosensitivity of inducibly expressing CHO 10 cells, **160**, 1079
- Reticulocytes
  - occurrence of erythroid cell-specific arachidonate 15-lipoxygenase (human), **160**, 954
- Retina
  - detection of endogenous heparinase activity (bovine), **161**, 604
  - mass spectrometric identification and quantification of 5-methoxytryptophol (quail), **165**, 1331
- Retinoic acid
  - blockade of imidazole-induced tyrosinase expression in B16 melanoma cultures, comparison with triiodothyronine (mouse), **162**, 288
  - cellular binding protein CRABP II
    - distribution (chicken embryo), **164**, 531
    - purification and partial characterization (chicken embryo), **157**, 1302; *erratum*, **159**, 371

  effect on testosterone production by Leydig cells in primary culture (rat), **158**, 400
  induction of
    differentiation in HL-60 cells, inhibition by pertussis toxin, **163**, 797
    night blindness, molecular basis (frog), **161**, 825
  inhibition of phosphatidylinositol turnover in retinoic acid-sensitive and -resistant neuroblastoma cells, analysis (human), **161**, 284
  synergistic effect on epidermal growth factor-induced prostaglandin E_2 release (rat lung cells), **162**, 1515
13-*cis*-Retinoic acid
  and glucarate, synergistic interaction against rat mammary tumor induction and MCF-7 cells, **163**, 1364
  stereospecific suicide inhibition of melanoma thioredoxin reductase (human), **160**, 573
Retinol
  effect on testosterone production by Leydig cells in primary culture (rat), **158**, 400
Retinol dehydrogenase
  ocular, inhibition by retinoic acid, role in night blindness (frog), **161**, 825
trans-Retinoyl chloromethane
  in affinity labeling of opsin (bovine retina), **160**, 942
Retroviruses
  conditional vectors, mouse mammary tumor virus-based, construction and characterization of packaging cell line (feline kidney), **159**, 1191
  infected cells, detection of NH_2-terminal myristoylated proteins by antibodies to NH_2-terminal myristoyl glycine, **162**, 724
  murine, enzymatically active reverse transcriptase, expression in human cells, **158**, 595
  recombinant vector containing interleukin-3 genes, multicopy introduction and high-level expression by superinfection (ψ2, NIH/3T3 cells), **158**, 576
Reverse transcriptase, *see* RNA-directed DNA polymerase
Rhodopsin
  immobilized delipidated, binding of G proteins (bovine brain, retina), **162**, 544
β-Riboadenylate
  binding to complementary oligo-α-thymidylate, thermodynamic parameters, **162**, 505
Riboflavin
  enhancement of sodium chromate(VI)-induced DNA single-strand breaks: electron spin resonance study (V-79 cells), **159**, 1080
  photosensitized production of Desferal free radical, amplification by superoxide dismutase, **160**, 1055
Ribonuclease H
  in mapping of insulin receptor mRNA: analysis of heterogenity (human, rat), **159**, 664
Ribonuclease inhibitor
  human placental, expression in *Escherichia coli*, **160**, 115
Ribonucleoproteins
  p120, phosphorylation in subcellular fractions, enhancement by specific EBV/C3dR ligands (Raji cells), **159**, 1213
Ribonucleotide reductase
  enhancement by phorbol ester in BALB/c 3T3 fibroblasts, analysis, **162**, 1417
  inhibition by cisplatin (*Escherichia coli*), **162**, 715
  oxygen-dependent regulation *in vivo*, role in replicon initiation (Ehrlich ascites cells), **163**, 334
Ribosomes
  N-glycosidase activity of ricin, impairment by α-sarcin (brine shrimp), **160**, 857
  S6 protein, phosphorylation by HepG-2 cells in response to insulin, kinetics (human), **161**, 797
  13-kDa-type acidic protein family, identification of protein A1 as fourth member (yeast), **161**, 1001
Ribozymes
  regulation of prokaryote gene expression, analysis, **162**, 1025
Ricin
  N-glycosidase activity on ribosomes, impairment by α-sarcin (brine shrimp), **160**, 857
RNA
  antisense, in identification of genomic clone for 5′ region of murine β-glucuronidase, **160**, 937
  double-stranded, mismatched, inhibition of HIV-1 proviral DNA synthesis and RNA accumulation (H9 cells), **158**, 943
  5S, genes containing insertions, transcription and assembly of preinitiation complexes (frog), **162**, 639
  messenger
    α-1-acid glycoprotein, apolipoproteins B and E, and β-actin, levels after injection of murine recombinant tumor necrosis factor (rat liver), **161**, 81
    acidic fibroblast growth factor, detection in ovary with reverse transcription–polymerase chain reaction amplification (rat), **165**, 82
    adenosylmethionine decarboxylase, cell content and translational efficiency, polyamine-mediated control (bovine), **160**, 1196
    adrenocortical cytochromes $P450_{scc}$, $P450_{11\beta}$, $P450_{17\alpha}$, $P450_{C21}$, and adrenodoxin, stability, effects of ACTH (bovine), **160**, 1227
    albumin, self-complementary regions, correlation with encoded structural regions of albumin protein (human), **163**, 466
    γ-aminolevulinate synthase, stability, regulation by hemin (chicken embryonic liver), **162**, 102
    amyloid β-protein precursor
      and enkephalin precursor in testicular peritubular cells, modulatory effects of phorbol ester (rat), **161**, 568
      tissue-specific expression: enhancement of protease inhibitor-harboring types in Alzheimer's disease brain (human), **165**, 1406
    apolipoprotein B, increase in liver of ventromedial hypothalamus-lesioned obese rat, **163**, 1107
    associated proteins in herpes simplex virus-infected cells, structure (human), **164**, 355
    atrial natriuretic factor
      endothelin-stimulated accumulation in cultured cardiocytes (rat), **164**, 1431

  levels in heart during ontogenetic development, analysis (human), **159**, 777
- blood–brain barrier glucose transporter, increased levels in diabetes mellitus (rat), **164**, 375
- brown adipose tissue uncoupling protein: use of one of two polyadenylation signals (rabbit), **161**, 156
- calcitonin, elevated levels, association with medullary thyroid carcinoma development (rat), **159**, 528
- catechol-*O*-methyltransferase, isolation (rat liver), **158**, 776
- CD11c subunit of leukocyte adherence receptors in hematopoietic cells, expression analysis (human), **160**, 346
- c-*fos*
  - cellular levels, transient increase after addition of serum and cycloheximide to culture (3Y1 fibroblasts), **159**, 501
  - induction in lymphoma Nb-2 cells (rat), **165**, 1359
- complementary to angiotensin II (+)mRNA, encoded peptide, identification as angiotensin receptor antagonist (human), **160**, 1387
- cytochrome b_5, partially processed, sequencing (human liver), **163**, 18
- cytoskeletal beaded-chain filament proteins, translation *in vitro* (chicken lens), **163**, 589
- endothelin, expression by vascular endothelial cells, stimulation by transforming growth factor β (pig), **159**, 1435
- estrogen receptor and epidermal growth factor receptor, modulation by phorbol ester in MCF-7 breast cancer cells (human), **162**, 415
- fatty-acid synthase, structure: identification of two NADPH binding sites (mouse), **158**, 690
- glucose transporter, myotubular, regulation by monokines (L6 cells), **165**, 429
- γ-glutamyl transpeptidase, expression of different types in liver and kidney (human), **164**, 912
- growth hormone receptor, identification and tissue distribution (rabbit), **158**, 141
- GTP-binding regulatory
  - levels during adipocyte differentiation (3T3-L1 cells), **165**, 929
  - *smg*-p25A, tissue-specific expression and increase by nerve growth factor and cAMP (PC-12 cells), **158**, 377
- hepatic antiproliferative, hybridizing cDNA, isolation (rat), **164**, 1316
- hepatocyte growth factor, increase in nonparenchymal liver cells after treatment with hepatotoxins (rat), **165**, 1229
- human B-cell stimulatory factor 2, deletion of 3′ untranslated region, induction of mRNA stabilization and high-level expression in NIH 3T3 cells, **163**, 1056
- 3-hydroxy-3-methylglutaryl-CoA reductase, sterol-mediated suppression in cultured cells, role of protein synthesis (hamster), **161**, 267
- inositol phospholipid-specific phospholipase C types I–IV, tissue- and cell-type-specific expression (rat), **164**, 406
- insulin-like growth factor I
  - reduction during malnourished state by infusion of human IGF-I (rat liver), **160**, 795
  - splicing variants, expression and stability (GH_3 cells), **162**, 1174
- insulin-like growth factor-binding protein IGF-BP3, tissue distribution (rat), **165**, 907
- insulin receptor
  - alternative splicing (human), **159**, 312
  - analysis of heterogenity by ribonuclease H mapping (human, rat), **159**, 664
  - hepatoma cell levels, effects of glucose concentration (human), **160**, 1415
- interleukin 6, start sites (human umbilical vein), **159**, 991
- β-Malay globin, abnormal processing, role in associated β-thalassemia (human), **163**, 8
- β-microseminoprotein, demonstration in nongenital tissues (human), **164**, 1310
- microsomal heme oxygenase, induction by heat shock (Hep 3B cells), **165**, 437
- Mn- and Cu,Zn-containing superoxide dismutases, correlation with degree of hepatoma differentiation (rat), **165**, 581
- murine homolog of Alzheimer's disease amyloid β protein precursor, structure and expression of alternatively spliced forms, **158**, 906
- mutant vasopressin, differential polyadenylation during development (rat), **158**, 555
- peptidyl-glycine α-amidating monooxygenase, ontogenetic expression in pancreas (rat), **158**, 244
- phospholipase A_2
  - interleukin-1β-stimulated synthesis in articular chondrocytes (rabbit), **164**, 488
  - levels in chondrocytes, effects of recombinant interleukin 1β (rabbit), **165**, 1079
- phospho*enol*pyruvate carboxykinase, content in renal proximal tubule cells, effect of ochratoxin A (rat), **162**, 916
- precursor with trimethylguanosine cap structure, efficient splicing *in vitro*, **162**, 977
- pregnancy-specific β1-glycoprotein, structure (HL-60 cells), **163**, 1021
- protein kinase C isozymes PKCα and nPKCε, down-regulation upon *in vitro* differentiation (murine neuroblastoma cells), **165**, 533
- renin, tissue distribution after captopril treatment: reciprocal control in brain and kidney (rat), **159**, 1065
- ribonucleotide reductase M1 and M2 components, effects of phobol ester in BALB/c 3T3 fibroblasts, **162**, 1417
- substance K receptor, molecular characterization (rat), **165**, 695
- α3 subunit of rat brain Na^+,K^+-ATPase, expression after injection into frog oocytes, **163**, 102
- thrombospondin, levels in vascular smooth muscle cells, effect of heparin (human), **162**, 1100
- transmembrane secretory component, expression in tissues (human), **158**, 783

    - tumor necrosis factor-α, unchanged levels during cyclosporin A inhibition of TNF production (murine macrophages), **161**, 551
    - urokinase, expression in aortic endothelial cells, effects of propranolol (bovine), **160**, 977
  - poly(A)$^+$, isolation of appreciable amounts from circulating platelets (human), **160**, 705
  - sperm nuclear, localization (rat testis), **158**, 272
  - 35 S, cauliflower mosaic virus, promotor region, function of hexameric sequence (sunflower cells), **164**, 387
  - transfer
    - Asp, role of discriminator base in amino acid acceptor activity (*Escherichia coli*), **163**, 1534
    - bound proline, specific activity in cultured osteoblast-like cells, alteration by parathyroid hormone (mouse), **161**, 994
    - hepatic, interaction with [^{35}S]methionine *in vivo*
      - analysis in rat, **163**, 255
      - effects of chemical carcinogens and partial hepatectomy (rat), **163**, 1412
    - leucyl, isoacceptor, aminoacylation, functional significance of aminoacyl-tRNA synthetase complex (rat liver), **163**, 513
    - ribonucleolytic activity of human angiogenin, characterization (yeast), **161**, 121

- RNA-directed DNA polymerase
  - enzymatically active murine retroviral, expression in human cells, **158**, 595
  - HIV-1-associated
    - and murine leukemia virus, inhibition by 5,6,7-trihydroxyflavone, **160**, 982
    - and selected human polymerases, effects of carbovir and AZT triphosphates and dideoxynucleoside triphosphates, comparison (human), **161**, 393
  - Moloney murine leukemia virus, inhibition by α-anomeric oligonucleotides, **161**, 1184
- RNA polymerase
  - σ subunit, DNAse I footprint (*Escherichia coli*), **160**, 121
  - type II
    - derived peptide, phosphorylation by protein kinase, inhibition by 5,6-dichloro-1-β-D-ribofuranosylbenzimidazole (HeLa cells), **159**, 508
    - transcription complexes, destabilization by ATP or GTP, **162**, 1133
- RNA synthesis
  - increase in mitochondria irradiated with helium–neon laser (rat liver), **163**, 1428
  - minute amounts from several regions of bacteriophage mu DNA during lysogenic state (*Escherichia coli*), **165**, 512
- RO 5-4864
  - effect on inhibition of platelet-activating factor-induced platelet aggregation by hetrazepine WEB2086 (rabbit), **160**, 263
- RO 15-1788
  - effect on inhibition of platelet-activating factor-induced platelet aggregation by hetrazepine WEB2086 (rabbit), **160**, 263
- Rose bengal
  - photosensitized production of Desferal free radical, amplification by superoxide dismutase, **160**, 1055
- RP 53801
  - selective inhibition of tyrosine protein kinase in RSV-transformed cells (quail), **165**, 1324
- RU 44403
  - radiolabeled, binding with renal angiotensin I-converting enzyme, role of chloride: evidence for single active site (human), **163**, 718

S

- *Saccharomyces cerevisiae*
  - fluconazole resistance, role of defective sterol C5-6 desaturation, **164**, 1170
  - intact, transformation procedure with electroporation, **164**, 1157
  - lipopeptide *a*-mating factor, total synthesis, **162**, 253
  - *lys2* and *lys5* mutants, revertant enzyme properties, **161**, 182
  - NADPH-cytochrome P450 reductase gene disruption, induction of increase in sensitivity to ketoconazole, **160**, 1257
  - nuclear and mitochondrial rDNA transcription, stringent regulation, analysis, **164**, 362
  - phosphate/water oxygen exchange by inorganic pyrophosphatase, pathways, **161**, 475
  - sexual response: mating factor-induced alteration of enzyme activity in glyoxalase system, **165**, 1091
  - solubilization and activity in water-in-oil microemulsions, **161**, 1244
- Salicylaldehyde
  - in formation of Schiff base copper(II) chelate, evaluation as tool for intermolecular crosslinking and immobilization of protein, **161**, 52
- Salicylic acid
  - modulation of binding activities of thyroxine-binding globulin and prealbumin in serum, comparison (rat), **159**, 919
  - trapping of hydroxyl radicals in ischemic-reperfused myocardium: radical detection in mitochondria (rat), **165**, 1004
- *Salmonella typhimurium*
  - fatty acid auxotroph fabB2, abortive infection by virulent phage 9NA: effect of fatty acid supplementation, **161**, 923
- Salts
  - lyotropic, stabilization of poliovirus against heat inactivation, **159**, 1177
- Saponins
  - molluscicidal, activating esterase, localization in *Phytolacca dodecandra*, **158**, 436
- Saporin-6
  - conjugated to basic fibroblast growth factor, biological and chemical characterization of resultant mitotoxin (BHK cells), **160**, 917

posins
  forms B and C, and precursors, distribution and developmental changes (human, rat), **165**, 1191
arafotoxin receptors
  functional characterization (rat uterus), **162**, 952
  structure–activity relationships and receptor subtypes (rat cardiac myocytes), **163**, 936
arafotoxins
  and endothelin, competitive interaction: binding and phosphoinositide hydrolysis in rat atria and brain (snake venom), **158**, 195
  immunological and structural characterization, **162**, 1317
  S6b and S6c, displacement of ^{125}I-endothelin bound to rat ventricular membranes, analysis (asp), **161**, 89
  synthetic analogs, effects on vascular endothelin receptor binding activity and cytosolic free Ca^{2+} concentration (rat), **162**, 441
  vasoconstrictor effects in aorta, structure–function relationships (rabbit), **162**, 371
-Sarcin
  impairment of *N*-glycosidase activity of ricin on ribosomes (brine shrimp), **160**, 857
arcolemma
  guanylate cyclase activation, role of atrial natriuretic peptide receptors (rat heart), **162**, 1339
  phosphoinositide phospholipase C activation by cytosolic protein (canine heart), **163**, 567
arcoplasmic reticulum
  arginine-specific ADP-ribosyltransferase solubilized as active form with trypsin, partial purification and characterization (rabbit), **164**, 128
  calcium release, enhancement by phosphatidylinositol 4,5-bisphosphate (guinea pig muscle), **163**, 1487
  Ca^{2+},Mg^{2+}-ATPase N- and C-terminal segments, evidence for cytoplasmic location (rabbit), **161**, 683
Schwann cells
  mitogen for, derivation from myelin basic protein (mouse), **164**, 883
Second messenger system
  realization as morphogenetic field: derivation of gene transcription as hysteretic function of second messenger, **165**, 1267
Secreted phosphoprotein I
  multiple forms, synthesis by normal and transformed bone cells, effects of transforming growth factor β1 (rat), **162**, 1453
  sulfation, association with mineralized tissue formation (rat bone marrow cells), **165**, 234
Secretin
  isolation and primary structure (rat intestine), **160**, 862
Selenazofurin
  induction of depression of cGMP and phosphatidylinositol pathway (L1210 cells), **164**, 869
Selenium
  effect on cisplatin adverse effects on renal mitochondria: glutathione peroxidase impairment in cisplatin toxicity (rat), **159**, 1121
  modulation of peroxidation in absence of glutathione peroxidase (housefly), **165**, 158
Sepharose
  –concanavalin A-immobilized $GABA_A$ receptors, ligand binding characteristics (rat brain), **163**, 611
Serine
  at $P_1{}'$ position in α-proteinase inhibitor, role in interaction with proteinase (human), **159**, 271
Serine proteinase-1
  T-cell, complex formation with and inhibition by human protease nexin-1 (mouse), **161**, 300
Serum, *see also* Blood, Plasma
  autoimmune, detection of autoantibodies against nucleolar protein (human), **163**, 1119
  binding activities of thyroxine-binding globulin and prealbumin, comparison: differential modulation by T_3, T_4, oleic acid, diphenylhydantoin, and salicylate (rat), **159**, 919
  endotoxin-stimulated endothelin release, radioimmunoassay (rat), **161**, 1220
  factors stimulatory for hepatocyte DNA synthesis, enhancement by ethinyl estradiol (rat), **160**, 154
  identification of insulin-like growth factor-binding protein
    in adult rat, **165**, 189
    type I, in diabetic rat, **163**, 882
  induction of transient increase in c-*fos* mRNA levels after addition to 3Y1 cell culture (rat), **159**, 501
  and insulin, differential regulation of distribution of glycosyl-phosphatidylinositol anchored proteins in BC_3H1 myocytes and 3T3-L1 preadipocytes, **164**, 824
  TMP-reactive autoantibodies in systemic lupus erythematosus patients, thymine-dependent oligonucleotide specificity, **161**, 204
Serum albumin
  bovine
    glycation by mannose and fucose *in vitro*, kinetics, **160**, 362
    reversal of ionomycin-promoted hydrogen peroxide production in guinea pig cerebral synaptosomes, **165**, 1104
  production by proalbumin processing in COS-1 cells transfected with rat albumin cDNA, **163**, 194
Shear flow
  induction of prostacyclin production in endothelial cells, mechanism (human umbilical vein), **158**, 31
Shigella toxin
  B subunit, interaction with globotriaosyl ceramide receptor-containing membranes, fluorescence study (*Shigella dysenteria*), **160**, 126
Shock
  cardiogenic, association with marked elevations of immunoreactive endothelin (human), **161**, 562
  heat, *see* Heat shock
Sialic acid
  binding protein, identification as cell cycle-dependent gene product (human), **163**, 506
  incorporation into secreted thyrotropin, effects of primary hypothyroidism (mouse), **159**, 755
  levels in low-density lipoproteins in blood of atherosclerotic patients, correlation with lipid accumulation, **162**, 206

- Sialidase
  - desialylation of low-density lipoproteins, effect on lipid accumulation in cultured aortic intimal cells (human), **162**, 206
  - inhibition by plant flavonoids (murine liver), **163**, 25
- Sialoglycopeptide
  - cell-surface, growth-inhibiting, abrogation of bombesin mitogenic activity (Swiss 3T3 cells), **161**, 468
- Sialoglycoproteins
  - 96-kDa, hepatic lysosomal membrane, encoding cDNA clone, isolation and sequencing (rat), **164**, 1113
- Sialyltransferase
  - partial cDNA, isolation and characterization (human), **164**, 225
- Signal transduction
  - in onset of terminal keratinocyte differentiation induced by 1α,25-dihydroxyvitamin D_3, role of protein kinase C translocation (mouse), **163**, 1517
  - in parietal cells, inhibition by pancreastatin (rabbit), **163**, 667
  - vasopressin and corticotropin-releasing factor in cultured pituitary cells, critical role of protein kinase C (rat), **163**, 1014
- Simian immunodeficiency virus
  - anti-retroviral activity of 2′,3′-didehydro-2′,3′-dideoxy-5-chlorocytidine, analysis (Raji cells), **164**, 1190
- Simian sarcoma virus
  - transformed NRK cells, conditioned medium from, detection of basic fibroblast-like growth factor, **164**, 1323
- Simvastatin
  - tissue selectivity, analysis *in vivo* (rat), **158**, 667
- Skin
  - differential cell activation by platelet activating factor: stimulation of phosphoinositide turnover and arachidonic acid mobilization in keratinocytes and fibroblasts (human), **163**, 1344
- S_6-kinase
  - smooth muscle cell, differential activation by low-density lipoproteins and epidermal growth factor (rat), **159**, 624
- Smooth muscle inhibitory factor
  - active, generation mechanism (bovine retractor penis muscle), **164**, 544
- Sodium
  - –calcium exchanger, role in Ca^{2+} influx in adrenal glomerulosa cells (bovine), **158**, 1005
  - free and bound, in pancreatic beta cells, effects of glucose and tolbutamide (mouse), **164**, 212
  - –glucose cotransporter protein, functional lysyl residues, inhibition by pyrylium salt (rabbit brush border membranes), **163**, 1356
  - –hydrogen antiport
    - activation, role of cAMP, analysis (murine macrophages), **165**, 131
    - blockage, inhibition of fibrinogen binding to platelets (human), **161**, 1228
    - during egg fertilization, effects of protein kinase inhibitors (sea urchin), **161**, 1100
  - –hydrogen exchanger
    - apical and basolateral, in renal epithelial cells, separat regulatory control, **165**, 833
    - in brush border membranes from cortical and medullar proximal tubule, analysis (rabbit kidney), **163**, 269
    - in lymphocyte plasma membrane, role in aldosteron effects on intracellular electrolytes (human), **164**, 961
  - inhibition of protein kinase C phosphorylation of histon H1 (rat), **162**, 45
  - –K–Cl cotransport in vascular endothelial cells, stimulation by atrial natriuretic factor (bovine), **159**, 734
  - –phosphate cotransport in OK cells, inhibition by parathyroid hormone, correlation with generation o second messengers in regulatory cascade, **158**, 951
  - –P_i cotransport in renal brush border membranes, adaptive increase elicited by thyroid hormone, blockage by dexamethasone (rat), **161**, 1160
  - transport
    - associated defect of ouabain-resistant renal Na,K-ATPase (rat), **165**, 360
    - mechanisms, effects of endothelin, role in intracellula Ca^{2+} mobilization (rat aortic smooth muscle cells) **163**, 458
  - uncoupled efflux mediated by reconstituted Na,K-ATPase analysis: electrogenic nature (shark), **160**, 801
- Sodium acetate
  - induced changes in mitochondrial respiration, protectiv effects of carnitine (rat liver), **158**, 181
- Sodium azide
  - effect on ATPase activity of mitochondrial ATPase–AT synthase with mutated β-subunits (yeast), **158**, 392
- Sodium bicarbonate
  - effect on ATPase activity of mitochondrial ATPase–AT synthase with mutated β-subunits (yeast), **158**, 39
- Sodium butyrate
  - induction of insulin receptor and other differentiation markers in Burkitt lymphoma Raji cells, **161**, 101
  - liposome-encapsulated, coupled to anti-Le^x monoclona antibodies, inhibition of colonic cancer cell growth (human), **158**, 202
- Sodium channels
  - ligand- and voltage-gated, role in regulation of lymphocyte membrane electrogenic pump activity (human, mouse rat), **160**, 999
- Sodium chloride
  - concentration in solution, regulation of casein kinase interaction with plasma membrane (rat liver), **160** 633
- Sodium chromate(VI)
  - induced DNA single-strand breaks, enhancement by vitamin B_2: ESR study (V-79 cells), **159**, 1080
- Sodium dodecyl sulfate
  - effect on activation of superoxide radical-generating membrane-bound oxidase in cell-free system (bovine neutrophils), **159**, 783
  - induced conformational and enzymatic changes of multicatalytic proteinase, analysis (ascidian), **162**, 334
- Sodium fluoride
  - stimulation of phospholipase D-like mechanism in pancreatic islet cells (rat), **163**, 922

odium nitroprusside
  inhibition of secretagogue-induced corticotropin release by anterior pituitary cells (rat), **158**, 824
olubilization
  yeast cells in water-in-oil microemulsions, **161**, 1244
omatostatin
  inhibition of
    distinct bombesin receptor-regulated Ca^{2+} mobilizing mechanisms in peptic cells (frog esophagus), **159**, 599
    neuroblastoma cell cAMP production, role of pertussis toxin, **161**, 1144
  interaction with activin A, effect on FSH secretion (rat pituitary), **162**, 958
omatostatin-28
  generating metallo-endoprotease from brain cytosol, characterization (rat), **160**, 968
omatostatin receptors
  developmental change and molecular properties in cerebral cortex (rat), **160**, 72
omatotropin
  cDNA, cloning and sequence analysis (grass carp), **161**, 1239
  crossreaction with antibodies to murine 13- to 18-kDa pituitary peptides (human), **163**, 386
  induced alteration of morphology and tubulin expression in murine 3T3 preadipose cells, analysis (bovine, human), **163**, 895
  stimulation of osteoblast release of insulin-like growth factor carrier proteins, analysis (rat), **160**, 788
omatotropin receptors
  mRNA, identification and tissue distribution (rabbit), **158**, 141
  and prolactin, erythropoietin, and interleukin-6 receptors, and p75 interleukin-2 receptor β-chain, common binding domain, analysis, **164**, 788
Spectrin
  binding domains of globin, analysis (human erythrocytes), **164**, 894
  calcium-induced cleavage and breakdown (rat lens), **162**, 1472
Spectrophotometry
  continuous, in assay for retroviral proteases of HIV-1 and avian myeloblastosis virus, description, **163**, 1079
Spectroscopy
  Mössbauer, oxidized and semi-reduced states of iron–molybdenum cofactor of nitrogenase (*Azotobacter vinelandii*), **162**, 882
  nuclear Overhauser enhancement
    in estimation of interproton distances of macromolecular systems: quadratic approach, **159**, 886
    with rotating frame, in oligosaccharide sequence determination, analysis, **159**, 618
  optical
    absorption, in analysis of glass transition of deoxymyoglobin (horse), **160**, 948
    myoglobin metastable form generated by reconstitution (sperm whale), **161**, 290
  proton-induced X-ray emission, in metal composition analysis of hydrogenase (*Thiocapsa roseopersicina*), **162**, 422
  Raman
    surface enhanced, conformational analysis of chromophores of phycocyanin and related chromopeptides (*Synechococcus* 6301), **159**, 1227
    unique low-frequency band associated with metal binding to metallothionein (*Neurospora crassa*, rabbit liver), **163**, 1093
Spermatozoa
  acrosome reaction, inducing activity in preovulatory ovarian follicular fluid, purification and identification (human), **160**, 828
  epididymal
    capacitation, associated membrane potential polarity change (mouse), **165**, 58
    cauda, surface major maturational glycoprotein, linkage to membrane via phosphatidylinositol (rat), **160**, 460
    identification of membrane antigens (goat), **162**, 550
  high buoyant density, association with immunodetectable galactosyltransferase (human), **162**, 184
  membrane phospholipids, peroxidation mechanisms (boar), **158**, 769
  nuclear RNA localization (rat), **158**, 272
  proton pump, coupling with superoxide radical–superoxidase dismutase system during maturation and role in sperm motility (human, rat), **161**, 771
Spermidine
  induction of ornithine carbamoyltransferase precursor transfer into hepatic mitochondria (rat), **158**, 287
  levels during oogenesis, role in oocyte competence to meiotic resumption (frog), **158**, 520
  regulation of adenosylmethionine decarboxylase mRNA cell content and translational efficiency (bovine), **160**, 1196
  selective alteration in colon carcinoma cells, modulation of expression of growth genes (human), **165**, 384
Spermine
  induction of ornithine carbamoyltransferase precursor transfer into hepatic mitochondria (rat), **158**, 287
  inhibition of adriamycin binding to inner mitochondrial membrane (bovine heart), **159**, 791
  levels during oogenesis, role in oocyte competence to meiotic resumption (frog), **158**, 520
  selective alteration in colon carcinoma cells, modulation of expression of growth genes (human), **165**, 384
Sphinganine
  effect on leukotriene B_4 receptors (human neutrophils), **163**, 1456
Sphingolipid hydrolase
  activator proteins and precursors, distribution and developmental changes (human, rat), **165**, 1191
Sphingosine
  inhibition of protein kinase C, correlation with presence of positive charge, **164**, 102
Sphingosine:*N*-methyltransferase
  role in synthesis of *N*,*N*-dimethylsphingosine (murine brain), **164**, 1411

- Spleen
  - endothelin distribution, clearance, and vascular effects (pig), **161**, 647
  - ferritin synthesis, translational regulation, effects of iron and inflammation (rat), **160**, 453
- Sputum
  - sol phases, elastase- and chymotrypsin-like activity in chronic bronchitis patients, inhibition by MR 889 (human), **165**, 568
- SQ 32,970
  - in affinity purification of endothia protease, **161**, 1
- *Staphylococcus aureus* neutral proteinase
  - fibrin-specific fibrinolysis, role of α_2-plasmin inhibitor, **162**, 830
- *Staphylococcus simulans*
  - biovar. *staphylolyticus*, plasmid-encoded lysostaphin endopeptidase resistance, analysis, **160**, 1106
- Staphylokinase, *see Staphylococcus aureus* neutral proteinase
- Staurosporin
  - effect on neutrophil receptors for leukotriene B_4 (human), **163**, 1456
- Staurosporine
  - attenuation of Ca^{2+}-dependent stretch-induced vascular tone (rabbit), **158**, 58
  - and H-7 and UCN-01, comparative effects on phorbol ester-induced CD4 down-regulation and augmentation of HIV replication (human T cells), **164**, 339
  - inhibition of arterial smooth muscle cell proliferation (rabbit), **158**, 105
- Stem cells
  - differentiation, control by incubation temperature: isolation of embryonal carcinoma mutants with temperature-sensitive cell growth (mouse), **165**, 65
  - hematopoietic, production, enhancement by continuous interleukin-6 perfusion (mouse), **159**, 933
- Steroidogenesis
  - analysis after release of aminoglutethimide blockade in cultured glial cells (rat), **161**, 917
- Steroid receptors
  - interaction with DNA-like structure of heat shock protein hsp 90 revealed by cDNA-derived amino acid sequence (chicken), **159**, 140
  - TR2-9 and TR2-11, molecular cloning: multiple ligand-binding domains (human prostate, testis), **165**, 735
- Steroid 5α-reductase
  - microsomal, role of NADPH-cytochrome P450 reductase (rat liver), **165**, 590
- Steroids
  - effects on phosphorylation of oviduct progesterone receptor, analysis (chicken), **164**, 295
  - inhibition of vincristine binding to multidrug resistance-related P-glycoprotein (K562 cells), **158**, 1066
- Sterols
  - biosynthesis, impaired mutant plant regenerated from tobacco callus resistant to triazole cytochrome P450-obtusifoliol-14-demethylase inhibitor, biochemical characterization, **165**, 125
  - C5-6 desaturation, defective, role in resistance to azole antifungals (yeast), **164**, 1170
- *Stigmatella aurantiaca*
  - detection of membrane-associated GTP-binding protein, **158**, 562
- Streptokinase
  - site-specific alteration of Gly-24, effect on plasminogen activation, **165**, 1085
- Stress
  - shear, stimulation of endothelin production by cultured endothelial cells (porcine aorta), **161**, 859
- Styrene
  - –glutathione adducts, peroxidase-catalyzed formation, production of singlet oxygen from, **159**, 1051
- Submandibular gland
  - isolated acini, introduction of cAMP phosphodiesterase, effects on isoproterenol stimulation of cAMP levels and mucin secretion (rat), **161**, 661
- Substance K receptors
  - and mRNAs, molecular characterization (rat), **165**, 695
- Substance P
  - priming of neutrophil activation, role in neurological regulation of inflammation (human), **161**, 520
  - stimulation of protein kinase C translocation in microvessels (bovine brain), **164**, 595
- Substrates
  - alternative, in kinetic distinction between rapid-equilibrium random and abortive ordered enzyme mechanisms, **152**, 406; *erratum*, **159**, 368
- Subtilisin
  - stability, modification by introduction of disulfide bridges and prolines, **160**, 109
- Succinate
  - effect on rate of electron transfer of adrenodoxin–adrenodoxin reductase system in mitochondria (bovine adrenal cortex), **162**, 168
- Succinate dehydrogenase (ubiquinone)
  - severe deficiency in patient with encephalopathy and myopathy, **163**, 695
- Sucrose
  - prevention of diabetes-like action of fasting on sarcoplasmic reticulum Ca^{2+}-pump ATPase and myosin isoenzymes (rat), **164**, 319
- Sugars
  - dolichol-linked, synthesis site in mitochondria, in characterization of submitochondrial compartments (mouse), **164**, 1009
- Sulfation
  - post-translational, poliovirus proteins, analysis (HeLa cells), **158**, 263
  - secreted phosphoprotein I, association with mineralized tissue formation (rat bone marrow cells), **165**, 234
  - secreted thyrotropin, effects of primary hypothyroidism (mouse), **159**, 755
- Sulfhydryl groups
  - free, serum cholinesterase, labeling by *S*-mercuric-*N*-dansylcysteine (human), **158**, 503
  - role in generation mechanism of active smooth muscle inhibitory factor (bovine retractor penis muscle), **164**, 544
- Sulfhydryl reducing agents
  - promotion of neutrophil adherence to bovine and human

- endothelial cells without increase of CD11b/CD18 surface expression (human), **165**, 51

ulfogalactosylsphingosine, *see* Lysosulfatide

uperoxide dismutase
- amplification of dye-photosensitized Desferal free radical production, **160**, 1055
- Cu,Zn-containing
  - crystallographic characterization and 3-D model (yeast), **160**, 677
  - endocytosis by hepatocytes: electron microscopy of protein–gold adducts (rat), **162**, 940
  - facilitation of electron transfer, role in membrane redox systems (bovine erythrocytes), **165**, 164
- expression changes as function of age and dietary restriction (rat liver), **164**, 620
- Mn-containing, induction by tumor necrosis factor in breast cancer MCF-7 cell line and TNF-resistant variant, comparison (human), **162**, 794
- mRNAs, correlation with degree of hepatoma differentiation (rat), **165**, 581
- role in intracellular copper transport in cultured hepatoma cells, **164**, 134
- –superoxide radical system, coupling with proton pump in maturing spermatozoa, role in sperm motility (human, rat), **161**, 771

Superoxide radicals
- analysis in ovary and uterus during early pregnancy: role in blastocyst implantation (mouse), **161**, 762
- direct scavenging by captopril, analysis, **158**, 52
- generation
  - effect of extracellular ATP (human neutrophils), **162**, 377
  - from hydrogen peroxide and glycylglycyl-L-histidine nickel(II) complex, ESR spectroscopic analysis, **159**, 445
  - by membrane-bound oxidase, parameters of activation in cell-free system (bovine neutrophils), **159**, 783
  - in microsomes, effects of interferon inducers, detection by lucigenin chemiluminescence (rat liver), **161**, 1042
  - in plasma membrane, relationship to leukotoxin biosynthesis (porcine neutrophils), **161**, 1077
  - platelet-activating factor-induced, dissociation from intracellular Ca^{2+} mobilization and degranulation: evidence for different eosinophil PAF receptors (guinea pig), **162**, 511
- and hydrogen peroxide, generated in xanthine/xanthine oxidase system, reactions of chloroperoxidase with, **159**, 1086
- release by stimulated neutrophils, association with phosphorylation of 47- and 49-kDa proteins (guinea pig), **158**, 1029
- –superoxidase dismutase system, coupling with proton pump in maturing spermatozoa, role in sperm motility (human, rat), **161**, 771

Surfactants
- supramolecular, for disruption of lipid membranes, characterization, **159**, 566

Swainsonine
- and other oligosaccharide-processing inhibitors, differential effects on thyrotropin secretion from dispersed pituitary cells (rat), **165**, 788

Synaptosomes
- caffeine-sensitive calcium stores, role as cytosolic buffering system for calcium loads (rat brain), **161**, 965
- hydrogen peroxide production, ionomycin-promoted, reversibility (guinea pig brain), **165**, 1104
- membrane taipoxin-binding protein, identification by affinity labeling (guinea pig brain), **165**, 689
- membrane vesicles, ATP-dependent H^+ transport, analysis (rat brain), **159**, 1045

Synenkephalin
- containing endogenous peptides, association with adrenal medulla intracellular membranes (bovine), **158**, 790

Synexin
- related activity of calcium-binding protein, characterization (human platelets), **159**, 236

Synovial fluid
- knee joint, extracellular appearance of calpain and calpastatin, comparison between rheumatoid arthritic and healthy subjects, **162**, 559

Systemic lupus erythematosus
- derived circulating nucleoprotein, induced monoclonal anti-DNA antibody, binding to DNA on membrane receptors (human), **159**, 1441
- serum TMP-reactive autoantibodies, thymine-dependent oligonucleotide specificity (human), **161**, 204

T

Tacrine
- induced morphological alterations in erythrocyte membranes, analysis (human), **163**, 1351

Taipoxin
- binding protein on guinea pig synaptic membranes, identification by affinity labeling (taipan venom), **165**, 689

Taste compounds
- bitter, salty, sour, and sweet, effects on oleate monolayer dynamic behavior at air–water interface, **160**, 699

Taurocholic acid
- accumulation by human, porcine, and rat hepatocytes, comparison, **162**, 619

Teleocidin
- effect on Ca^{2+}-induced fusion of liposomes (bovine brain), **165**, 1256

Temperature
- dependence of plasma membrane physical state, analysis (MDCK cells), **162**, 1004
- effects on amine oxidase activity (bovine serum), **163**, 1168
- incubation, induced control of stem cell differentiation: isolation of embryonal carcinoma cell mutants with temperature-sensitive growth (mouse), **165**, 65

Teniposide
- and heat shock, comparative effects on histone methylation patterns (fruit fly), **162**, 1037

Terminal deoxynucleotidyltransferase, *see* DNA nucleotidylexotransferase
Testis
  peritubular cells, abundance of amyloid β-protein precursor mRNA and enkephalin precursor mRNA, phorbol ester effects (rat), **161**, 568
  post-meiotic gene expression of *Zfy*, detection by genomic clone of *Zfy-1* from Y^{DOM} strain (mouse), **165**, 1286
Testosterone
  binding microsomal cytochromes P450, iron spin state, age-related changes (rat liver), **158**, 480
  production in Leydig cells in primary culture, effects of retinol and retinoic acid (rat), **158**, 400
Testosterone 16α-hydroxylase
  substrate specificity, modification by point mutation at threonine-301 (rabbit hepatic microsomes), **158**, 717
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin, *see* Dioxin
12-*O*-Tetradecanoylphorbol-13-acetate
  desensitization of endothelial cell inositol phosphate production, role of protein kinase C (human umbilical vein), **161**, 1064
  effects on
    Ca^{2+}-induced fusion of liposomes (bovine brain), **165**, 1256
    phospholipase D in monocytes and peripheral blood lymphocytes, comparison (human), **162**, 788
    ribonucleotide reductase M1 and M2 components in BALB/c 3T3 fibroblasts, **162**, 1417
  induction of
    CD4 down-regulation and augmentation of HIV replication, effects of protein kinase C inhibitors (human T cells), **164**, 339
    differential membrane association of protein kinase C subspecies (human platelets), **161**, 556
    force development in myometrium, effect of pregnancy (rat), **158**, 302
    phospholipase C activity in cultured cells, inhibition by antiviral and antitumoral xanthate compound (hamster, human), **162**, 198
    plasminogen activator in transformed fetal bovine aortic endothelial cells, role of protein kinase C, **160**, 682
    protein kinase C depletion, correlation with tumor promotion (JB6 epidermal cells), **165**, 981
    retention of specific protein kinase C isozymes (BC3H-1 myocytes), **161**, 327
    thromboxane A_2 receptor expression (HEL, K562 cells), **158**, 958
  modulation of
    amyloid β-protein precursor and enkephalin precursor mRNAs in testicular peritubular cells (rat), **161**, 568
    estrogen receptor and epidermal growth factor receptor mRNAs in MCF-7 breast cancer cells (human), **162**, 415
  and other carcinogens, *in vitro* transformation of epithelial cells: evidence for consistent oncogene methylation changes (rat), **164**, 693
  stimulation of
    cerebral cortex capillary endothelial cell growth *in vitro* (bovine), **158**, 584
    phospholipase D-like mechanism in pancreatic islet cells (rat), **163**, 922
    protein kinase C-mediated troponin phosphorylation in isolated myocytes (rat), **162**, 1105
Tetrahydrobiopterin
  biosynthesis, role of 6-pyruvoyl tetrahydropterin (2′-oxo) reductase, immunological studies (rat), **165**, 845
Δ-9-Tetrahydrocannabinol
  alteration of hepatic microsomal function and protooncogene expression (rat), **160**, 217
1,2,3,4-Tetrahydroisoquinoline
  inhibition of complex I of mitochondrial electron transport system (murine brain), **162**, 1541
  N-methylation by *N*-methyltransferase (human brain), **161**, 1213
3,4,3′,5′-Tetrahydroxy-*trans*-stilbene, *see* Piceatannol
3,3,5,5-Tetramethyl-1-pyrroline-1-oxide
  as spin trap in continuous-flow ESR monitoring of hydroxyl radical generation in ischemic and reperfused myocardium (rat), **164**, 1274
Tetrandrine
  with chloroquine or qinghaosu, potentiating action against chloroquine-sensitive and -resistant falciparum malaria, **165**, 758
  selective antimalarial activity against chloroquine-resistant *Plasmodium falciparum*, **159**, 242
Tetranectin
  plasma, kringle-4-binding, binding of apolipoprotein(a) and plasminogen, functional analogy, **161**, 427
Tetraphenylborate
  potentiation of 1-methyl-4-phenylpyridinium-induced respiratory inhibition in electron transport particles and intact mitochondria (rat), **161**, 809
Tetraphenylboron
  enhancement of 1-methyl-4-phenylpyridinium ion interaction with mitochondria (rat liver), **159**, 983
β-Thalassemia
  role of abnormal β-Malay globin mRNA processing (human), **163**, 8
$β^0$-Thalassemia/HbE
  molecular basis (human), **162**, 846; *erratum*, **163**, 1540
Thermal transitions
  thylakoid membranes, reversibility (cucumber, pea), **158**, 11
Thermogenesis
  central activation by interleukins 1β and 1α (rat), **162**, 591
7-Thia-8-oxoguanosine
  stimulation of phosphoinositide signaling pathway in B lymphocytes (mouse), **163**, 1306
Thimerosal
  induction of platelet aggregation, role of $[Ca^{2+}]_i$ mobilization and secondary prostaglandin endoperoxide formation (human), **159**, 961
Thioamides
  cyclic enkephalin pseudopeptides with, biological activities, **162**, 1126
Thiocolchicine
  association with tubulin, quantitative analysis (bovine brain), **161**, 544

hioether linkages
  to cysteine, demonstration in prenylated proteins (CHO cells), **163**, 143
hiol aminopeptidase
  associated activity of bleomycin hydrolase, analysis: unique responses to magnesium ion, sodium chloride, and metal-chelating agents (rabbit liver), **163**, 788
hiol protease inhibitors
  E-64d, inhibition of calpain in intact platelets (human), **158**, 432
hiols
  and Cu^{2+}, single-strand cleavage of plasmid DNA, **162**, 1111
  –Cu(II) system, apparent sequence preference in cleavage of linear B-DNA (bovine), **165**, 1235
hioproline, *see* Timonacic
hioredoxin reductase
  EF-hands calcium binding, effect on cellular redox status (human keratinocytes), **162**, 1311
  stereospecific suicide inhibition by 13-*cis*-retinoic acid (human melanoma), **160**, 573
hiourea
  reversal of platinated DNA adducts, mechanism, analysis with platinated GMP, **161**, 819
hiyl radicals
  attack on polyunsaturated fatty acids, role in lipid peroxidation, **161**, 113
  glutathione-derived, reactions with vitamin A, polyunsaturated fatty acids, and vitamin C, comparison, **161**, 1199
hreonine
  in position 301 of cytochromes P450, point mutations, modification of substrate specificities of laurate (ω-1)-hydroxylase and testosterone 16α-hydroxylase (rabbit liver), **158**, 717
  Thr246→Gly mutation in L-lactate dehydrogenase, effect on specificity (*Bacillus stearothermophilus*), **161**, 59
hrombin
  effects on
    calcium channel activation (human platelets), **162**, 24
    cytosolic calcium and phosphoinositide levels in osteoblastic cells (human), **164**, 119
  induced platelet adhesion to endothelium, modification by endothelial-derived relaxing factor (rat, sheep), **159**, 349
  stimulation of endothelial cells, subsequent desensitization of inositol phosphate production, role of protein kinase C (human umbilical vein), **161**, 1064
γ-Thrombin
  induced arachidonic acid release in platelets, inhibition by cGMP analogs (human), **165**, 708
Thrombin receptors
  mediation of aggregin cleavage during thrombin-induced platelet aggregation (human), **162**, 1017
β-Thromboglobulin
  cleavage product formed in cultures of stimulated mononuclear cells, activation of neutrophils (human), **159**, 969
Thrombolamban
  identification as cAMP-dependent protein kinase substrate and interaction with Ca^{2+}-ATPase (human), **159**, 644
Thromboplastin
  endothelial cell-associated, inducing protein derived from J82 human bladder carcinoma cells, identification and partial purification (human umbilical vein), **160**, 222
Thrombospondin
  mRNA levels in vascular smooth muscle cells, effect of heparin (human), **162**, 1100
  stimulation of fibroblast proliferation (human), **163**, 56
Thromboxane A_2
  role in
    direct activation of glycogenolysis (rat hepatocytes), **163**, 1235
    endothelin-induced Ca^{2+} mobilization in cultured vascular smooth muscle cells (rabbit, rat), **160**, 751
Thromboxane A_2 receptors
  endothelial cell, biochemical characterization and functional implications (bovine pulmonary artery), **158**, 326
  expression in cultured erythroleukemia cells, induction by phorbol ester (human), **158**, 958
  isoelectric and mass characterization (human platelets), **163**, 183
Thromboxane B_2
  in liposomes, suppression of primary immune response to liposomal antigens (rabbit), **160**, 565
Thymidine
  specific counterbalancing of stem cell differentiation-inducing nucleoside analogs of DNA synthesis inhibitors (F9 teratocarcinoma cells), **163**, 1290
Thymidine kinase
  activity in A549 lung cancer cells, effects of acivicin and cisplatin combination (human), **161**, 31
Thymidylate synthase
  activity in A549 lung cancer cells, effects of acivicin and cisplatin combination (human), **161**, 31
  fluorouracil-induced inhibition, effects of interferon α2 (HL-60 cells), **163**, 867
Thymine
  dependent oligonucleotide specificity in TMP-reactive autoantibodies in systemic lupus erythematosis sera, demonstration (human), **161**, 204
Thymocytes
  glucocorticoid-sensitive, killing by dioxin after *in vivo* exposure (rat), **160**, 1003
  phospholipase A_2 activity, inhibition in dexamethasone-treated mice, implication for role of lipocortins, **159**, 53
Thyroglobulin
  gene promoter protein-binding domains, analysis (rat), **163**, 481
  gene promoter region, cAMP-dependent binding of thyroid *trans*-acting factor (bovine, dog), **160**, 722
Thyroid
  FRTL5 cells, agonist properties of A_1 adenosine receptor antagonist 1,3-dipropyl-8-cyclopentylxanthine (rat), **159**, 355

  trans-acting factor, cAMP-dependent binding to thyroglobulin promoter region (bovine, dog), **160**, 722

Thyroid-stimulating hormone, *see* Thyrotropin

Thyrotropin
  secreted, sialylation and sulfation, effects of primary hypothyroidism (mouse), **159**, 755
  secretion
    from dispersed pituitary cells, differential effects of oligosaccharide-processing inhibitors (rat), **165**, 788
    immediate high-amplitude, induction by cell swelling after administration of permeant molecules glycerol or urea (rat pituitary cells), **163**, 471
  stimulation of transcription from ferritin heavy chain promotor (FRTL-5 cells), **165**, 506
  β subunit, role of C-terminal 6-amino-acid extension (human), **165**, 1035

Thyrotropin receptors
  cDNA, cloning, sequencing, and functional expression (human), **165**, 1184
  cloning, sequencing, and expression: evidence for autoantibody binding (human), **165**, 1250

Thyrotropin-releasing hormone
  stimulated prolactin secretion and phosphoinositide metabolism, inhibition by interleukin 1β (rat pituitary cells), **165**, 496

Thyrotropin-releasing hormone receptors
  linked to phosphoinositide hydrolysis, pharmacological characterization (GH_3 cells), **161**, 1306

Thyroxine
  binding to transthyretin, role of transthyretin non-amino acid components and glutathione constituents (human), **158**, 341
  modulation of binding activities of thyroxine-binding globulin and thyroxine-binding prealbumin in serum, comparison (rat), **159**, 919

Tiazofurin
  depression of cGMP and phosphatidylinositol pathway (L1210 cells), **164**, 869

Tibric acid
  acyl-coenzyme A thioester, potentiation of diacylglycerol-activated protein kinase C (rat brain, liver), **159**, 1026

Timonacic
  macrophage-mediated *N*-nitrosation, characterization (mouse), **159**, 373

Tissue factor, *see* Thromboplastin

TMP (thymidine 5′-monophosphate)
  reactive autoantibodies in systemic lupus erythematosus sera, thymine-dependent oligonucleotide specificity (human), **161**, 204

Tobacco vein mottling virus
  cytoplasmic inclusion protein, expression in transgenic tobacco, **160**, 425

α-Tocopherol, *see* Vitamin E

Tolbutamide
  effects on free and bound sodium in pancreatic β cells (mouse), **164**, 212

Tolerance
  B cells to lipopolysaccharide, effects of interleukin 4 (neonatal mouse), **164**, 199
  reversible, to endothelium-dependent relaxation, induction by arterial L-arginine depletion (bovine pulmonary artery), **164**, 714

Toluene
  metabolism, deuterium isotope effects: product release as rate-limiting step in cytochrome P450 catalysis (rat liver), **160**, 844

α-Toxin
  permeabilized smooth muscle, calcium sensitivity
    augmentation by norepinephrine and GTP-γ-S (rabbit), **157**, 677; *erratum*, **165**, 1442
    regulation, role of actomyosin–ADP complex (rabbit), **165**, 408

Toxins
  Bacillus sphaericus 1593M, associated proteins encoded by genes expressed in *Escherichia coli* and *Bacillus subtilis*, respective roles, **164**, 1417
  Clostridium botulinum type A, cleavage by endogenous protease, **162**, 767
  protein A-B type, domain-specific bias in arginine/lysine usage, **160**, 333
  Ustilago maydis virus P4, purification and molecular properties, **162**, 651

Transacylase
  subunit of branched-chain α-keto acid dehydrogenase, sequence analysis (human), **161**, 1035

Transamination
  leucine in skeletal muscle, analysis by heteronuclear $^{15}N/^{1}H$ spin echo NMR (rat), **160**, 1033

Transcription
  adenovirus 12 E1A gene, control: interactions of factors bound at two sites in 5′-upstream region (Ehrlich ascites tumor cells), **158**, 685
  c-*sis* protooncogene, enhancement in bronchoalveolar mononuclear cells from autoimmune disease patients with lung involvement, **164**, 1018
  from ferritin heavy chain promotor, stimulation by thyrotropin (FRTL-5 cells), **165**, 506
  5S RNA genes containing insertions, and assembly of preinitiation complexes (frog), **162**, 639
  herpes simplex virus type 1 immediate early gene, specific inhibition by human recombinant interferons, **159**, 439
  HTLV-I-infected minus strand in infected T cells (human), **163**, 1006
  leu-2 gene, response time to α-isopropylmalate (*Neurospora crassa*), **161**, 1286
  rDNA
    effects of nerve growth factor and platelet-derived growth factor, comparison (human tumor cells), **163**, 649
    initiation, analysis (rice), **160**, 1117
    nuclear and mitochondrial, stringent regulation, analysis (yeast), **164**, 362
  regulation of tissue-specific expression of terminal deoxynucleotidyltransferase (human leukemic cells), **164**, 750
  reverse-oriented, from adenovirus type 5 DNA terminus, repression by nuclear factor I, **164**, 1212

anscription factor S-II
  functional, production in *Bombyx mori* cells (mouse), **160**, 1093
ansducin
  binding to immobilized delipidated rhodopsin (bovine retina), **162**, 544
  α subunit, spontaneous formation of intermolecular α–α disulfide linkages, **159**, 651
ansfection
  encoding gene, in production of chimeric bispecific antibodies (murine myeloma cells), **164**, 271
  herpes simplex virus type 2 BglII N fragment and subfragments into NIH 3T3 cells, effects on morphological transformation and mutagenesis at *hprt* locus, **159**, 1249
  murine genomic DNA into SV40-transformed xeroderma pigmentosum group A cell line, derived clone with highly amplified murine DNA and intermediate uv resistance, spontaneous reversion (human), **160**, 647
ansferrin
  diferric, zero-field Mössbauer studies (human), **158**, 755; *erratum*, **160**, 417
  secretion by breast cancer cells (human), **163**, 149
ansferrin receptors
  distribution in regenerating liver, analysis (rat), **164**, 1105
ansferrin reductase
  diferric, detection in *Plasmodium falciparum*-infected erythrocytes (human), **158**, 469
ansformation
  DNA-mediated, *N*-acetyl glucosaminyltransferase I-deficient CHO cells: restoration of enzyme activity, **159**, 554
  epithelial cells *in vitro* by different carcinogens: evidence for consistent oncogene methylation changes (rat), **164**, 693
  and hormone-specific phosphorylation, oviduct progesterone receptor, analysis (chicken), **164**, 295
  intact yeast, electroporation-based procedure, **164**, 1157
  morphological, NIH 3T3 cells by transfection with herpes simplex virus type 2 BglII N fragment and subfragments, relationship to mutagenesis at *hprt* locus, **159**, 1249
  neoplastic, adherent osteoblast-like cells, detection by computer-assisted imaging cytometry of nuclear chromatin (mouse), **164**, 728
  Phanerochaete chrysosporium, shuttle vector-based system, description, **161**, 720
ansforming growth factor α
  effect on endothelial cell survival *in vitro* (rat heart), **162**, 1010
  macrophage-secreted, role in metallothionein induction by endotoxin (human, rat), **164**, 114
  stimulation of
    hepatic fat-storing cell proliferation (rat), **162**, 708
    prostacyclin production by cultured vascular endothelial cells, comparison with epidermal growth factor (human), **160**, 1100
ransforming growth factor β
  bone-derived latent complex, activation by isolated avian osteoclasts (mouse), **158**, 817
  effects on
    endothelial cell survival *in vitro* (rat heart), **162**, 1010
    synthesis of multiple forms of secreted phosphoprotein I in normal and transformed bone cells (rat), **162**, 1453
  induced mitogenesis in bone cancer cells, analysis (human), **161**, 672
  inhibition of
    hepatic fat-storing cell proliferation (rat), **162**, 708
    interleukin-1-stimulated porcine cartilage degradation *in vitro* (human), **162**, 144
    tumor necrosis factor-induced proliferation of diploid fibroblasts and TNF cytotoxicity against transformed cells (human), **158**, 155
  regulation of colony formation of differentiated chondrocytes in soft agar (chicken, rabbit), **159**, 1006
  stimulation of
    endothelin mRNA expression by vascular endothelial cells (pig), **159**, 1435
    insulin secretion (rat), **158**, 1060
  type 1 precursor, recombinant and platelet, interactions with insulin-like growth factor II/mannose 6-phosphate receptor (rat), **160**, 393
  types 1 and 2, induction of hemoglobin synthesis in erythroleukemia cell line (human), **165**, 145
Transgenes
  human renin, tissue-specific expression in mice, **165**, 826
Transglutaminase, *see* Protein-glutamine γ-glutamyltransferase
Transketolase
  variant form in leukocytes, analysis and identification (human), **161**, 150
Translation
  adenosylmethionine decarboxylase mRNA, efficiency, polyamine-mediated control (bovine), **160**, 1196
  leu-2 gene, response time to α-isopropylmalate (*Neurospora crassa*), **161**, 1286
  mediated regulation of ferritin synthesis in spleen, effects of iron and inflammation (rat), **160**, 453
Translocation
  chromosomal, t(1;19), near insulin receptor locus in pre-B acute lymphocytic leukemia cell line, correlation with insulin receptor overexpression (human), **159**, 1275
Transplantation
  heterogeneous, human colonic carcinomas into nude mice, effect of tumor casein kinase II activity, **163**, 635
Transthyretin
  encoding gene, mutation causing familial amyloidotic polyneuropathy, localization to exon 3 (human), **164**, 1240
  non-amino acid components and glutathione constituents, role in microheterogeneity and thyroxine binding (human), **158**, 341
  variant-type, produced by *Escherichia coli* expression system, tetramer formation (human), **163**, 851
Triacylglycerol lipase
  lingual and pancreatic, secondary structure: circular dichroism studies and relationship to hydrophobic moments (rat), **162**, 95

Tricarboxylate carrier
  mitochondrial, reconstituted, effects of anthracycline antibiotics (rat liver), **164**, 1281
Trichloroethylene
  degradation by *Nitrosomonas europaea*, **159**, 640
Tricyclodecan-9-yl-xanthogenate
  inhibition of phorbol ester-induced phospholipase C activity in cultured cells (hamster, human), **162**, 198
Trifluoperazine
  effect on Ca^{2+}-dependent protein protease calpain I (human erythrocytes), **159**, 1297
Trifluorothymidine
  induced thymine-less death of androgen-independent prostatic cancer cells, molecular mechanism (rat), **165**, 73
5*S*,12*R*,19-Trihydroxy-6*Z*,8*E*,10*E*,14*Z*-eicosatetraenoic acid
  identification as major metabolite of leukotriene B_4 hydroxylation in rat neutrophils, **159**, 1283
5,6,7-Trihydroxyflavone, *see* Baicalein
Triiodothyronine
  binding protein p55, homologous to protein disulfide-isomerase, high-level expression in retroviral vector (mouse), **164**, 238
  effect on
    association of apolipoprotein A-I, C-III, and A-IV genes with nuclear matrix (rat liver), **161**, 576
    imidazole-induced tyrosinase expression in B16 melanoma cultures, comparison with retinoic acid (mouse), **162**, 288
    malic enzyme in cultured fetal hepatocytes (rat), **161**, 1028
  induced adaptive increase in renal brush border membrane Na^+–P_i cotransport, blockage by dexamethasone (rat), **161**, 1160
  modulation of binding activities of thyroxine-binding globulin and thyroxine-binding prealbumin in serum, comparison (rat), **159**, 919
  regulatory effect on malic enzyme expression in fetal brown adipocyte primary cultures (rat), **163**, 341
  suppression of hepatic levels of phenobarbital-inducible P450b and P450e and other neonatal P450 forms in hypophysectomized rat, **160**, 609
Triiodothyronine receptors
  nuclear, recognition by antibody against c-*erb* A peptide (rat kidney, liver), **160**, 148
2,2,7-Trimethylguanosine
  cap structure, pre-mRNA with, efficient splicing *in vitro*, **162**, 977
4,5′,8-Trimethylpsoralen, *see* Trioxsalen
Trioxsalen
  affinity for chromatin, effects of nuclear isolation (human), **163**, 1384; *erratum*, **165**, 919
Triphenylacrylonitriles
  antiestrogenic, modes of inhibition of protein kinase C (rat brain), **163**, 1377
Triton X-100
  micellar, in model for analysis of chemical nature of hydrogen transfer in NAD(P)H-dependent enzymatic reactions, **159**, 1330
Triyne carbonate
  from actinomycete culture, inhibition of acetoacetyl-CoA thiolase (rat liver), **163**, 548
Tropomyosin
  binding domain in troponin T, consensus sequences, conservation in 35-kDa fragment of *h*-caldesmon (chicken gizzard), **161**, 38
  binding regions in smooth muscle caldesmon, characterization (chicken), **160**, 1316
  and 15-kDa actin-binding fragment of caldesmon, sequence analysis (turkey gizzard), **160**, 210
Troponin
  protein kinase C-mediated phosphorylation in isolated myocytes, stimulation by isoproterenol or phorbol ester (rat), **162**, 1105
Troponin T
  tropomyosin-binding domain
    consensus sequences, conservation in 35-kDa fragment of *h*-caldesmon (chicken gizzard), **161**, 38
    structural similarity to 15-kDa actin-binding fragment of caldesmon (turkey gizzard), **160**, 210
Trypsin
  and carboxypeptidase A, inhibitory chimeric 32-residue peptide, design and chemical synthesis, **162**, 1425; *erratum*, **164**, 594
  insoluble, inhibition by α_2-macroglobulin (human), **165**, 14
  related protease, production by granulosa cells after gonadotropin treatment (rat ovary), **165**, 624
  solubilization of active arginine-specific ADP-ribosyltransferase from sarcoplasmic reticulum: enzyme partial purification and characterization (rabbit), **164**, 128
Trypsin inhibitor
  Ecballium elaterium type II, related microproteins, inhibition of elastase and chymotrypsin, **162**, 79
  soybean, sequence similarity to Alzheimer's disease amyloid peptide (human), **163**, 1248
Trypsinization
  cell-surface, effect on ethanolamine base exchange enzymatic activity, analysis in astrocyte primary cultures and derived spontaneously transformed cell lines (rat), **159**, 1055
  susceptibility of glucose polymer: polymer localization in PC12 cells, **159**, 1
Tryptophan
  aspartate aminotransferase reactivity, enhancement by [Arg292→Val] or [Arg292→Leu] mutations (*Escherichia coli*), **159**, 337
  in cytochrome $P450_e$ nanosecond fluorometry (rat liver), **162**, 921
  fluorescence, static quenching by oxidized dithiothreitol, **165**, 772
  residues, presence at active site of 2,3-dihydroxybenzoic acid decarboxylase (*Aspergillus niger*), **165**, 20
Tryptophan–tRNA ligase
  complex formation with rabbit muscle glyceraldehyde-3-phosphate dehydrogenase (bovine), **161**, 481
Tryptophanyl-tRNA synthetase, *see* Tryptophan–tRNA ligase

bulin
  association with thiocolchicine, quantitative analysis (bovine brain), **161**, 544
  expression in 3T3 preadipose cells, effects of bovine and human growth hormone (mouse), **163**, 895
  molecular integrity, effect on tubulin carboxypeptidase activity, **159**, 770
  phosphorylation during platelet activation, time-resolved analysis (human), **159**, 170
bulin carboxypeptidase
  effect on tubulin after removal of β-tubulin subunit and α-tubulin subunit N-terminal region, **159**, 770
ftsin
  specific translocation into monocyte nuclei (human), **159**, 1147
mor cells, *see also* Cell lines
  adrenocortical carcinoma, anchorage-independent proliferation, stimulation by inhibition of cholesterol biosynthesis (human), **165**, 219
  basophilic leukemia
    interferon-induced histidine decarboxylase activity, prevention by coincubation with ADP-ribosyltransferase inhibitors (rat), **158**, 94
    RBL-1, arachidonate 5-lipoxygenase-regulating cofactors, optimization (rat), **161**, 1327
  bladder
    cell lines derived from high-grade invasive tumors, elastase activity (human), **162**, 308
    J82-derived endothelial tissue factor-inducing protein, identification and partial purification (human umbilical vein), **160**, 222
  breast
    DNA synthesis after mitogen-induced topoisomerase II synthesis, analysis (human), **160**, 12
    expression of insulin-like growth factor binding protein BP-25 (human), **158**, 38
    MCF-7
      epidermal growth factor receptors, regulation by estrogen and antiestrogen (human), **159**, 126
      estrogen receptor and epidermal growth factor receptor mRNAs, modulation by phorbol ester (human), **162**, 415
      and MDA-MB-231, growth in culture, stimulation by linoleic acid (human), **164**, 277; *erratum*, **165**, 1443
      secretion of transferrin (human), **163**, 149
      synergistic interaction of glucarate and 13-*cis*-retinoic acid against (human), **163**, 1364
      and tumor necrosis factor-resistant variant, Mn-superoxide dismutase induction by TNF, comparison (human), **162**, 794
    MDA-468, Ca^{2+}-signaling response, analysis (human), **159**, 1290
    T-47-D, metabolism, effects of gossypol and 6-aminonicotinamide, ^{31}P NMR study (human), **164**, 947
  Burkitt lymphoma
    proteins with tyrosine protein kinase activity, purification and characterization (human), **163**, 1128
    Raji
      expression of insulin receptor and other differentiation markers, induction by sodium butyrate, **161**, 101
      leukotriene A_4 hydrolase gene and 5-lipoxygenase gene expression, analysis, **161**, 740
      nuclei and plasma membranes, phosphorylation of EBV/C3dR and p120 ribonucleoprotein, enhancement by specific EBV/C3dR ligands, **159**, 1213
      simian immunodeficiency virus-infected, antiviral activity of D4CC, analysis, **164**, 1190
  cervical carcinoma
    and cervical tumor-derived cell lines, c-*myc* gene structure and expression, analysis (human), **158**, 334
  choriocarcinoma JAR, secretion of human chorionic gonadotropin, effects of interleukin 1α and tumor necrosis factor α (human), **164**, 284
  colon cancer
    adenocarcinoma, proliferation, inhibition by liposome-encapsulated sodium butyrate coupled to anti-Le^x monoclonal antibodies (human), **158**, 202
    growth gene expression, modulation by selective alteration of polyamines (human), **165**, 384
    monolayers, binding of epidermal growth factor (human), **160**, 317
    presence of 33–40-kDa gastrin-binding protein (human, mouse), **164**, 512
  colorectal carcinoma SW707, proliferation and ribosomal DNA transcription, effects of nerve growth factor and platelet-derived growth factor, comparison (human), **163**, 649
  Ehrlich ascites, role of lipid peroxidation in mitochondrial membrane polyunsaturated fatty acid content, comparison with liver (mouse), **163**, 356
  embryonal carcinoma
    and Friend erythroleukemia, identification of two types of activin receptors, **161**, 1267
    mutants with temperature-sensitive cell growth, isolation and characterization: control of stem cell differentiation by incubation temperature (mouse), **165**, 65
  epidermoid carcinoma
    A431, lipocortin I phosphorylation, effect of phorbol ester (human), **160**, 474
    KB, c-*fos* expression, induction by monoclonal antibody to epidermal growth factor receptors (human), **158**, 129
  erythroblastic leukemia, transplantable, erythropoietin receptors, solubilization and characterization (mouse), **160**, 1140
  erythroleukemia
    agonist-induced phosphorylation of immunologically *ras*-related protein (human), **161**, 972
    ATP-depleted, ornithine decarboxylase stabilization (mouse), **163**, 1217
    hemoglobin synthesis, induction by transforming growth factor β (human), **165**, 145
    increased inositol phosphate production induced by neuropeptide Y, correlation with intracellular calcium mobilization (human), **165**, 1138

  - K562, vincristine binding to multidrug resistance-related P-glycoprotein, inhibition by steroid hormones (human), **158**, 1066
  - thromboxane A_2 receptor expression, induction by 12-*O*-tetradecanoylphorbol-13-acetate (human), **158**, 958
- fibrosarcoma, invasive and metastatic activities, effects of eicosapentaenoic acid (human), **160**, 559
- F9 teratocarcinoma, differentiation-inducing abilities of DNA synthesis-inhibiting nucleoside analogs, specific counterbalancing by corresponding normal nucleosides, **163**, 1290
- gastric cancer, identification of Hanganutziu–Deicher antigen (human), **160**, 1149
- glioblastoma-astrocytoma U87 MG, superinduction of low-density lipoprotein receptor (human), **165**, 574
- glioma C6
  - binding of plasminogen from various species *in vitro*, analysis, **164**, 1288
  - hexose monophosphate shunt activity, GC/MS analysis, **158**, 474
  - intact isoproterenol-stimulated, cAMP production, inhibition by ADP and ATP, **163**, 1150
- HeLa
  - evidence for atrial natriuretic peptide receptor with guanylate cyclase activity, **164**, 671
  - and normal fibroblasts, ADP-ribosylatable content of elongation factor-2, cell cycle-associated changes, **159**, 1141
  - nuclei, ADP-ribose pyrophosphorolysis: metabolic pathway of $(\text{ADP-ribose})_n$, **163**, 1047
  - permeabilized, bleomycin-induced DNA repair synthesis, different mechanisms, **164**, 1226
  - stably expressing HIV *env* and *tat* gene products, preparation, **161**, 305
  - S3, herpes simplex virus-infected, analysis of mRNA-associated proteins, **164**, 355
- hepatocellular carcinoma, c-*myc* transcript levels during tumor resection, analysis (human), **162**, 1260
- hepatoma
  - AS-30D, identification of pp-120 as common endogenous substrate for insulin and insulin-like growth factor I receptor associated tyrosine kinase (rat), **160**, 168
  - detection of nuclear DNA sequences homologous to mitochondrial genes (rat), **162**, 258
  - expression of ferritin subunit genes (human), **161**, 902
  - H4, *N*-methyl-*N*′-nitro-*N*-nitrosoguanidine-induced O^6-methylguanine-DNA-methyltransferase activity, potentiation by poly(ADP-ribose) synthesis inhibitors (rat), **163**, 599
  - H4IIE, capable of expressing phospho*enol*pyruvate carboxykinase, expressed chimeric genes, pH sensitivity, conferment by 5′ region of PEPCK gene (rat), **164**, 81
  - Hep3B, heme oxygenase mRNA, induction by heat shock (human), **165**, 437
  - HepG2
    - C4b-binding protein secretion: identification as acute-phase protein (human), **164**, 1446
    - c-*myc* gene expression, regulation by glucose (human), **165**, 1123
    - secretion of discrete apolopoprotein A-containin lipoprotein particles, identification and characte zation (human), **163**, 574
  - insulin receptor mRNA levels, effects of glucose co centration (human), **160**, 1415
  - intracellular copper transport, role of metallothionei glutathione, and superoxide dismutase, **164**, 134
  - intracellular secretory glycoprotein transport, delay b bromoconduritol (human), **161**, 1013
  - Morris, mRNA for Mn- and Cu,Zn-containing supe oxide dismutases, correlation with degree of differen tiation (rat), **165**, 581
  - unglycosylated secretory glycoproteins, solubility an accumulation in rough endoplasmic reticulum (h man), **160**, 1421
- HL-60
  - binding and incorporation of exogenous gangliosid GM_3, **161**, 782
  - differential expression of cytosolic activation factors fo NADPH oxidase, **161**, 1109
  - expressed pregnancy-specific β1-glycoprotein, struc tures of protein, mRNA, and gene, **163**, 1021
  - growth and differentiation, regulation by T-cell-derive lymphokine, mechanism, **161**, 583
  - p36/40 tyrosine-protein kinase, purification and chara terization, **160**, 1203
  - retinoic acid-induced differentiation, inhibition by pe tussis toxin, **163**, 797
  - retroviral transfer of murine c-*myc* gene into, **163**, 321
  - thymidylate synthase, fluorouracil-induced inhibitio effect of interferon α2, **163**, 867
- hybridoma, rearranged immunoglobin genes, rapid clonin with mixed primers and polymerase chain reacti (human), **160**, 1250
- insulinoma, liver metastasis-derived pancreastatin-relate protein, isolation and characterization (human), **164** 141
- Jurkat, stably expressing HIV *env* and *tat* gene products preparation (human), **161**, 305
- leukemia
  - CCRF-CEM, atypical multidrug resistance in cells selected for high-level methotrexate resistance, role of P-glycoprotein, **164**, 928; **165**, 1435; *erratum*, **165** 1445
  - CEM-C7, glucocorticoid-induced death, associate molecular changes: identification of putative nucle ases as histones (human), **162**, 30
  - L1210, cGMP and phosphatidylinositol pathway, depres sion induced by tiazofurin and selenazofurin, **164** 869
  - tumor promoter-dependent cell line, selective low level of protein kinase C isozyme (mouse), **164**, 1397
- lymphoma
  - DNA and phospholipid precursors, deoxycytidine salvaging into, effects of 1-β-D-arabinofuranosyl cytosine (human), **163**, 1158
  - α-fetoprotein gene expression, analysis (human), **159** 112
  - Nb-2
    - *c-fos* mRNA induction, analysis (rat), **165**, 1359

membrane proteins, bacterial toxin-induced ADP-ribosylation, effects of prolactin, **156**, 776; *erratum*, **161**, 392
$p56^{lck}$ phosphorylation by exogenous ATP (mouse), **162**, 51
sis by macrophages in coculture, role of L-arginine (mouse), **165**, 1262
ammary
C-127-1, role of terminal deoxynucleotidyl transferase as intracellular mutagen (mouse), **165**, 271
epithelial, metabolism of linolenic and docosahexaenoic acids (mouse), **158**, 730
R3230AC, expression of proliferating cell nuclear antigen/cyclin gene (rat), **161**, 873
WRK_1, transient inositol 1,4,5-trisphosphate accumulation during vasopressin stimulation, correlation with intracellular calcium mobilization (rat), **159**, 953
edullary thyroid carcinoma
development, association with elevation of calcitonin mRNA levels (rat), **159**, 528
insulin-like growth factor I production and receptor binding, analysis (rat), **161**, 589
edulloblastoma TE671, verapamil resistance, analysis (human), **161**, 1312
elanoma
B16, imidazole-induced tyrosinase expression, comparative effects of retinoic acid and triiodothyronine (mouse), **162**, 288
cachexia-inducing, associated lipoprotein lipase-inhibiting protein, purification (human), **160**, 1085
G361, neuroglandular antigen glycosylation, inhibition by phorbol ester (human), **158**, 837
invasive and metastatic activities, reduction by eicosapentaenoic acid (mouse), **160**, 559
metastasis, role of membrane-associated cathepsin L (human, mouse), **164**, 556; *erratum*, **165**, 1444
WM 266-4, proliferation and ribosomal DNA transcription, comparative effects of nerve growth factor and platelet-derived growth factor (human), **163**, 649
monoblastic leukemia U937, differentiation-inducing ability of tumor necrosis factor muteins (human), **160**, 820; *erratum*, **161**, 1348
myeloblastic leukemia ML-1, differentiation-inducing ability of tumor necrosis factor muteins (human), **160**, 820; *erratum*, **161**, 1348
myelogenous leukemia, tumor necrosis factor-induced differentiation, stimulation by protein-bound polysaccharide PSK (human), **162**, 597
myeloid leukemia M1, differentiation into macrophages, role of interleukin 6 produced in response to differentiation-inducing factor and 1α,25-dihydroxyvitamin D_3 (mouse), **158**, 660
neuroblastoma
IMR32, N-*myc* gene repression by c-*myc* protein (human), **162**, 991
NCB-20, bradykinin-induced protein kinase C translocation, dependence on 1,2-diacylglycerol content and free calcium, **162**, 1279
N1E115, cAMP production, inhibition by bradykinin, neurotensin, and somatostatin, pertussis toxin-sensitive and -insensitive mechanisms, **161**, 1144
neuro 2a, differentiation *in vitro*, associated down-regulation of mRNA for protein kinase C isozymes PKCα and nPKCε (mouse), **165**, 533
NIE 115, phosphorylation of intermediate filament protein peripherin (mouse), **160**, 772
retinoic acid-sensitive and -resistant, phosphatidylinositol turnover, effect of retinoic acid (human), **161**, 284
SH-SY5, identification of α-adrenergic receptor sites (human), **158**, 921
SH-SY5Y, (−)-indolactam V effects on protein kinase C and muscarinic receptors (human), **162**, 1207
SK-N-SH, calcium influx, mediation by nicotine receptors and voltage-sensitive calcium channels (human), **162**, 1230
neuroblastoma×glioma NG108-15, inositol phosphate production, effects of bradykinin, GTPγS, R599022, and *N*-ethylmaleimide, **165**, 175
osteosarcoma
Htb96, transforming growth factor β-induced mitogenesis, analysis (human), **161**, 672
osteoblast-like, cytosolic calcium and phosphoinositide levels, effects of thrombin (human), **164**, 119
UMR106, secretion of insulin-like growth factors, stimulation by estradiol *in vitro* (rat), **158**, 407
UMR 106.1, calcitonin gene-related peptide, production and characterization, **158**, 214
ovarian carcinoma, gonadotropin-releasing hormone binding sites, photoaffinity labeling (human), **161**, 1086
pheochromocytoma PC12
associated glucose polymer, localization by trypsinization study, **159**, 1
GTP-binding protein mRNA expression, effects of nerve growth factor and cAMP, **158**, 377
release of Alzheimer amyloid precursor, induction by nerve and epidermal growth factors, **164**, 664
undifferentiated, electrical excitability, **163**, 810
voltage-dependent Ca^{2+} channels, homologous regulation by 1,4-dihydropyridines, **160**, 929
pituitary GH_3
expression and stability of insulin-like growth factor I mRNA splicing variants, **162**, 1174
TRH receptors linked to phosphoinositide hydrolysis, pharmacological characterization, **161**, 1306
whole-cell clamped, high concentration K^+ stimulation, effect on Ca^{2+} current, **158**, 534; *erratum*, **160**, 416
pre-B acute lymphocytic leukemia, 697, insulin receptor overexpression, correlation with t(1;19) chromosome translocation near insulin receptor locus (human), **159**, 1275
prostatic adenocarcinoma, androgen-independent, thymineless death, molecular mechanism (rat), **165**, 73
pulmonary, thymidylate synthase and thymidine kinase activities, effects of acivicin and *cis*-diamminedichloroplatinum(II) combination (human), **161**, 31
retinoblastoma Y-79
identification of α-adrenergic receptor sites, **158**, 921

  - proliferation, relationship to intracellular [^{3}H]dopamine binding sites, **165**, 391
- rhabdomyosarcoma A673, secreted 34-kDa insulin-like growth factor binding protein, identification as homolog to rat BRL-3A binding protein, **163**, 875
- small cell lung cancer
  - Ca^{2+} mobilization by neuropeptides, **164**, 66
  - cytosolic Ca^{2+} elevation by diolecystokinin (human), **163**, 605
- T-cell, H-7 effects on growth *in vitro*, role of protein kinase C and cyclic nucleotide-dependent kinases (mouse), **162**, 138
- T-cell leukemia, glucocorticoid-sensitive, grown in dexamethasone, associated increase in dolichol levels (human), **158**, 163
- thymoma WEHI7.1, expression of gluconeogenic enzyme fructose 1,6-bisphosphatase, **158**, 929
- T-lymphoma MOLT-4
  - induction of giant cell formation by HIV, effect of pH, **158**, 973
  - phorbol ester-induced CD4 down-regulation and augmentation of HIV replication, effects of protein kinase C inhibitors, **164**, 339
- various types
  - detection of dopamine D-2 receptors (human), **162**, 575
  - with differing metastatic potentials, gelatinase properties, comparison (mouse), **158**, 228

Tumor growth-inhibiting factors
- localization in unfertilized ova (shad), **159**, 713

Tumoricidal activity
- activated macrophages, and generation of reactive nitrogen intermediates, *in vitro* and *ex vivo* analysis (rat), **164**, 968

Tumor necrosis factor
- enhancement of HIV replication *in vitro* (T4 lymphocytes), **158**, 307
- formation in cultured macrophages and D-galactosamine-sensitized mice, suppression by lipoxygenase inhibitors, **159**, 748
- induction of
  - human myelogenous leukemic cell differentiation, stimulation by protein-bound polysaccharide PSK, **162**, 597
  - lethal shock, comparative effects of different interleukin 1 species (human, mouse), **163**, 378
  - Mn-superoxide dismutase in breast cancer MCF-7 cell line and TNF-resistant variant, comparison (human), **162**, 794
  - monocyte chemotactic and activating factor production in fibroblasts (human), **160**, 1403
  - proliferation of diploid fibroblasts and cytotoxicity against transformed cells, suppression by transforming growth factor β (L-929, WI-38 cells), **158**, 155
- infusion into vasopressin-stimulated hepatocytes, effect on inositol lipid metabolism (rat), **161**, 197
- and interleukin 1, synergistic stimulation of prostaglandin synthesis and phospholipase A_2 release from mesangial cells (rat kidney), **159**, 385
- muteins, induction of differentiation of monoblastic an myeloblastic leukemia cell lines, analysis (human) **160**, 820; *erratum*, **161**, 1348
- recombinant, effects on rat hepatic mRNA levels for α1 acid glycoprotein, apolipoproteins B and E, and β actin after injection (mouse), **161**, 81
- type α
  - effect on secretion of human chorionic gonadotropin by JAR choriocarcinoma cells (human), **164**, 284
  - induction of
    - H_2O_2 formation by neutrophils, effects of pertussis toxin and extracellular Ca^{2+} removal (human) **159**, 763
    - 28-kDa stress protein phosphorylation in endothelia cells, role in protection against cytotoxicity (bovine aorta), **163**, 301
  - inhibition of follicle-stimulating hormone-induced differentiation in cultured granulosa cells (rat), **163** 1038
  - production by macrophages, inhibition by cyclosporin A without decrease of TNF mRNA levels (mouse) **161**, 551

Tumor promoters
- okadaic acid-class, apparent activation of protein kinase (murine brain), **159**, 939

Tumors
- colonic, carrageenan and 1,2-dimethylhydrazine-induced localization of *N*-acetylneuraminic acid and *N*-glycol ylneuraminic acid in derived glycopeptides (rat), **15** 452
- colorectal, casein kinase II characterization after heterotransplantation into nude mice (human), **163**, 635
- Engelbreth–Holm–Swarm, production of undersulfate heparan sulfate and oversulfated galactosaminoglycan (mouse), **162**, 189
- gastrointestinal, protein kinase C activity, comparison with normal tissue (human), **163**, 407
- mammary, synergistic effects of glucarate and 13-*cis*-retinoic acid (rat), **163**, 1364

Tunicamycin
- inhibition of hepatic unglycosylated glycoprotein secretion, role of glycoprotein solubility (Hep G2 cells). **160**, 1421

Tyrosinase, *see* Monophenol monooxygenase

Tyrosine
- aspartate aminotransferase reactivity, enhancement by [Arg292→Val] or [Arg292→Leu] mutations (*Escherichia coli*), **159**, 337
- peptidyl dipeptidase-4, role in catalytic activity (*Pseudomonas maltophilia*), **158**, 45
- phosphorylation in neutrophil proteins, analysis (human) **162**, 1478

Tyrosine hydroxylase
- requirement of ferrous iron (rat), **161**, 211

Tyrosine kinase, *see* Protein-tyrosine kinase

U

biquitin
dependent proteolysis, inhibition by des-Gly–Gly-ubiquitin: implications for mechanism of polyubiquitin synthesis (rabbit reticulocytes), **162**, 89
CN-01
and staurosporine and H-7, comparative effects on phorbol ester-induced CD4 down-regulation and augmentation of HIV replication (human T cells), **164**, 339
DP (uridine 5′-diphosphate)
–disaccharide fragment of cytoplasmic cofactor isolated from *Methanobacterium thermoautotrophicum*, structure determination, **159**, 1404
K-69,578
production of natriuretic and diuretic responses and augmentation of endogenous atrial natriuretic factor levels (mouse), **164**, 58
traviolet light
induction of DNA cleavage by esperamicin and neocarzinostatin (bovine thymus, *Escherichia coli*), **164**, 903
intermediate resistance in revertant genomic transfectant xeroderma pigmentosum group A cell line with highly amplified murine DNA (human), **160**, 647
racil
in DNA, mismatch repair and nucleotide-excision or base-excision repair, role in discontinuous DNA replication in *lig-7* strain of *Escherichia coli*, **165**, 685
rate oxidase
full-length cDNA clone, nucleotide sequence (rat liver), **158**, 991
rea
effect on autodegradation of hepatic proteasomes (rat), **158**, 548
induced cell swelling, induction of immediate high-amplitude thyrotropin and prolactin secretion (rat pituitary cells), **163**, 471
induced reversible pepsin unfolding above pH 6, implications for pepsinogen folding mechanism (pig), **158**, 115
rease
–single-stranded DNA-binding protein conjugate, in detection of total DNA, **165**, 474
ridine
^{3}H-labeled, transport in activated macrophages, analysis (mouse), **160**, 354
ridine monophosphokinase
encoding gene, primary structure (yeast), **165**, 464
rinary bladder
vanadate-insensitive ATP-dependent H$^+$ transport in membrane vesicles, inhibition by NBD-Cl (turtle), **161**, 312
rine
protein excretion in patients with essential hypertension, augmentaton by atrial natriuretic factor: ANF role in renal handling of protein, **158**, 936
rodilatin
binding properties and activation of particulate guanylate cyclase (bovine adrenal cortex, human platelets), **163**, 37
phosphorylation and dephosphorylation, effects on bioactivity (rabbit aorta), **163**, 830
Urokinase, *see* Plasminogen activator
Ustilago maydis virus P4
encoded toxin, purification and molecular properties, **162**, 651
Uteroglobin
and lipocortin 1, peptides derived from region of local homology, inhibition of platelet aggregation and secretion (human), **165**, 27
Uterus
endothelin/sarafotoxin receptors, detection and functional characterization (rat), **162**, 952
intracellular [^{3}H]dopamine-binding sites, relationship to cell proliferation (rat), **165**, 391
and ovary, superoxide radical presence during early pregnancy: role in blastocyst implantation (mouse), **161**, 762
phasic contractions via voltage-dependent Ca channels and developing contractions via second type of Ca channel, induction by endothelin (rat), **159**, 317

V

Vaccinia virus
antagonistic effects of 9-β-D-arabinofuranosyladenine, enhancement by dideoxyriboside derivatives of 2,6-diaminopurine, **159**, 61
Vacuoles
calcium release, induction by inositol 1,4,5-trisphosphate (*Neurospora crassa*), **162**, 852
Valinomycin
effect on angiotensin II-induced calcium mobilization in vascular smooth muscle cells (rat), **162**, 491
and K$^+$ channel opener BRL34915 and calcium channel blockers, effects on endothelin-induced vascular contraction, comparison (rat aorta), **164**, 1003
stoichiometric binding to cytochrome-*c* oxidase, induced structural and functional alterations, **160**, 1132
Vanadate
activation of bromoperoxidase (red seaweed), **160**, 87
effect on protein phosphorylation in cerebral microvessels: regulatory role (rat), **163**, 771
insensitive ATP-dependent H$^+$ transport in bladder epithelial membrane vesicles, inhibition by NBD-Cl (turtle), **161**, 312
monomers and dimers, inhibition of acid phosphatase, effects of pH (human seminal fluid, potato, wheat germ), **165**, 246
o-Vanillin
comutagenic activity in *N*-methyl-*N*-nitrosourea-induced mutagenesis, mechanism, **162**, 1376
Vascular endothelial growth factor
amino acid sequence deduced from cDNA clone, relationship to platelet-derived growth factor (bovine), **165**, 1198

- and follistatin, secretion by pituitary follicular cells (bovine), **165**, 292

Vasoactive intestinal peptide
- amino- and carboxyl-terminal oligopeptides, preferential cleavage by recombinant enkephalinase (human), **158**, 850
- binding to intestinal epithelial cells, decrease in hypothyroidism (rat), **162**, 701

Vasoactive intestinal peptide receptors
- binding to VIP and associated cAMP accumulation in isolated enterocytes, effects of lindane (rat), **159**, 1391

Vasoconstriction
- aortic
  - endothelin-induced, effects of K^+ channel opener BRL34915, specific K^+ ionophore valinomycin, and calcium channel blockers, comparison (rat), **164**, 1003
  - inducing activity of endothelial cell culture medium, correlation with endothelin immunoreactivity (pig), **160**, 602
- aortic smooth muscle cell, low-density lipoprotein-induced, role of calcium and pH (rat), **163**, 315
- hypoxic pulmonary, enhancement by inhibition of endothelium-derived relaxing factor (rat), **164**, 1198
- and pressor activity, endothelin, structure–activity relationships, role of charged groups (rat), **163**, 418

Vasodilation
- neurogenic, in mesenteric artery, role of calcitonin gene-related peptide release from perivascular nerves (rat), **165**, 1391
- systemic, acetylcholine-induced *in vivo*, regulatory effects of L-N^G-methylarginine and L-arginine (guinea pig), **163**, 710

Vasopressin
- effect on intracellular free Ca^{2+} levels in fibroblasts: role of dihydropyridine-sensitive Ca^{2+} channels (mouse), **162**, 448
- induced corticotropin release by anterior pituitary cells, inhibition by cyclic GMP and guanylate cyclase activators (rat), **158**, 824
- mRNA, mutant, differential polyadenylation during development (rat), **158**, 555
- and other neuropeptides, mobilization of Ca^{2+} in small cell lung cancer cells, **164**, 66
- signal transduction in cultured pituitary cells, critical role of protein kinase C (rat), **163**, 1014
- stimulated metabolism of inositol lipids in hepatocytes, effect of tumor necrosis factor infusion (rat), **161**, 197

Vasorelaxation
- endothelium-dependent
  - opposite effects of L-arginine and L-argininosuccinic acid (bovine), **161**, 536
  - reversible tolerance to, induction by arterial L-arginine depletion (bovine), **164**, 714
- mediation by hydroxylamines and oximes: conversion to nitrites and mechanism of endothelium-dependent relaxation (rat), **164**, 889
- urodilatin-mediated, effects of phosphorylation and dephosphorylation (rabbit), **163**, 830

Vasospasm
- cerebral, production, role of endothelin (dog), **159**, 134

Vectors
- conditional retroviral, mouse mammary tumor virus-base construction and characterization of packaging ce line (feline kidney), **159**, 1191

Veins
- facial, Ca^{2+}-dependent stretch-induced tone, attenuati by staurosporine (rabbit), **158**, 58
- umbilical, angiotensin II, evidence for local generati and release (human), **165**, 457

Verapamil
- and nicardipine, K^+ channel opener BRL34915, and K ionophore valinomycin, effects on endothelin-i duced vascular contraction, comparison (rat), **16** 1003
- potent and specific inhibition of interleukin-8-, IL-1α and IL-1β-induced lymphocytic migration *in vitr* (human), **165**, 349
- resistant medulloblastoma cell line, analysis (human), **16** 1312
- sensitive binding of xenobiotics, and glutathione-depen dent enzyme activities, analysis (mussel), **164**, 934

Veratryl alcohol
- reaction with lignin peroxidase compound III, analysi (*Phanerochaete chrysosporium*), **162**, 464

Vesicles
- containing phospholipid hydroperoxides, lifetime distribu tions of 1,6-diphenyl-1,3,5-hexatriene, **164**, 169
- dioleoyl and egg phosphatidylcholine, sterol-free, differen tial effects of nystatin and amphotericin B, **164**, 609
- free Mg^{2+} levels, reduction by phospholipase C activit (rat brain), **165**, 913
- large unilamellar, non-leaky vesiculation by plasma hig density lipoproteins, HPLC detection (human), **16** 1219
- phosphatidylcholine, globotriaosyl ceramide receptor-con taining, interaction with Shigella toxin, fluorescenc study (*Shigella dysenteria*), **160**, 126
- phospholipid, aggregation of calcium ionophore A2318 into stacked dimeric pore, **158**, 891
- plasma membrane, ATP-dependent Cl^- uptake, effects of proton pump inhibitors (rat brain), **160**, 469
- synaptosomal membrane, ATP-dependent H^+ transport, analysis (rat brain), **159**, 1045

Vesiculation
- non-leaky, large unilamellar vesicles by plasma high-density lipoproteins, detection by HPLC (human), **160**, 1219

Vibrio cholerae
- *dam* gene mutation conferring 2-aminopurine sensitivity with intact GATC methylase activity, **165**, 561

Vibrio furnissii
- chemotactic response to chitin oligosaccharides, **161**, 1172

Vincristine
- binding to multidrug resistance-related P-glycoprotein, inhibition by steroid hormones (K562 cells), **158**, 1066
- direct activation of human multidrug resistance gene (CV-1 cells), **165**, 1415

tamin A
  and polyunsaturated fatty acids and vitamin C, competing reactions with glutathione-derived thiyl free radicals, **161**, 1199
tamin B_2, *see* Riboflavin
tamin C, *see* Ascorbic acid
tamin D
  calbindin expression regulation, role of encoding vitamin D-dependent gene methylation (rat), **160**, 1281
  and fatty acids, binding properties of vitamin D-binding protein, relationship (bovine), **163**, 14
tamin D_3
  synthetic derivative 2β-(3-hydroxypropoxy)-1α,25-dihydroxyvitamin D_3, regulation of calcium metabolism (rat), **163**, 1444
tamin E
  augmentation of zidovudine therapeutic efficacy (human MT4, murine bone marrow cells), **165**, 401
  bilayer membranes with, time-resolved fluorescence anisotropy study, **158**, 386
  deficiency, associated perturbations in oxygen radical formation and membrane order (murine brain), **163**, 860
  phospholipid liposomes with, binding of iron, analysis, **160**, 834
on Willebrand factor
  endothelial cell high-molecular-weight, conversion into plasma multimer pattern by granulocyte proteases (human), **158**, 980
  106 N-terminal amino acid subunit, localization of epitope corresponding to monoclonal antibody inhibiting factor VIII binding, **163**, 618
  subfragment corresponding to platelet glycoprotein Ib-, collagen-, and heparin-binding domains, production in *Escherichia coli* (human), **164**, 1339

W

W-5
  effect on Ca^{2+}-dependent protein protease calpain I (human erythrocytes), **159**, 1297
W-7
  effects on
    Ca^{2+}-dependent protein protease calpain I (human erythrocytes), **159**, 1297
    sodium–hydrogen antiport during egg fertilization (sea urchin), **161**, 1100
Water
  4-aminobiphenyl binding to monoclonal antibody 2E11 in, description (mouse), **158**, 80
  and oil, microemulsions, solubilization and activity of yeast cells in, **161**, 1244
  and P_i, oxygen exchange catalyzed by yeast inorganic pyrophosphatase, pathways, **161**, 475
  suspended sonicated cardiolipin sodium salt, analysis with ^{23}Na and ^{31}P NMR (bovine heart), **161**, 979
WEB 2086
  inhibition of platelet-activating factor-induced platelet aggregation, role of benzodiazepine receptors (rabbit), **160**, 263
Wheat germ agglutinin
  competitive binding of gangliosides and glycophorin, analysis (bovine, human), **160**, 780
Withangulatin A
  promotion of type II DNA topoisomerase-mediated DNA damage (*Physalis angulata*), **159**, 1128
Woodward's reagent K
  effect on activity of mitochondrial phosphate carrier (bovine heart), **162**, 212

X

Xanthine
  –xanthine oxidase system, chloroperoxidase reactions in presence of, analysis, **159**, 1086
Xanthine dehydrogenase
  proteolytic conversion to xanthine oxidase, role of calpain (rat), **165**, 858
Xanthine oxidase
  formation by proteolytic conversion of xanthine dehydrogenase, role of calpain (rat), **165**, 858
  generation of reactive oxygen species in isolated perfused liver after hypoxic injury (rat), **160**, 140
  –xanthine system, chloroperoxidase reactions in presence of, analysis, **159**, 1086
Xanthophores
  permeabilized, pigment organelle dispersion stages, role of protein phosphorylation (goldfish), **161**, 626
Xenobiotics
  verapamil-sensitive binding, analysis (mussel), **164**, 934
Xeroderma pigmentosum
  derived cell line, uv-resistant primary transfectants, DNA repair proficiency (human), **162**, 1351
  group A, derived genomic transfectant cell line with highly amplified murine DNA and intermediate uv resistance, spontaneous reversion (human), **160**, 647
Xylans
  binding to cellobiohydrolase I from *Trichoderma reesei*, effects on enzyme structure, small-angle X-ray scattering analysis (*Rhodymenia palmata*), **165**, 615
Xylose
  and glucose, identification of single active site on glucose/xylose isomerase (*Streptomyces* sp.), **159**, 457
Xylose isomerase
  identification of single active site for glucose and xylose (*Streptomyces* sp.), **159**, 457

Z

ZDZ 202-791
  inhibition of interleukin-8-, IL-1α-, and IL-1-β-induced lymphocytic migration *in vitro*, analysis (human), **165**, 349

Zidovudine

increased therapeutic efficacy in combination with vitamin E, analysis (human MT4, murine bone marrow cells), **165**, 401

prodrug, analysis: enhanced anti-HIV efficacy (human, mouse), **160**, 656; *erratum*, **162**, 1591

structure and conformation, NMR analysis, **164**, 1086

Zinc
–ATP-dependent chemical phosphorylation of proteins, **163**, 64
and Ca^{2+}, complexes with 5-F-BAPTA, comparative stability, **165**, 838
cation radical in heme proteins, photochemical generation and reactions, **159**, 472
Zinostatin
light-induced DNA cleavage (bovine thymus, *Escherichia coli*), **164**, 903

10 001103680
UNIVERSITY OF HAWAII
